JULY 2025

FOREWORD

The Uganda Bureau of Statistics (UBOS) is committed to the production and dissemination of integrated statistical information that meet the international standards quality requirements. This report comprises key Economic Indicators in Transport and Information Communication Technology (ICT) Sectors. The data is derived from the latest surveys and administrative records of Higher Local Governments (HLGs), Districts Engineering Departments and Ministries, Departments and Agencies (MDAs)

The information presented in this Quarterly Report covers statistics on the ICT and Transport. ICT Statistics includes Number of Telephone subscribers, Internet subscribers, Mobile Money subscribers and Postal Statistics. whereas Transport Statistics consists of Road Transport, Newly registered motor vehicles, Air Transport, Rail Transport and Water Transport Statistics. The information on these sub-sectors is presented on a quarterly basis.

The Bureau appreciates the continued cooperation of MDAs in availing the requisite data to produce this Quarterly Report. We welcome comments from Users that aim at enhancing the quality of our Reports.

It is my sincere hope that the readers use the statistics in this report to make informed decisions.

Aliziki.K.Lubega

1.0 INTRODUCTION

This report presents Transport and Communication statistics. The statistics provided on transport include road, water, rail and air services, while those on communication include Internet subscription, postal, telecommunications and Mobile Money transactions.

2.0 ROADS TRANSPORT

This sub-section presents data on the newly registered motor vehicles, motorcycles and Licensed Vehicles for Public Use. However, other economic indicators such as Number of Passengers and Volume of Cargo are yet to be compiled for the Road Sector.

2.1 Newly registered motor vehicles

Uganda Revenue Authority conducts registration of new vehicles while the Ministry of Works and Transport (MOWT) registers Government owned vehicles.

2.2 Quarterly Private newly registered motor vehicles /Tri-cycles & Motorcycles

The table below presents Quarterly statistics on newly privately owned registered motor vehicles, tri-cycles and motorcycles. Overall, the number of newly registered motor vehicles, tri-cycles and motorcycles reduced by 21.7 percent in Q3 of 2024/25. This change was attributed to a decline of 17.8 percent in the number of newly registered cars. The newly registered Tri-cycles decreased by 23.5 percent. Similarly, the newly registered M/cycles decreased by 23.0 percent in the same period from 35,506 motorcycles registered in Q2 2024/25 to 27,341 registered in Q3 2024/25 as shown in table 1 below.

2.5 Road Length Statistics

The Uganda road network is categorized into four areas namely, National roads, District Roads, Urban Roads and Community Access Roads. These are further Sub-divided by surface type namely Tarmac (paved), Marram (unpaved) and dirty/earth roads.

In the last five years the percentage of roads paved continued to increase. In 2023/24, 29.2 percent of unpaved roads were paved equivalent to 66 kilometers. However, in the same period the percentage of unpaved roads continued to drop. Although the National Road network continued to increase in the last four years, in 2023/24 the National Road network remained relatively stable as shown in table1

Table 1: National Road Net Work Paved and Unpaved

Surface type	2019/20	2020/21	2021/22	2022/23	2023/24
Total Paved	5,398.00	5,591.00	5,811.09	6,133.30	6,199.00

Condition of paved roads (km) under the National Road Network as at 2023/2024

The measurement of the road condition is by the International Roughness Index (IRI). Roughness is a good indicator of the condition of the road because it affects the level of service in terms of the riding quality, speed and cost of vehicle operation and maintenance.

By June 2024, the total paved roads in the country were at 6,199km, out of these 3,874 were established to be in good condition representing 62.5 percent of the total paved roads, this was followed by fair roads with 1,965 km representing 31.7 percent. The Kms of roads under poor conditions were 360 km representing only 5.8 as shown in Figure 10.1.

Figure 10.1: Condition of paved roads (km) as of June 2024, 2019/20 -2023/24

Condition of Unpaved roads (km) of the National Road Network as at June 2024, 2019/20-2023/24

By June 2024, the total Kms of unpaved roads were 15,001. Out of this, 3000.2Kms were found to be in good condition representing only 20 percent, 6300.4 were found to be in fair conditions representing 42 percent while 5,700.4 Kms of roads were found to be in poor state representing 38 percent. Majority of the roads under the unpaved roads are under fair and poor conditions while as for the paved majority of the roads were established to be in good conditions as shown in Figure 10.2.

3.0 AIR TRANSPORT

This sub-section presents data on the movement of commercial aircraft, passengers and cargo through Entebbe International Airport and aircraft movement over Uganda's air space.

3.1 Aircraft Movement

There was a 5.8 percent reduction in the aircraft movement at Entebbe Airport in Q3 of 2024/25. The total number of movements reduced from 14,948 registered in Q2 2024/25 to 14,075 movements registered in Q3 of 2024/25. The commercial Aircraft landings decreased by 9.1 percent in Q3 of 2024/25 from 8,601 commercial aircraft landings to 7,817. Similarly, the over flights at Entebbe decreased by 1.4 percent from 6,347 over flights registered in Q2 of 2024/25 to 6,258 over flights registered in Q3 of 2024/25 as shown in Table 3 below.

Table 2: Quarterly Aircraft Movements at Entebbe International Airport 2023/24 – 2024/25

Aircraft Movement	2023/24				2024/25		
	Q1	Q2	Q3	Q4	Q1	Q2	Q3
Commercial Aircraft Landings	8,356	7,970	7,694	7,529	8,809	8,601	7,817
Percentage Change	12.7	-4.6	-3.5	-2.1	17	-2.4	-9.1

Source: Civil Aviation Authority

3.2 Passenger Air transport

The total number of passengers passing through Entebbe International Airport decreased by 6.2 percent in Q3 of 2024/25. The total movements decreased from 592,516 registered in Q2 of 2024/25 to 556,058 movements registered in Q3 2024/25. This was attributed to a decline in both the number of international passengers and domestic passengers by 6.1 percent and 11.3 percent respectively as shown in table 4 below.

Table 3: Quarterly Number of Passengers through Entebbe International Airport from 2023/24 - 2024/25

Passengers	2023/24				2024/25		
	Q1	Q2	Q3	Q4	Q1	Q2	Q3
International	548,066	541,599	542,183	527,041	587,034	586,846	551,028
Percentage Change	24.5	-1.2	0.1	-2.8	11.4	-0.03	-6.1

3.3 Volume of Cargo through Entebbe International airport

The total volume of cargo through Entebbe international Airport decreased by 10.4 percent in Q3 2024/25 from 17,261 tones registered in Q2 of 2024/25 to 15,466 tones. This was due to a decline in the volume of cargo loaded by 9.1 percent in Q3 of 2024/25 from 11,584 tones loaded in the Q2 2024/25 to 10,534 tones. In the same period, the volume of cargo off-loaded decreased by 13.1 percent from 5,677 tones registered in the Q2 of 2024/25 to 4,932 tones registered in Q3 of 2024/25 as shown in table 5 below.

Table 4: Volume of Cargo through Entebbe International Airport, tones 2023/24 – 2024/25 Volume of Cargo

Cargo	2023/24				2024/25		
	Q1	Q2	Q3	Q4	Q1	Q2	Q3

3.4 Volume of Mail through Entebbe International Airport

The total volume of mail through Entebbe International Airport decreased by 8.2 percent from 146 mails registered in Q2 of 2024/25 to 134 mails registered in Q3 of 2024/25. This was attributed to a decline of 4.7 percent in the number of mails off-loaded from 107 mails offloaded in Q2 2024/25 to 102 mails Q3 2024/25. The total mails loaded declined by 15.4 percent from 39 mail loaded in Q2 of 2024/25 to 33 mails loaded in Q3 2024/25 as shown in Table 6 below.

4.0 WATER TRANSPORT

The table below shows the total number of passengers transported using registered ferries in Q2 of 2024/25 increased by 5.3 percent from 1,463,976 passengers to 1,541,789 passengers registered in Q2 of 2024/25. There was an increment of 19.1 percent in the total number of trips taken by registered ferries from 7,161 trips registered in Q1 of 2024/25 to 8,526 trips registered in Q2 of 2024/2025. The cargo(tons) carried by registered ferries declined by 3.9 percent in Q2 of 2024/25 from 73,226.54 tons registered in Q1 of 2024/2025 to 70,395.89 tons registered in Q2 of 2024/2025. Furthermore, there was an increment in both the number of motor vehicles and motorcycles transported by registered ferries by 23.2 and 29.6 percent in Q2 of 2024/2025 as shown in table 7 below.

Table 6: Water transport traffic from 2023/24 - 2024/25.

Traffic	2023/24				2024/25

Source: Uganda Bureau of Statistics

5.0 RAILWAY TRANSPORT STATISTICS

A total of 68,845.7 metric tons was hauled in Q3 of 2024/2025, indicating a 10.5 percent decline in haulage compared to 1.4 percent hauled in Q2 of 2024/25. Net tones in km, which is a summation of every one tons, moved per one kilometer decreased by 21.2 percent in Q3 of 2024/25 from 19,576 to 15,419.8 net ton per km. The wagon turn-around time from Malaba to Kampala and back to Malaba reduced to 16 days reported in Q3 of 2024/25 from 24 days in Q2 2024/25. Locomotive productivity per kilometer per day decline by 75.4 percent in Q3 2024/25 from 90.1 percent. There was only three reported accidents registered in Q3 of 2024/25. The total number of passengers increased by 14.5 percent in Q3 of 2024/2025 from 97,975 passengers registered in Q2 of 2024/25 to 112,215 passengers as shown in table 8 below. Note that the wagon turn-around time has changed from Mombasa to Malaba. We have dropped Mombasa to Malaba as wagon turn around because our wagons stop at the boarder of Malaba not Mombasa.

6.0 ICT & COMMUNICATION STATISTICS

This section presents quarterly statistics on Postal and Courier Services, mobile money transactions.

6.1 Postal and Courier Services

The total volume of letters handled by Posta Uganda declined by 44.5 percent in Q3 of 2024/25, from 98,032 letters registered in Q2 2023/24 to 54,375 letters registered in Q3 of 2024/2025. This was attributed to a 47.6 percent decline in the Volume of ordinary letters and the volume of Registered mails which declined by 24.1 percent. The volume of parcels decreased by 6.2 percent from 3,674 parcels to 3,446 parcels registered in Q3 of 2024/2025. Additionally, Mail services registered a decline of 33.8 percent from 10,727 EMS registered in Q2 of 2023/24 to 7,100 EMS registered in Q3 of 2024/25 respectively as shown in Table 9 below.
