

UGANDA BUREAU OF STATISTICS

THE REPUBLIC OF UGANDA

ANNUAL INDICATOR REPORT FOR THE SUSTAINABLE DEVELOPMENT GOALS

JUNE 2025

PREFACE

The Sustainable Development Goals (SDGs) rely heavily on accurate and comprehensive data to monitor development progress across different aspects. When Uganda committed to implementing the SDGs in 2015, it established a structured system to coordinate implementation and reporting on the SDGs. Understanding the importance of reliable and consistent data, Uganda developed the National SDG Coordination Framework to steer SDG implementation, guided by the SDG roadmap which designates specific roles to key institutions, including the Uganda Bureau of Statistics (UBOS). The Bureau spearheads the SDG Data Technical Working Group (TWG) by ensuring that quality data is produced and made available for SDG monitoring and reporting.

To enhance data production for SDG reporting, UBOS developed and maintains the SDG indicator matrix with all indicators applicable to Uganda's situation. This matrix is a key tracking tool, aligned to Uganda's National Statistical Indicator (NSI) framework to maintain consistency with the country's broader development objectives. The SDG Data TWG also examines challenges, shares insights, and deliberates on solutions such as methodological research to improve data quality and accessibility for effective SDG monitoring.

In collaboration with Ministries, Departments, and Agencies (MDAs), UBOS updates the SDG indicator matrix quarterly, ensuring each goal is supported by timely and accurate data. This publication offers the latest data series for 148 out of 201 indicators applicable to Uganda, along with definitions and computation methods to enhance understanding and use of the data. A detailed metadata handbook, published by UBOS, provides additional information for some of the indicators and will be updated to include the new indicators.

I extend my appreciation to all stakeholders for their efforts in consistently providing data. This commitment is crucial to Uganda's SDG reporting and progress towards Sustainable development as well as leaving no one behind through data. I encourage all stakeholders to freely use the statistics in this publication for reporting on SDGs in Uganda.

For God and My Country

GUIDING NOTES

- i) The matrix presents data series from the inception of the SDG agenda in 2015
- ii) Where data sources are surveys or censuses that take intervals, the inter survey data should be used in the subsequent years.
- iii) Where different sources of data are provided, it has been clearly indicated. This will enable the user to decide on which source is applicable based on the purpose.
- iv) Comments have been provided especially about any limitations that may arise.
- v) The indicators with no data are in annex A.

INTRODUCTION

The Sustainable Development Goals (SDGs) were adopted by all United Nations Member States, including Uganda, in 2015 as a universal call to action geared at ending poverty, protecting the planet, and ensuring prosperity for all by 2030.

Uganda has aligned its national development frameworks to the SDGs and is committed to achieve the 17 goals, which cover a wide range of issues, including poverty, inequality, health, education, and environmental sustainability. The third National Development Plan (NDP III 2020/21–2024/25) explicitly reflects SDG targets with focus on economic growth, industrialization, human capital development, and environmental sustainability.

Additionally, the United Nations Sustainable Development Cooperation Framework 2021-2025 outlines the UN's collaborative efforts to support the Government of Uganda in addressing national priorities and filling gaps on the path toward achieving the NDP III and SDG targets. These efforts are coordinated by the SDG Secretariat at the Office of the Prime Minister, whose operation is guided by the SDG Roadmap. The SDG roadmap is implemented through five Technical Working Groups including one on Data for SDGs chaired by UBOS.

Meeting the national commitments on SDGs requires quality data and statistics to inform the regular reporting, monitoring and evaluation. Considering the above, the Bureau through the Data Technical Working Group developed and maintains a national SDG Indicator Matrix with 201 SDG indicators applicable to Uganda. These indicators are produced and reported regularly by respective Ministries, Departments and Agencies responsible for their production.

This report presents the SDG indicators updated with data series as of June 2025.

2.0 Data Sources and Quality

To effectively measure and guide the realization of the SDGs, quality data is generated through multiple data sources including censuses, surveys, administrative data and non-traditional data sources for routine reporting and monitoring of the SDG implementation. The Ministries, Departments and Agencies responsible for the respective SDG indicators submit the data generated to UBOS to facilitate the update of the SDG Indicator Matrix. This matrix is updated regularly and new development presented at the Quarterly meetings of the SDG Data TWG.

In a bid to ensure that quality data is produced for SDG Indicators, the producers ensure compliance to the quality dimensions namely, accuracy and reliability, completeness, coherence and comparability, consistency, timeliness, accessibility and clarity.

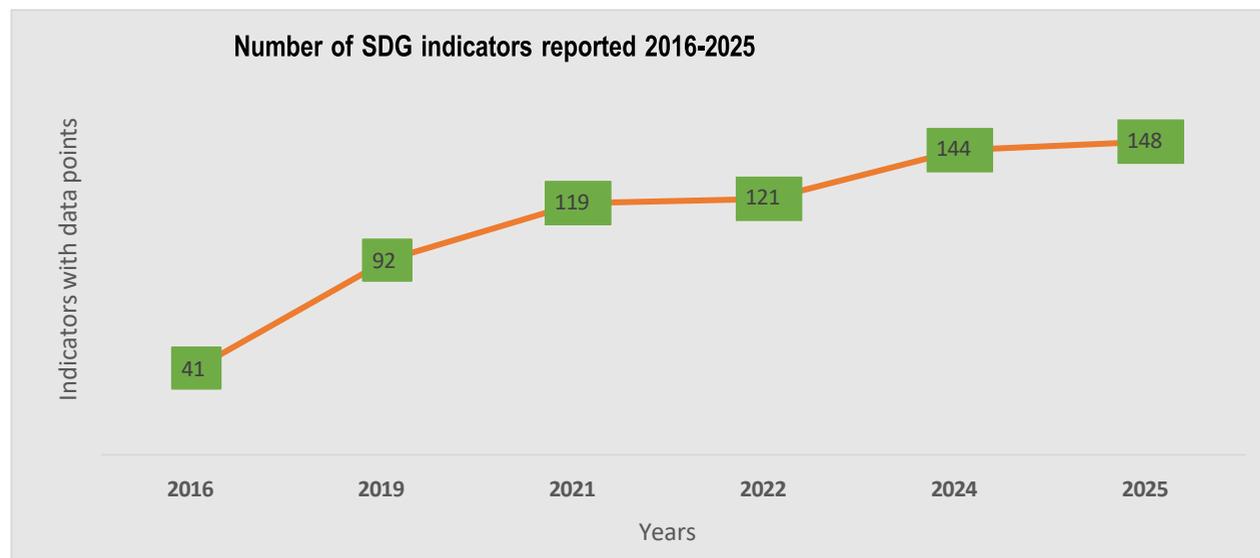

3.0 Trends in production of data for SDG indicators

The implementation of the Sustainable Development Goals (SDGs) in Uganda is tracked using 201 SDG indicators that are applicable to Uganda. Uganda through the SDG Data Technical Working Group chaired by Uganda Bureau of Statistics has been generating and reporting on data for the SDG indicators since 2015 to date.

Uganda has registered significant improvement in the production of data for SDG indicators resulting from various efforts geared towards increasing the number of SDG indicators for reporting and monitoring over time.

Figure 1 shows that in 2016 41 (20.4%) SDG indicators had data out of the 201 applicable indicators to Uganda. Five years later saw the indicators increased to 119 (59%) indicators with data and currently the SDG data availability stands at 148 (73.6%) indicators with just five years to end the implementation period of the agenda 2030 of the Sustainable Development Goals.

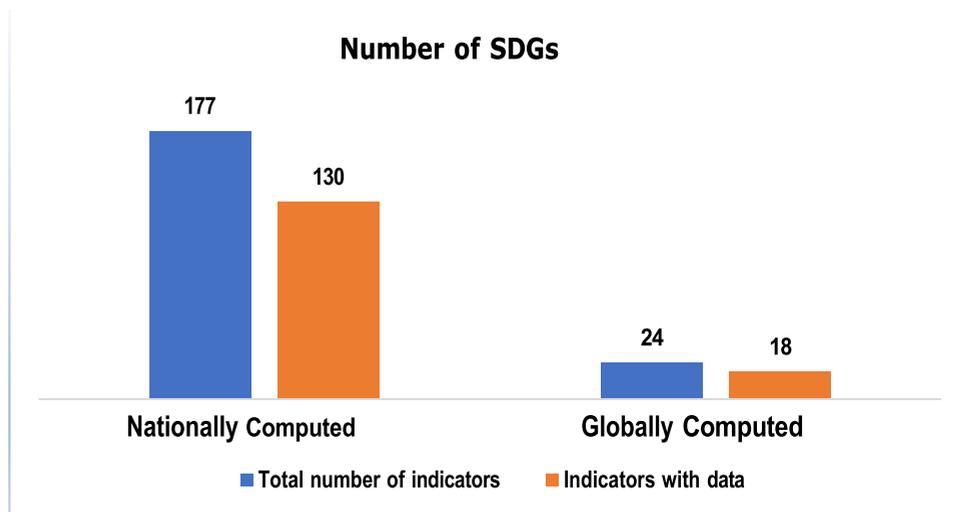

Figure 1: Number of indicators reported 2016-2025

3.1 Distribution of SDG indicators with data by category

The SDG indicators are grouped by the broad category of those computed nationally and those computed globally. The SDG indicators with data being used for monitoring and reporting stand at 148 (73.6%) indicators out of the 201 applicable to the country. Out of the 148 indicators with data points, 130 indicators are computed nationally compared to 18 indicators computed globally as shown in Figure 2.

Figure 2: Number of SDG indicators with data by category

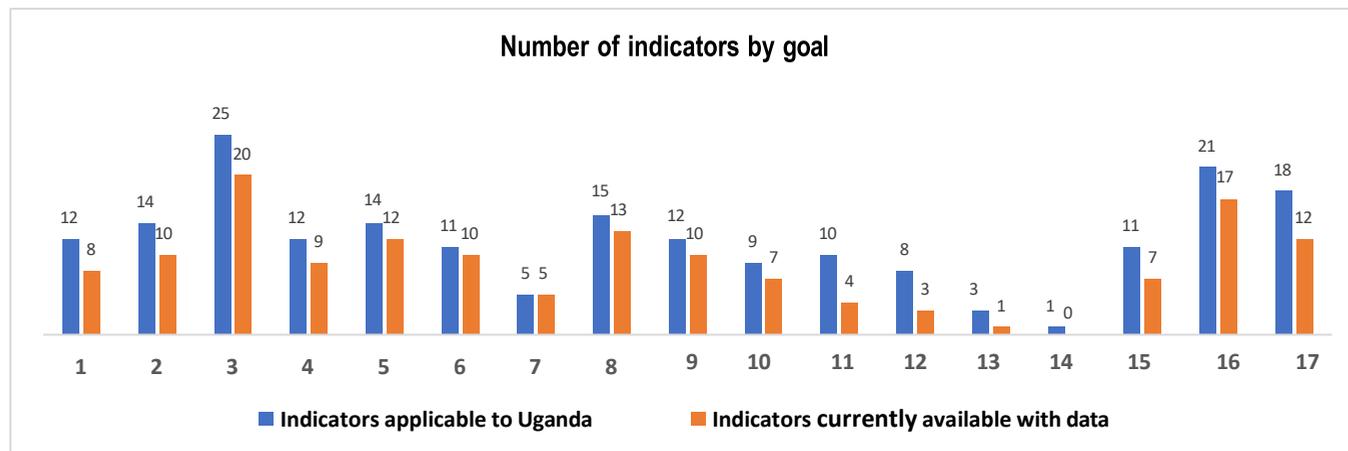

3.2 : Proportion of SDG Indicators with data by Goal

The SDG Data Technical working group designated Goal Specific Technical Committees to handle the issue of methodology development and improvement, data collection and compilation of the data for the indicators under the respective Goals. The Goal specific Technical Committees report back to the TWG on data and metadata compiled for quality assurance and approval for use in SDG reporting and Monitoring.

Figure 3 shows the number of indicators with data by goal. Goal 7 on affordable and clean energy is the only SDG goal whose indicators are fully reported on followed by goal 8 and goal 5, while goal 11 is the least reported on with only 4 out of 10 indicators having data.

Figure 3: Number of SDG indicators with data by Goal

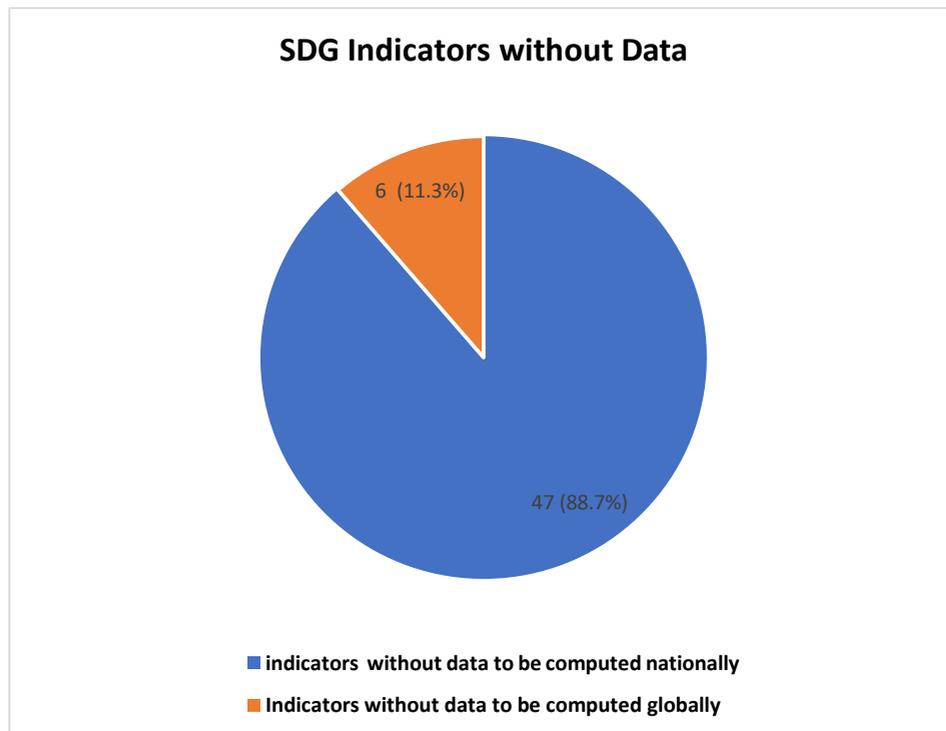

3.3 : SDG Data Gap Analysis

The Bureau through the SDG data TWG has tried to bridge the data gaps on SDG indicators however there still exist some gaps that require attention in the remaining five years of the SDG implementation.

There are 53 (26.4%) indicators without data out of the 201 applicable to Uganda. Most of the indicators without data represented by 88.7% (47) are expected to be generated at national level while 11.3% (6) of the indicators without data are expected to be generated at Global level as shown in Figure 4.

Figure 4: SDG Indicators without data

4.0 DATA MATRIX OF SUSTAINABLE DEVELOPMENT GOAL INDICATORS

4.1 SDG ONE “END POVERTY IN ALL ITS FORMS EVERYWHERE”

End poverty in all its forms everywhere

Sustainable Development Goal (SDG) 1 aims to end poverty in all its forms everywhere. For Uganda, this goal is especially critical as poverty remains a significant challenge despite economic growth in recent decades. Tackling poverty is central to the country's national development agenda and aligns with the aspirations of Vision 2040 and the Third National Development Plan (NDP III).

Uganda has implemented various initiatives to address poverty, including the parish development model (PDM), Social assistance grant (SAGE), and targeted agricultural interventions. These programs are designed to uplift vulnerable communities and promote inclusive development, consistent with the theme for the 2025 Africa regional forum for sustainable development “Driving job creation and economic growth through sustainable, inclusive, science and evidence-based solutions for the 2030 agenda and agenda 2063.

In terms of data availability, 8 out of 12 indicators under this goal have up to date data series.

4.2 SDG TWO “END HUNGER”

Achieve food security and improved nutrition and promote sustainable Agriculture.

Ending hunger, achieving food security, improving nutrition, and promoting sustainable agriculture are central to SDG 2. In Uganda, agriculture is the backbone of the economy, employing about 70% of the population. The Government of Uganda has undertaken several initiatives, including the development and implementation of the Agriculture Sector Strategic Plan (ASSP) and the Uganda Nutrition Action Plan (UNAP), aimed at improving food security, enhancing agricultural productivity, and eradicating malnutrition. Progress of the respective targets and goals is indicted in Table 2.

In terms of data availability, 10 out of 14 indicators under this goal have data series.

Table 2: Goal 2-Zero Hunger: End hunger, achieve food security and improved nutrition, and promote sustainable agriculture

4.3 SDG THREE “GOOD HEALTH AND WELL BEING”

Ensure healthy lives and promote wellbeing for all at all ages.

Sustainable Development Goal (SDG) 3 aims at ensuring healthy lives and promote well-being for all at all ages. Achieving this goal is crucial for building prosperous societies, as good health is a fundamental driver of economic and social development. SDG 3 addresses major health priorities, including maternal and child health, communicable and non-communicable diseases, mental health, and universal health coverage. The Government of Uganda, in collaboration with development partners, has implemented various initiatives to improve healthcare services. These include expanding immunization programs, increasing access to reproductive health services, and strengthening the health workforce. Despite progress, significant gaps remain, particularly in rural areas as can be observed in the data series (Table 3)

In terms of data availability, 20 out of 25 indicators under this goal have data series.

Table 3: Goal 3- Good Health and Well-being: Ensure healthy lives and promote well-being for all at all ages

4.4 SDG FOUR “QUALITY EDUCATION”

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

SDG 4 focuses on ensuring inclusive and equitable quality education for all, including lifelong learning opportunities. This goal aims to achieve a world where everyone, regardless of background, has access to a high-quality, relevant education that empowers them to participate fully in society and contribute to sustainable development. The Ugandan Government is actively working towards achieving this goal through various initiatives and by aligning its education policies with the SDG 4 targets. The Government has made efforts to achieve this goal through Strengthening the education system, focus on gender equality, promoting literacy and numeracy, Collaborating with partners as well as monitoring.

In terms of data availability, 9 out of 12 indicators under this goal have data series.

Table 4: Quality Education: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

4.5 SDG FIVE “GENDER EQUALITY”

Achieve gender equality and empower all women and girls.

Sustainable Development Goal 5 related to initiatives towards ending all forms of discrimination and inequality against women and girls. Gender equality is important in achieving women’s economic empowerment and parity. The Government of Uganda, has implemented several initiatives including policies like the National Gender Policy and laws addressing gender-based violence, all aimed at empowering women and girls.

In terms of data availability, 12 out of 14 indicators under this goal have data series.

Table 5: Goal 5: Gender Equality: Achieve gender equality and empower all women and girls

4.6 SDG SIX “CLEAN WATER”

Ensure availability and sustainable management of water and sanitation for all.

SDG 6 recognizes the vital role of clean water and sanitation in human health, economic development, and the environment. It encompasses not only access to safe drinking water and sanitation but also the sustainable management of water resources, including addressing water scarcity and pollution. The achievement of SDG 6 promotes access to safe water and improves sanitation which are crucial for preventing waterborne diseases. This also boosts productivity, reduces health costs, protects ecosystems, conserves and supports economic growth. Uganda has made progress in ensuring access to water and sanitation however still faces challenges of increased water pollution, increased demand for water from an increasing population and suffers the impacts of climate change.

In terms of data availability, 10 out of 11 indicators under this goal have data series.

Table 6: Goal -Clean Water and Sanitation: Ensure availability and sustainable management of water and sanitation for all

4.7 SDG SEVEN “AFFORDABLE AND CLEAN ENERGY”

Ensure access to affordable, reliable, sustainable and modern energy for all.

Sustainable Development Goal (SDG) 7 focuses on ensuring access to affordable, reliable, sustainable, and modern energy for all. For Uganda, achieving this goal is crucial for economic development, poverty reduction, and environmental sustainability. Access to clean and affordable energy is essential for powering industries, improving education and healthcare services, and enhancing the quality of life for citizens.

The Ugandan Government has initiated several projects to enhance energy infrastructure, including investments in hydropower, solar energy, and grid expansion. These efforts aim to increase electricity generation capacity, improve energy access, and promote the use of renewable energy sources.

In terms of data availability, all the five (5) indicators under this goal have data series.

4.8 SDG EIGHT “DECENT WORK AND ECONOMIC GROWTH”

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Sustainable Development Goal 8 (SDG 8) aims to promote inclusive and sustainable economic growth, full and productive employment, and decent work for all. Achieving this goal is crucial for Uganda’s long-term development, as the country has a young and rapidly growing population. With economic transformation a priority, the Government has implemented strategies such as the **National Development Plan (NDP III)** and **Vision 2040**, focusing on industrialization, entrepreneurship, and labor force enhancement. However, challenges like youth unemployment, informal employment, and slow economic diversification remain key barriers.

In terms of data availability, 13 out of 15 indicators under this goal have data series.

4.9 SDG NINE “INDUSTRY, INNOVATION AND INFRASTRUCTURE”

Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

Sustainable Development Goal (SDG) 9 focuses on building resilient infrastructure, promoting inclusive and sustainable industrialization, and fostering innovation. For Uganda, achieving this goal is vital for economic transformation, job creation, and enhancing the quality of life for its citizens. The development of infrastructure and industrial sectors is essential for supporting economic growth and improving access to and quality services.

The Government has initiated several projects to enhance infrastructure and industrial capacity, including investments in transportation, energy, and innovation sectors. These efforts aim at creating a conducive environment for economic growth and technological advancement.

In terms of data availability, 10 out of 12 indicators under this goal have data series.

4.10 SDG TEN “REDUCED INEQUALITIES”

Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Goal 10 focuses on promoting universal policies to address the needs of disadvantaged and marginalized populations. The aim of this goal is to reduce inequality within and among countries. This includes addressing income inequalities, as well as inequalities based on age, sex disability, race, ethnicity, origin, religion, or other status. This goal also focuses on ensuring equal opportunities and reducing inequalities.

Achieving SDG goal 10 is essential for Economic growth and income distribution, social inclusion, access to basic services and addressing regional inequalities which aligns with Uganda’s Third National Development Plan (NDP III) and Uganda’s Vision 2040. The Government of Uganda, in collaboration various stakeholders, including UN and Civil Society are actively working towards SDG goal 10 by focusing on inclusive policies, promoting social and economic empowerment and addressing inequality in various areas.

In terms of data availability, 7 out of 9 indicators under this goal have data series

4.11 SDG ELEVEN “SUSTAINABLE CITIES AND COMMUNITIES”

Make cities and human settlements inclusive, safe, resilient and sustainable.

Sustainable Development Goal 11 focuses on ensuring access to affordable and sustainable housing, developing safe and accessible transportation, and promoting inclusive urbanization. SDG 11 also recognizes the importance of making cities resilient to climate change and natural disasters, including developing strategies to reduce the impact of these events.

Achieving this goal, is essential for reducing poverty, environmental degradation and promoting innovation.

The Government of Uganda, has developed several initiatives aimed at improving drainage and transport in its several cities while improving the livelihood of the citizens, all aligned to the Vision 2040. Despite the efforts, the country still faces challenges like drainage issues during the rainy season and insufficient housing due to the increasing population.

In terms of data availability, 4 out of 10 indicators under this goal have data series.

4.12 SDG TWELVE “RESPONSIBLE CONSUMPTION AND PRODUCTION”

Ensure sustainable consumption and production patterns.

SDG 12 focuses on ensuring sustainable consumption and production patterns. It aims at making people use and produce goods and services in a more environmentally friendly and socially responsible manner. The goal also promotes moving towards a circular economy, where resources are used repeatedly and waste is minimized. Achieving SDG 12 reduces the country’s global hunger index, and overdependence on imports which also aligns with the country’s Vision 2040. To achieve this Uganda implements the National Action Plan on sustainable production which aims to promote efficient and sustainable use of resources, eco-friendly materials, and foster sustainable consumption and production models. The plan further operationalizes the Uganda Green Growth Development Strategy (UGGDS), which focuses on sustainable agriculture, natural capital management, forestry, and green cities, with a roadmap for short, medium, and long-term interventions which align with the country’s vision 2040.

In terms of data availability, 3 out of 8 indicators under this goal have data series.

4.13 SDG THIRTEEN “CLIMATE ACTION”

Take urgent action to combat climate change and its impacts.

Sustainable Development Goal 13, aims to combat climate change and its impacts by reducing greenhouse gas emissions and increasing resilience to climate-related hazards. It calls for integrating climate change measures into national policies, improving education and awareness, and mobilizing financial resources for developing countries. The achievement of SDG 13, is expected to reduce the number of people affected by severe droughts and floods and the related effects leading to the realization of NDP III and Vision 2040.

While the Government has made significant interventions, it continues to face challenges in addressing severe climate change effects such as floods and droughts.

In terms of data availability, 1 out of 3 indicators under this goal has data series.

4.15 SDG FIFTEEN “LIFE ON LAND”

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss

SDG 15 aims to protect, restore, and promote the sustainable use of terrestrial ecosystems, manage forests sustainably, combat desertification, halt and reverse land degradation, and halt biodiversity loss. The goal recognizes that forests, wetlands, drylands, and mountains are critical to human life and planetary health. Biodiversity supports the ecosystems that provide us with food, water, air, and climate regulation.

In terms of data availability, 7 out of 11 indicators under this goal have data series.

4.16 SDG SIXTEEN “PEACE, JUSTICE AND STRONG INSTITUTIONS”

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

SDG 16 aims to Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable and inclusive institutions at all levels.

This goal has 21 indicators and 17 of these have data points.

Table 15: SDG16: Peace, Justice and Strong Institutions

4.17 SDG SEVENTEEN “PARTNERSHIPS FOR THE GOAL”

Strengthen the means of implementation and revitalize the global partnership for sustainable development.

Sustainable Development Goal 17 (SDG 17) focuses on strengthening global partnerships to support and achieve the ambitious targets of the 2030 Agenda. It emphasizes cooperation between Governments, the private sector, and civil society to mobilize resources, enhance capacity-building, and improve technology access. In Uganda, partnerships are crucial for achieving sustainable economic growth and development, particularly in financing, trade, and technology transfer.

In terms of data availability for indicators under this goal, 12 out of 18 indicators under this goal have data series.

Table 16: Goal 17: Strengthen the means of implementation and revitalize the global partnership for sustainable development

A: List of Indicators without data

S/N	SDGI official code (2017)	SDG Indicators
1.	1.5.2	Direct economic loss attributed to disasters in relation to global GDP
2.	1.5.3	Number of countries that adopt and implement national disaster risk reduction strategies in line with the Sendai Framework for Disaster Risk Reduction
3.	1.5.4	Proportion of local Governments that adopt and implement local disaster risk reduction strategies in line with national disaster risk reduction strategies
4.	1.b.1	Percentage of households informed of Government Safety Net Programs
5.	2.1.1	Prevalence of undernourishment
6.	2.4.1	Proportion of agricultural area under productive and sustainable agriculture
7.	2.b.1	Agricultural export subsidies
8.	2.c.1	Indicator of food price anomalies
9.	3.5.1	Coverage of treatment interventions (pharmacological, psychosocial and rehabilitation and aftercare services) for substance use disorders
10.	3.5.2	Harmful use of alcohol, defined according to the national context as alcohol per capita consumption (aged 15 years and older) within a calendar year in litres of pure alcohol
11.	3.9.1	Mortality rate attributed to household and ambient air pollution
12.	3.b.3	Proportion of health facilities that have a core set of relevant essential medicines available and affordable on a sustainable basis
13.	3.c.1	Health worker density and distribution preparedness
14.	4.5.1	Parity indices (female/male, rural/urban, bottom/top wealth quintile and others such as disability status, indigenous peoples and conflict-affected, as data become available) for all education indicators on this list that can be disaggregated
15.	4.7.1	Extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education; and (d) student assessment
16.	4.b.1	Volume of official development assistance flows for scholarships by sector and type of study
17.	5.6.2	Number of countries with laws and regulations that guarantee full and equal access to women and men aged 15 years and older to sexual and reproductive health care, information and education
18.	5.a.2	Proportion of countries where the legal framework (including customary law) guarantees women's equal rights to land ownership and/or control
19.	6.3.2	Proportion of bodies of water with good ambient water quality
20.	8.4.1	Material footprint, material footprint per capita, and material footprint per GDP
21.	8.4.2	Domestic material consumption, domestic material consumption per capita, and domestic material consumption per GDP
22.	9.3.2	Proportion of small-scale industries with a loan or line of credit
23.	9.4.1	CO2 emission per unit of value added
24.	10.4.1	Labour share of GDP, comprising wages and social protection transfers
25.	10.c.1	Remittance costs as a proportion of the amount remitted
26.	11.1.1	Proportion of urban population living in slums, informal settlements or inadequate housing
27.	11.2.1	Proportion of population that has convenient access to public transport, by sex, age and persons with disabilities

28.	11.3.2	Proportion of cities with a direct participation structure of civil society in urban planning and management that operate regularly and democratically
29.	11.6.1	Proportion of urban solid waste regularly collected and with adequate final discharge out of total urban solid waste generated, by cities
30.	11.7.1	Average share of the built-up area of cities that is open space for public use for all, by sex, age and persons with disabilities
31.	11.7.2	Proportion of persons victim of physical or sexual harassment, by sex, age, disability status and place of occurrence, in the previous
32.	12.4.2	Hazardous waste generated per capita and proportion of hazardous waste treated, by type of treatment
33.	12.5.1	National recycling rate, tons of material recycled
34.	12.6.1	Number of companies publishing sustainability reports
35.	12.7.1	Number of countries implementing sustainable public procurement policies and action plans
36.	12.c.1	Amount of fossil fuel subsidies per unit of GDP (production and consumption)
37.	13.2.2	The total greenhouse gas emissions per year for the SDG target 13.2.
38.	13.a.1	Amounts provided and mobilized (in US\$) per year in relation to the continued existing collective mobilization goal of the \$100 billion commitment through to 2025
39.	14.6.1	Progress by countries in the degree of implementation of international instruments aiming to combat illegal, unreported and unregulated fishing
40.	15.1.2	Proportion of important sites for terrestrial and freshwater biodiversity that are covered by protected areas, by ecosystem type
41.	15.3.1	Proportion of land that is degraded over total land area
42.	15.4.1	Coverage by protected areas of important sites for mountain biodiversity
43.	15.4.2	Mountain Green Cover Index
44.	16.4.1	Total value of inward and outward illicit financial flows (in current United States dollars)
45.	16.4.2	Proportion of seized, found or surrendered arms whose illicit origin or context has been traced or established by a competent authority in line with international instruments
46.	16.5.2	Proportion of businesses that had at least one contact with a public official and that paid a bribe to a public official, or were asked for a bribe by those public officials during the previous 12 months
47.	16.10.1	Number of verified cases of killing, kidnapping, enforced disappearance, arbitrary detention and torture of journalists, associated media personnel, trade unionists and human rights advocates in the previous 12 months
48.	17.3.1	Foreign direct investment, official development assistance and South-South cooperation as a proportion of gross national income
49.	17.11.1	Developing countries and least developed countries' share of global exports
50.	17.13.1	Macroeconomic Dashboard
51.	17.14.1	Number of countries with mechanisms in place to enhance policy coherence of sustainable development
52.	17.17.1	US\$ committed to public-private and civil society partnerships
53.	17.18.1	Statistical capacity indicator for SDG monitoring

B: List of 24 Globally computed SDG Indicators

S/N	SDG CODE	INDICATOR NAME
1	3.d.1	International Health Regulations capacity and health emergency preparedness
2	5.6.2	Number of countries with laws and regulations that guarantee full and equal access to women and men aged 15 years and older to sexual and reproductive health care, information and education
3	5.a.2	Proportion of countries where the legal framework (including customary law) guarantees women's equal rights to land ownership and/or control
4	5.c.1	Proportion of countries with systems to track and make public allocations for gender equality and women's empowerment
5	7.b.1	Installed renewable energy-generating capacity in developing countries (in watts per capita) (repeated indicator: 12.a.1)
6	8.8.2	Level of national compliance of labour rights (freedom of association and collective bargaining) based on International Labour Organization (ILO) textual sources and national legislation, by sex and migrant status
7	10.7.2	Number of countries that have implemented well-managed migration policies
8	10.a.1	Proportion of tariff lines applied to imports from least developed countries and developing countries with zero-tariff
9	11.a.1	Number of countries that have national urban policies or regional development plans that (a) respond to population dynamics; (b) ensure balanced territorial development and; c) increase local fiscal space
10	12.1.1	Number of countries with sustainable consumption and production (SCP) national action plans or SCP mainstreamed as a priority or a target into national policies
11	12.4.1	Number of parties to international multilateral environmental agreements on hazardous waste, and other chemicals that meet their commitments and obligations in transmitting information as required by each relevant agreement
12	12.7.1	Number of countries implementing sustainable public procurement policies and action plans
13	14.6.1	Progress by countries in the degree of implementation of international instruments aiming to combat illegal, unreported and unregulated fishing
14	15.6.1	Number of countries that have adopted legislative, administrative and policy frameworks to ensure fair and equitable sharing of benefits
15	15.8.1	Proportion of countries adopting relevant national legislation and adequately resourcing the prevention or control of invasive alien species
16	15.9.1	(a) Number of countries that have established national targets in accordance with or similar to Aichi Biodiversity Target 2 of the Strategic Plan for Biodiversity 2011–2020 in their national biodiversity strategy and action plans and the progress reported towards these targets; and (b) integration of biodiversity into national accounting and reporting systems, defined as implementation of the System of Environmental-Economic Accounting
17	16.10.2	Number of countries that adopt and implement constitutional, statutory and/or policy guarantees for public access to information
18	17.11.1	Developing countries and least developed countries' share of global exports
19	17.14.1	Number of countries with mechanisms in place to enhance policy coherence of sustainable development
20	17.16.1	Number of countries reporting progress in multi-stakeholder development effectiveness monitoring frameworks that support the achievement of the SDGs
21	17.18.2	Number of countries that have national statistical legislation that complies with the Fundamental Principles of Official Statistics
22	17.18.3	Number of countries with a national statistical plan that is fully funded and under implementation, by source of funding
23	17.19.1	US\$ value of all resources made available to strengthen statistical capacity in developing countries
24	17.19.2	Proportion of countries that (a) have conducted at least one population and housing census in the last 10 years; and (b) have achieved 100 percent birth registration and 80 percent death registration

C: Contributors to the compilation of the Report

Management

Dr. Chris N. Mukiza (PhD)- Executive Director/ Chief Statistician.

Dr. Ssenono Vincent (PhD)- Deputy Executive Director.

Thomas Rutaro- Director, Methodology and Statistical Coordination Services.

Namono Lydia- Head of Department, Outreach and Quality Assurance.
