UBOS CELEBRATES THE WORKERS OF UGANDA

At the national level, the theme earmarked for the International Labour day celebrations i.e. ***“Improving Access to Labour Justice: A Prerequisite for Increased Productivity”*** is cognizant of the importance of equal rights at work and its overall contribution to sustainable employment and labour productivity along the economic value chain. The day is also celebrated to heighten both national and international consciousness, on the importance of promoting and protecting the comprehensive rights of workers along all spheres.

It is therefore our pleasure to share with you the selected statistical indicators across sectors highlighting the contribution of the workers' movement to the national development agenda.

**H.E Gen. Yoweri Tibuhaburwa
Kaguta Museveni,
PRESIDENT OF THE REPUBLIC
OF UGANDA**

CONGRATULATORY MESSAGE

The Board of Directors, Management and Staff of the Uganda Bureau of Statistics congratulate His Excellency the President of the Republic of Uganda Gen. Yoweri Kaguta Tibuhaburwa Museveni, the people of Uganda and the entire workers fraternity on this occasion of celebrating the International Labour Day.

As we join the rest of the country and the world at large in the celebration,

we take the honour to share some of the statistics that help appreciate the status and contribution of workers in the transformation process of our country. We remain committed to delivering on our mandate of producing and disseminating quality official statistics for national development. We appeal to all Ugandans to participate and be part of the Census 2024 activities because, **IT MATTERS TO BE COUNTED!**

Albert Byamugisha (PhD)
UBOS, Board Chairman

Chris N. Mukiza (PhD)
Executive Director

Long live Your Excellency; Long live the women and entire people of Uganda!

UGANDA'S POPULATION AT A GLANCE

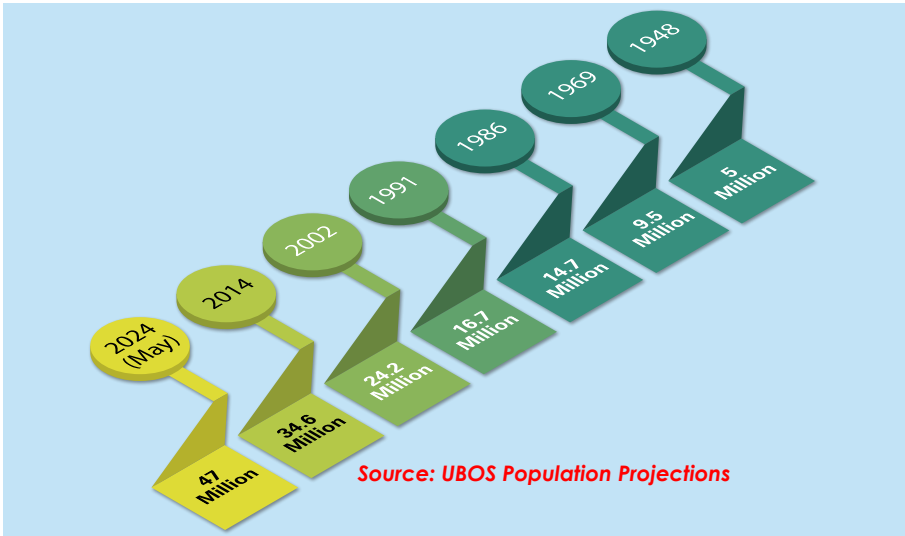

- Uganda's population has grown from 5 million persons in 1948 to 47 million persons as of May 2024.
 - Females account for 51% of the total population and males 49%.
 - Wakiso district remains the most populated with a projected population of 4 million persons as of May 2024, followed by Kampala City with 2 million persons.
 - Obongi district has the least population, projected at 53,300 persons, followed by Karenga district with 74,900 persons as of May 2024.
- About 8 out of every 10 persons is less than 35 years of age
- There are a total of about 1.1million persons aged 65 years and above, females are the majority (56%) compared to males (44%)
- Only 0.4 % of the population are aged 80 years and above, and about 3 out of every 5 of them are females.

Table 01: Population by Age Group as of May 2024

Age group	Male	Female	Total	Percent by Age group
0-4	3,890,100	3,797,400	7,687,500	16.4
5-9	3,477,500	3,395,600	6,873,100	14.6

WORKING AGE POPULATION

The Working Age Population (WAP) is a measure of the total number of potential workers within the economy. The international WAP as per the International Labour Organisation (ILO) is 15 years and above. However, given the differences in socio-economic, cultural and demographic characteristics among countries, it was recommended that each country sets the age range for its WAP. Uganda's age-range was set at 14-64 years. On the other hand, working population is the population within the working age that is engaged in the production of goods and provision of services for others or own final use.

- Overall, 23.5 million (55%) of the population are of working age.
- Of the WAP, 87% (20.5 million) are working, that is, engaged in the production of goods and services for others or for own final use.
- Though there are more of the females (56%) than males (54%) in the WAP, the proportion of working males (90%) is higher than for working females (85%).

Table 02: Distribution of working age (14-64 years) and working population (%)

POPULATION IN EMPLOYMENT

Persons in employment refer to all individuals of working age who, during the reference period are engaged in any activity to produce goods or provide services for pay or profit. This implies that work is done as part of a transaction in exchange for payment in form of wages or salaries for time worked or work done or in the form of profits derived from the goods produced and services provided through market transactions.

The status in employment of workers in Uganda can be categorised as follow 1:

→ **INDEPENDENT WORKERS**

These are workers who own the economic unit for which they work and control its activities. They include;

A. Employers

- Employers in corporations
- Employers in household market enterprises

B. Independent workers without employees

- Owner-operators of corporations without employees.
- Own-account workers in household market enterprises without employees.

DEPENDENT WORKERS

These are workers who do not have complete authority or control over the economic unit for which they work. If they are in employment for profit they have no employees, and do not make the most important decisions about the activities of the economic unit for which they work. They include;

C.

Dependent contractors

→ Dependent contractors

D.

Employees

- Permanent employees.
- Fixed-term employees.
- Short-term and casual employees.
- Paid apprentices, trainees and interns.

¹ Resolutions of the 20th International Conference of Labour Statisticians

D.

Contributing family workers

→ Contributing family workers.

- 47% of the employed population are independent workers without employees. These are followed by employees accounting for 34% of the population in employment; a similar pattern by sex and residence with the exception of urban residents who are mainly employees (44%).
- Trend analysis shows that the proportion of own account workers i.e 'Independent workers without employees' increased from 42% in 2019/20 to 47% in 2021.
- The percentage of employers remains lowest of the population in employment though it increased from 6% in 2019/20 to 10% in 2021. Impliedly, there is need to promote investment (local and foreign) for job creation and encourage job creators as opposed to job seekers.

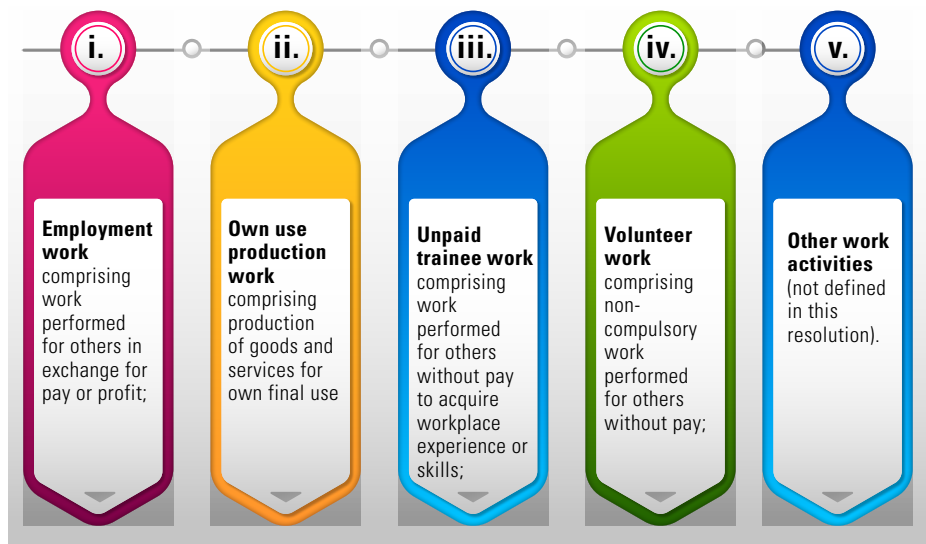

Figure 01: Comparison of status in employment, 2019/20 and 2021 (%)

Source: National Labour Force Survey (NLFS) Report – 2021

FORMS OF WORK

There are five mutually exclusive **forms of work** distinguished on the basis of the intended destination of the production (for own final use; or for use by others, i.e. other economic units) and the nature of the transaction (i.e. monetary or non-monetary transactions, and transfers). They include:

The majority of the working population are in employment (49%) followed by subsistence agriculture (40%) with the least proportion (0.3%) in doing volunteer work.

Of the females who are working, 40% are in employment while 46% are in subsistence agriculture. Compared to their male counterparts, 58% are in employment, while 34% are in subsistence agriculture.

Of the youths (18 – 30 years) who are working, 49% are in employment

Regional differentials showed that whereas Kampala has the highest proportion (84%) of the working population in employment, the least proportion (1%) in subsistence agriculture was from Kampala. Relatedly whereas Elgon sub-region has the highest percentage (63%) of its working population in subsistence agriculture, the sub region has the least percentage (28%) in employment

Overall, majority of those persons without education or those who have attained only some primary schooling (53%) are engaged in subsistence agriculture while majority of those who completed primary (55%) and other higher education levels are mostly in paid employment. Thus, the higher the education level, the higher the proportion in employment.

Table 03: Distribution of working population by forms of work (%)

Background Characteristics	Employment	Subsistence agriculture only	Unpaid trainee	Volunteer work	Other subsistence work*	Total

***Other subsistence work includes economic activities classified in the SNA but undertaken for own final use by the household or individual e.g., brick making to build one's own house.**

Source: National Labour Force Survey (NLFS) Report – 2021

- Comparing the trends, the percentage of persons in employment increased from 44% in 2019/20 to 49% in 2021
- The percentage of households engaged in subsistence agriculture remained stagnant at 40% in 2019/20 and 2021

Figure 02: Comparison in forms of work for the working population

Source: National Labour Force Survey (NLFS) Report – 2021

INDUSTRY AND SECTOR OF EMPLOYMENT

- The highest proportion of employed persons was engaged in Agriculture, forestry and fishing (36%) followed by those in Trade (23%).
- Employment in the trade, Transport and Hotels services is increasing whereas employment in agriculture, education and social work is reducing overtime.

Table 04: Distribution of the Population in employment by Industry (%)

Industry of main job	NLFS 2016/17	UNHS 2019/20	NLFS 2021
Agriculture, forestry and fishing	40.9	39.8	35.9
Trade	18.1	20.2	22.8
Manufacturing	9.8	8.3	8.3
Transport and storage	4.3	5.7	6.2

Human health and social work activities	1.6	1.7	2.2
Construction	4.3	4.6	4.7
Public administration	1.3	1.4	2.2
Other Activities	5.2	3.8	4.0
Total	100	100	100

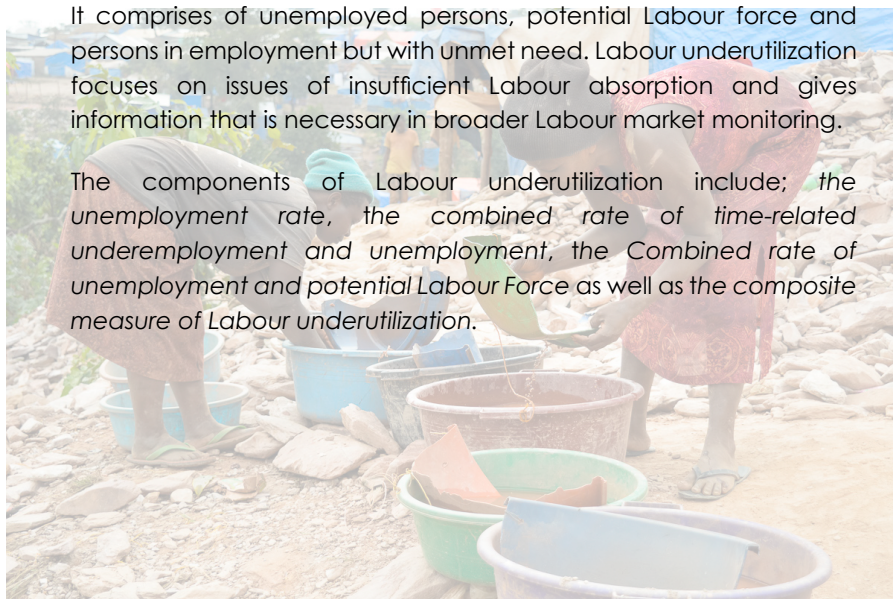

Source: National Labour Force Survey 2021

- The two major sectors of Uganda's economy in terms of employment include the Services sector and Agriculture, forestry and fishing. These two combined, employ 84% of the total employed population as of 2021, with more persons likely to be employed in the services sector.

LABOUR UNDER-UTILIZATION

Labour Under-utilization refers to mismatches between Labour supply and demand. This in essence is the unmet need for employment. It comprises of unemployed persons, potential Labour force and persons in employment but with unmet need. Labour underutilization focuses on issues of insufficient Labour absorption and gives information that is necessary in broader Labour market monitoring.

The components of Labour underutilization include; the unemployment rate, the combined rate of time-related underemployment and unemployment, the Combined rate of unemployment and potential Labour Force as well as the composite measure of Labour underutilization.

The current statistics from the National Labour Force (NLFS), 2021 show that:

- About 12% (1.4million people) of the population aged 14-64 years are unemployed with a higher share among females (14%) compared to males (10%).
- The Unemployment rate of the working age population in urban areas of 16% is recorded slightly higher than that of rural residents (13%).
- Bukedi and Bunyoro sub regions have the highest unemployment rate (25% and 17% respectively) and Kigezi sub region has the lowest at 3%.
- Education attainment differentials show that the lowest unemployment rate (11%) is among persons with no education and those that completed primary while the highest is among persons that completed secondary education, Post primary/secondary specialized training and above (17%).
- Persons with disability have slightly lower unemployment rate (10%) compared to those without disability (12%)

- Overall, the unemployment rate stands at 12%, which reflects an increase from the 9% recorded in 2019/20.

Figure 03: Trend in Unemployment Rate by Sex and residence

Source: National Labour Force Survey (NLFS), 2021

The composite measure of Labour Underutilisation is composed of the sum of the population in time-related underemployment, unemployment and the potential Labour force expressed as a proportion of the extended Labour force.

- Labour underutilisation has increased over the years from 35% in 2016/17 to 42% in 2021.

- More proportion of females (50%) compared to males (35%) are underutilised.

Figure 04: Trend in Composite measure of Labour underutilization

INFORMAL EMPLOYMENT

Informal employment refers to cases where employment relationships are by law or in practice, not subject to social protection (i.e., no provision for pension or contribution to

National Social Security Fund) and no entitlement to paid annual leave or paid sick leave. Statistics on informality are key to assessing the quality of employment in an economy. This indicator therefore presents the share of employment which is classified as informal employment in the total economy, and separately in agriculture and in non-agriculture.

- 92% of the employed population is engaged in informal employment including agriculture; a slight decrease from 93% reported in 2019/20.
- on the other hand; 88% of the employed population is engaged in informal employment excluding those in the agricultural sector; a similar proportion to that recorded in 2019/20
- Overall, informality is high though reducing at a slow rate.

Table: 06 Proportion of employed population in informal employment by background characteristics, (%)

INFORMAL SECTOR

Informal sector includes all workers in unincorporated enterprises that produce at least partly for the market though may not be formally registered. It excludes households that produce exclusively for own final use, subsistence agriculture, construction of own dwellings among others. In addition, **Informal Enterprises** are not always registered under Uganda Registration Services Bureau (URSB) as commercial / business establishments or by the Uganda Revenue Authority (URA) for Value added tax / income tax returns. As a result, these enterprises do not always keep complete books of accounts.

56% of the employed population work in the informal sector.

More employed persons in the rural (60%) than urban (52%) areas work in the informal sector.

Impliedly, the higher the level of education attained, the less likely one is to work in the informal sector.

Table 07: Proportion of employed population in the formal sector, informal sector and household units by selected characteristics, (%)

DECENT WORK INDICATORS

Social protection

Social protection is a set of interventions whose objective is to reduce social and economic risk and vulnerability, and to alleviate extreme poverty and deprivation. Over three-quarters of the population in paid employment (76%) do not contribute towards any form of social protection

Table 08: Distribution of persons in paid employment by type of social security and selected background characteristics, %

Background Characteristics	Employer					Total

DISABILITY FRIENDLY WORKPLACE

A company's culture should be inclusive of everyone including persons with disabilities. Creating a disability friendly workplace entails eliminating barriers, modification or replacement of equipment, training the employees with special needs, providing the needed information and making the workplace flexible for persons with varying disability types.

- Of the PWDs in employment, a third report that their work tasks fully or partially accommodate for the difficulties they have.

Figure 05: PWDs whose work places and tasks have been modified to account for the difficulty they have,

Source: National Labour Force Survey (NLFS) 2021

- More than half of persons with disability (65%) are comfortable that employers are willing to hire PWDs irrespective of disability type with the exception of those with remembering/concentration difficulties.

Figure 05: Perception of PWDs regarding willingness of employers to employ PWDs and employees' willingness to work with PWDs by selected background characteristics, %

CHILD LABOUR

Child labour is defined in the Uganda National Child Labour Policy as work that is hazardous or exploitative and threatens the health, safety, physical growth and mental development of children and therefore constitutes an urgent policy priority.

Children are child labourers if they are:

- Aged 5-11 years and they are at work in economic activity since they are not expected to work.
- Aged 12-13 years doing work in economic activity other than 'light work'¹ or do work beyond 14 hours a week.
- Aged 14-17 years involved in hazardous forms of work or working for an equivalent of 43 hours in a week or beyond.

Child labour is an obstacle to achieving equitable quality education and promoting lifelong learning opportunities for all through Universal Primary Education (UPE) and Universal Secondary Education (USE). Children forced out of school into labour to help their families by supplementing available income are denied the opportunity to acquire the knowledge and skills needed for a more gainful future employment and may contribute to the proliferation of the viscous cycle of poverty.

The current statistics show that:

- Overall; 40% of children aged 5-17 years are involved in child labour excluding household chores; an increase from 38% in 2019/20.
- Also, of the children aged 5-11 years, 58% are in child labour excluding household chores, a slight increase from 55% in 2019/20.
- Sex differentials show that more males (41%) than females (38%) of children aged 5-17 years are engaged in child labour excluding household chores.
- About 41% of the children aged 5-17 years currently attending school are also engaged in child labour excluding household chores.
- Karamoja and Lango sub-regions have the highest proportion of children aged 5-17 years in child labour excluding household chores i.e 56% and 52% respectively.

EARNINGS FROM PAID EMPLOYMENT ON MAIN JOB

Earnings refer to the remuneration in cash or/and in kind paid to employees, as a rule at regular intervals, for time worked or work done together with remuneration for time not worked such as annual vacation and other paid leave or holidays. It includes direct wages and salaries, remuneration for time not worked, bonuses and gratuities, and payments in kind. It excludes Employers' contributions to social security and pension schemes, severance and termination pay (12th ICLS, 1973).

- The median monthly cash wage in Uganda is UGX 200,000. Males earn on average Uganda shillings 250,000 compared to Uganda shillings 140,000 earned by females.
- The highest paying sector is services, Formal and public sector that pay an average median monthly cash wage of UGX 300,000, UGX 612,000 and UGX 560,000 respectively.

FORT PORTAL CITY AT A GLANCE

- Fort Portal is a city in the Mid-Western Region of Uganda. It is the busiest commercial centre in Tooro sub region.
- The city lies approximately 300 kilometres west of Kampala, Uganda's Capital and largest city.
- The projected total population for Fort Portal City stands at 124,500 people as of May 2024.
- 51% % of the total population are female.

Selected indicators for Kabarole District:

- 50% of the total population are female.
- 71% of the households engage in subsistence agriculture.
- 7% of children aged 10 – 17 years are in child marriages.
- 10% of children aged 0 – 17 years are orphaned.
- School attendance stands at 82% (6-12 years) and 29% (13-18 years).
- The literacy rate for the district stands at 73%.
- 74% of the households get information from radio.
- 2% of the households get information by Community announcer (word of mouth).
- 30% of households own a bicycle.
- 12% of households use electricity for lighting.
- 71% of households use tadooba for lighting.
- 95% of households own a mosquito net.
- 3% of households have no toilet facility.

It Matters to be Counted

HOW WELL DO YOU KNOW THE HISTORY OF LABOUR DAY?

- On May 01, 1886 in United States of America, people decided to go on a strike to demand the maximum duration of work to eight hours per day. This strike was followed by a bomb blast in Chicago's Haymarket Square on May 4, 1886.
- This led to the death of many and hundreds were injured as well. In order to commemorate the Haymarket square incident and to promote the welfare of labourers across the world, pan-national organization of socialist and communist parties chose this day as **International Labour Day**.
- In 1889, a meeting in Paris was held by the first congress of the Second International, following a proposal by Raymond Lavigne that called for international demonstrations on the 1890 anniversary of the Chicago protests. International Labour Day was formally recognized as an annual event at the International's second congress in 1891.
