<b>PREFACE</b>	<b>xiii</b>	
<b>LIST OF ABBREVIATIONS &amp; ACRONYMS</b>	<b>xv</b>	
<b>SDG INDICATORS 2024/25</b>	<b>xvi</b>	
<b>CHAPTER 1</b>	<b>INTRODUCTION</b>	<b>01</b>
1.1.	Background.....	02
1.2.	Objectives .....	02
1.3.	Scope and Coverage .....	03
1.4.	Survey Design .....	03
1.5.	Survey Organisation.....	05
1.6.	Data processing .....	05
1.7.	Response Rate.....	05
1.8.	Quality Assurance .....	06
1.9.	The Structure of the Report .....	06
<b>CHAPTER 2</b>	<b>BACKGROUND CHARACTERISTICS</b>	<b>07</b>
2.1.	Introduction .....	08
2.2.	Population Distribution of the population aged 18 and above.....	08
2.3.	Education .....	08
<b>CHAPTER 3</b>	<b>HUMAN RIGHTS AND JUSTICE</b>	<b>15</b>
3.1.	Introduction.....	16
3.2.	Human Rights in Uganda .....	17
3.3.	Right to Health.....	19
3.4.	Right to Education .....	21
3.5.	Right to Work .....	23
3.6.	Denial of Human Rights through Discrimination.....	26
3.7.	Access to Justice .....	28
3.8.	Knowledge and belief in patriotism .....	35
<b>CHAPTER 4</b>	<b>DEMOCRACY AND ELECTORAL SYSTEMS</b>	<b>57</b>
4.1.	Introduction.....	58
4.2.	Awareness of Citizen's right to vote .....	58
4.3.	Access to electoral information .....	59

4.4.	Political Participation.....	61
4.5.	Free expression of views on politics .....	62
4.6.	Knowledge of Political Parties/Organizations.....	63
4.7.	Membership to Political parties.....	64
4.8.	Members of Associations/Groups .....	65
<b>CHAPTER 5</b>	<b>TRANSPARENCY AND ACCOUNTABILITY</b>	<b>73</b>
5.1.	Introduction.....	74
5.2.	Trust in Public Institutions .....	74
5.3.	Transparency and Accountability .....	75
5.4.	Corruption.....	82
<b>CHAPTER 6</b>	<b>PEACE AND SECURITY</b>	<b>109</b>
6.1.	Introduction .....	110
6.2.	Theft in the community.....	110
6.3.	Management of violence against women and children .....	115
6.4.	Worry of threats .....	116
6.5.	Safety .....	117
6.6.	Role of Public Security Forces (PSF).....	118
6.7.	Tension and Conflict .....	120
6.8.	Subjective well-being/happiness.....	123
6.9.	Interpersonal trust.....	124
<b>CHAPTER 7</b>	<b>PERCEPTIONS ON WOMEN'S RIGHTS</b>	<b>139</b>
7.1.	Introduction.....	140
7.2.	Perceptions towards women participation in politics .....	141
7.3.	Perception on what women should participate as in Electoral Processes .....	141
7.4.	Preference between male and female candidates in elections.....	142
7.5.	Perceptions of the population on violence against women and girls is a violation of human rights .....	143
7.6.	Attitudes about different aspects of gender equity and equality .....	143
<b>CHAPTER 8</b>	<b>CONCLUSION AND RECOMMENDATIONS</b>	<b>153</b>
8.1.	Introduction.....	154
8.2.	Human Rights and Justice.....	154
8.3.	Democracy and Electoral Systems .....	155
8.4.	Transparency and Accountability .....	155
8.5.	Peace and Security .....	156
8.6.	Perception on Women's Rights .....	157
<b>ANNEX</b>		<b>159</b>
	Annex I: Survey Errors .....	160
	ANNEX II: Questionnaire .....	168

# Preface

The Uganda Bureau of Statistics (UBOS) conducted the National Governance, Peace and Security Survey (NGPSS) between December 2024 and April 2025. The main objective of the survey was to update statistical data on governance, peace and security to inform and monitor legal and administrative initiatives of the Government and the Private Sector on the rule of law, human rights, transparency and accountability, and democratic governance, among others. This survey is the third in a series after the 2017 NGPSS and the 2013 National Governance Baseline Survey (NGBS).

The Bureau is grateful to Government of Uganda and UN Women for the financial support towards implementation of the survey. We acknowledge the contribution of the Governance, Peace and Security Programme Secretariat for the technical support in design and compilation of this report.

We appreciate the general public for their cooperation throughout the survey exercise. We also extend our special gratitude to the survey field staff for ensuring a successful study through collection of quality data.

UBOS hereby encourages the general public to utilize the findings in this report for planning, policy reviews, decision making, further research and generating public debate.

\*All figures for the SDG 16 indicators shown above are expressed as percentages (%) and are not absolute numbers.

Chapter 1

# INTRODUCTION

## 1.1. Background

Governance, Peace and Security statistics are essential for advancing Uganda's development objectives. These data support the implementation of national, regional and international frameworks, including the National Development Plans (NDPs), Africa Agenda 2063 and 2030 Agenda for Sustainable Development. Specifically, Sustainable Development Goal (SDG) Goal 16 aims to promote peaceful and inclusive societies, ensure access to justice for all, and build effective, accountable, and inclusive institutions. These statistics also play a vital role in the management of public affairs, guiding Government action, strengthening accountability, and supporting conflict prevention. In doing so, they help promote equity, transparency, social justice, human rights, and inclusive governance at all levels.

Uganda's governance framework emphasizes democratic principles such as the rule of law, equity, citizen participation, and human rights. The NDP IV (2025/26–2030/31) in Chapter 20 underscores the importance of governance and security for national transformation. Full implementation NDP IV requires relevant statistics for monitoring, policy formulation, and resource allocation.

In recognition of this, Uganda has progressively institutionalized the collection of governance data, starting with the Uganda National Governance Baseline Survey (UNGBS) in 2013, followed by the National Governance, Peace and Security Survey (NGPSS) in 2017. These efforts aim to provide reliable and harmonized data for tracking progress on governance commitments under national and international frameworks. However, due to emerging policy shifts, demographic changes, and evolving governance challenges—including national elections, peace-building efforts, and crime trends—an updated and expanded survey became necessary. The NGPSS 2024/25 addresses this gap.

The NGPSS 2024/25 survey further aligns with the African Charter on Democracy, Elections and Governance and the AU Protocol on the Establishment of the Peace and Security Council. At the national level, it is grounded in the Constitution of Uganda, which mandates equitable development across regions and prioritises marginalised and underserved populations.

## 1.2. Objectives

The overall objective of the NGPSS 2024/25 is to generate updated statistical indicators for monitoring the legal and administrative initiatives of Government in line with the national, regional and global frameworks.

### Specific Objectives

1. Collect nationally representative data on Governance, Peace and Security;
2. Populate and update the prioritised set of Governance, Peace and Security indicators required to monitor NDP IV, SDG Goal 16, Africa Agenda 2063 and National Standard Indicators;
3. To provide trend for Governance, Peace, and Security Statistics.

## 1.3. Scope and Coverage

Governance is a broad and multifaceted concept, typically involving dimensions such as authority, decision-making, service delivery, and accountability. The NGPSS 2024/25 collected information on the following localized dimensions, based on the Handbook of Governance statistics and the Governance, Peace and Security modules of the Strategy for Harmonization of Statistics in Africa (GPS-SHaSA):

1. Access to Justice
2. National Registration and Electoral Systems
3. Democracy
4. Transparency and Accountability
5. Democratic Governance
6. Peace and Security
7. Women's Rights (Legal, Economic, and Political Participation)

The survey also collected socio-economic, demographic and contextual information on education, health, and the work environment for household members aged 18 and above, among others.

## 1.4. Survey Design

The NGPSS 2024/25 employed a three-stage cluster sampling design using the 2024 National Population and Housing Census (NPHC) frame. The survey targeted the population aged 18 and above in both rural and urban areas. The survey was designed to generate estimates across 15 statistical sub-regions (strata).

### 1.4.1. Selection of Sample Units

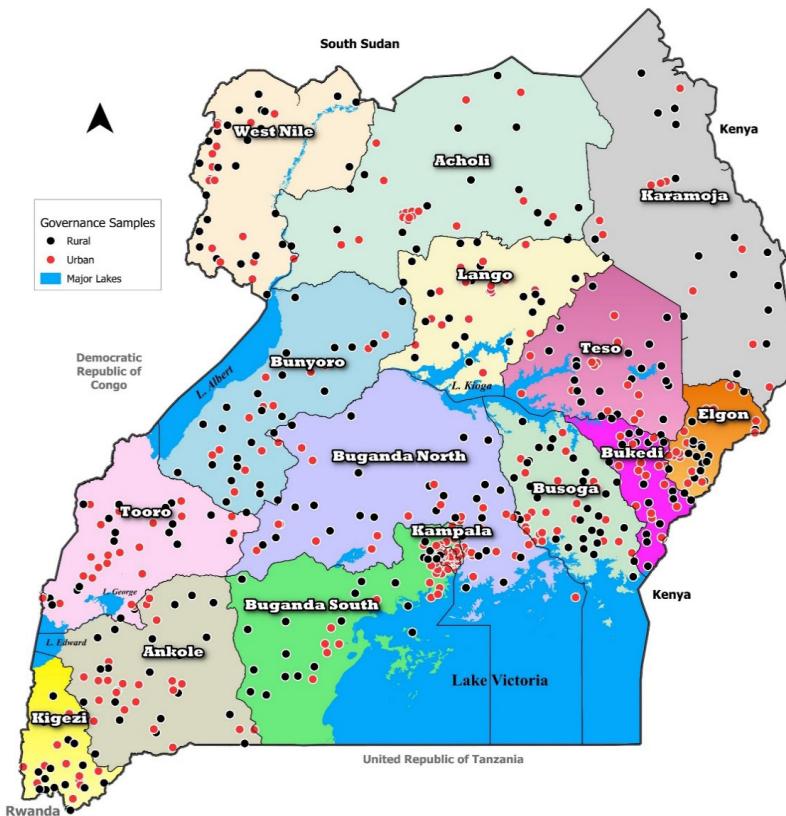

At the first stage, 600 Enumeration Areas (EAs) were selected using Probability Proportional to Size (PPS) whose distribution is as shown in Table 1.1. At the second stage, 15 households were selected per EA using systematic random sampling.

At the third stage, respondents were selected within households using a Kish Grid approach. All eligible adult males in the household were listed, and one male was randomly selected. Similarly, all eligible adult females were listed, and one female was randomly selected. Where there was one eligible respondent, only one was enumerated and if there was none, the household interview would end at the household roster. This implies there was no replacement during selection of respondents.

**Table 1.1. Domains and sample allocation**

Sn.	Sub-Region	EAs			Households		
		Urban	Rural	Total	Urban	Rural	Total
1	Acholi	18	15	33	270	225	495
2	Ankole	22	22	44	330	330	660
3	Bukedi	15	21	36	225	315	540
4	Bunyoro	17	23	40	255	345	600
5	Busoga	22	28	50	330	420	750
6	Elgon	15	20	35	225	300	525
7	Kampala	32		32	480	0	480
8	Karamoja	10	17	27	150	255	405
9	Kigezi	12	18	30	180	270	450
10	Lango	17	21	38	255	315	570
11	Buganda North	27	28	55	405	420	825
12	Buganda South	36	22	58	540	330	870
13	Teso	13	22	35	195	330	525
14	Tooro	20	23	43	300	345	645
15	West Nile	18	26	44	270	390	660
<b>Total</b>		<b>294</b>	<b>306</b>	<b>600</b>	<b>4,410</b>	<b>4,590</b>	<b>9,000</b>

**Figure 1.1. Map showing distribution of sampled Enumeration Areas by Sub-Region**

## 1.5. Survey Organisation

UBOS managed the survey through coordinated activities involving tool development, pre-testing, training, fieldwork, and quality control. Field teams consisted of 9 supervisors, 31 enumerators, and 9 drivers, selected for linguistic and regional familiarity. UBOS staff and selected stakeholders conducted field supervision, debriefing and feedback sessions.

### 1.5.1. Pre-test

A pre-test was conducted in September 2024 to assess the flow of questions, the data capture application performance, and interviewer readiness. Feedback was incorporated to finalise the questionnaire and training materials.

### 1.5.2. Training

A team of 41 field interviewers were trained for 10 days in November 2024. The training involved daily presentations from facilitators, daily sessions of mock interviews which gave enumerators chance to interact with the application and lastly was field practice to test the flow of questions with the public.

### 1.5.3. Data Collection

The main fieldwork commenced on 2nd December 2024 and continued until 7th May 2025. Nine field teams were constituted and dispatched to the different statistical sub-regions. Field interviewers were recruited based on fluency in the local languages spoken in their respective areas of deployment, while supervisors were selected to ensure a balance of both males and females.

Data collection was conducted in four trips over the fieldwork period. After each trip, teams returned to headquarters for refresher training and debriefing sessions to enhance coordination, reinforce field protocols, and address any emerging challenges before redeploying for the next round.

## 1.6. Data processing

The data was captured using Computer Assisted Personal Interviews (CAPI) with survey solutions software. Quality checks and daily synchronisation with the central server were conducted for consistency, completeness, and accuracy. The data was downloaded from the server, subjected to data quality checks and finally analysed based on established editing guidelines and the approved tabulation plan.

## 1.7. Response Rate

Overall, the survey yielded a response rate of 86 percent among the 9,000 households sampled. Of the eligible respondents aged 18 and above, 96 percent and 95 percent (women and men respectively) were interviewed (Table 1.2).

**Table 1.2. Results of the household and individual interviews**

<b>Household interviews</b>	<b>Urban</b>	<b>Rural</b>	<b>Total</b>
Households selected	4,410	4,590	9,000
Household Interviewed	3,728	4,018	7,746
Household response rate (%) <sup>1</sup>	84.5	87.5	86.1
<b>Interviews with women aged 18 and above</b>			
Number of eligible women	2,819	3,138	5,957
Number of eligible women interviewed	2,729	3,016	5,745
Eligible women response rate (%) <sup>2</sup>	96.8	96.1	96.4
<b>Interviews with men aged 18 and above</b>			
Number of eligible men	2,256	2,587	4,843
Number of eligible men interviewed	2,130	2,481	4,611
Eligible men response rate (%) <sup>2</sup>	94.4	95.9	95.2

<sup>1</sup> Households interviewed/ households occupied

<sup>2</sup> Respondents interviewed/ eligible respondents

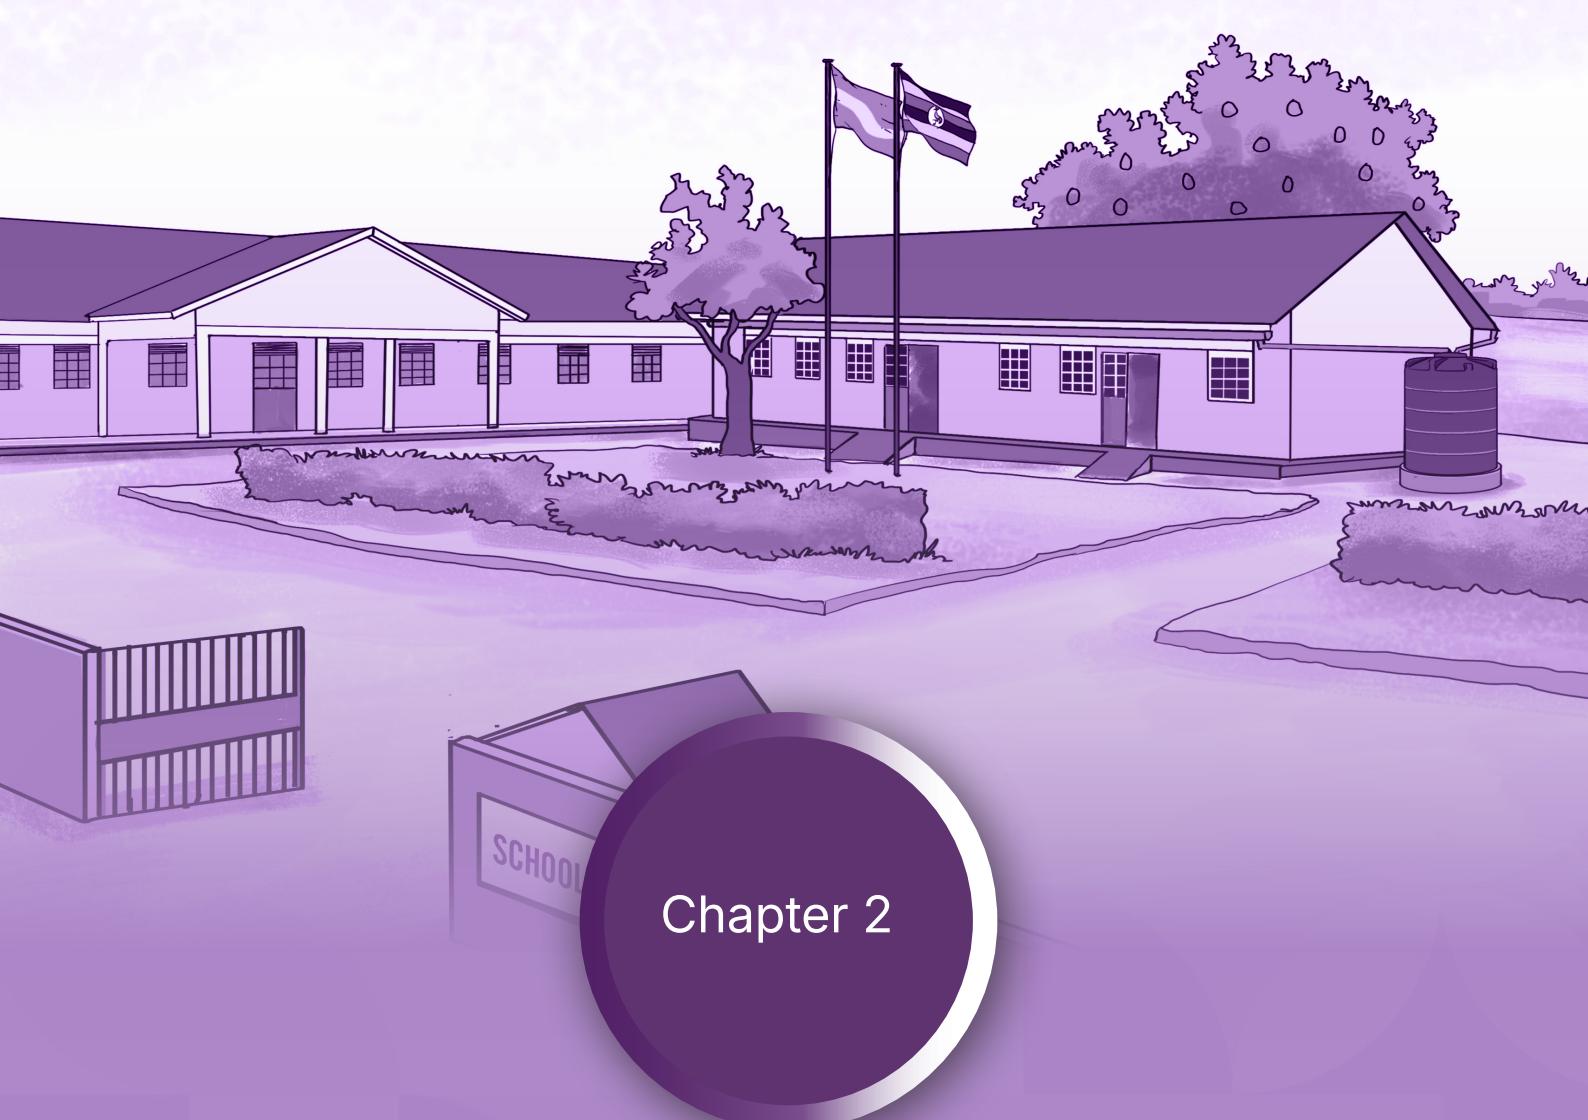

## 1.8. Quality Assurance

Comprehensive quality assurance measures were applied throughout all phases of the survey to ensure high-quality data and statistics aligned with key quality dimensions, including relevance, methodological soundness, accuracy, timeliness, accessibility, coherence, and comparability. The institutional environment was continually assessed to confirm the adequacy of human, financial, and technological resources, while the Governance, Peace and Security Technical Working Group provided oversight and technical support. During questionnaire and tools development, independent reviews were conducted to ensure alignment with national, regional, and international frameworks, and all tools together with the Survey Solutions software underwent extensive testing and evaluation of tablets and data-transfer systems.

Data quality during fieldwork was strengthened through in-built data editing checks and real-time monitoring. Data processing and analysis followed established editing guidelines and the approved tabulation plan, with all draft outputs undergoing rigorous peer review. In addition, stakeholder engagements were conducted throughout the questionnaire development, data collection, analysis, and report-writing phases to ensure relevance, accuracy, and broad ownership of the survey results.

## 1.9. The Structure of the Report

The report comprises Chapter 1: Introduction, Chapter 2: Background characteristics, Chapter 3: Human rights and justice, Chapter 4: Democracy and electoral systems, Chapter 5: Transparency and accountability, Chapter 6: Peace and security, Chapter 7: Perceptions on women's rights and, Chapter 8: Conclusion and recommendations.

# BACKGROUND CHARACTERISTICS

## Key Findings

**Education:** Seventeen (17%) percent of females aged 18 and above had never attended school compared to seven percent of males.

## 2.1. Introduction

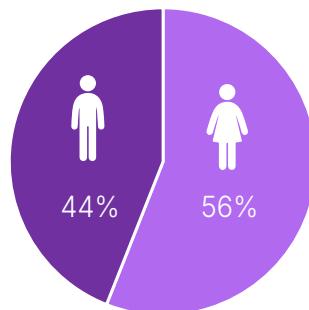

Understanding the demographic, health, and socioeconomic composition of Uganda's adult population aged 18 and above is crucial for gaining insights into governance, peace, and security outcomes. This report provides information on various demographic and social characteristics, including sex, residence, age group, and education to ensure a holistic understanding of the community's perspectives and experiences.

This chapter delves into the key characteristics such as age, sex, education, and compliance with national programmes for the respondents in the NGPSS 2024/25. By examining these factors, the survey aimed at providing a detailed picture of the population, which can inform policy decisions and contribute to the overall governance and security framework in Uganda.

## 2.2. Population Distribution of the population aged 18 and above

The findings reveal that the population aged 18 and above comprised 56 percent of females and 44 percent of males (Figure 2.1). A larger proportion of population were residing in rural areas (61%) compared to urban areas (39%) as shown in Table 2.1. The distribution of the population by residence shows that 62 percent of males and 60 percent females resided in rural areas. Overall, 68 percent of population aged 18 and above were married or cohabiting. A higher proportion of females (13%) were separated/divorced compared to males (9%).

**Figure 2.1. Percentage distribution of population aged 18 and above by sex**

## 2.3. Education

Education is fundamental to personal development and is closely aligned with Uganda's commitment to Sustainable Development Goal 4 (SDG 4) and the National Development Plan IV. In the prioritization of education, Uganda aims to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all, which are essential for the country's overall development and progress. To support this goal, the survey included questions on school attendance, highest level of education attained, and literacy status for the population aged 18 and above.

### 2.3.1. School Attendance

The findings indicate that 13 percent of the population aged 18 and above had never attended school. The sex variations show that 17 percent of females had never attended school, compared to 7 percent of males. Additionally, 85 percent of the population aged

18 and above had left school, while 4 percent of males and 2 percent of females were currently attending school, as shown in Table 2.2.

The findings also reveal that 8 percent of residents in the urban areas had never attended school, compared to 16 percent of those in the rural areas. One in every three persons aged 60 years and above had never attended school (32%), a proportion significantly higher than that of the youth aged 18–30 years, of whom only 4 percent had never attended school.

### 2.3.2. Literacy

Literacy is defined as the ability to read and write with understanding in any language. The overall adult literacy rate was 76 percent; higher among males (84%) compared to females (70%).

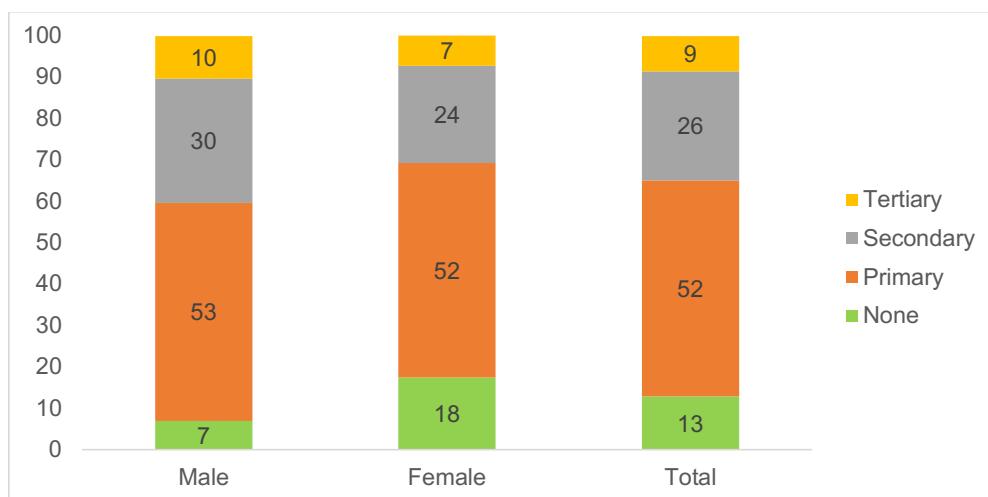

### 2.3.3. Educational Attainment

Figure 2.2 shows that among the population aged 18 and above, the proportion of females with no formal education was (18%), compared to males (7%). A high proportion of the population aged 18 and above had completed primary education (52%), with almost no gender differentials among males (53%) and females (52%). A high proportion of the males had completed secondary school education (30%) or had a degree and above (10%) compared to females (24% and 7%, respectively).

Variations by age reveal that the youth (18–30) had completed higher levels of education compared to older persons (60+). Among the population aged 18–30, four percent had no formal education, and 37 percent had completed secondary education. In contrast, 32 percent of those aged 60 and above had no formal education, and 12 percent had completed secondary education.

Sub regional analysis shows significant disparities in educational attainment. Kampala had the highest proportion of population aged 18 and above who had completed secondary education (44%) and degree and above (23%), while Karamoja Sub region had the least (11% and 4%, respectively). (Table 2.4).

Chapter 3

# HUMAN RIGHTS AND JUSTICE

## Key Findings

- ⦿ **Awareness of Human Rights:** Eighty-nine percent of the population aged 18 and above were aware of the different human rights with Tooro Sub region (99%) having the highest proportion compared to Karamoja Sub region (67%) with the least.
- ⦿ **Right to Health:** Among persons aged 18 and above who fell sick, 41 percent consulted a private clinic, while 38 percent consulted a Government health unit/hospital.
- ⦿ **Work in harmful Environment:** Seventy-three percent of the working population reported harmful working environment in 2024/25 compared to forty-one percent in 2017.
- ⦿ **Prevalence of discrimination:** Twenty-eight percent of the population aged 18 and above had experienced at least one form of discrimination.
- ⦿ **Awareness of right to seek justice:** Eighty-nine percent of the population aged 18 and above were aware of the right to seek justice.
- ⦿ **Awareness of institutions that offer legal services:** Overall 89% of the population aged 18 and above were aware of the institutions where justice is sought. A slightly higher proportion of males (90%) than females (88%) were aware of the institutions where justice is sought.
- ⦿ **Restraint from seeking justice:** Family member (4%), Traditional leader (4%) and Community leader (3%) were the most commonly reported source of restraint from seeking for justice.
- ⦿ **Trust in Justice:** Overall 93 percent of the population aged 18 and above trust in the various justice systems. Local Councils (91%), Uganda Human Rights Commission and Courts of Law (82%) were the most trusted justice institutions.

### 3.1. Introduction

Human rights are fundamental principles that guarantee all individuals the ability to live with dignity, freedom, equality, justice, and peace. These rights are universal and apply to everyone without discrimination. They form the foundation for the full development of individuals and communities by establishing the minimum standards necessary for a dignified life. Human rights empower people to make choices about their lives, express themselves freely, and participate in governance, among many other freedoms. Human rights also assure citizens of the means necessary to satisfy their basic needs and also ensure that they are protected against abuse by those who are powerful<sup>1</sup>.

Access to justice in Uganda refers to the ability of individuals to seek and obtain fair remedies for grievances through formal or informal justice systems, in accordance with human rights standards. It is both a right in itself and a key mechanism for ensuring the protection of all other human rights. Ensuring access to justice remains a crucial pillar in promoting equality and accountability in Ugandan society.

---

<sup>1</sup> Human Rights: A Basic Handbook for UN Staff, UN Office of the High Commissioner for Human Rights (OHCHR, 2000)

## 3.2. Human Rights in Uganda

Chapter Four of Uganda's 1995 Constitution anchors the protection and promotion of fundamental rights and freedoms and establishes the Uganda Human Rights Commission (UHRC) as the State's principal human rights institution.

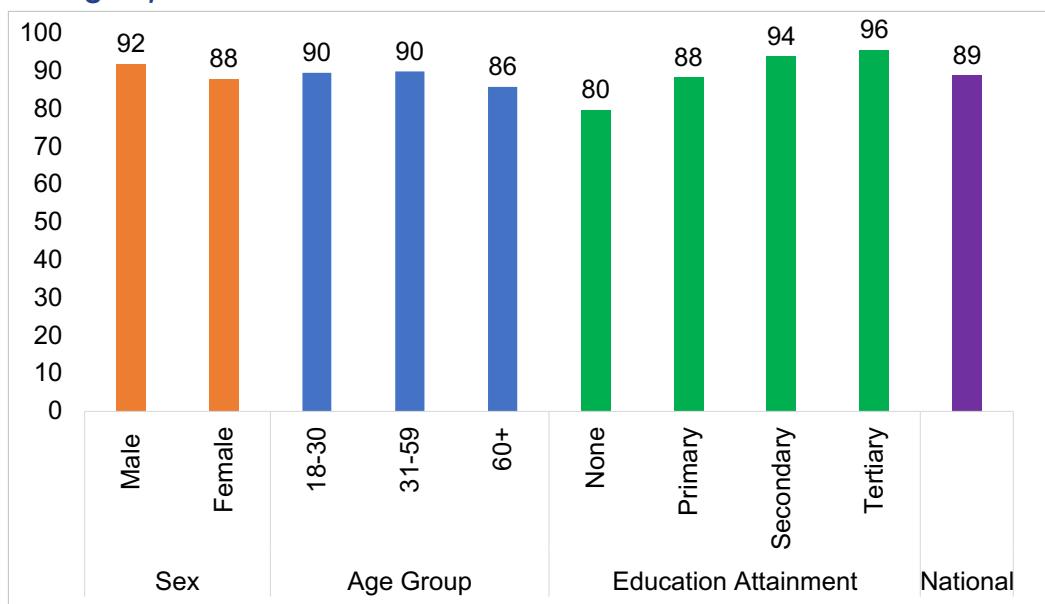

### 3.2.1. Awareness and Respect for Human Rights

Awareness of human rights is important for their protection and enforcement. Therefore, in order to enjoy these rights, having knowledge of them is critical. The survey sought information on the public's knowledge of human rights and their perception on whether these rights are respected in Uganda.

Findings in Figure 3.1 show that overall, 89 percent of the population aged 18 and above indicated that they were aware of their human rights. Levels of the awareness of human rights were slightly lower among females (88%) compared to males (92%).

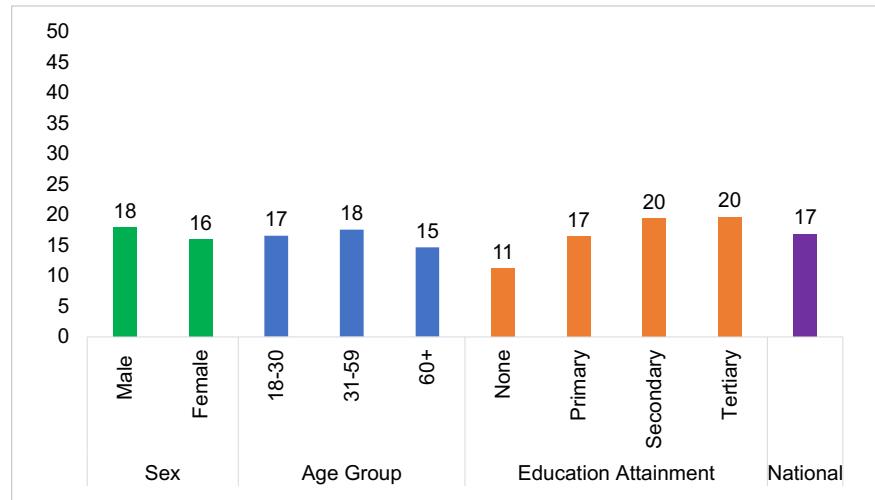

Furthermore, knowledge of human rights of population aged 18 and above increased with an increase in the level of education from 80 percent among those with no formal education to 96 percent among those with tertiary education (Table 3.1).

**Figure 3.1. Proportion of population aged 18 and above that were aware of Human Rights, (%)**

Population aged 18 and above were asked to establish whether they claimed their human rights during the 12 months before the survey. Figure 3.2 shows that 17 percent of persons aged 18 and above had claimed their human rights, with a slightly higher percentage of males (19%) compared to that of females (16%). Elgon Sub region (39%) had the highest proportion of population who reported to have claimed their human rights while Busoga Sub region (9%) had the lowest. (Table 3.1)

**Figure 3.2. Proportion of population aged 18 and above that claimed their Human Rights**

Awareness of human rights was highest in Tooro and Kigezi (99% each) and lowest in Karamoja (67%), Busoga (71%) and Teso (76%) subregions (Figure 3.3).

**Figure 3.3. Proportion of population aged 18 and above aware of Human Rights by Sub region (%)**

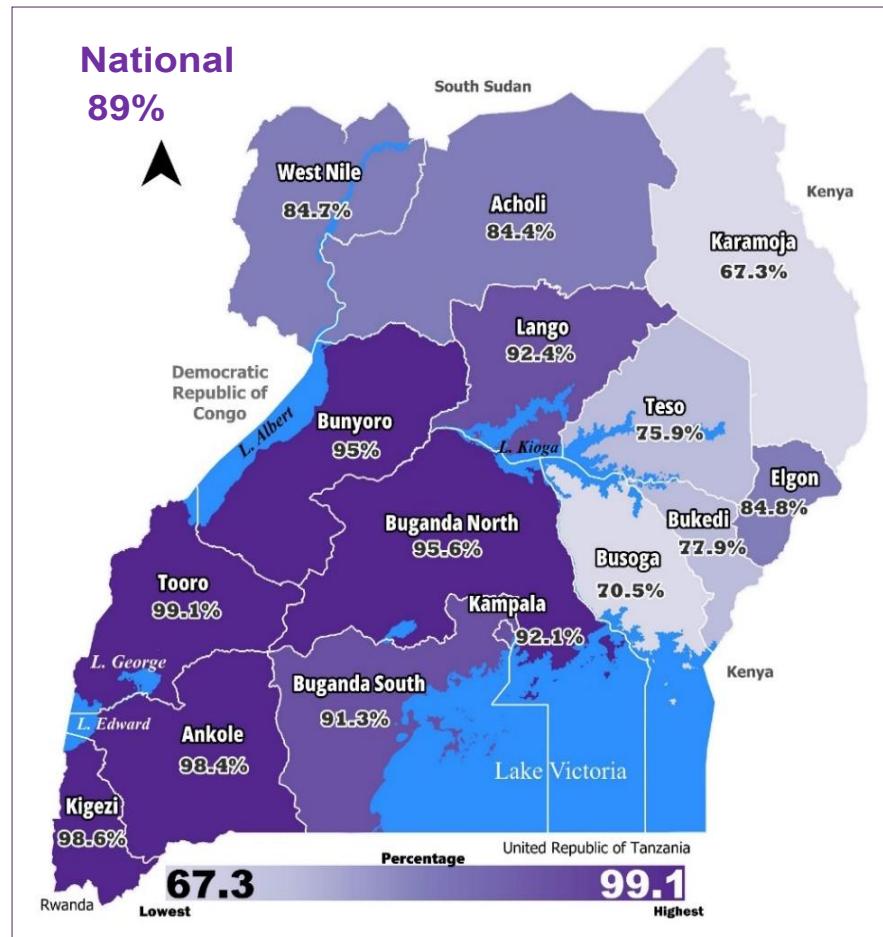

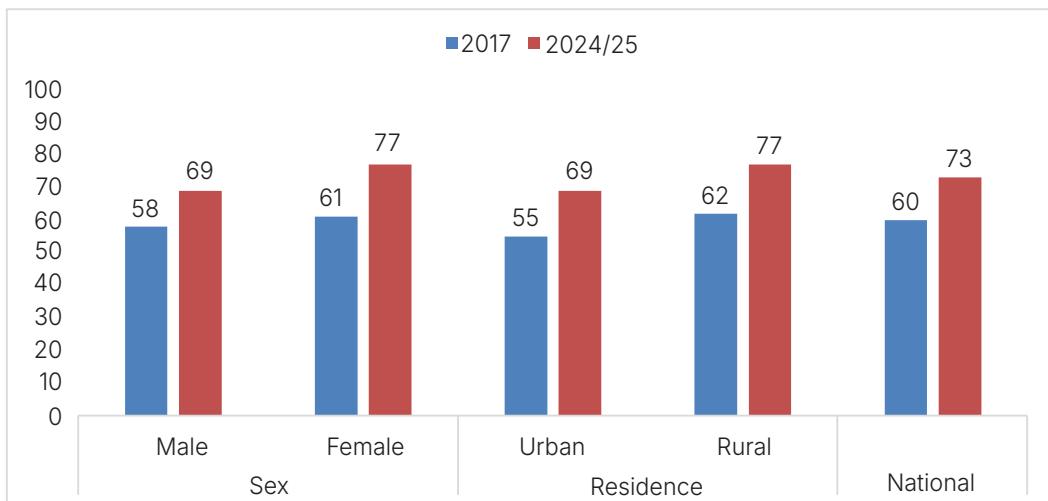

Figure 3.4 further indicates the perceptions on the respect for human rights in the country based on 2017 and 2024/25 NGPSS survey results. Overall, the proportion of the population aged 18 and above who perceived human rights to be respected in the country increased from 60 percent in 2017 to 73 percent in 2024/25.

**Figure 3.4. Perceptions of the population aged 18 and above on respect of human rights in Uganda by sex and residence (%)**

*Note: 2017 and 2024/25 used often+always as categories for respect of Human Rights*

### 3.3. Right to Health

The World Health Organization defines health as complete physical, mental, and social well-being not merely the absence of disease. The right to health is a fundamental human right and essential to human dignity.

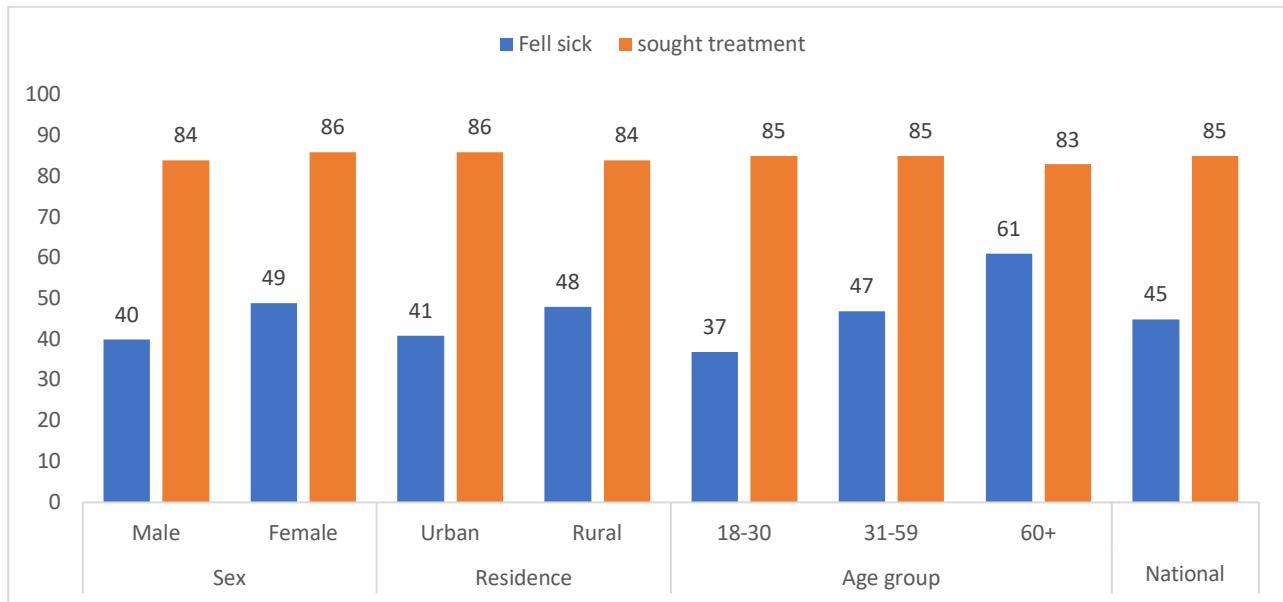

Globally, SDG 3 promotes healthy lives and well-being for all. In Uganda, this right is upheld and promoted through disease prevention, and equitable access to quality, affordable care, especially by the 1995 Constitution and prioritized under the national development agenda. The NDP IV effectively operationalises the idea that all Ugandans should in practice have access to essential health care. In a bid to assess the progress of the country towards achieving the right to health, the population aged 18 and above were asked some questions regarding their health status. The information gathered includes prevalence of sickness, individuals' health seeking behavior and whether the patient paid any fees which were above the normal or official during treatment.

Figure 3.5 shows that, overall, 45 percent of population 18 and above had fallen sick 30 days preceding the survey with a higher proportion of females (49%) compared to that of males (40%) and rural residents (48%) compared to urban residents (41%). In addition, Variations by age show that higher proportions of those aged 60 and above (61%) had fallen sick compared to those aged 18-30 (37%).

With regard to health seeking behaviour, 85 percent of the population aged 18 and above who fell sick reported that they had sought treatment for the sickness suffered. Forty one percent of the persons who fell sick consulted a private clinic, of which 44 percent were

male compared to 39 percent female while, 38 percent consulted a public health facility. Consultation at private clinics was highest amongst residents in Ankole (57%) and lowest in the Bukedi Sub region (19%) as shown in Table 3.3. Table 3.3.

**Figure 3.5. Persons aged 18 and above that fell sick 30 days before the survey and those who sought treatment (%) by selected background characteristics**

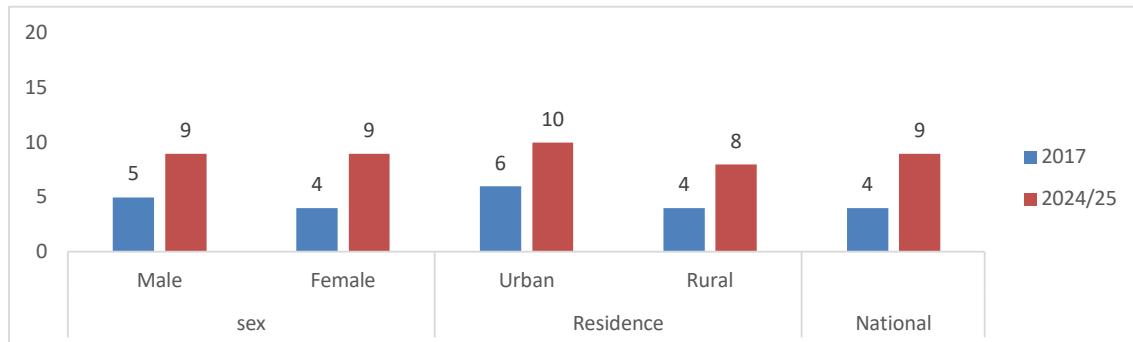

### 3.3.1. Payment of unofficial or informal fees at health facilities

The payment of unofficial or informal fees at health facilities raises the overall cost of healthcare and can serve as a deterrent, particularly for the poor, when selecting a healthcare option in Uganda. Addressing these financial barriers is crucial to ensuring equitable access to health services for all. The 2017 NGPSS gathered data on whether individuals who sought medical care incurred any charges beyond the officially sanctioned fees. These standard payments were defined as those formally set by the health facility and uniformly applied to all patients receiving the same services.

Figure 3.6 shows that 9 percent of persons aged 18 and above that sought treatment had made payments above the official fees. This is an increase from 4 percent registered in 2017. Males and females (9% each) reported paying fees above the normal charges. Ten percent of urban residents reported paying fees above the normal charges for treatment compared to the rural residents (8%) (Table 3.4 & Figure 3.6).

**Figure 3.6. Proportion of the population 18 and above who made a payment at a facility other than the normal payment**

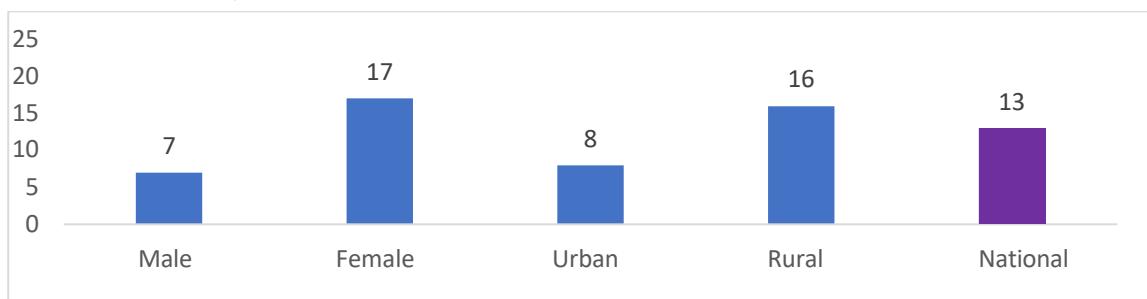

## 3.4. Right to Education

Article 26 of the Universal Declaration of Human Rights affirms that “everyone has the right to education.” Education is a cornerstone of socio-economic development, human empowerment, and the promotion of individual well-being and dignity. Goal 4 of Agenda 2030 seeks to ensure inclusive and equitable quality education for all and promote lifelong learning. In Uganda, this right is upheld by the 1995 Constitution. The fourth National Development Plan (NDP IV) highlights the commitment to providing accessible, relevant, and quality education, training, and sports services for all.

### 3.4.1. Never attended school

Figure 3.7 shows that 13 percent of the population aged 18 and above had never attended any formal schooling with a higher share among females (17%) than males (7%). The proportion of those who had never attended school was higher among rural residents (16%) compared to urban residents (8%). (Table 2.2)

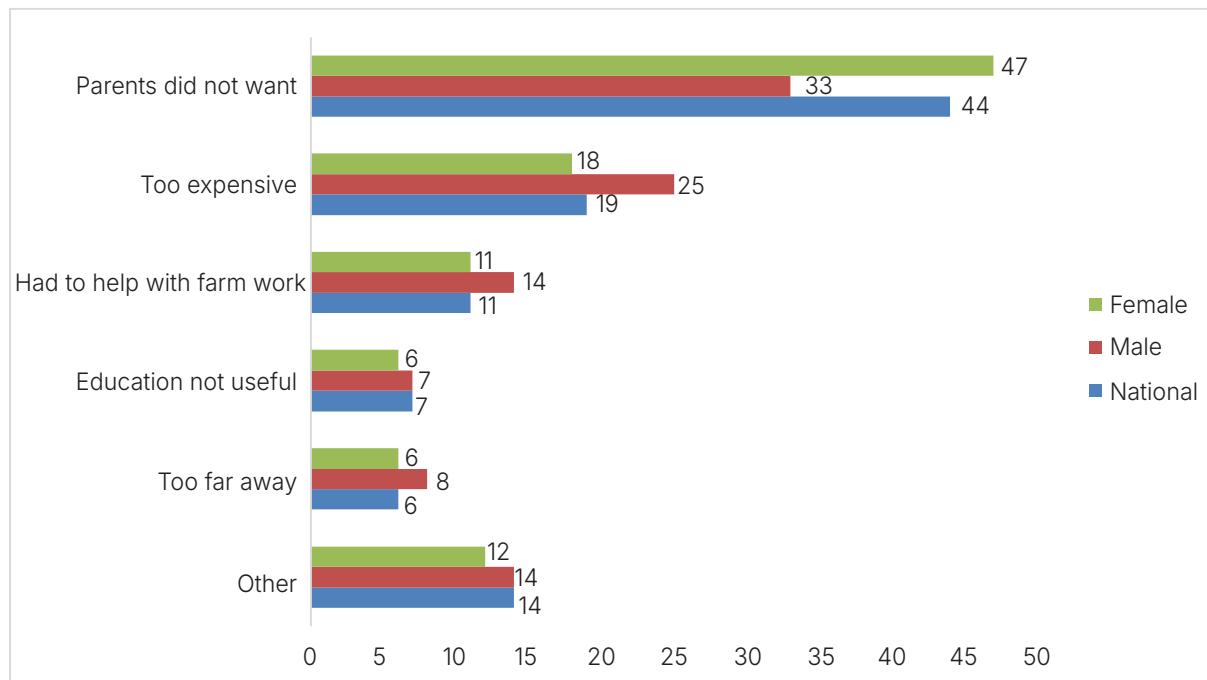

**Figure 3.7. Proportion of the population aged 18 and above that have never attended school by sex and residence (%)**

### 3.4.2. Reasons for not attending school

Figure 3.8 shows that the main reason for never attending school for persons aged 18 and above was because their parents did not want to (44%) with higher proportion among females (47%) than males (33%). A higher proportion of males (7%) never attended school because they believed education is not useful compared to females (6%). A similar pattern was observed for males (25%) who had left school because it was too expensive compared to females (18%).

**Figure 3.8. Proportion of the population aged 18 and above that never attended school by reason of not attending**

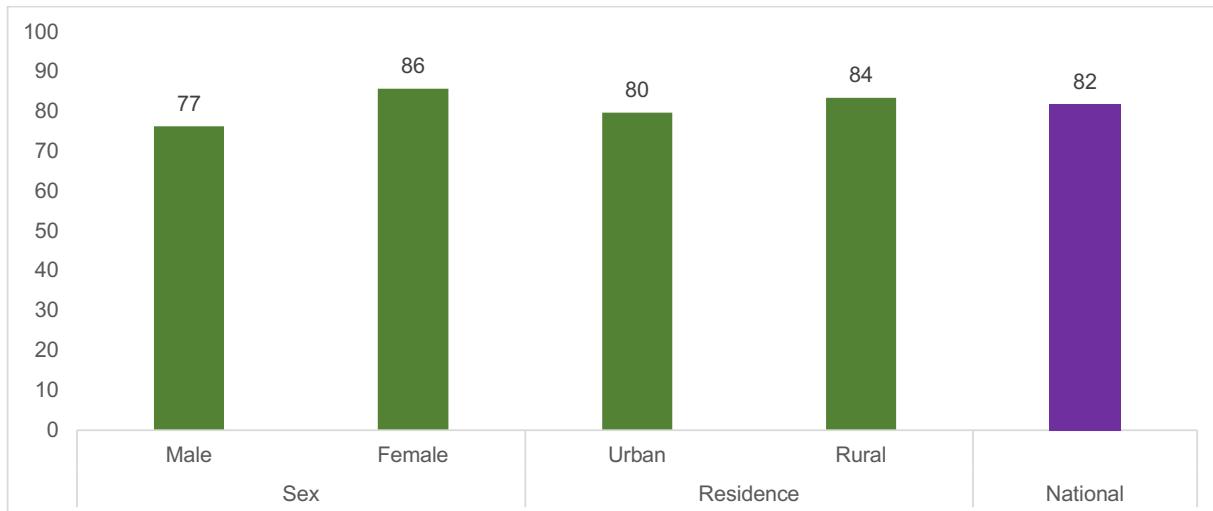

\*\*others include covid 19 pandemic, death of parent, fell sick, got an accident....

### 3.4.3. Attended school in the past

Figure 3.9 shows that 82 percent of the population aged 18-24 had attended in the past with higher proportion of females (86%) compared to that of males (77%). Variation by residence shows that a higher proportion of rural residents (84%) than urban residents (80%) had attended school in the past.

**Figure 3.9. Proportion of the population aged (18-24) that attended school in the past by sex and Residence**

### 3.5. Right to Work

Article 40 of the 1995 Constitution of Uganda calls on Parliament to enact laws "to provide for the right of persons to work under satisfactory, safe, and healthy conditions". the Fourth National Development Plan (NDPIV), seeks to promote decent employment opportunities and employment for sustainable socioeconomic transformation. The 2016 National Employment Policy also reaffirms that employment creation is central to Uganda's economic development and transformation.

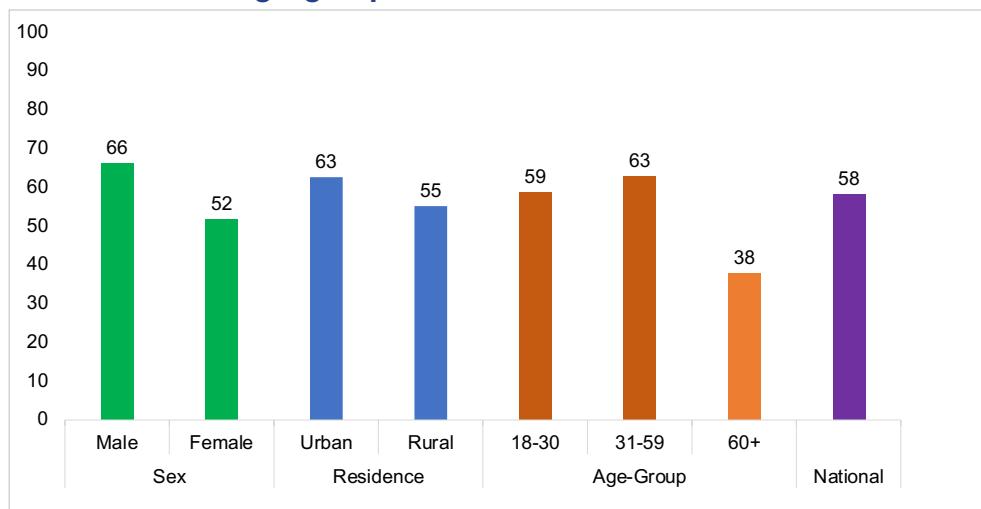

The NGPSS 2024/25 collected information on the working status of the persons aged 18 and above and the working environment for those actively engaged in work.

#### 3.5.1. Working Population

According to the International Labour Organization (ILO) "Work comprises any activity performed by persons of any sex and age to produce goods or to provide services for use by others or for own use." The working population is therefore the population engaged in economic activities. Work is different from employment which is work for pay or profit.

Figure 3.10 shows that, overall, 58 percent of the population aged 18 and above were working, with a higher proportion for males (66%) than females (52%). Urban residents (63%) comprised a higher proportion of the working population compared to rural residents (55%). The population aged 31-59 had the highest proportion of individuals who were working (63%), relative to other age groups.

**Figure 3.10. Proportion of population aged 18 and above that was working by sex, residence and age-group**

#### 3.5.2. Working Environment

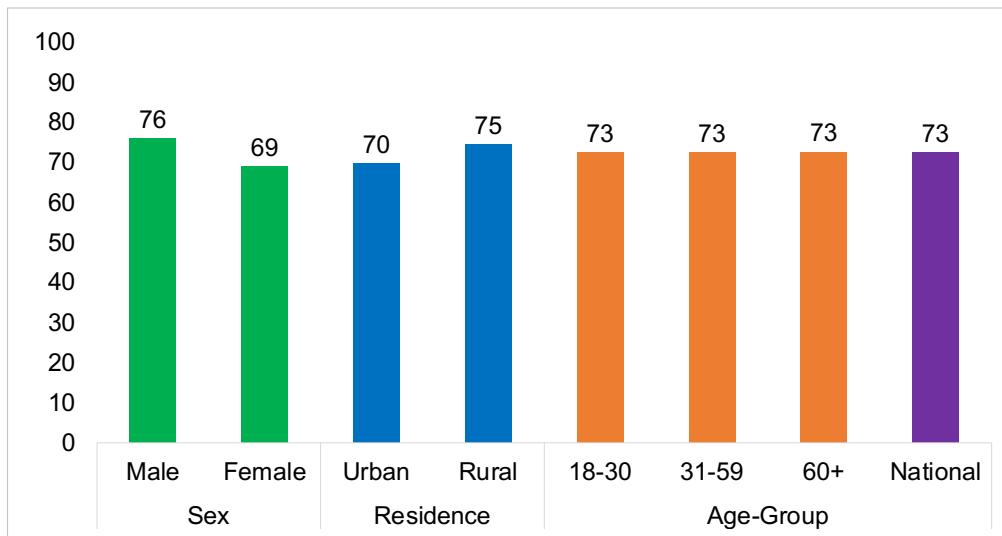

The right to health and safety at work is a fundamental human right, as recognized in the Occupational Health and Safety Act, 2006. In a competitive work environment, this right is often overlooked, compromising the well-being and dignity of workers. It is therefore essential that workplaces are regularly assessed to identify existing or potential hazards that may require the use of personal protective equipment. Reducing or eliminating

occupational hazards not only prevents injuries and diseases but also minimizes lost work time and ensures a safe working environment an entitlement for every worker. To better understand workplace safety, the working population aged 18 and above was asked additional questions regarding whether their workplaces posed any harm to them and if they are provided with protective gear.

This question revealed that overall, 73 percent of the population aged 18 and above worked in harmful environments, and 22 percent are provided with protective gear. A higher proportion of males (76%) compared to females (69%) reported working in harmful environments in 2024/25. Age disaggregation showed that the proportion of individuals working in harmful environments was relatively uniform across age groups, at 73 percent. Additionally, rural residents (75%) reported to be engaged in harmful work environments than their urban counterparts (70%). Bunyoro (96%) and Tooro (93%) show a very high exposure to harmful environments but also the highest provision for protective gear (44% and 40% respectively) (Figure 3.11 & Table 3.5).

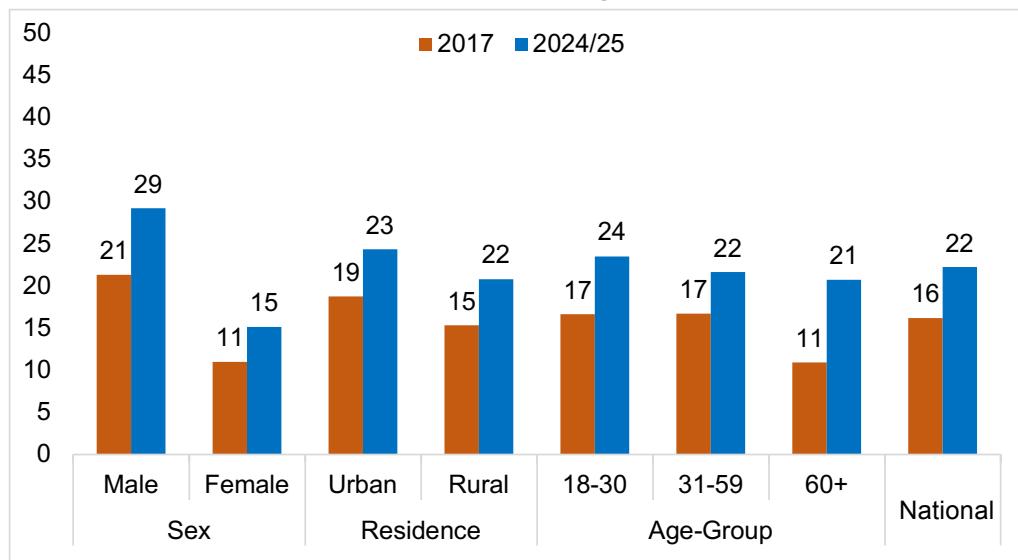

Overall, the proportion of persons working in harmful environments increased significantly from 41 percent in 2017 to 73 percent in 2024/25, indicating a growing concern for health and safety. Similarly, the proportion of workers provided with protective gear rose from 16 percent to 22 percent during the same period. However, this increase remains modest in comparison to the sharp rise in exposure to hazardous work environments (Figure 3.11 & Figure 3.12 & Table 3.5).

**Figure 3.11. Trend of the proportion of the population aged 18 and above working in harmful environments**

Sex variations show that a higher proportion of men than women aged 18 and above had received protective equipment, with 29 percent of men provided with safety gear compared to 15 percent of women. Age variation show that the highest proportion of persons who were provided with protective gear were those aged 18–30 at 24 percent, followed by those aged 31–59 at 22 percent, and individuals aged 60 and above at 21 percent (Figure 3.12 & Table 3.5).

**Figure 3.12. Trend of the proportion of the population aged 18 and above working in Harmful environments with Protective gears**

### 3.5.3. Paid Leave

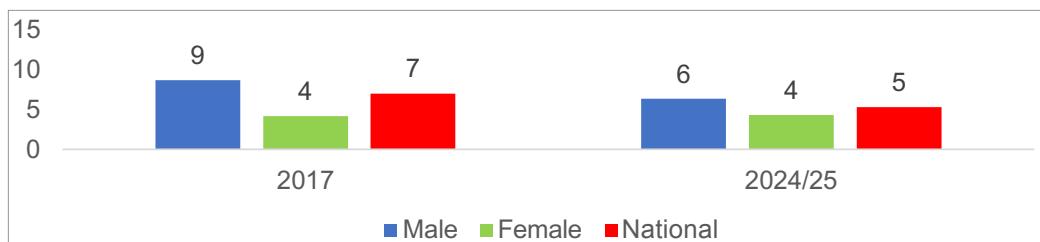

Paid leave is the period during which workers take time away from their work while continuing to receive an income and an entitlement to social protection. Paid leave preserves workers' human capital because it provides a period of rest and recovery that enables them to remain healthy. At the same time providing paid leave can enhance workers' motivation and promotes their well-being in general.

The 2006 Uganda Employment Act stipulates that every employee is entitled to both annual leave and public holidays with full pay. The survey collected information on entitlement to paid leave for all working persons aged 18 years.

Figure 3.13 shows that five percent of persons working were entitled to paid leave a decrease from seven percent in 2017. Sex differentials observed among the working persons reveal that a high proportion of males had paid leave (6% in 2024/25 and 9% in 2017) compared to the females (4% in 2024/25 and 4% in 2017).

The disaggregation by residence reveals that in 2024/25, a higher proportion of the working population aged 18 and above with paid leave (89%) resided in urban areas (8%) compared to those in rural areas (4%). Additionally, the majority of those with paid leave were aged between 31 and 59 years (6%), which was higher than in other age groups (Table 3.6).

**Figure 3.13. Trend of the Population aged 18 and above with Paid Leave, (%)**

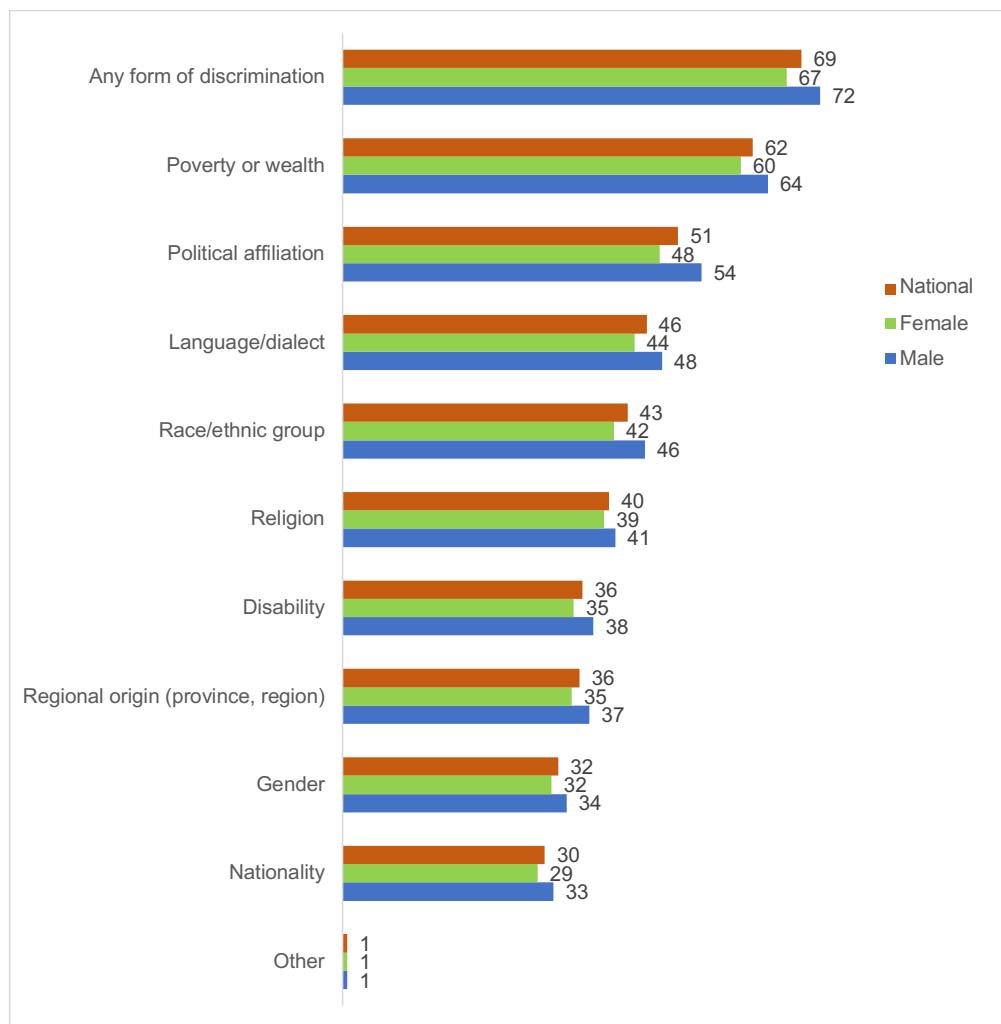

## 3.6. Denial of Human Rights through Discrimination

### 3.6.1. Perception on different Types of Discrimination

Population aged 18 and above during the survey were asked if they thought there was discrimination related to the different types. Figure 3.14 and Table 3.7 show that 69 percent of the persons 18 and above perceive that there was some form of discrimination. The most common forms of discrimination were based on poverty or wealth (62%), political affiliation (51%), language/dialect (46%) and race/ ethnicity (43%) while least was based on the persons nationality (30%) and Gender(32%).

**Figure 3.14. Perception of different Types of Discrimination by sex. (Population aged 18 and above)**

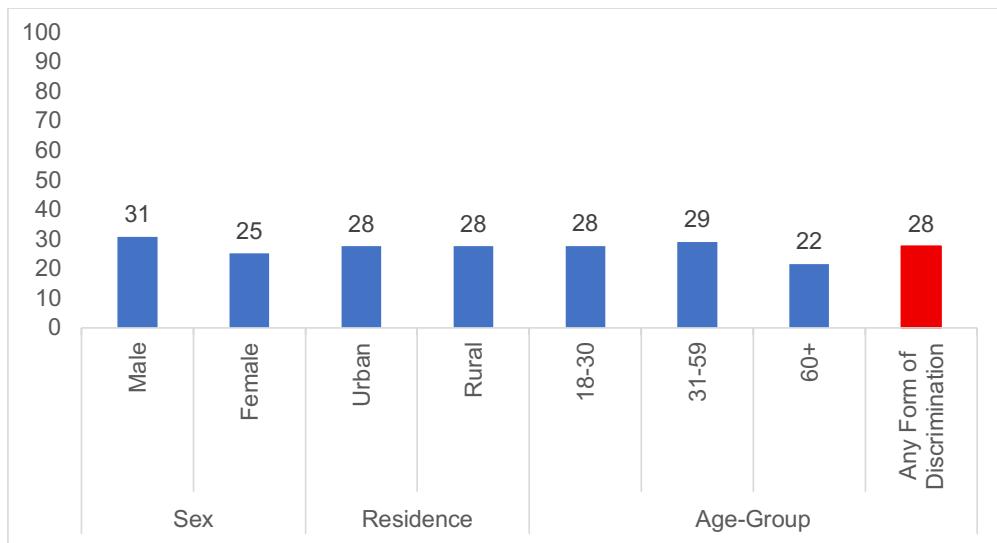

### 3.6.2. Prevalence of different Types of Discrimination

Population aged 18 and above were further asked whether they had been discriminated 12 months prior to the survey. Therefore the Figure 3.15 presents the proportions of person aged 18 and above who perceived that they had been discriminated against in the 12 months preceding the survey. Overall, nearly three in ten individuals (28%) reported being victims

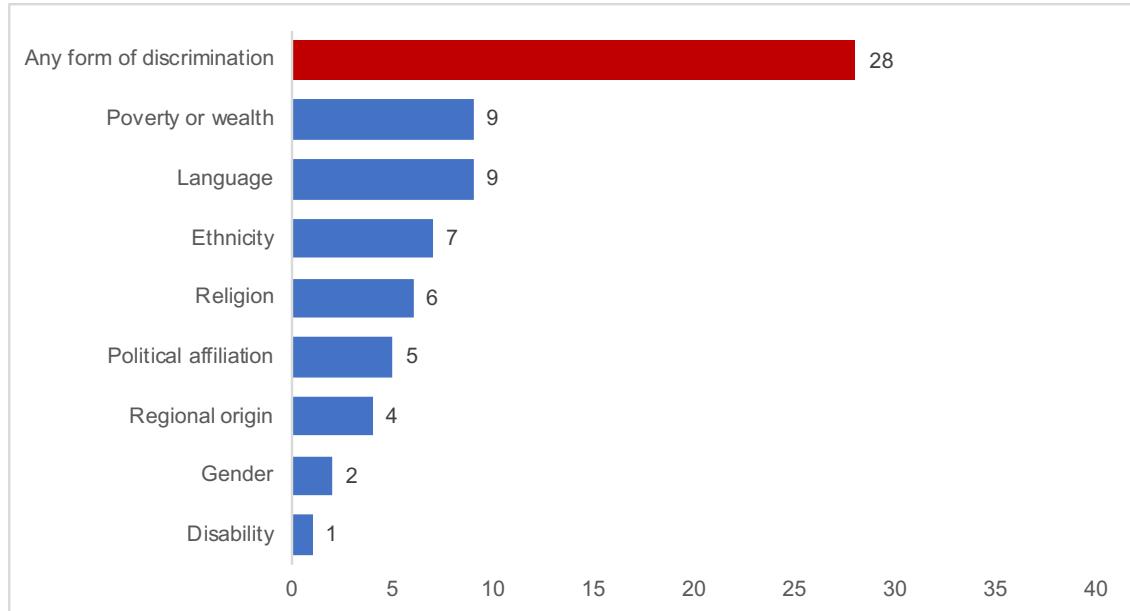

of at least one form of discrimination, with higher proportions observed among males (31%) and persons aged 31–59 years (29%) compared to their respective counterparts.

Poverty or wealth and language were the most commonly reported forms of discrimination both at (9%), followed by discrimination based on ethnicity at (7%) and, the least reported was discrimination based on disability at (1%) which may reflect either lower prevalence or underreporting due to stigma or lack of awareness. (Figure 3.16).

**Figure 3.15. Prevalence of at least One Form of Discrimination by selected Background characteristics (%)**

**Figure 3.16. Prevalence types of Discrimination among population aged 18 and above, (%)**

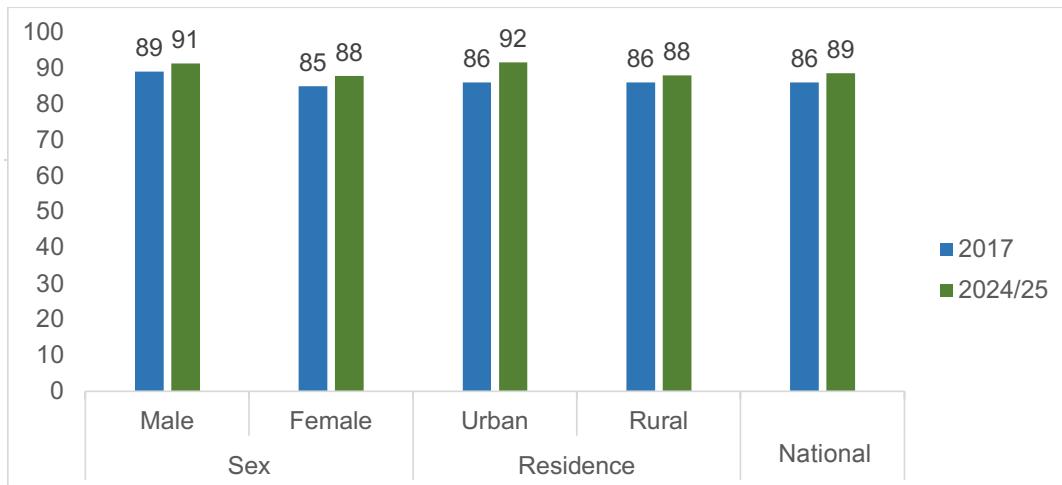

## 3.7. Access to Justice

Access to Justice is a basic principle of the rule of law. The NDP IV seeks to Promote the justice law and order, justice service delivery system and access to Justice for socio-economic development. The promotion of access to justice enables a country's population to have their voice heard, exercise their rights, challenge discrimination or hold decision-makers accountable. Delivery of justice should be impartial and non-discriminatory. Independence of the judicial system, together with its impartiality and integrity is an essential prerequisite for upholding the rule of law and ensuring that there is no discrimination in the administration of justice. It is upon states to take all necessary steps to provide fair, transparent, effective, non-discriminatory and accountable services that promote access to justice for all.

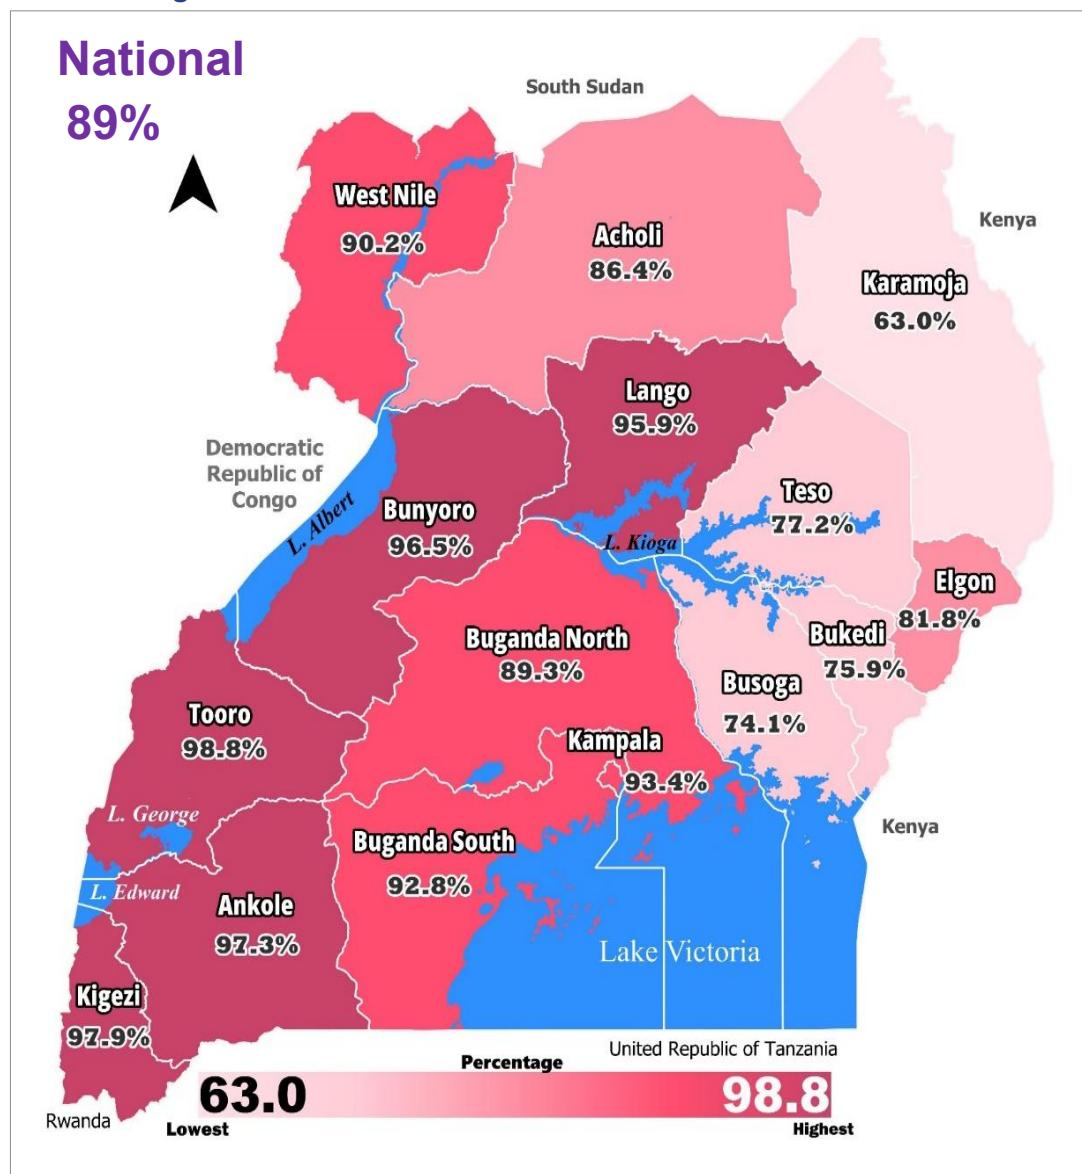

### 3.7.1. Awareness of the rights to seek Justice

The survey sought to find out whether the population was aware of their right to seek justice, and the knowledge of the institution's justice could be sought from. Overall, the level of awareness of the right to seek justice among the population aged 18 and above was 89 percent, an increase from 86 percent in 2017. Awareness was higher among persons living in urban areas (92%) compared to those in rural areas (88%). Tooro (99%) and Kigezi (98%) recorded the highest level of awareness on the right to seek justice while Karamoja Sub region recorded the lowest (63%) (Figure 3.17 and Table 3.9).

**Figure 3.17. Trend in the proportion of the population aged 18 and above aware of their right to seek justice by selected background characteristics**

**Figure 3.18. Population aged 18 and above who were aware of their right to seek justice by Sub region**

### 3.7.2. Awareness of institution that offer legal services

The findings in Figure 3.19 indicated that awareness of institutions where justice can be sought is generally high across the population, with a national average of 89 percent. However, slight variations exist across different population groups. Males (90%) had slightly higher proportion of awareness than females (88%); urban residents (90%) had higher levels of awareness compared to their rural counterparts (88%). By age group, awareness was highest among those aged 31–59 years (90%) and lowest among those aged 60+ (85%).

Tooro (96%) and Kigezi (96%) had the highest level of awareness of institution where justice is sought while Karamoja Sub region (70%) and Lango Sub region (70%) had the lowest (Table 3.9).

**Figure 3.19. Population aged 18 and above who were aware of their right to seek justice the proportion who knew justice institutions by sex, residence and age group.**

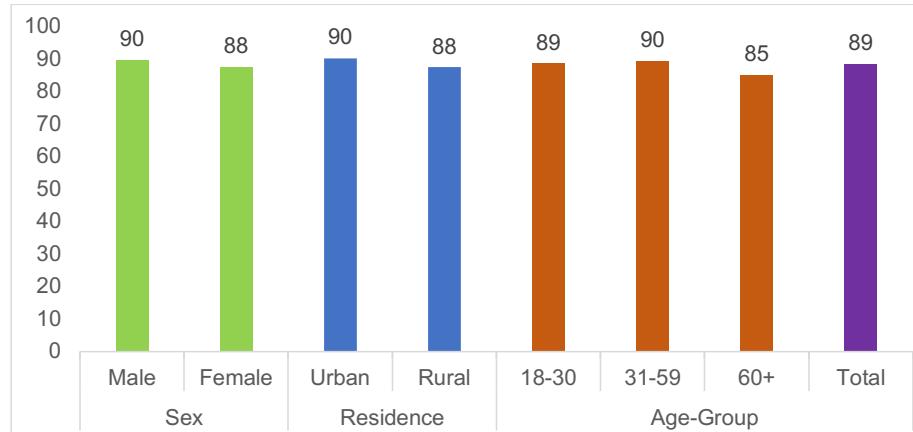

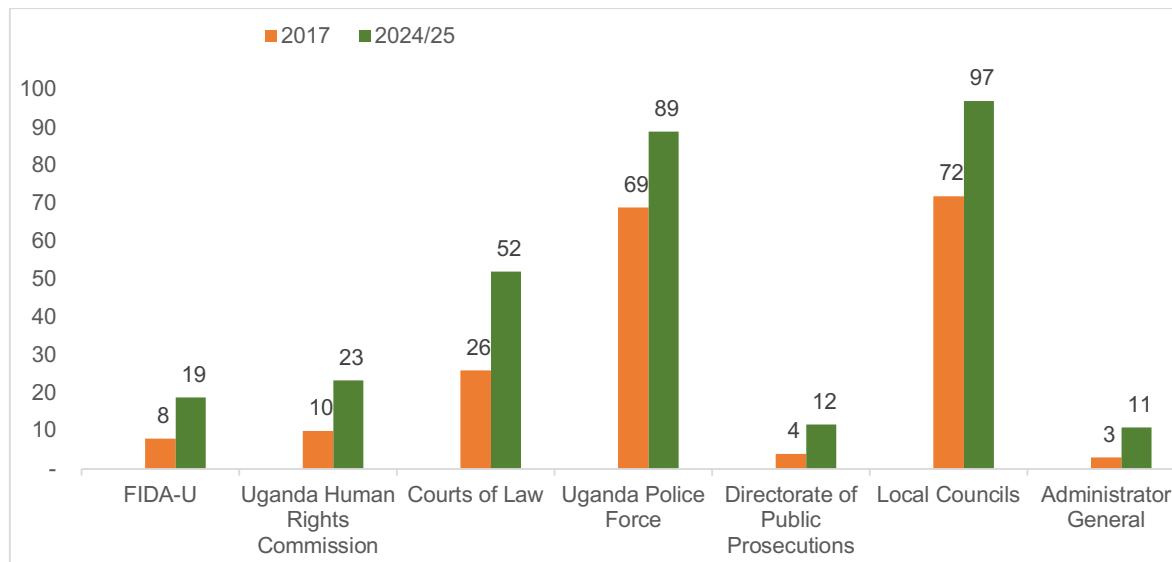

Figure 3.20 shows varying levels of public awareness regarding institutions that provide justice. Local councils were the most recognized justice institutions with 97 percent followed by Uganda police force (89%). The office of the Administrator General was the least recognized justice institution with 11 percent. (Table 3.10). The results further show a general increase in knowledge for all justice institutions.

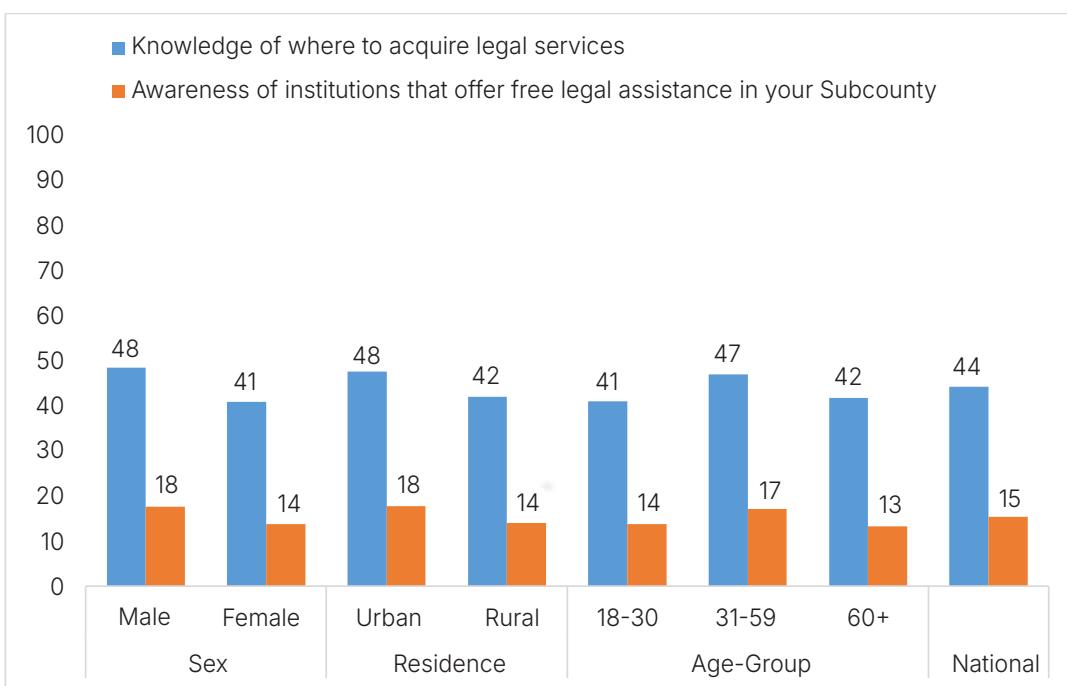

**Figure 3.20. Trends of the proportion of the population aged 18 and above who were aware of the different justice institutions (%)**

### 3.7.3. Awareness of institutions offering free legal services and knowledge of where to access legal assistance

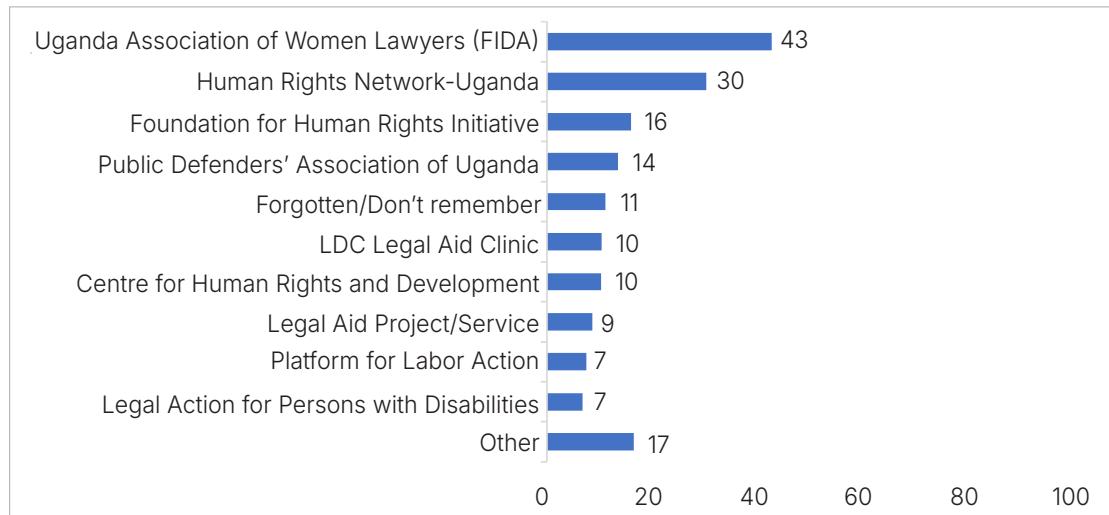

Figure 3.21 shows that overall, 44 percent of the population aged 18 and above reported knowing where to access legal services, while 15 percent were aware of institutions that offer free legal assistance. Males demonstrated higher levels of both knowledge (48%) and awareness (18%) compared to females (41% and 14%, respectively). Similarly, urban residents were more informed than their rural counterparts, with 48 percent knowing where to access legal services and 18 percent aware of free legal aid providers, compared to 42 percent and 14 percent in rural areas. (Table 3.11).

**Figure 3.21. Proportion of population aged 18 and above who have knowledge of where to acquire legal services and were aware of institutions that offer free legal services, 2024/25**

The findings in Figure 3.22 reveal varying levels of public awareness regarding institutions that offer free legal services in Uganda. The Uganda Association of Women Lawyers (FIDA) was the most recognized, with 43 percent of population aged 18 and above identifying it as a provider of free legal aid, followed by the Human Rights Network-Uganda (30%) and the Foundation for Human Rights Initiative (16%). Other institutions such as the Public Defenders' Association of Uganda had 14 percent, while LDC Legal Aid Clinic had 10 percent. Awareness was particularly low for Legal Action for Persons with Disabilities (7%). (Table 3.12)

**Figure 3.22. Awareness of population aged 18 and above of institutions that provide free legal services (legal aid) (%)**

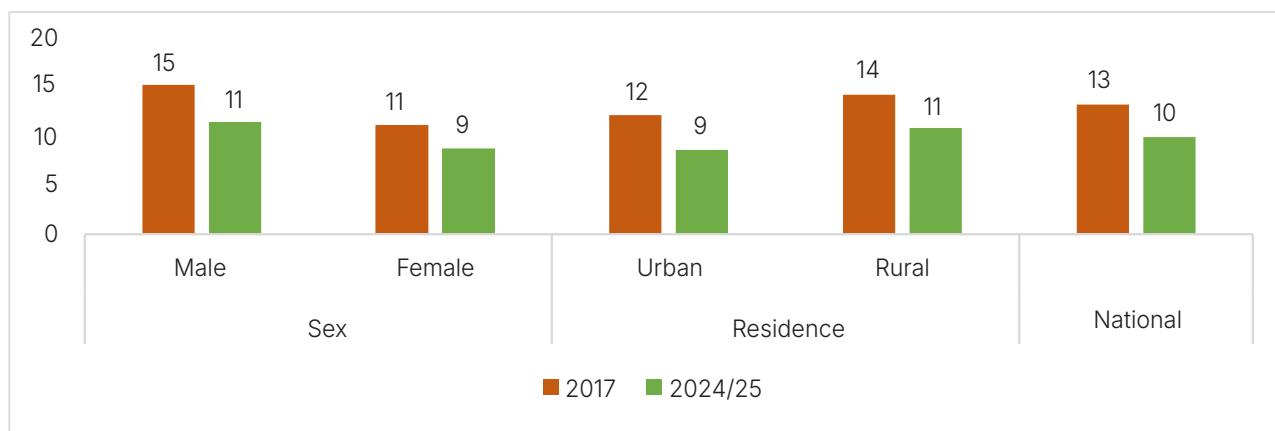

### 3.7.4. Informal Justice System

Informal justice systems refer to community-based mechanisms for dispute resolution that operate outside the formal court structures. These systems rely on traditional, cultural, or religious leaders and community elders to mediate conflicts and promote reconciliation. In Uganda, informal justice mechanisms play a vital role in complementing the formal justice system, particularly in areas where access to formal institutions may be limited.

The 2024/25 National Governance, Peace and Security Survey sought to establish the extent to which individuals had utilized informal justice systems in the 12 months preceding the survey.

Figure 3.23 shows that 10 percent of the population used the informal justice system to resolve a dispute in the 12 months preceding the survey, a decline from 13 percent in 2017. Sex differentials were minimal for males (11%) and (9 %) of females reported to have used the informal justice system to resolve disputes. Furthermore, slightly higher proportions in rural areas (11 %) used the informal system for justice resolution compared to those in urban areas (9 %). (Table 3.13)

**Figure 3.23. Trend of the proportion of the population aged 18 and above who used the informal Justice system by selected background characteristics (%)**

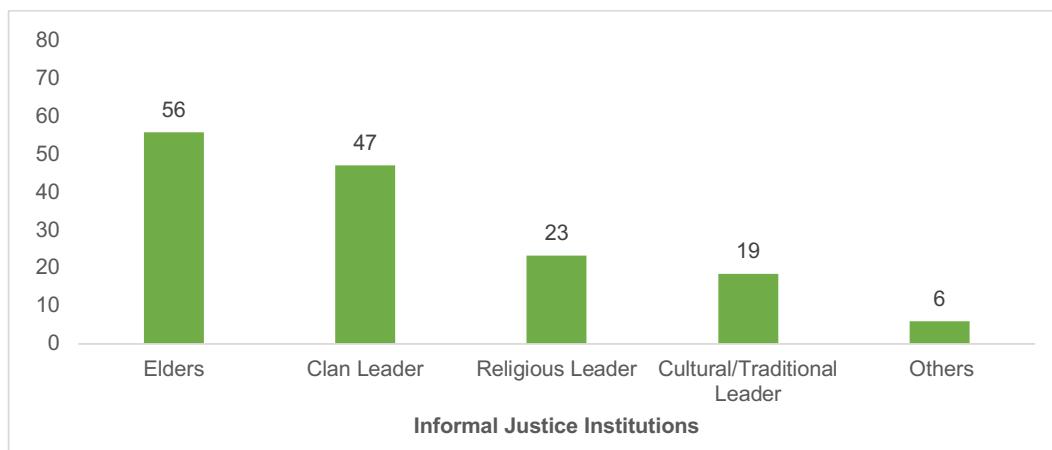

### 3.7.5. Institution or Persons used in informal justice system

The population aged 18 and above who sought non formal justice were requested to state the type of personnel that assisted during the delivery of informal justice.

Figure 3.24 shows that the proportion of the population who used the informal justice system during the 12 months preceding the survey by the type of system used had Elders (56%) as the most utilised system, followed by clan leaders (47%) and religious leaders at (23%). (Table 3.15)

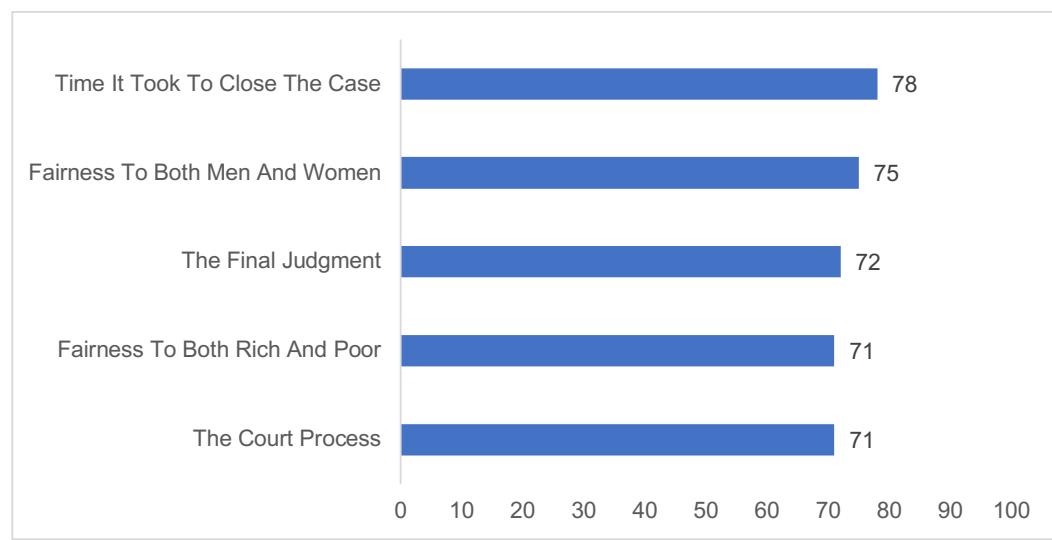

**Figure 3.24. Proportion of the Population aged 18 years that used the Informal Justice system to resolve a dispute by type of Institution**

### 3.7.6. Satisfaction with Informal Justice Institutions

Among persons who used the informal justice system for dispute resolution, 78 percent were satisfied with the time taken to close the case, while 75 percent were satisfied with the fairness to both men and women. Furthermore, 72 percent expressed satisfaction with the final judgment, and 71 percent were satisfied with both the court process and the fairness to the rich and the poor. (Figure 3.25 & Table 3.15)

**Figure 3.25. Proportion of the population aged 18 and above who were Satisfied with Various aspects of Informal Justice Institutions, (%)**

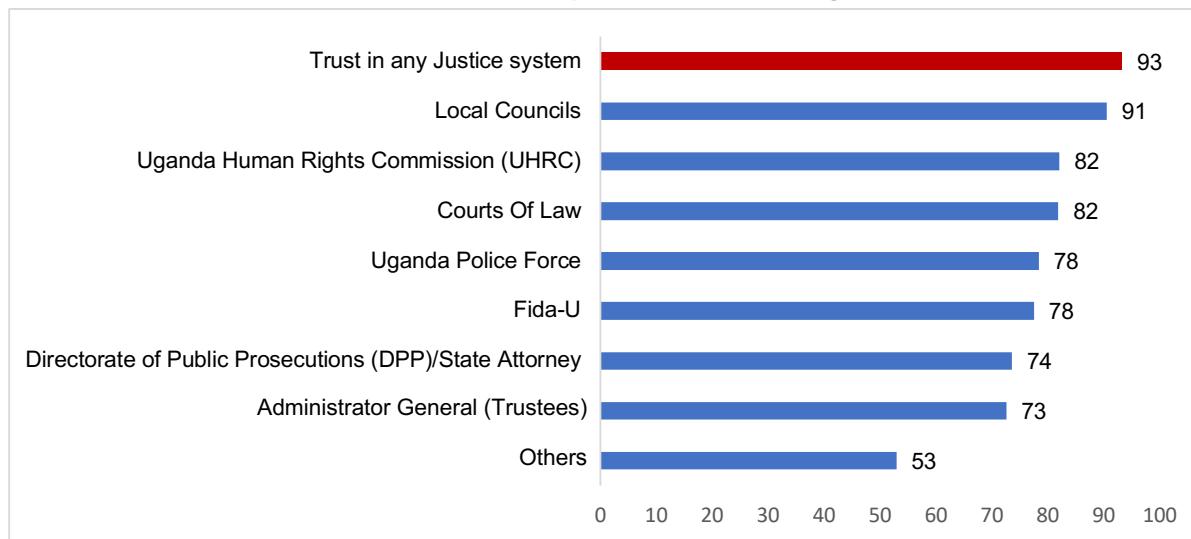

### 3.7.7. Trust in Justice Institutions

Figure 3.26 shows that 93 percent of the population aged 18 and above trust in any justice system, with Local Councils (91%), Uganda Human Rights Commission (82%), and Courts of Law (82%) receiving the highest levels of public confidence. Institutions like the Uganda Police Force (78%) and FIDA-U (78%) also recorded strong trust levels, while the

Directorate of Public Prosecutions (74%) and Administrator General (73%) received slightly lower ratings. (Table 3.16)

**Figure 3.26. Trust in Justice Institutions by the population aged 18 and above**

During the survey, the population aged 18 and above were asked if they had been coerced from seeking justice in the last 12months prior to the survey. Figure 3.27 shows that 9 percent of the population aged 18 and above were restrained from seeking justice. The most common sources of restraint from seeking for justice were family member (4%), traditional leader (4%) and community leader (3%).

**Figure 3.27. Proportion of the population aged 18 and above who were restrained from seeking for justice during the last 12 months by source of restraint (%)**

\*Others include NGO, army, UPS, UPF

### 3.8. Knowledge and belief in patriotism

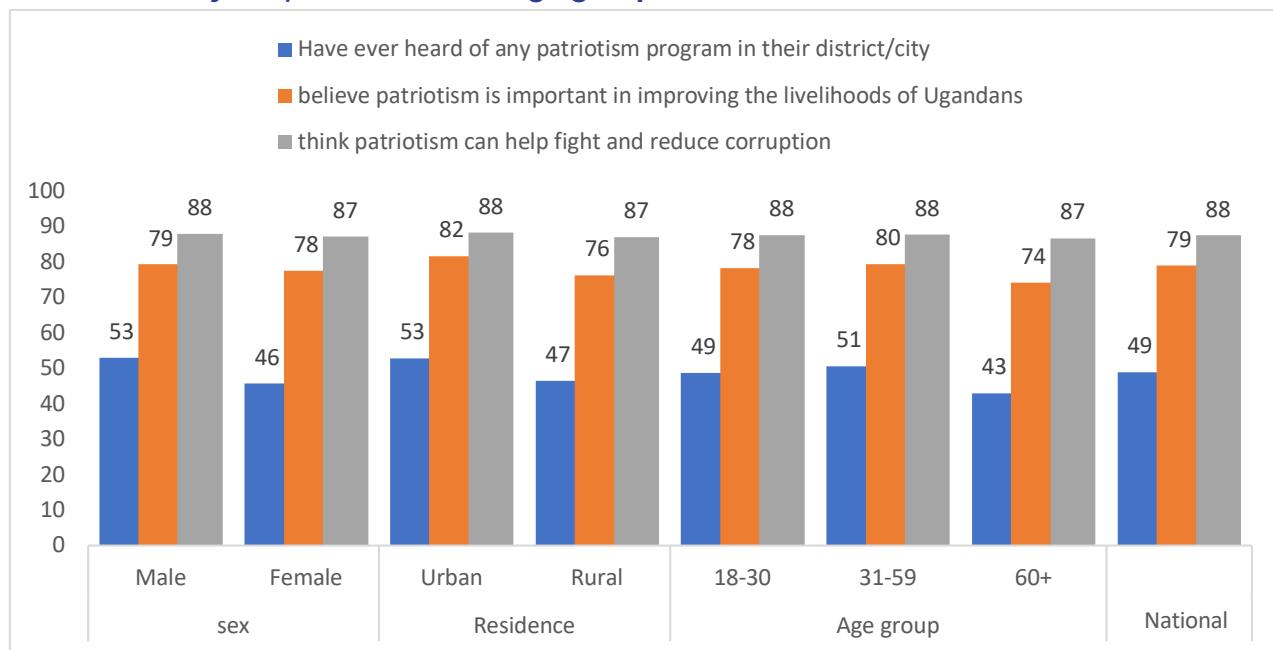

Patriotism is the love, loyalty, and devotion one feels toward their country, often reflected in pride for its history, culture, and values. It involves a sense of responsibility to support, protect, and contribute to the nation's well-being through actions such as obeying laws, participating in civic duties, and promoting unity and development. Unlike extreme nationalism, patriotism encourages pride without diminishing respect for other nations.

Population aged 18 and above were asked whether they had ever heard of any patriotism program in their district or city, whether they believe patriotism is important for improving people's livelihoods, and whether they think patriotism can contribute to fighting and reducing corruption.

Overall, 49 percent of population aged 18 and above reported having heard of a patriotism program in their district or city, while 78 percent believed that patriotism is important in improving livelihoods, and 88% thought it could help fight and reduce corruption. Disaggregation by sex reveals that a higher proportion of males (53%) compared to females (46%) have heard of patriotism programs and to believe in the positive impact of patriotism on livelihoods and corruption reduction. Similarly, urban residents reported higher awareness levels (53%) and belief in the role of patriotism in improving livelihoods (82%) compared to rural residents (47% and 76%, respectively). Belief in patriotism's role in fighting corruption was equally high in both urban and rural (88% and 87%).

By age, awareness of patriotism programs was highest among those aged 31–59 years (51%), followed by youth aged 18–30 (49%), and lowest among those 60 years and above (43%). (Figure 3.28 & Table 3.18).

**Figure 3.28. Proportion of the population aged 18 and above perceptions on Patriotism, by sex, residence and age group**

Chapter 4

# DEMOCRACY AND ELECTORAL SYSTEMS

## Key Findings

- ⦿ **Awareness of Citizen's right to vote:** Ninety-four percent of the population aged 18 and above were aware of their right to vote.
- ⦿ **Access to electoral information:** Seventy five percent of the population aged 18 and above were able to check the voters' register in the 2021 general elections, a decrease from 81 percent in the 2016 general elections.
- ⦿ **Membership to Political parties:** Twenty-four percent of the population aged 18 and above were members of the Political parties. The youth comprised 18% of members in political parties.

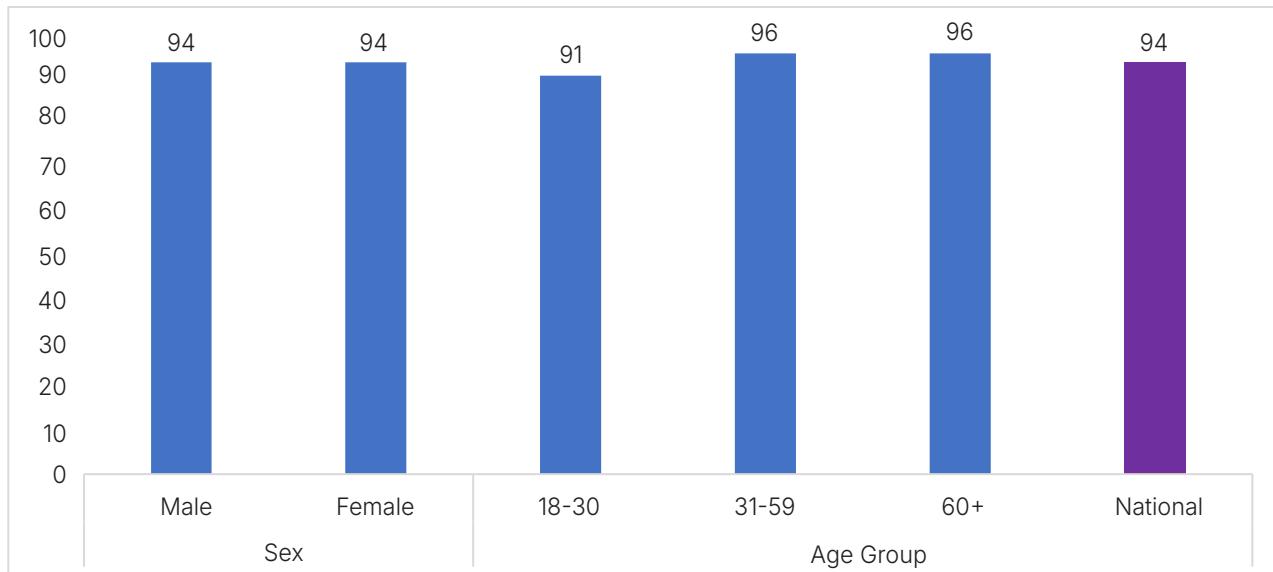

### 4.1. Introduction

Uganda is a representative democracy with a multi-party parliamentary system, committed to holding regular, free, and fair elections. The country conducts elections for the President, Members of Parliament and Local Governments

### 4.2. Awareness of Citizen's right to vote

Figure 4.1 shows that 94 percent of the population aged 18 and above were aware of their right to vote. Slightly higher proportion of persons aged 31-59 (96%) and 60+ (96%) were aware of their right to vote compared to those aged 18-30 (91%). Males (94%) and females (94%) were equally aware of their right to vote.

**Figure 4.1. Awareness of the right to vote by sex and age group, (%)**

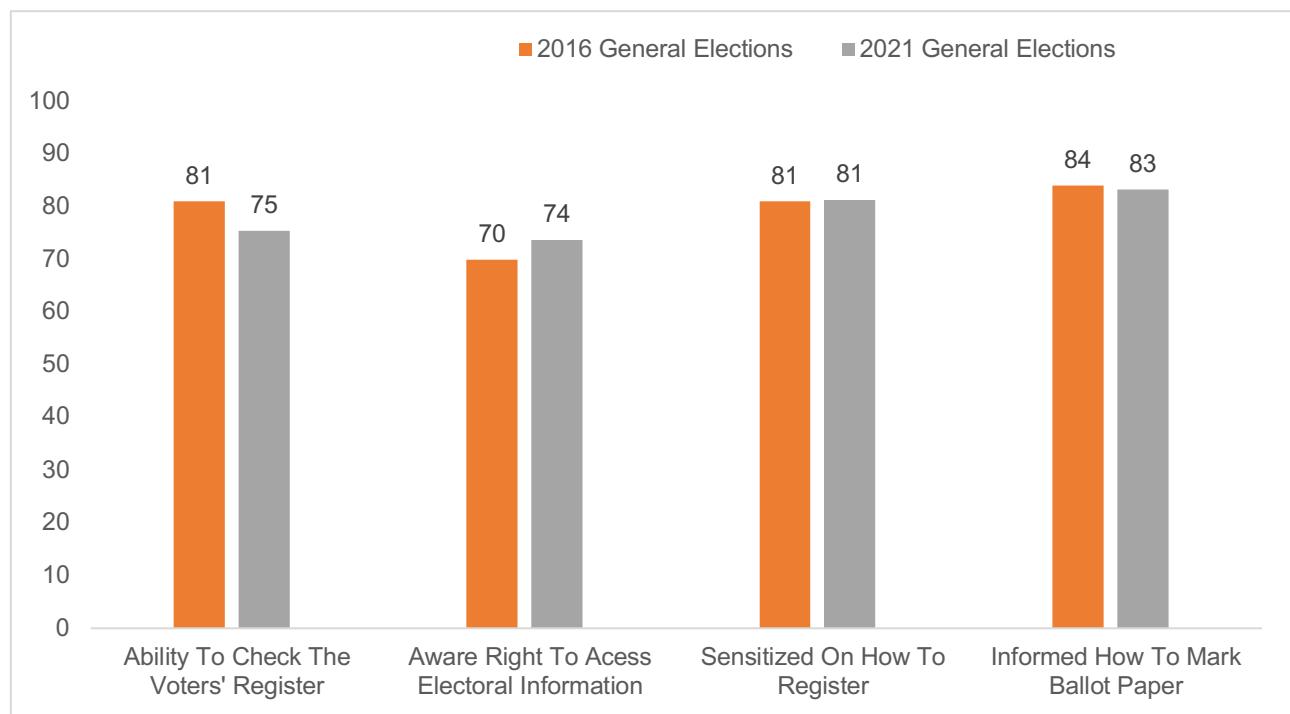

### 4.3. Access to electoral information

Any credible elections require space for knowledge exchange for all voters and those to be voted for. Any misinformation is likely to disrupt the functioning of electoral processes.

The survey showed different levels of awareness and preparedness among citizens regarding electoral processes. Table 4.2 and Figure 4.2 show that 75 percent of population aged 18 and above as of 2021 were able to check the voters' register during the 2021 general elections, a decrease from 81 percent during the 2016 general elections. Seventy-four percent of population aged 22 and above were aware of their right to access electoral information in 2021, an increase from 70 percent during the 2016 general elections.

**Figure 4.2. Proportion of population aged 18 and above that had access to electoral information and voters' sensitization during the 2016 and 2021 general elections**

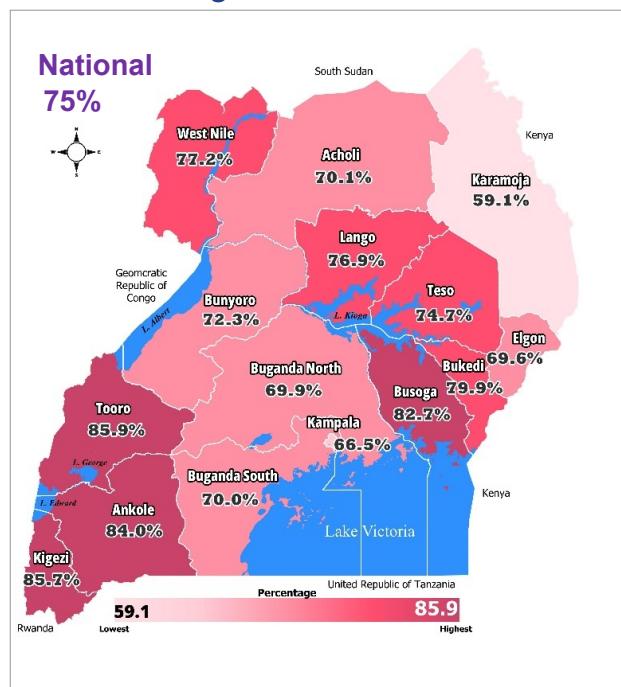

\*\* information collected in 2017

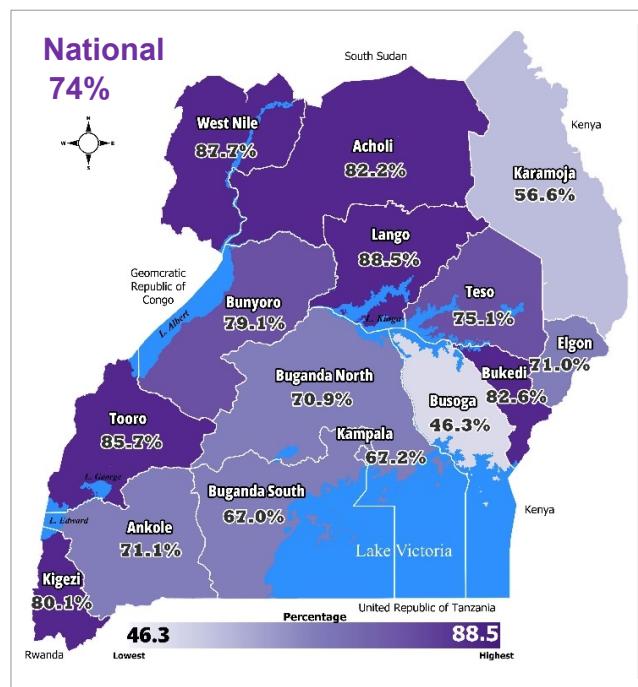

\*\*\* information collected in 2024/25

During the survey, the population aged 18 and above were asked their experience regarding the level of preparedness during the previous general elections. Figure 4.3 shows that Karamoja Sub region had the least (59%) population aged 22 and above who were able to check voters' register and Tooro had the highest percent (86%). Figure 4.4 shows that Lango Sub region had the highest percent (89%) and Busoga Sub region (46%) had the least percent of proportion that was aware of their right to access electoral information. Figure 4.5 shows Population aged 22 and above who were informed how to mark the ballot with the highest in Kigezi (92%) and lowest in Buganda South Sub region (75%). Fig 4.6 shows the Population aged 22 and above who were sensitized on how to register was highest in Kigezi (92%) and lowest in Buganda south (72%).

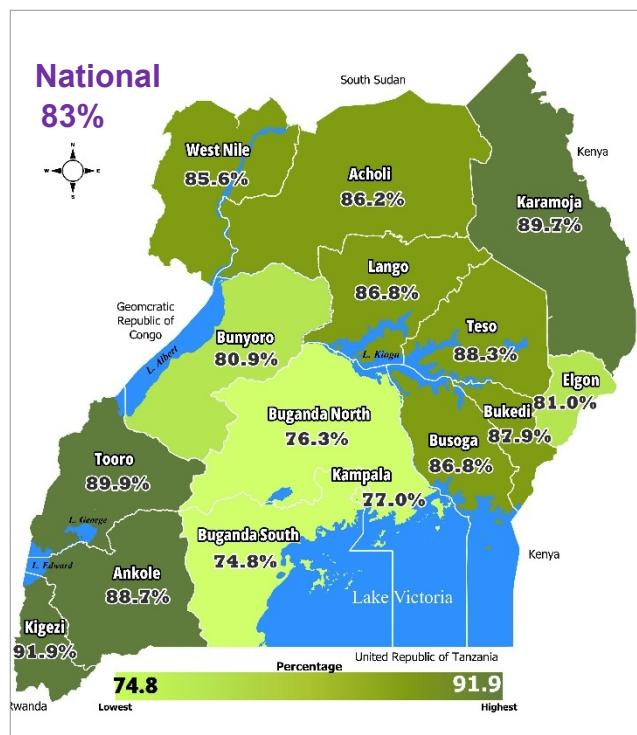

**Figure 4.3. Population aged 22 and above who were able to check voters' register**

**Figure 4.5. Population aged 22 and above who were informed how to mark the ballot**

**Figure 4.6. Population aged 22 and above who were sensitized how to register**

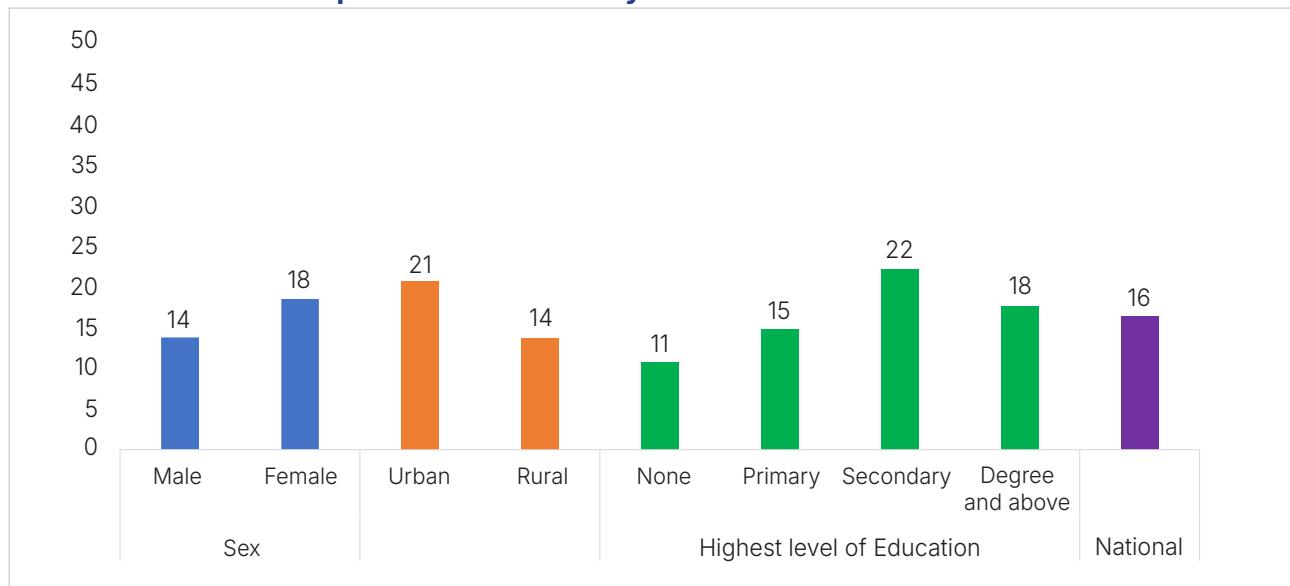

## 4.4. Political Participation

In Uganda, the right to political participation is guaranteed under Article 1(1) of the Constitution, which affirms that "All power belongs to the people who shall, through regular, free and fair elections, express their will and consent on how and by whom they shall be governed." Political participation is rooted in fundamental freedoms i.e. freedom of speech, assembly, and association and it encompasses the right to take part in public affairs, to register as a candidate, to campaign, and to contest for, and hold public office at all levels of Government.

### 4.4.1. Voter Registration

Figure 4.7 shows that 16 percent of the population aged 18 as of 2021 were not registered to vote in the previous elections. The variation among residents show that urban (21%) had a higher proportion of residents who were not registered to vote compared to rural (14%) during the 2021 general elections.

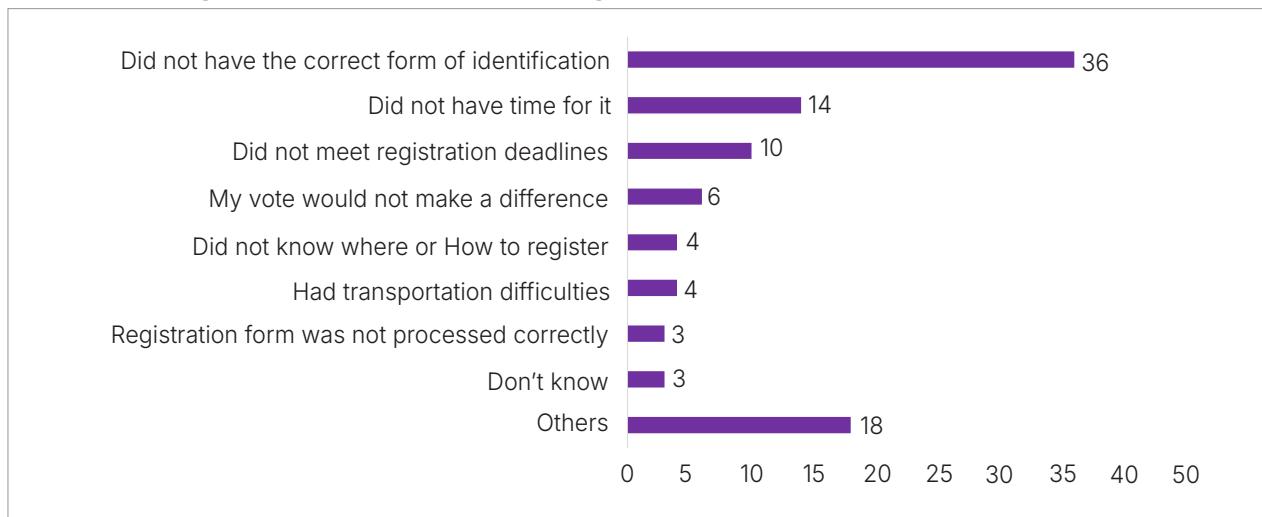

**Figure 4.7. Proportion of the population aged 22 and above that were not registered to vote in the previous elections by residence and sex**

### 4.4.2. Reasons for not being registered to vote

Reasons for individuals not being registered to vote in the 2021 general elections included not having the correct form of identification (36%), which was the highest followed by did not have time for it. Other notable reasons consist of failing to meet registration deadlines (10%) as shown in Figure 4.8.

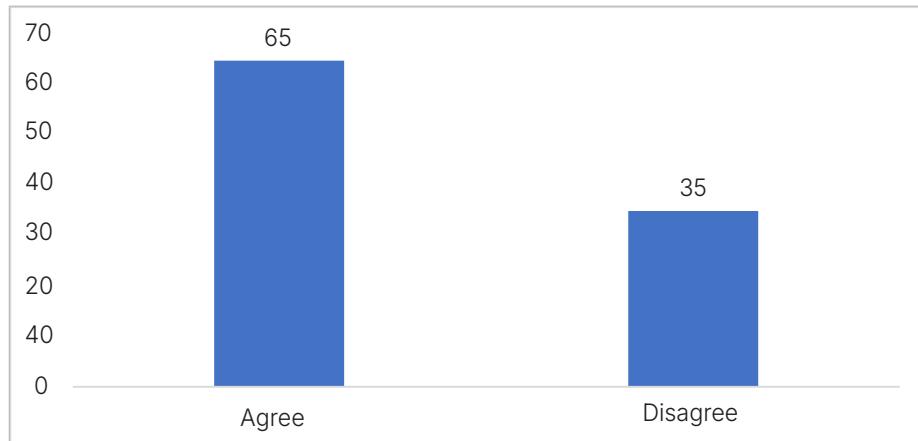

**Figure 4.8. Proportion of the population aged 18 and above by reasons for not being registered to vote in the 2021 general elections**

#### **4.4.3. Equal facilitation of all presidential candidates**

The survey collected information on whether the population aged 18 and above were in agreement with all presidential candidates being facilitated equally by the electoral commission during the last presidential elections. A higher proportion of population aged 18 and above (65%) agreed that the Electoral Commission facilitated all presidential candidates equally during the 2021 elections compared to (35%) who disagreed. (Figure 4.9 and Table 4.3).

**Figure 4.9. Proportion of the population aged 18 and above who stated that all presidential candidates were equally facilitated by the electoral commission in the 2021 presidential elections**

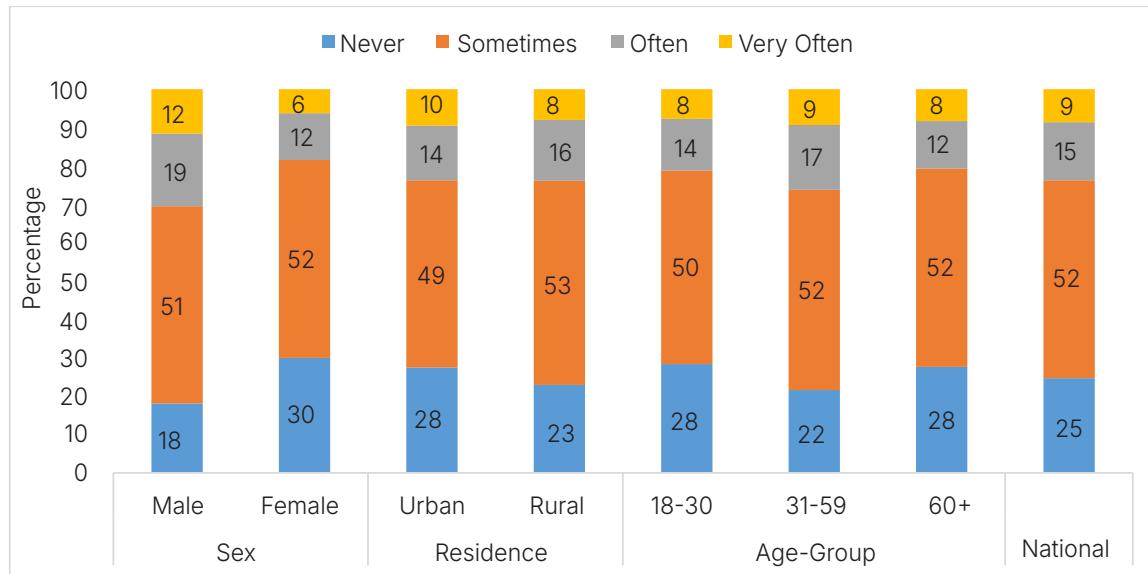

#### **4.5. Free expression of views on politics**

The population aged 18 and above were asked how frequently they discussed politics with those close to them – family, friends, colleagues and the results are presented in Figure 4.10 and Table 4.4. More than half of the population aged 18 and above sometimes talked

politics with those close to them (52%) while nine percent very often talked politics with those close to them. Twenty-five percent never talked politics with those close to them.

A higher proportion of females (30%) never talked politics with those close to them, compared to (18%) of males. Buganda South Sub region (20%) had the highest proportion of persons aged 18 and above who very often talked politics with those close to them, while Tooro had the least (2%). Buganda North Sub region (44%) had the highest proportion of persons aged 18 and above who never talked politics with those close to them, while Lango Sub region, Tooro and Ankole had the least (12%).(Table 4.4).

**Figure 4.10. Proportion of the population aged 18 and above who talked politics with those close to them**

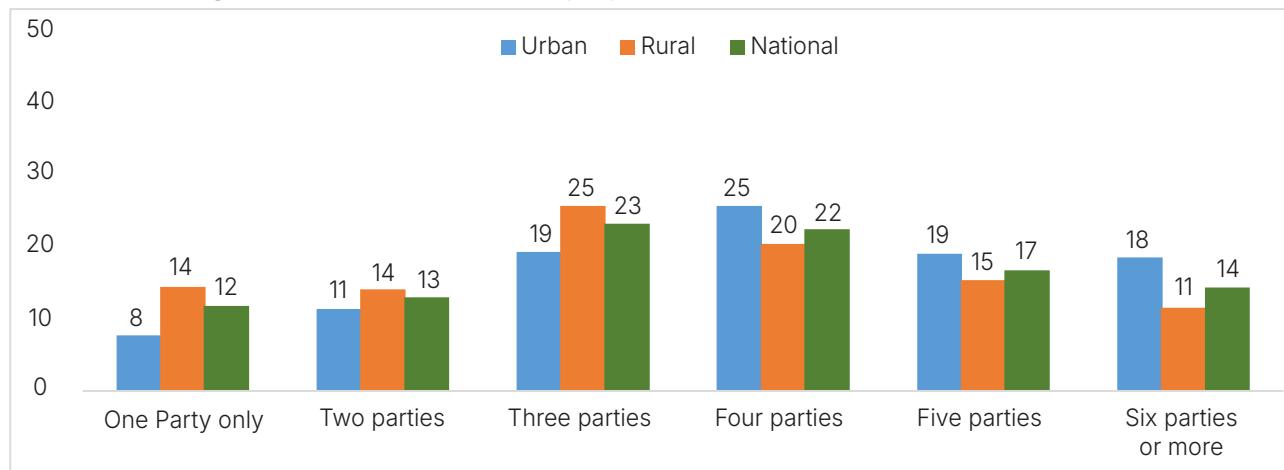

## 4.6. Knowledge of Political Parties/Organizations

During 2021 general Elections, Uganda had 26 registered political parties and organizations. Nationally, 12 percent of the population aged 18 and above knew only one political party, while 14 percent knew six or more political parties. Fourteen percent of rural residents knew only one political party compared to 8 percent of urban residents. On the contrary, a higher proportion of urban residents knew more political parties compared to their rural counterparts. Eighteen percent of urban residents knew six or more political parties compared to 14 percent of rural residents (Figure 4.11).

Men had knowledge of more political parties (six or more political parties) at 21 percent compared to women at 9 percent (six or more political parties) (Table 4.5). Twice as many women (15%) as men (7%) knew only one political party. Knowledge of more political parties (six or more) was highest in Kampala (26%) and Buganda South Sub region (26%) Sub regions, and lowest in Elgon Sub region (2%) (Table 4.5).

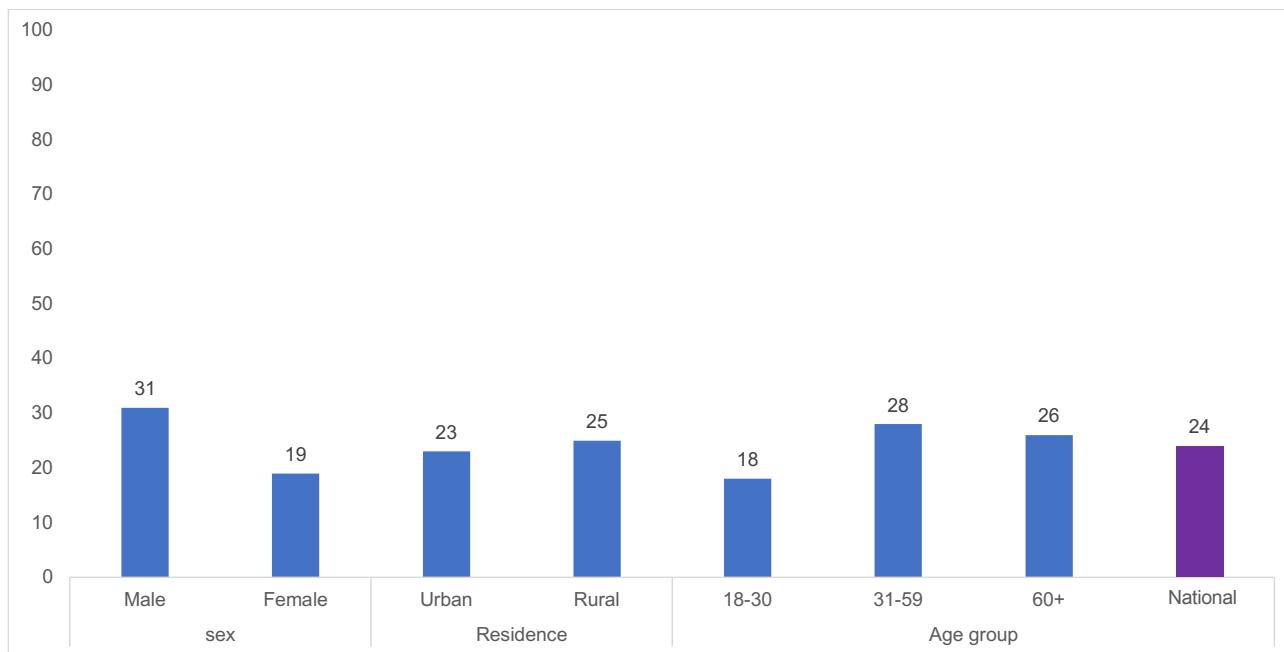

**Figure 4.11. Proportion of the population aged 18 and above aware of political parties/ organizations in the country by number known (%)**

## 4.7. Membership to Political parties

Twenty-four percent of population aged 18 and above were members of political parties, with a higher proportion of males (31%) compared to those of females (19%). Population aged 18 and above in Urban areas had the least percent (23%) than persons from Rural areas (25%). Persons aged 18-30 (18%) have the least level of political party membership compared to their counterparts aged 31-59 (28%) and 60+ (26%). (Figure 4.12 & Table 4.6)

**Figure 4.12. Proportion of the population aged 18 and above who are members of a political party (%)**

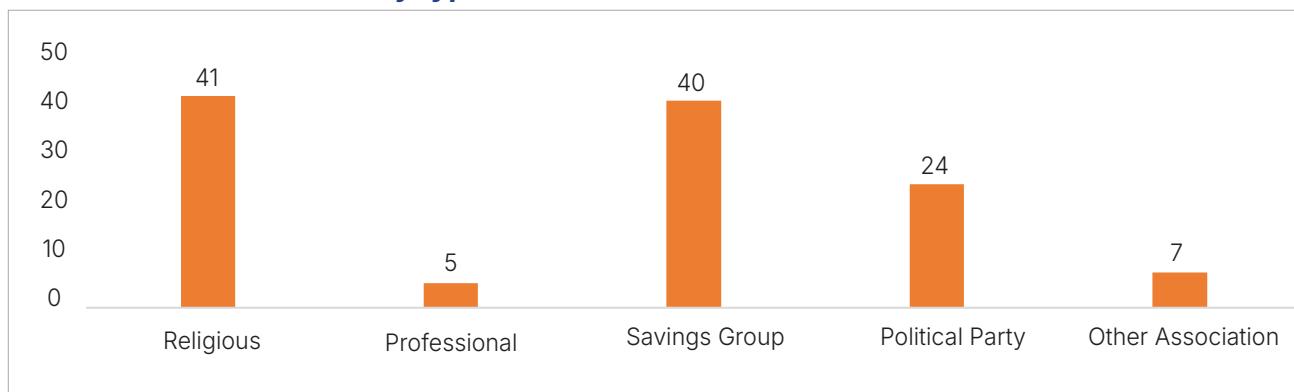

\*members of a political party was a combination of (office bearer + member)

## 4.8. Members of Associations/Groups

Membership of a community group or a political party offers advantages for active participation in shaping public policy and influencing election outcomes. The most common forms of group participation were Religious (45%), and Savings (42%) groups as shown in Figure 4.13. Whereas a slightly higher proportion of women (45%) than men (44%) were members in religious groups.

There was higher proportion of male members (31%) in political party groups than female members (19%). Whereas the proportion of females (44%) was higher than that of males (41%) of members in savings groups. Membership to Professional, Recreational and Sporting groups remained low across all background characteristics.

**Figure 4.13. Percentage of population aged 18 and above that are Members to various Associations by type**

Chapter 5

# TRANSPARENCY AND ACCOUNTABILITY

## Key Findings

- ⦿ **Trust in Public Institutions:** Ninety three percent of the population aged 18 and above trusted at least one main public institution. Trust in the Uganda Police Force increased to 60 percent from 46 percent in 2017.
- ⦿ **Service Delivery by Local Authorities:** Perception of population aged 18 and above regarding delivery of local services increased from 66 percent in 2017 to 69 percent in 2024/25.
- ⦿ **Level to which Local Authorities listen to people:** Seventy-four percent of the population aged 18 and above reported that their Local Council leaders listen to them.
- ⦿ **Monitoring Service Delivery:** Thirty percent of population aged 18 and above reported that they were empowered to demand for accountability from their Local Council leaders regarding service delivery and 16 percent reported that they were informed of how public funds were utilized.
- ⦿ **Extent to which the Population Considers Corruption a concern:** Overall 82 percent of the population aged 18 and above considered corruption a concern. This was a decline from 88 percent in 2017.
- ⦿ **Prevalence and frequency of Bribery:** Fourteen percent of the population aged 18 and above paid a bribe in the 12 months prior to the survey. This is a reduction from 17% in 2017.
- ⦿ **Government's fight against corruption:** Fifty-seven percent of the population aged 18 and above were aware of Government's effort to fight corruption. This is an increase from 54 percent in 2017.

### 5.1. Introduction

Transparency and accountability are central to strengthening governance systems and fostering citizens' trust in public institutions. Transparency and accountability is essential to promoting responsible management of public resources and ensuring that institutions operate with integrity and openness. The NDP IV, highlights governance, transparency, and anti-corruption as key enablers of effective service delivery thus enhancing institutional accountability contributes to improved citizen welfare and sustainable national development.

Similarly, SDG 16 emphasizes the importance of building effective, accountable, and inclusive institutions. This chapter presents findings on citizens' perceptions of trust in public institutions, levels of transparency, and experiences with corruption, providing critical evidence to inform policy actions aimed at deepening accountability and promoting good governance in Uganda.

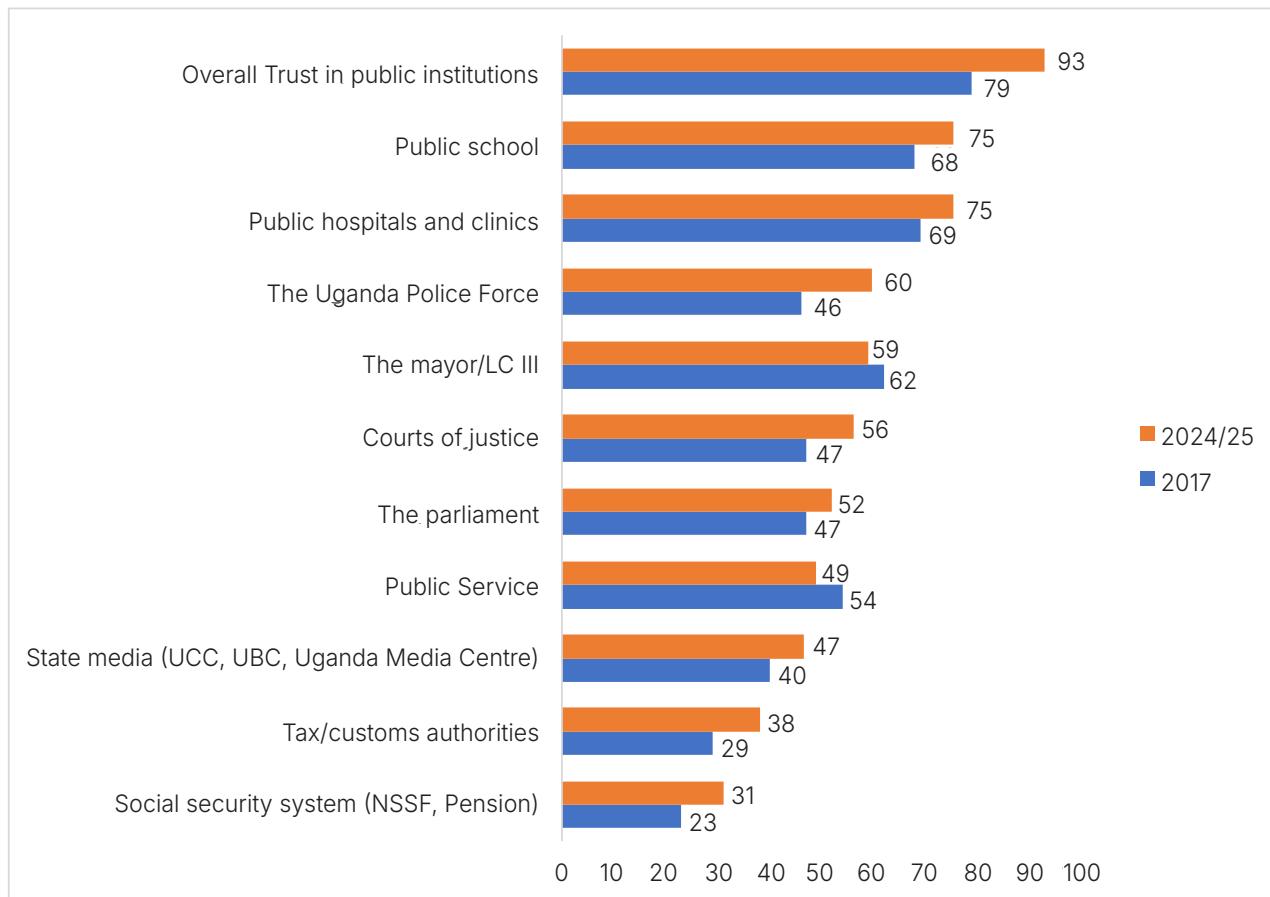

### 5.2. Trust in Public Institutions

Citizen trust in public institutions signals good governance. On the other hand, distrust weakens how policies are made and carried out.

Ninety three percent of the population aged 18 and above trusted at least one main public institution. Trust in the Uganda Police Force increased to 60 percent from 46 percent in 2017.

Figure 5.1 shows that trust in Mayors/LC III declined from 62 percent in 2017 to 59 percent in 2025 while trust in public service reduced from 54 percent to 49 percent over the same period. The Uganda Police Force had the highest percentage increase (15%) in the level of trust from 46 percent in 2017 to 61 percent in 2025. For all the other institutions, there was a general increase in public trust.

**Figure 5.1. Percentage level of trust in most of the public institutions in 2024/25 and 2017**

### 5.3. Transparency and Accountability

Transparency and accountability involve giving citizens a say in how and why decisions are made. Uganda has an opportunity to create a more accountable and responsive Government and an electoral system capable of enabling a growing number of citizens to participate peacefully in politics. In order for results of democracy to be realized, there must be transparency and accountability by the leaders to the people under their jurisdiction. This includes clear disclosure of public funds and decisions, inclusive participation spaces, and independent oversight across planning, budgeting, procurement, and service delivery.

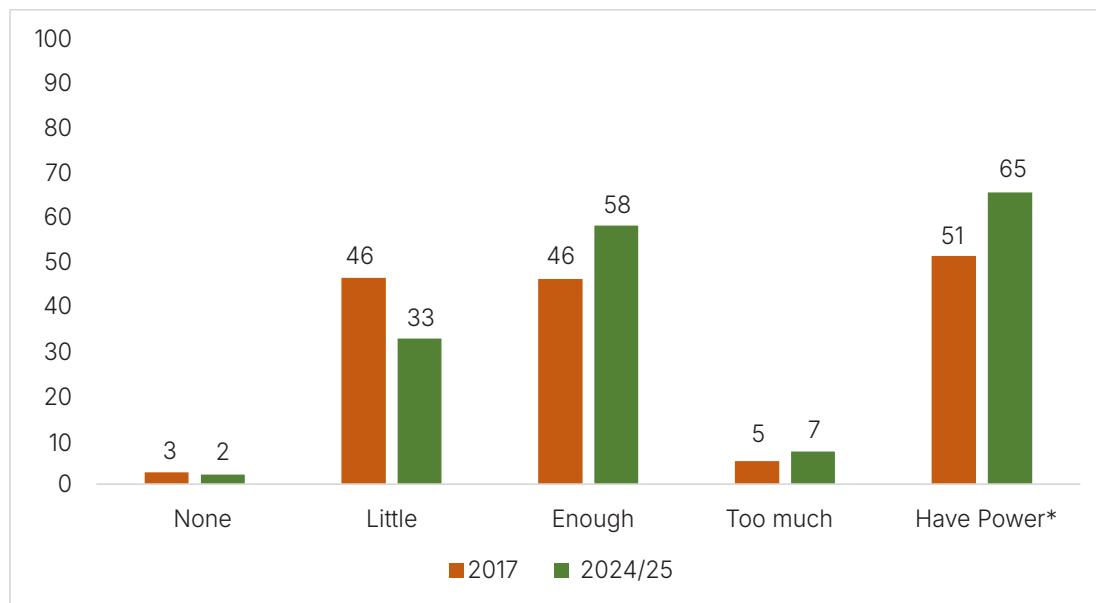

Transparency refers to being easy to understand, being open and honest in all communications, transactions and operations. Accountability is about being responsible to someone for actions taken, being able to explain, clarify and justify actions. Transparency is paramount in any form of accountability.

The citizens of Uganda have a right to know and hold public institutions accountable for actions executed and public institutions are obliged to present the accountability with clarity and justification. In practice, this means publishing budgets and results in accessible formats, setting clear service standards, providing complaint channels, enforcing sanctions for nonperformance, and ensuring inclusion.

### 5.3.1. Performance of Local and Central Authorities

Most of our day-to-day activities are dependent on the services provided by Local Government leaders. Local Authorities operate under the Local Government Act (1997). Figure 5.2 shows that 65 percent of the persons aged 18 and above perceived Local Authorities to have power, an increase from 51 percent in 2017.

**Figure 5.2. Percentage distribution of the population aged 18 and above by their Perception on how much power Local Authorities have, 2017 and 2024/25**

*Have Power\* is (Too much + Enough)*

Spatial variations reveal that Lango Sub region and Ankole subregions had the highest proportion (78% each) of the population aged 18 and above that perceived Local Authorities to have power while Elgon Sub region and Teso Sub region had the least (39% each) (Table 5.2).

### **5.3.2. Performance of Local Council Leaders and Members of Parliament**

Members of Parliament (MPs) and LC V Chairpersons are elected to represent their constituents on issues that affect them and are expected to be accountable to the electorate. During the survey, the population aged 18 and above rated their leaders' service-delivery performance using four categories (very good, good, fair, and poor).

The results in Table 5.3 show that the highest percentage of population aged 18 and above rated the performance of their LC V/District/City leaders (54%) and MPs (44%) in relation to service delivery as good. West Nile Sub region had the highest rating of the leaders' performance at LC V/District/City level (90%) and MPs at (79%). The table further shows that (82%) and (63%) of the population aged 18 and above rated their LCI and LCIII leaders' performance in service delivery respectively as good.

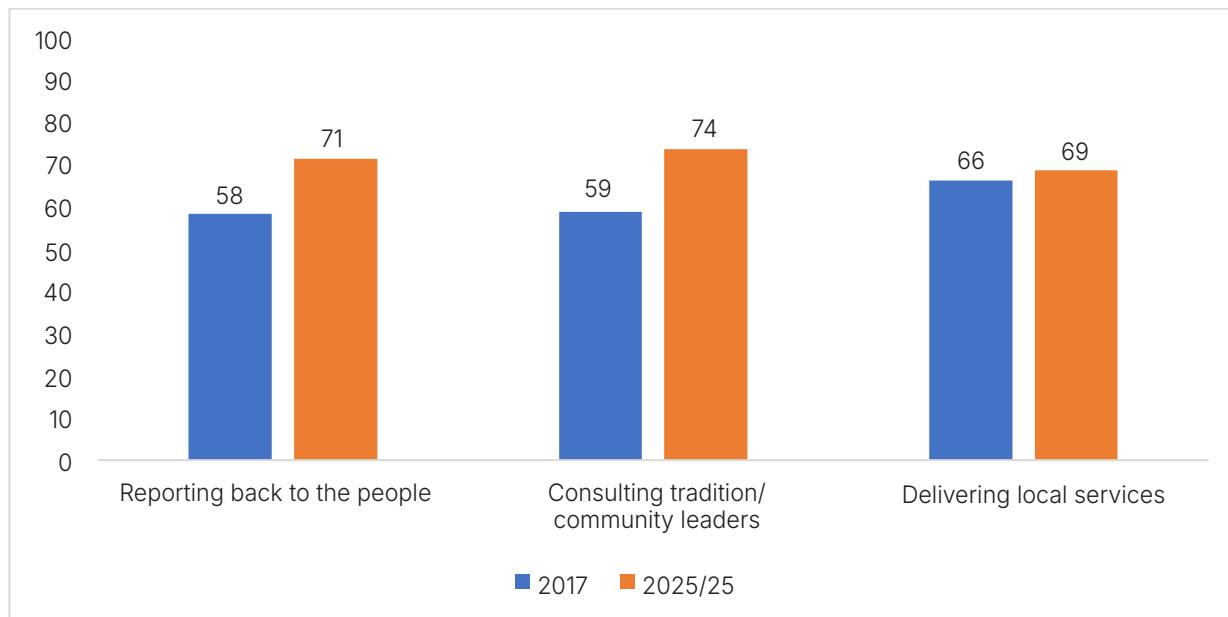

### **5.3.3. Perception of the level of performance of Local Authorities**

The Local Government Act provides for powers and functions of Local Councils which include among others monitoring the performance of persons employed by the Government or a higher Local Government to provide services and also monitor the provision of Government services or the implementation of projects in its area of jurisdiction.

During the data collection exercise the population aged 18 and above were asked how well they thought their local authority is handling the following; reporting back to people, consulting traditional/community leaders and delivering local services. Figure 5.3 shows an increase in perceived consultation, feedback and service delivery by Local Authorities since 2017. Seventy-one percent of the population aged 18 and above reported that Local Authorities were reporting back to people, an increase from 58 percent in 2017. Perception of population aged 18 and above regarding delivery of local services increased from 66 percent in 2017 to 69 percent in 2024/25.

Table 5.5 shows that a higher proportion of persons aged 18 and above in the rural areas (70%) than those in the urban areas (66%) reported that Local Authorities deliver local services. Seventy four percent of the population aged 18 and above reported that Local Authorities consult traditional or community leaders. The highest share of the population aged 18 and above in Teso Sub region (92%) and least in Elgon Sub region (55%) reported Local Authorities consult traditional/community leaders. Teso Sub region also had the highest percentage of the population aged 18 and above that perceived that Local Authorities report back to the people (89%). A higher proportion of persons aged 18 and above in the rural areas (70%) than those in the urban areas (66%) reported that Local Authorities deliver local services well/very well.

**Figure 5.3. Percentage distribution of population aged 18 and above by their Perception\* on Consultation, Feedback and Service delivery by Local Authorities**

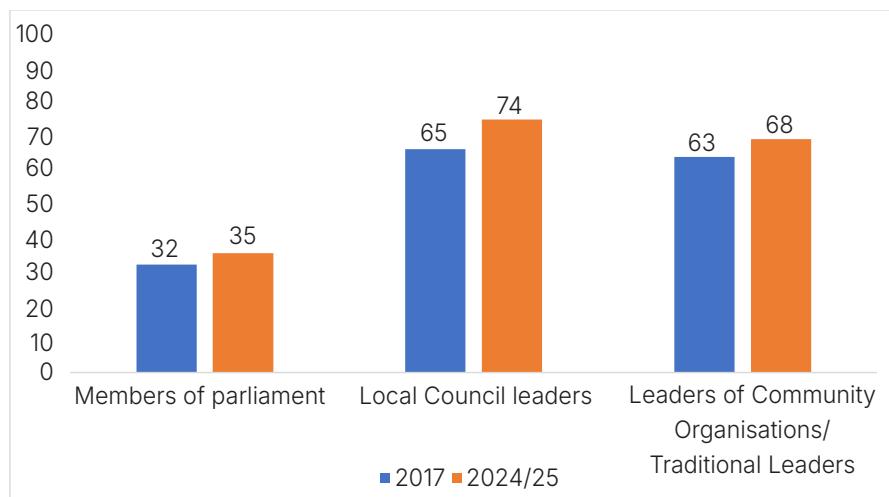

*\*includes respondents that reported Well/Very well*

#### **5.3.4. Perception of the level to which Local and Central Authorities listen to people**

The Sustainable Development Goals 2030 advocate for inclusiveness with no one left behind in service delivery hence the need for the views of people especially those who are vulnerable. It's the views of people that inform Government decisions. During the 2024/25 NGPSS, the population aged 18 and above were asked if they think that their local and central leaders listen to people like them.

Findings in Figure 5.4 show that 74 percent of population aged 18 and above reported that Local Elected Officials/ Councilors listen to them, 68 percent reported that Leaders of community organisations or Traditional leaders listen to them and 35 percent reported that Members of Parliament/National Assembly listen to them.

**Figure 5.4. Percentage distribution of population by perception of whether different leaders listen to them**

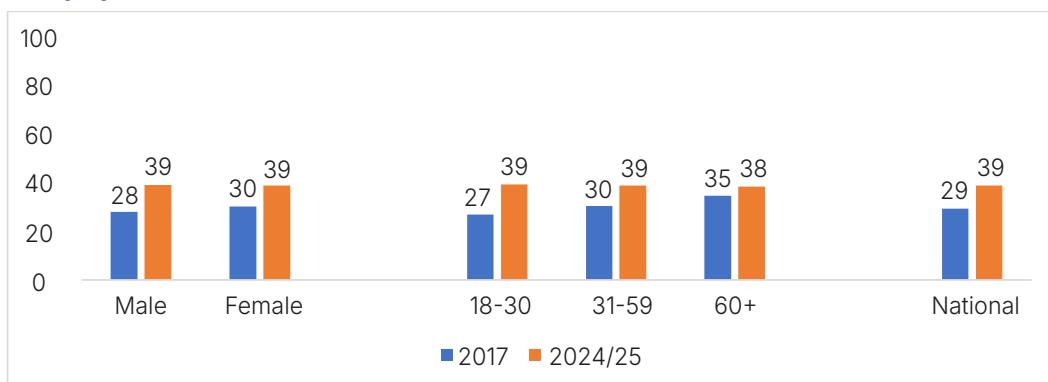

### 5.3.5. Responsiveness of Community and Political leaders

Community leaders take responsibility for the well-being and improvement of their communities by playing an important role in setting priorities, providing over-arching policy direction, and bringing stakeholders together. Their visibility and the ability to communicate with a broad base of constituents and partners can be used to spear-head initiatives to achieve overall community development objectives. This section presents the results on the responsiveness of political leaders to the needs of the people and the extent to which Government takes the voice of the people into account. In this context, responsiveness refers to the way in which community and political leaders perceive the needs of particular groups in the community and respond to their demands.

The results in Figure 5.5 show that 39 percent of the population aged 18 and above were of the opinion that political leaders respond to the needs of the people. This is an increase from 29 percent in 2017. Lango Sub region reported the highest percentage (81%) of the population aged 18 and above who opined that political leaders respond to the needs of the people while Busoga Sub region had the lowest (18%). Sixteen percent of the population aged 18 and above opined that political leaders do not respond at all to the needs of the people. (Table 5.6)

**Figure 5.5. Opinions on the whether political leaders respond to the needs of the People (%)**

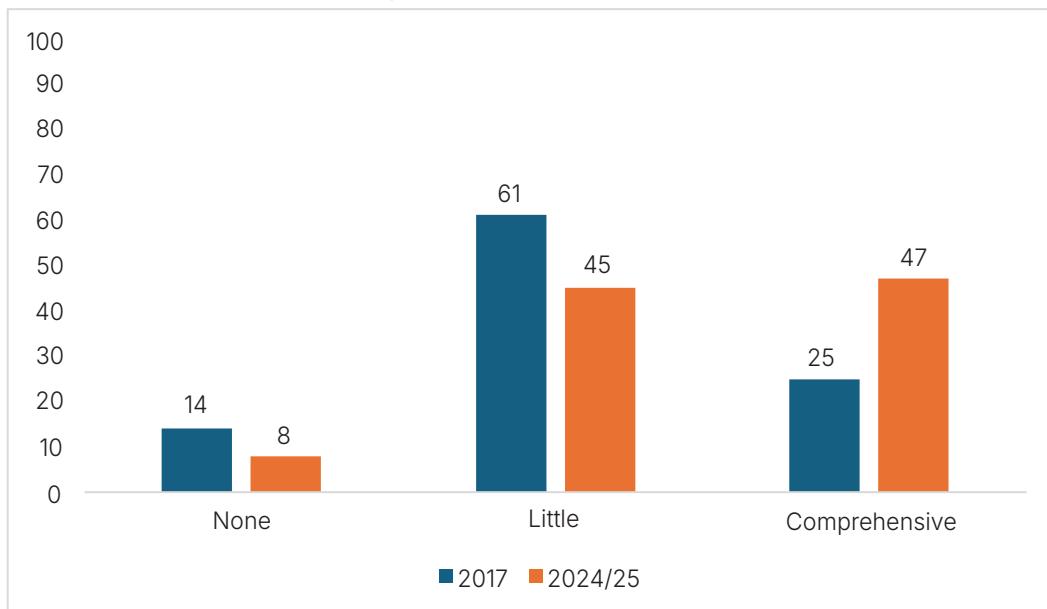

### 5.3.6. Sharing of information on Government Decisions

The Access to information Act, 2005 (Article 8) provides for automatic disclosure of information and records by Government to the public.

Figure 5.6 shows that 47 percent of the population aged 18 and above reported that Central Authorities shared comprehensive information on Government decisions. Furthermore 45 percent of the population aged 18 and above reported that the information provided by the Central Authorities was little. However, 8 percent reported that they were not provided with any information at all.

West Nile Sub region had the highest percentage of the population aged 18 and above who perceived that Central Authorities provide enough information (61%), while Busoga Sub region had the lowest (21%) as shown in (Table 5.7).

**Figure 5.6. Trend in perception of population aged 18 and above on how much information is shared by Central Authorities (%)**

\*Comprehensive combines enough and very comprehensive

### 5.3.7. Public Participation in Service Delivery

Public participation is a vital aspect of democracy that allows for individuals within communities to positively contribute to the general good by providing them an opportunity to influence public decisions. Public involvement is an essential element of democracy meant to ensure that the citizens have a direct voice in public decisions.

## **Extent to which the Government takes into account the peoples voices**

A voice gives one the capacity to express their views and priorities, demand rights and entitlements and can be exercised through the participation of citizens in decision-making process, service delivery or policy implementation processes. It can also be exercised through lobbying, protests or complaints. A responsive Government listens to the concerns and priorities of citizens and its policies and institutions respond to the needs of the citizens and uphold their rights.

Information was collected on perceptions of the extent to which Government takes into account the voices of the opposition parties, Non-Governmental Organizations/Civil Society Organizations, Local Authorities and the Private Sector.

Table 5.8 shows that 64 percent of the population aged 18 and above reported that Government takes into account the voices of Local Authorities, and NGOs/CSOs, while 61 percent said the same for the Private Sector, and 34 percent for opposition parties.

### **5.3.8. Monitoring Service Delivery**

Uganda's decentralized service delivery framework provides for a mixture of approaches to service delivery. These include; direct provision by Local Governments, private sector service delivery, and civil society service delivery. A Local Government monitors the performance of persons employed by the Government or a higher Local Government to provide services or implement projects in the area of jurisdiction (as provided for under the Local Governments Act, 1997).

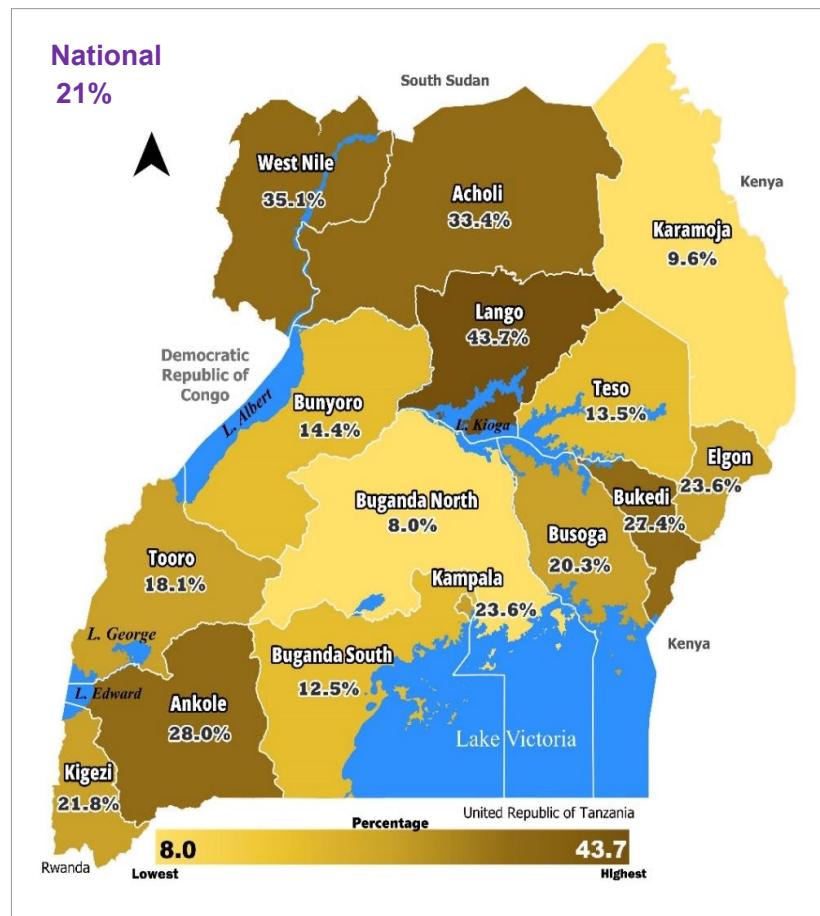

The Public Finance Management Act (PFMA, 2015) was designed to regulate financial management in the National and Local Governments; to ensure that all revenue, expenditure, assets and liabilities of those Governments are managed efficiently and effectively; to provide for the responsibilities of persons entrusted with financial management in those Governments; and to provide for matters connected therewith. This is all geared at securing transparency, accountability, and sound management of the revenue, expenditure, assets and liabilities of institutions (planning, budgeting, procurement, reporting, and audit).

The results in Table 5.9 show that 30 percent of population aged 18 and above reported that they were empowered to demand for accountability regarding service delivery from their Local Council leaders, 31 percent were aware of the existence of a committee set up to monitor delivery of services and 16 percent were informed of how public funds were utilized.

During the survey data collection exercise, the population aged 18 and above were asked if they had raised any complaint to the Local Government leaders over poor service delivery in their community in the last 12 months prior to the survey date. The services referred to included roads, schools and health, among others.

Figure 5.7 shows that Lango had the highest proportion (44%) that had raised a complaint 12 months prior to the survey while Buganda North Sub region had the least (8%).

**Figure 5.7. Proportion of population aged 18 and above that have raised any complaint to the Local Council leader in the last 12 months prior to the survey by Sub region**

## 5.4. Corruption

Corruption is the abuse of entrusted power for private gain. Corruption can be classified as grand, petty and political, depending on the amounts of resources lost and the sector where it occurs. At high Government levels it is grand corruption and it distorts policies or the central functioning of the state, enabling leaders to benefit at the expense of the public good. On the other hand, Petty corruption is the everyday abuse of entrusted power by low- and mid-level public officials in their interactions with ordinary citizens, who often are trying to access basic goods or services in places like hospitals, schools, police departments and other agencies. Political corruption involves manipulation of policies, institutions and rules of procedure in the allocation of resources and financing by political decision makers that abuse their position to sustain their power, status and wealth.

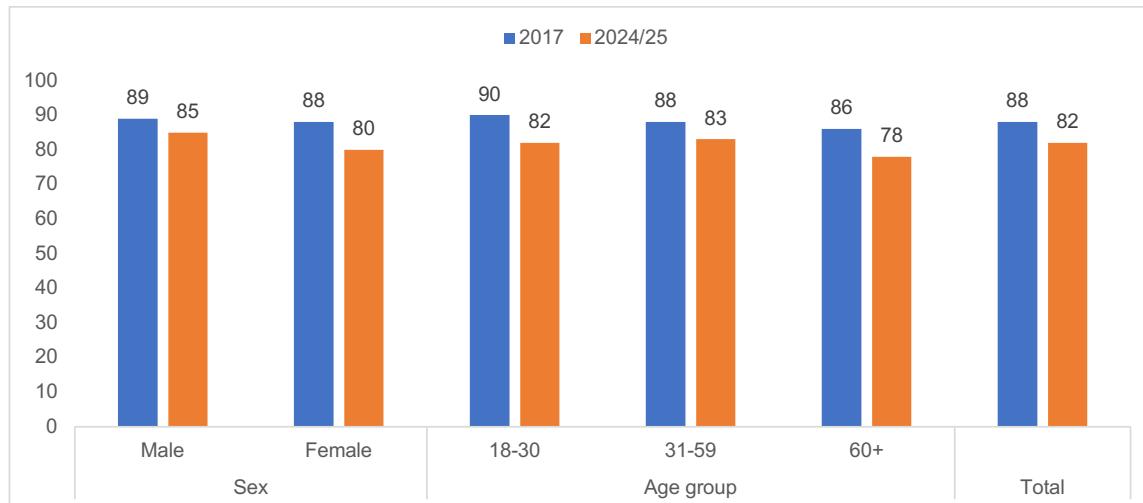

### 5.4.1. Extent to which the Population Considers Corruption a concern

The survey collected information on the perceived extent to which corruption was a concern in the country. Responses were captured on a four-point scale, where 1 = Not at all, 2 = A little, 3 = Often, and 4 = Always. Responses coded 3 and 4 were classified as indicating that corruption is a concern.

Overall 82 percent of the population aged 18 and above considered corruption a concern. This was a decline from 88 percent in 2017, as shown in Figure 5.8.

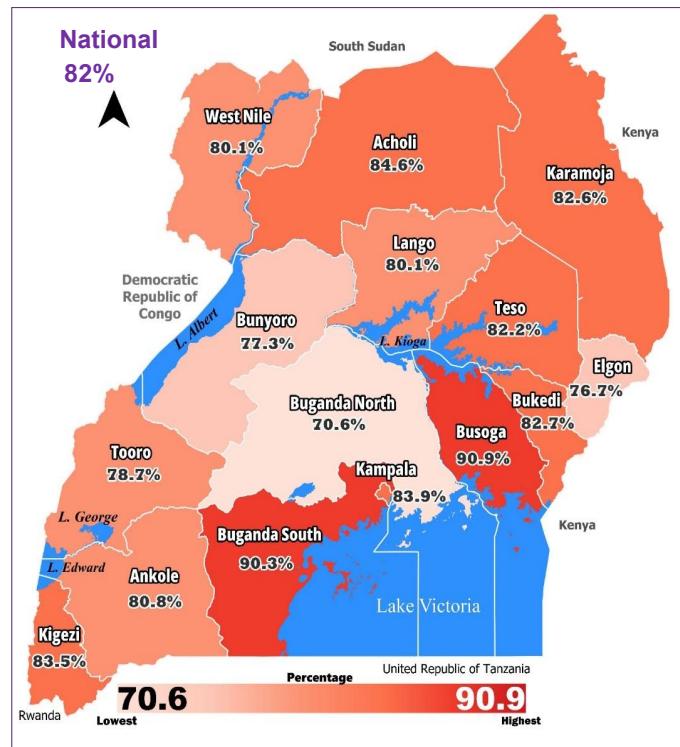

Table 5.10 shows that Busoga Sub region had the highest percentage of population (91%) aged 18 and above who considered corruption as a big problem, while Buganda North Sub region had the least (71%) (Table 5.10)

**Figure 5.8. Percentage of the population aged 18 and above who consider corruption a concern in the country by sex and age group, (%)**

\*corruption a concern is often+always

**Figure 5.9. Percentage of the population aged 18 and above who consider corruption a concern in the country by Sub region, (%)**

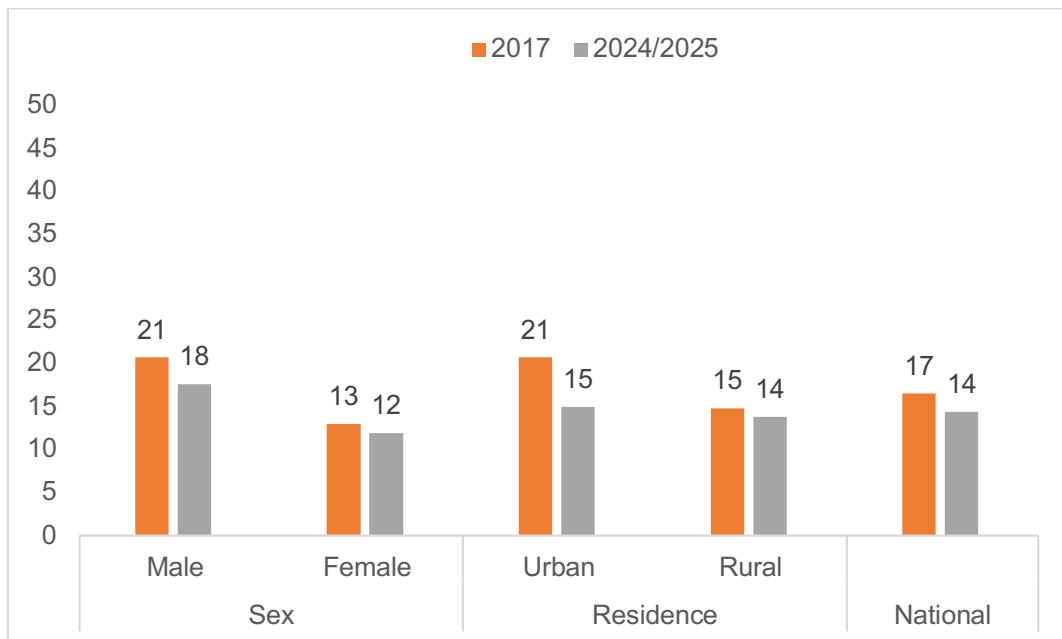

## 5.4.2. Prevalence and frequency of Bribery

Figure 5.10 shows that 14 percent of the population aged 18 and above paid a bribe in the 12 months prior to the survey, a decrease from 17 percent in 2017. The percentage of the population that had paid a bribe slightly decreased for both males and females from 21 percent in 2017 to 18 percent in 2024/25 and from 13 percent to 12 percent respectively.

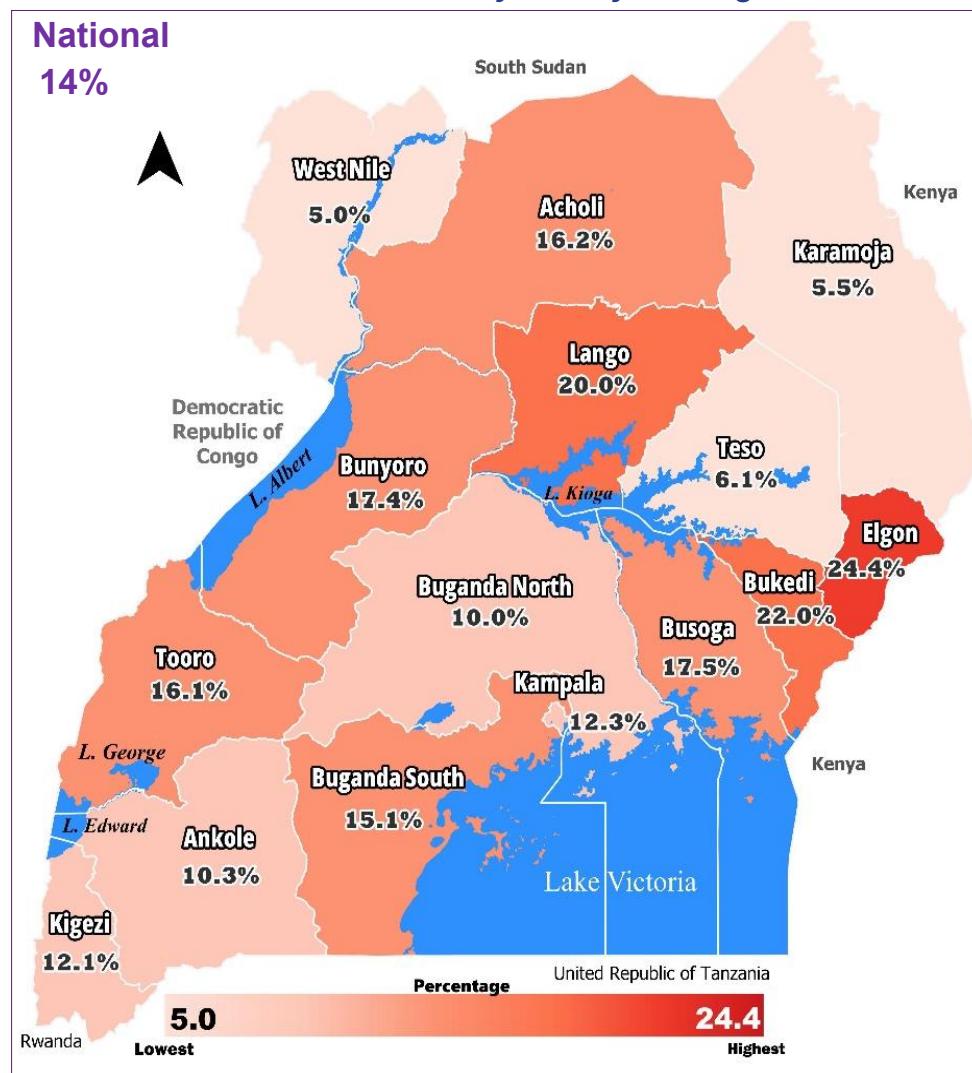

The highest percentage (16%) of persons aged 18 and above that paid a bribe in the last 12 months prior to the survey date were those aged between 31 and 59. Table 5.12

**Figure 5.10. Percentage Distribution of population aged 18 and above that Paid a Bribe in Last 12 Months Prior to the Survey Date by selected background characteristics (%)**

Findings in Figure 5.11 show marked regional variation: Elgon Sub region (24%) and Bukedi Sub region (22%) recorded the highest prevalence, West Nile Sub region (5%) was the lowest.

**Figure 5.11. Percentage Distribution of population aged 18 and above that Paid a Bribe in Last 12 Months Prior to the Survey Date by Sub Region**

Bribery can be categorized into three forms namely; Occasional bribery (once), Regular bribery (Two to five times), and Chronic bribery (More than five times).

The results in Table 5.13 indicate that 52 percent of the population aged 18 and above had paid a bribe one time, 12 months prior to the survey date, followed by 37 percent that had paid a bribe two to five times and 11 percent had paid a bribe more than five times 12 months prior to the survey date.

Results further show that a higher proportion of females (55%) than males (50%) and more persons in rural areas (53%) than those in urban areas (52%) had paid a bribe once in the 12 months prior to the survey date. Elgon Sub region (26%) followed by Kampala (21%) had the biggest percentage of population that had paid a bribe more than five times, while Teso Sub region had the least (3%). More of the population with no education attained (16%) paid a bribe more than five times, compared to those with tertiary education (8%).

### 5.4.3. Institutions where citizens paid bribes

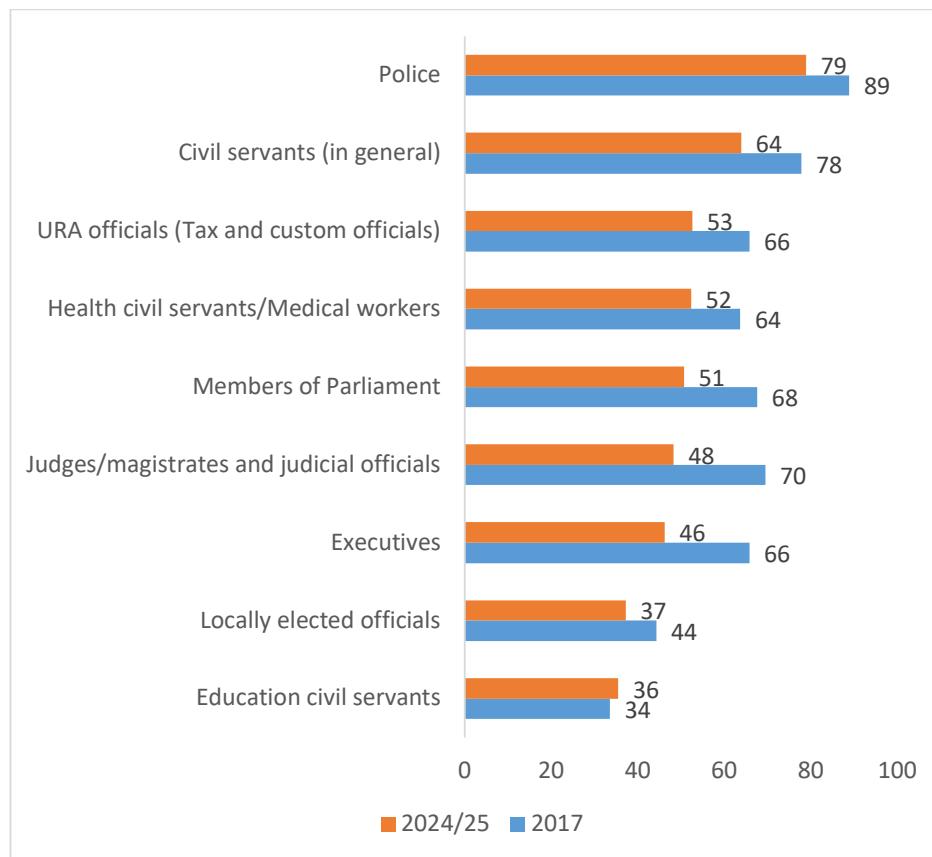

The population aged 18 and above were further asked in which institutions they had to pay bribes. Results in Table 5.14 indicate that the highest percentage of population aged 18 and above reported to have paid bribes to health workers and police (48% and 45% respectively) while the lowest (1%) paid to NWSC. A higher proportion of females (57%) than males (39%) paid bribes to Health workers while a higher proportion of males (52%) than females (37%) paid bribes to Police officials.

Sub regional variations show that Bukedi Sub region (82%) had the highest percentage of population that paid bribes in health and Teso Sub region (17%) had the least. Ankole (66%) had the highest proportion that paid bribes in police institutions while Elgon and Bukedi Sub region (22% each) had the least.

### 5.4.4. Corruption within public institutions

Figure 5.12 shows that the biggest percentage of population aged 18 and above reported that police officials were the most corrupt (79%), followed by civil servants (in general) (64%). This is a reduction from 89 percent (police) and 78 percent (civil servants in general).

**Figure 5.12. Perception of persons aged 18 and above on corrupt persons within public institutions (%)**

\*Executive comprises the president, prime minister and ministers.

Table 5.15 shows that a high proportion of males (82%) than females (76%) reported that the police officials are the most corrupt. Of those that said police was most corrupt (79%), the biggest percentage was from urban areas (82%) as compared to those from rural areas (77%).

Buganda South sub-region had the highest percentage of population (84%) whose perception was that police is corrupt and Karamoja Sub region had the least (57%). More so, 80% of the population aged 18-30 and 31-59 years reported Police as the most corrupt.

#### **5.4.5. Prevalence and frequency of corruption within the security forces**

The survey sought to establish from the population aged 18 and above whether they had ever paid a bribe to members of the Public Security Forces in the 12 months prior to the survey. Those who reported paying were then asked how many times they paid.

Table 5.17 shows that 8 percent of population aged 18 and above indicated that they had paid a bribe to Public Security Forces in the last 12 months prior to the survey. The highest percentage was recorded in Acholi Sub region (16%) while the least was recorded in West Nile Sub region (3%).

Results further show that the highest percentage (51%) of those that had paid a bribe to the Public Security Forces had done it once (one time), followed by 40 percent that had paid a bribe two to five times and 9 percent had paid more than five times.

#### **5.4.6. Perceptions on corruption within the security forces**

Results in Table 5.18 show that 63 percent of population aged 18 and above indicated that the public security forces were involved in corruption. Bukedi Sub region (78%) had the highest percentage of population aged 18 and above who perceived that public security forces were involved in corruption while Tooro Sub region had the least (40%). On the other hand, 13 percent of the population perceived that public security forces were not involved in corruption at all.

#### **5.4.7. Government fight against corruption**

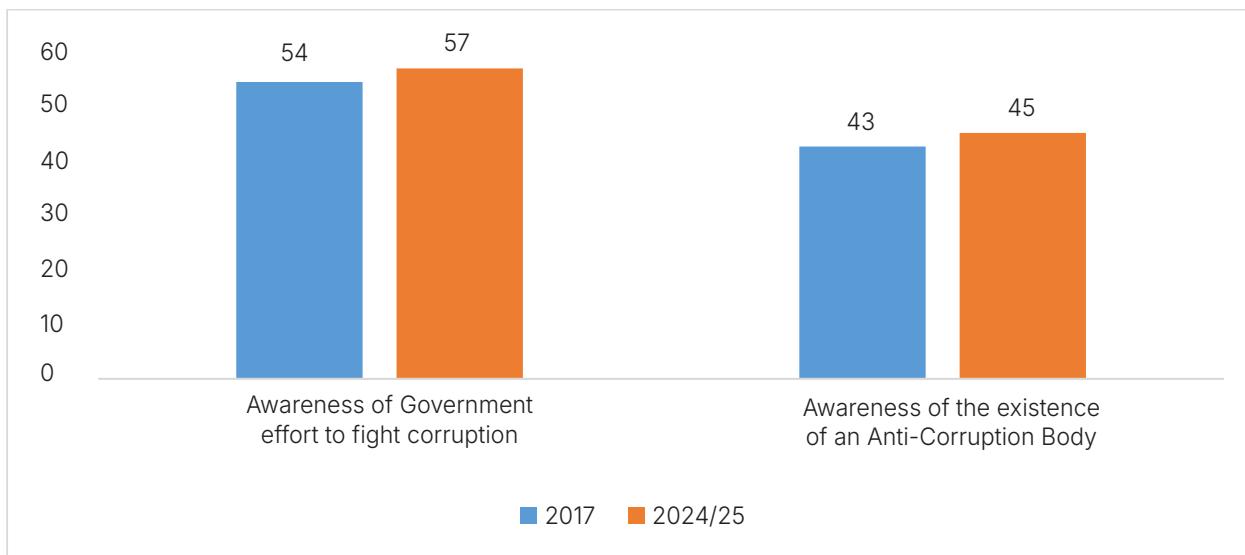

The Anti-Corruption Act and the National Anti-Corruption Strategy (NACS) were designed to make a significant impact on building the quality of accountability and reducing the levels of corruption in Uganda with a focus on people, systems, organizations and building a culture where integrity is valued and corruption is rejected – zero tolerance to corruption.

In Uganda, the institutions charged with the task of fighting corruption are the Presidency, the Inspectorate of Government (IG), the Auditor General (AG) the Department of Public Prosecutions (DPP), the people of Uganda, the parliament, and the Judiciary. In addition, there exist constitutional anti-corruption agencies specifically charged with this task. The findings in Table 5.18 & Figure 5.13 shows that 57 percent of the population aged 18 and above were aware of Government's effort to fight corruption. Awareness was higher among males (62%) than females (53%), and higher in urban (61%) than rural (55%) areas. By sub-region, Tooro (77%) reported the highest awareness and Karamoja Sub region (27%) the lowest.

Results further show that 13 percent of the population aged 18 and above felt that the Government's fight on corruption was very effective and 14 percent said it was not effective at all. Forty-five percent of the population aged 18 and above were aware of the existence of an anti-corruption body in the country. This awareness increased with the level of education.

Table 5.18 and Figure 5.13 also shows that 45 percent of the population aged 18 and above were aware of the existence of an anti-corruption body in the country.

**Figure 5.13. Percentage of population aged 18 and above aware of Government effort to fight corruption and existence of an Anti-Corruption body in the country (%)**

## Chapter 6

# PEACE AND SECURITY

## Key Findings

- ⦿ **Experience of theft in the community:** 17% of the population aged 18 and above reported that their property had been taken without their consent in the last 12 months. This is a reduction from 28% in 2017.
- ⦿ **Reporting cases of theft:** 69% of the population aged 18 and above reported the theft case to Police. The proportion of the population satisfied with the outcome of their most recent complaint increased to 39%, from 30% in 2017.
- ⦿ **Effectiveness in managing Violence against Women and Children:** 77% of the population aged 18 and above perceived the Public Security Forces as effective in managing violence against women, while 79% considered them effective in managing violence against children.
- ⦿ **Level of feeling safe:** 60% of the population aged 18 and above felt safe walking alone in their residential area at night.
- ⦿ **Conflict resolution mechanism:** 91% of the population aged 18 and above were aware of the means, institutions to help resolve conflict. 78% reported that they usually go to their Local Committees to get help to resolve a conflict.
- ⦿ **Public trust in the state to provide security:** 82% of the population aged 18 and above had trust in the ability of Government to protect them and their property, an increase from 72% in 2017.
- ⦿ **Level of happiness with life:** 81% of the population aged 18 and above reported that they were happy with their lives, an increase from 77% in 2017.

### 6.1. Introduction

Peace and security are foundational to sustainable development and national transformation, as emphasized in Chapter 20 and 21 of the NDP IV, which focus on ensuring public order and justice. This chapter explores Ugandans' perceptions and experiences related to theft, threats, management of violence, safety, and confidence in public security forces. The findings serve to inform policy interventions rooted in the objectives of NDP IV and Uganda's commitment to SDG 16, guiding efforts to promote community safety, strengthen institutions, and ensure a stable, secure environment for all.

### 6.2. Theft in the community

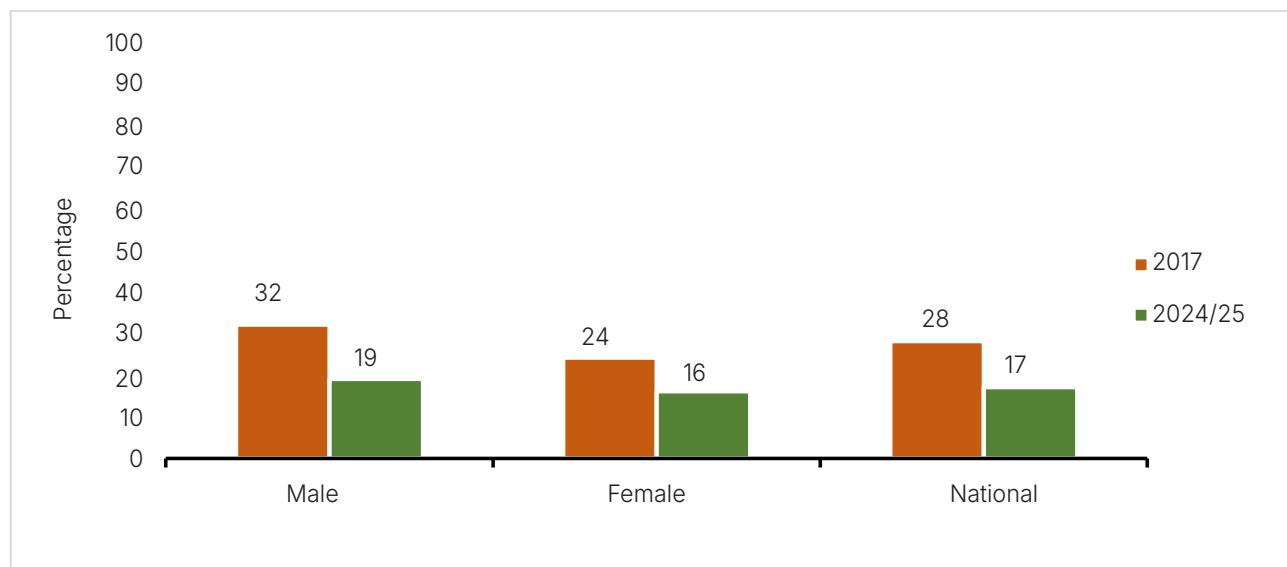

Under Section 254 (1) of the Penal Code Act, cap 120 the act of theft is said to be done as stated hereunder: Where a person who fraudulently and without claim of right takes anything capable of being stolen or fraudulently converts to the use of any person other than the general or special owner thereof anything capable of being stolen, is said to steal that thing.

### 6.2.1. Experience of theft in the community

The population aged 18 and above were asked whether anyone had taken their property against their will in the 12 months preceding the survey. As shown in Figure 6.1, 17 percent of the population aged 18 and above reported that their property had been taken without their consent during this period. This is a reduction from 28% in 2017. Experience of theft was more common among males (19%) than females (16%).

Lango and Busoga Sub regions had the highest percentage (31% each) of the population aged 18 and above who had experienced theft in the 12 months preceding the survey, while Teso Sub region had the least (6%) (Table 6.1).

**Figure 6.1. Proportion of population aged 18 and above who reported to have experienced theft in the last 12 months (%)**

### 6.2.2. Property stolen in the community

The survey also collected information on the specific items that had been stolen from individuals who reported to have lost any property. Figure 6.2 shows that overall, the most commonly stolen property in the 12 months preceding the survey included livestock (28%), money (22%) and land (15%), while the least stolen items included a vehicle (less than 1%), Computer/Monitor/CPU/Any other device (1%) and house (2%).

**Figure 6.2. Proportion of population aged 18 and above who reported theft by property stolen (%)**

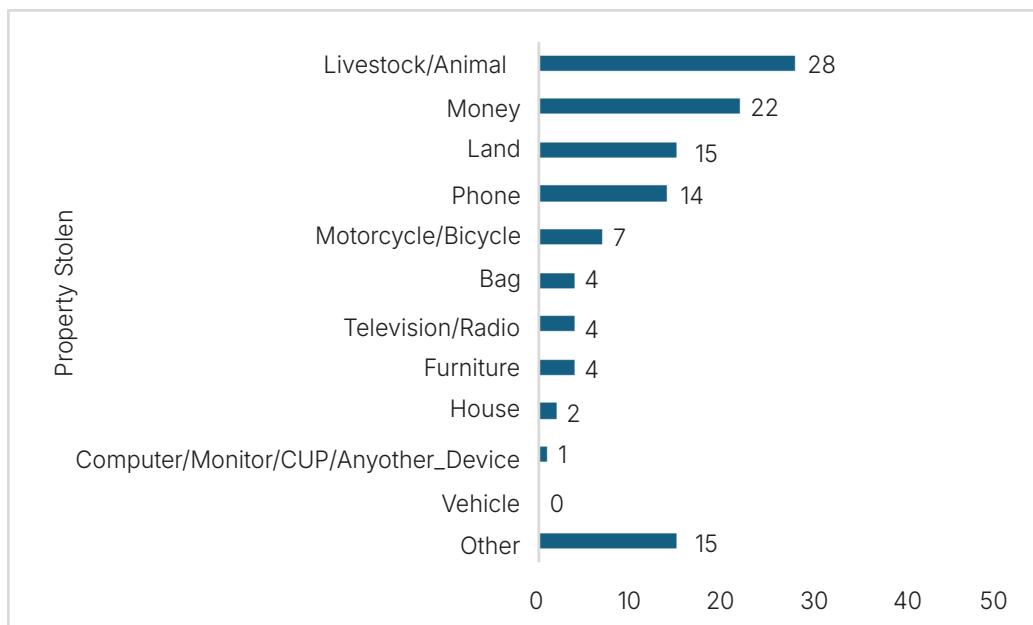

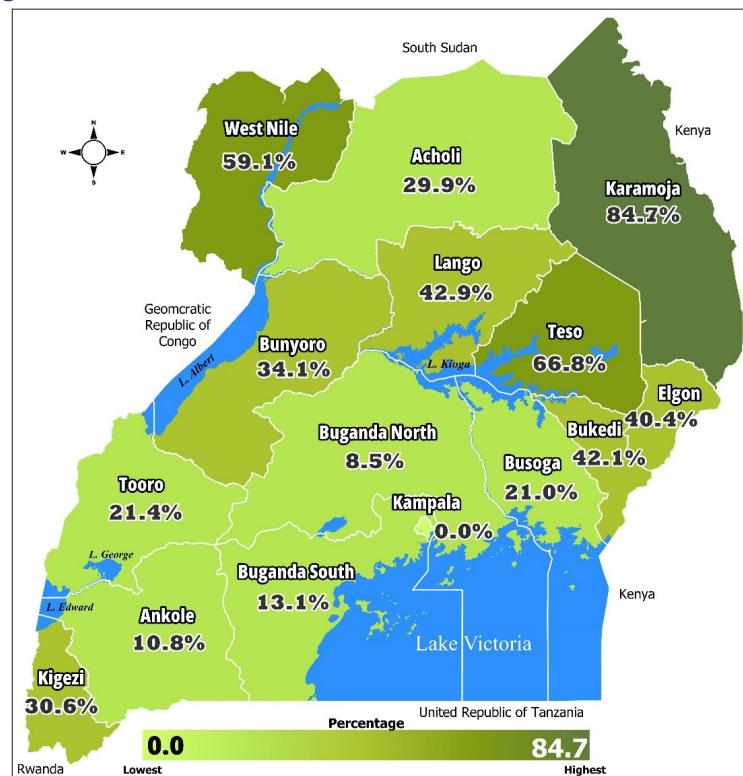

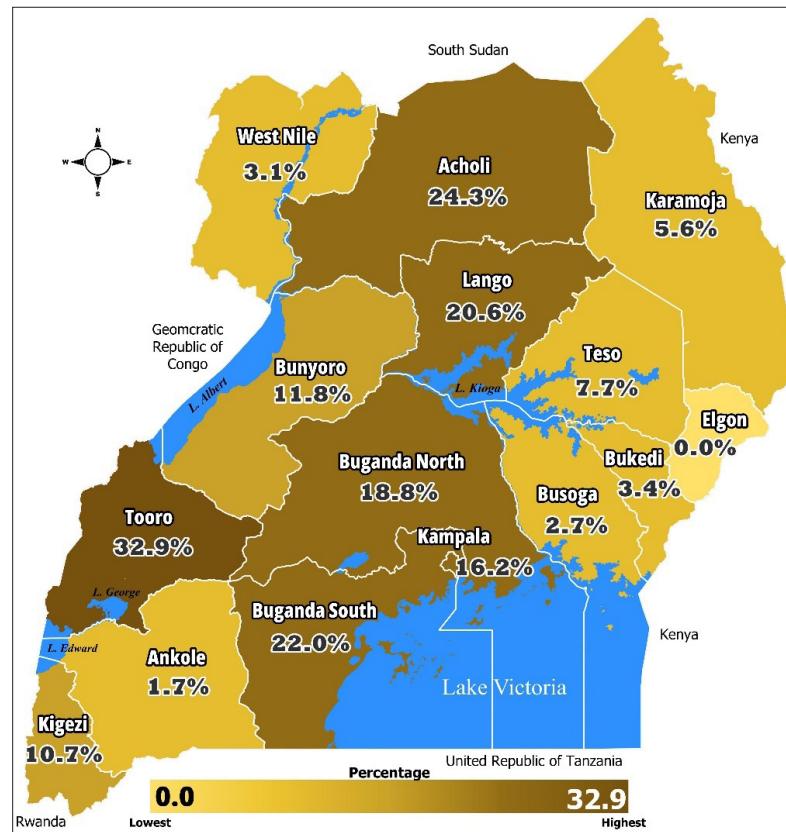

Figure 6.3 and Figure 6.4 show the Sub regional distribution of some of the most commonly stolen property, namely land and livestock. Theft of livestock in the 12 months before the survey was reported highest in Karamoja Sub region (85%), followed by Teso Sub region (67%) and lowest in Kampala (0%) (Figure 6.3). Theft of land in the 12 months before the survey was reported highest in Tooro (33%) and lowest in Elgon Sub region (0%) (Figure 6.4).

**Figure 6.3. Proportion of population aged 18 and above who reported theft of livestock by Sub region (%)**

**Figure 6.4. Proportion of population aged 18 and above who reported theft of land by Sub region (%)**

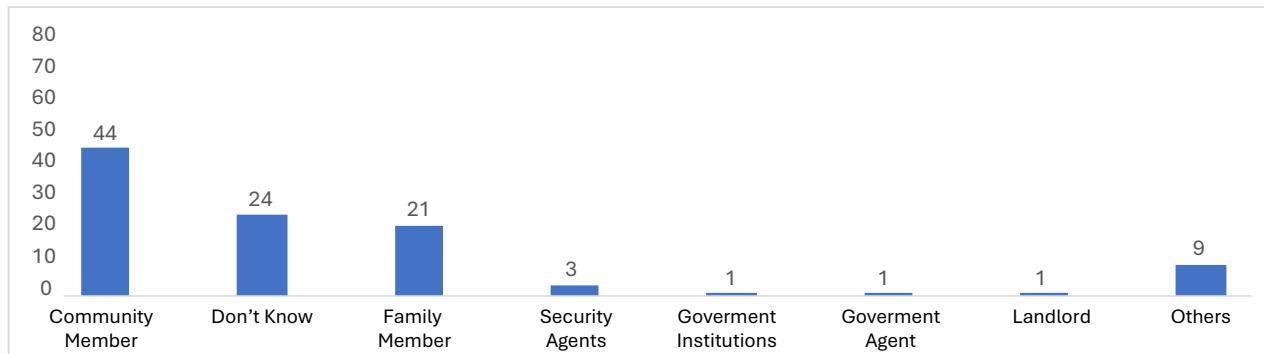

### 6.2.3. Perpetrators of theft in the community

Information was collected from the population aged 18 and above regarding the perpetrators of theft. For the purposes of this survey, perpetrators were defined as institutions or individuals involved in committing the theft.

Figure 6.5 indicates that overall, theft was mostly committed by community (44%) and family (21%) members, however 24% of the population aged 18 and above reported that they did not know the perpetrator.

**Figure 6.5. Perpetrators of theft in the last 12 months, (%)**

#### 6.2.4. Reporting of theft cases to the relevant authorities

The reporting rate of a crime is an indicator of the level of public responsiveness and how well the Criminal Justice System meets public expectations. One way of fighting crime is by reporting the crime to the authorities. When an individual is a victim of crime, it is important that the case is reported to authorities in the Justice system at the earliest opportunity possible to carry out necessary investigations related to the case. The NGPSS 2024/25 asked all individuals who were victims of theft 12 months prior to the survey whether they reported the case to any relevant authorities.

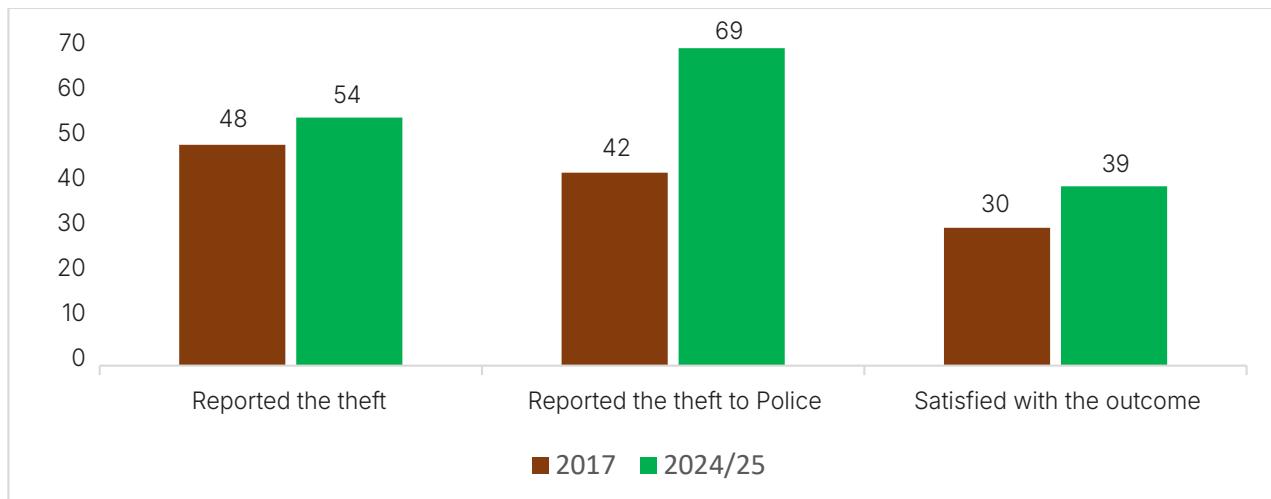

A follow up question was asked of the population aged 18 and above who reported any case whether they were satisfied with the outcome from the case. Satisfaction is a measure of the level of trust or confidence attached to the Criminal Justice System

Figure 6.6 shows that more than half of the population aged 18 and above (54%) reported theft of their property to relevant authorities. This is an increase from 48 percent in 2017. Reporting of theft cases to Police increased to 69 percent from 42 percent in 2017.

A slightly higher proportion of males (70%) than females (68%) reported theft cases to Police. Furthermore, reporting of theft cases to Police was higher among the urban residents (74%) than rural residents (66%) (Table 6.2).

Overall, 39 percent of the population aged 18 and above reported that they were satisfied with the outcome of their most recent case. This is an increase from 30 percent in 2017 (Figure 6.6). A higher proportion of females (43%) than males (35%) were satisfied with the outcomes of the most recent case reported (Table 6.2).

**Figure 6.6. Proportion of the population aged 18 and above who reported theft to the relevant authorities, (%)**

## 6.3. Management of violence against women and children

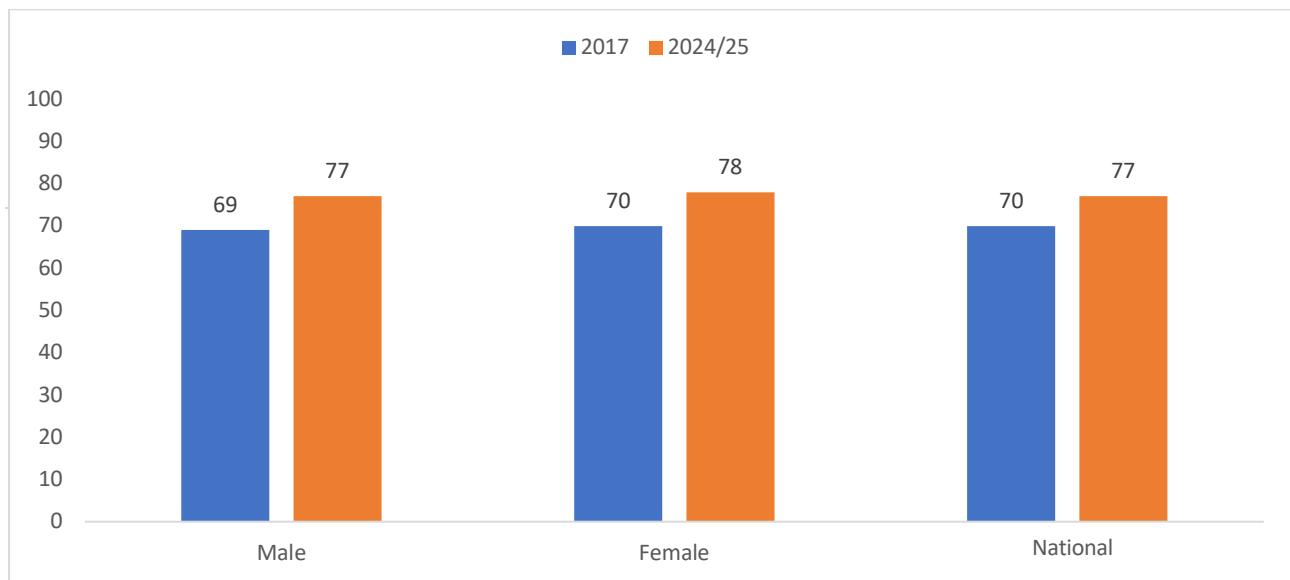

The importance of collecting data on Violence Against Women and Children (VAW/C) is to unravel that thread by shedding light not only on forms of violence that are already widely discussed but also to reduce the known forms of violence, such as dowry, murders, female circumcision enslavement for sex tourism, human trafficking, defilement and rape.

### 6.3.1. Effectiveness of managing violence against women

Results in Figure 6.7 show that overall, 77 percent of the population aged 18 and above thought the Public Security Forces (PSF) were effective in managing violence against women. This was an increase from 70 percent in 2017.

Table 6.3 further shows that the population aged 18 and above in Kigezi (86%) had the highest proportion perceiving the Public Security Forces as effective in managing violence against women, while Karamoja Sub region recorded the lowest proportion (60%).

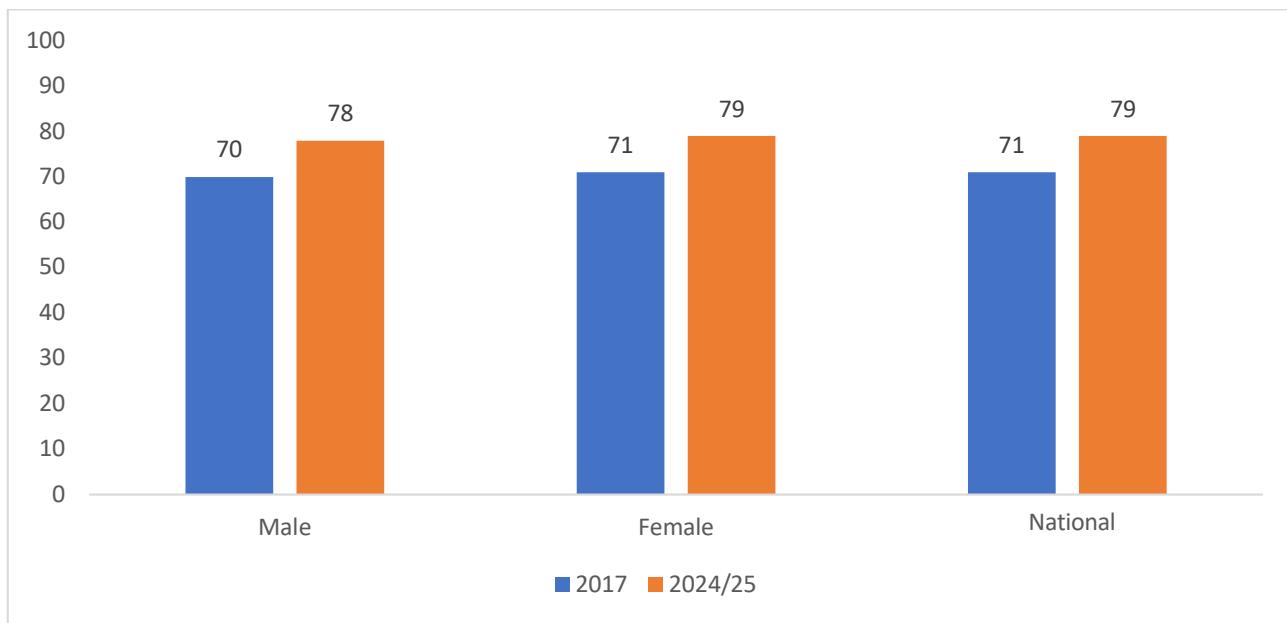

**Figure 6.7. Percentage of population aged 18 and above who considered Public Security Forces effective in addressing violence against women**

### 6.3.2. Effectiveness in addressing violence against children

Children who experience abuse, violence, abandonment or severe neglect face significant threats to their survival and wellbeing. Target 16.2 of the SDGs is to "end abuse, exploitation, trafficking and all forms of violence against and torture of children". Violence against children includes all forms of violence against people under 18 years of age, whether perpetrated by parents, caregivers, peers, romantic partners, or strangers. Results in Figure 6.8 show that overall, 79 percent of the population aged 18 and above thought the Public Security Forces (PSF) were effective in managing violence against children. This was an increase from 71 percent in 2017.

**Figure 6.8. Proportion of population aged 18 and above who considered PSF effective in addressing violence against children**

Findings in Table 6.4 show that 88 percent of the population aged 18 and above of Kigezi region reported PSF to be effective while 63 percent in Karamoja Sub region reported PSF to be effective in managing violence against children

## 6.4. Worry of threats

Fear is a human emotion that is triggered by a perceived threat. As such, it is an essential part of safety. However, when individuals live in constant fear, whether from physical dangers in their environment or threats that they perceive, they can become incapacitated to perform their day-to-day duties. The existence of worry and threats indicates that the conditions of true peace and security have not been met. Elements of worry of threats act as drives of instability.

Figure 6.9 shows the percentage level of worries by the type of threat that the population aged 18 and above reported. The most common forms of worry include poverty (84%), followed by Unemployment (81%) and the least was terrorism (12%).

**Figure 6.9. Forms of worry by different types of threats, (%) (Population aged 18 and above)**

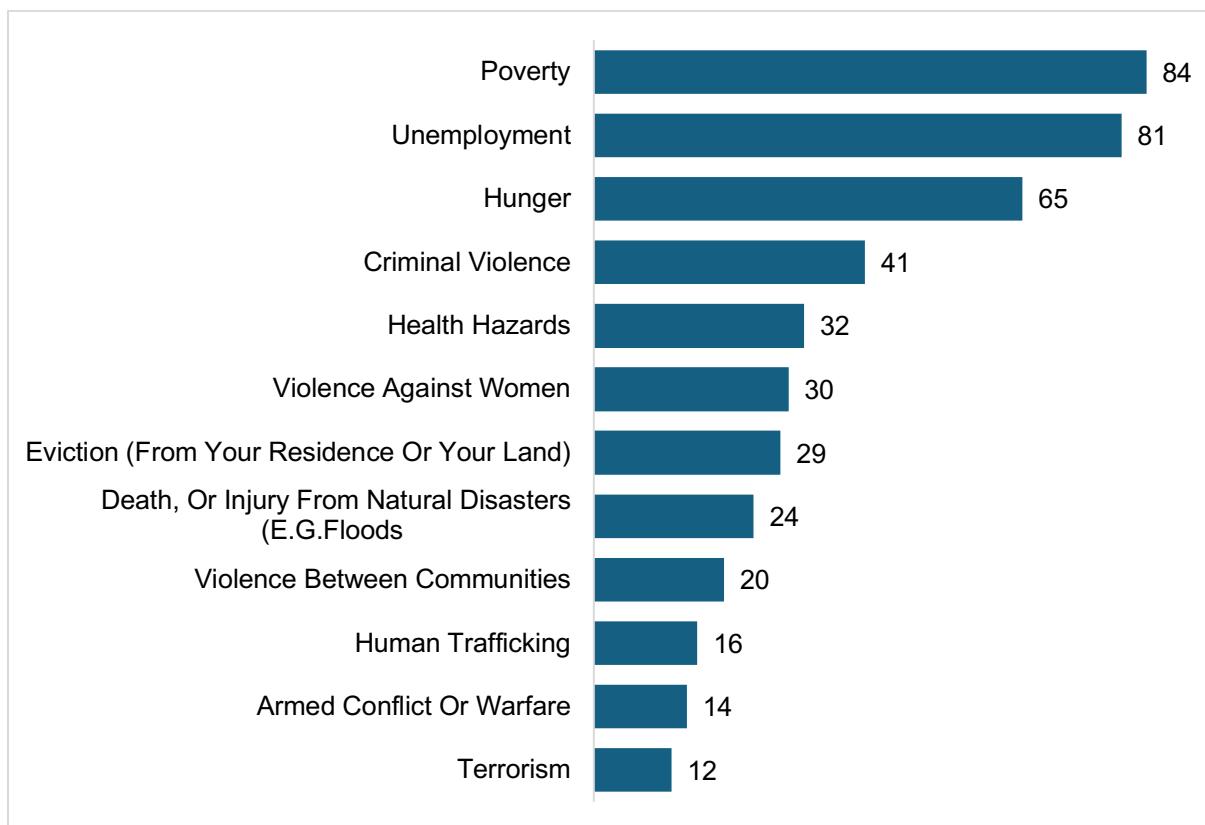

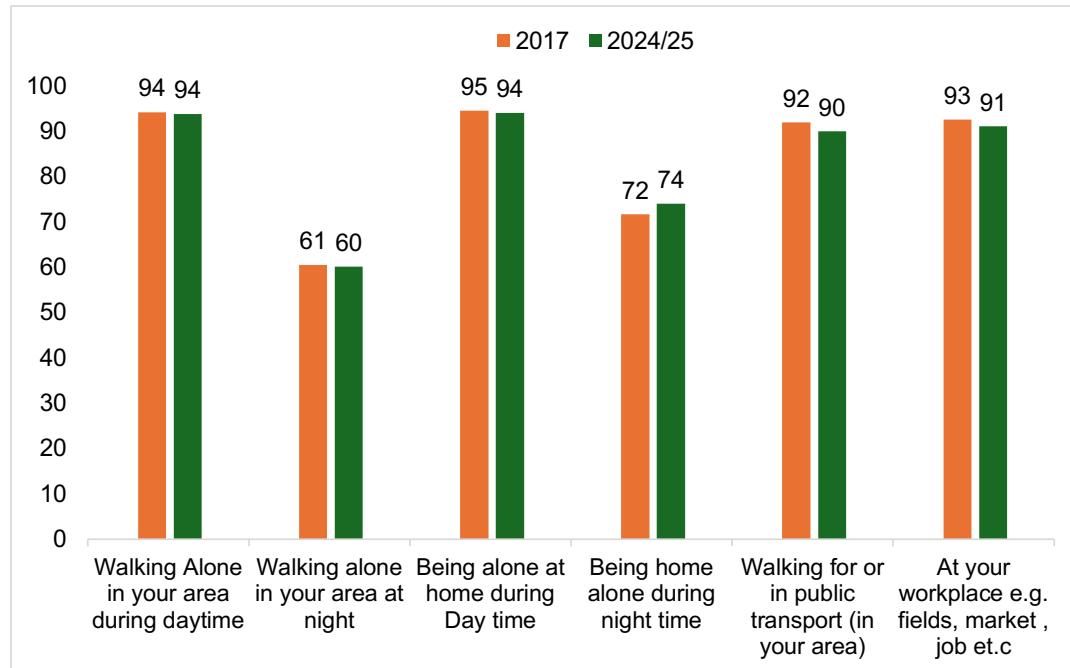

Table 6.5 shows that the Bukedi and West Nile regions had the highest proportions of the population aged 18 and above who were most worried about poverty (95% each), compared to Tooro, which recorded the lowest proportion (61%).

## 6.5. Safety

Fear of crime restricts mobility, which interferes with social and economic interaction, as well as other social activities. SDG Target 16.1 "Significantly reduce all forms of violence and related death rates everywhere" is one of the most direct global commitments to enhancing safety under the UN SDGs.

To better understand the views of population aged 18 and above, five scenarios related to safety in their day-to-day activities were asked during the survey to population aged 18 and above. Figure 6.10 shows the level of safety as "fairly and completely" as was reported during the survey. The findings indicate that the population aged 18 and above felt safer walking alone during daytime (94%) as compared to walking alone in their areas at night (60%).

**Figure 6.10. Level of feeling safe in different places (%)**

## 6.6. Role of Public Security Forces (PSF)

The 1995 Constitution of the republic of Uganda classifies public security forces to include institutions that observe and respect human rights and freedoms in the performance of their functions. These are the Uganda Peoples Defence Forces, the Uganda Police Force, the Uganda Prisons Service, all intelligence services and the National Security Council.

This survey collected information on perceptions of population aged 18 and above on whether Public Security Forces were discriminative, the occurrence of discrimination by these security officials, the population's aged 18 and above experience of discrimination prior to the survey and their effectiveness in managing security in the country.

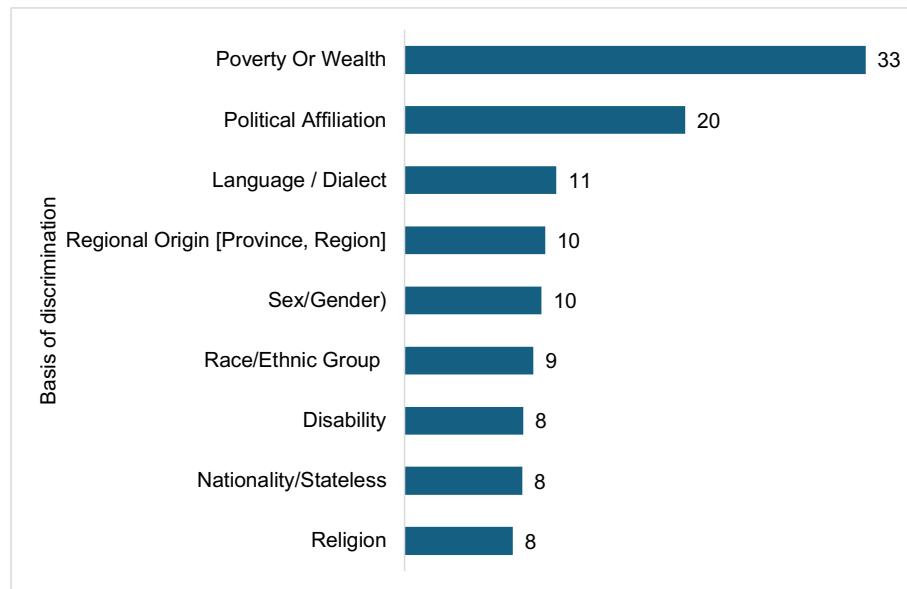

### 6.6.1. Perception on discrimination by public security forces

Discrimination is treatment or consideration of, or making a distinction in favour of or against, a person based on the group, class, or category to which the person is perceived to belong. Equality and Freedom from Discrimination are enshrined in Article 21 of the Constitution of the Republic of Uganda. The constitution notes that "a person shall not be discriminated against on the ground of sex, race, colour, ethnic origin, tribe, birth, creed or religion, social or economic standing, political opinion or disability".

Security forces in Uganda are generally mandated to keep law and order. It is their legal and ethical duty to treat and serve the public equally without discrimination.

The results in Table 6.7 and Figure 6.11 reveal that majority of the population aged 18 and above believe that poverty (33%) and political affiliation (20%) were the leading domains of discrimination by public security forces.

**Figure 6.11. Perception on existence of discrimination by Public Security Forces based on selected background characteristics (%)**

### 6.6.2. Victims of discrimination by public security forces

A victim is someone who has suffered because of someone else's actions or beliefs or as a result of unpleasant circumstances. Figure 6.12 shows that 14 percent of the population aged 18 and above reported to have been victims of some form of discrimination by public security forces. Discrimination based on poverty or wealth status was the most common form (10%) followed by political affiliation (5%) and language spoken by an individual (4%).

**Figure 6.12. Proportion of population aged 18 and above who had been victims of discrimination by public security forces by basis of discrimination**

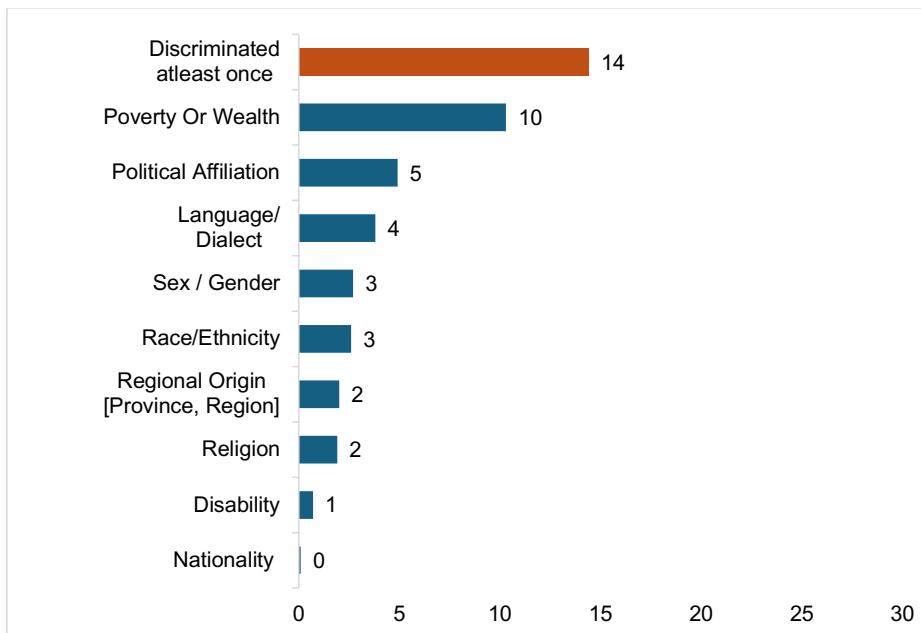

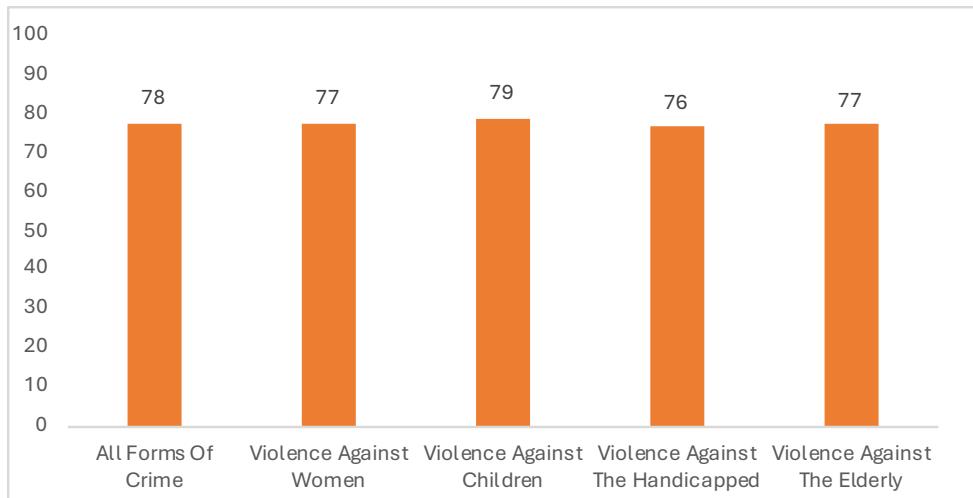

Table 6.8 shows that 18 percent males and 12 percent females experienced discrimination at least once. The region with the highest experience of discrimination at least once was Lango (34%) followed by Acholi (30%) while the least was Tooro and Teso (7% each).

### 6.6.3. Effectiveness of Public Security Forces in addressing violent crime

The survey collected information on population's aged 18 and above perceptions on the effectiveness of public security organisations in addressing violent crimes. The public security forces would be considered effective if they met the objectives and/or expectations of the public they serve. This includes solving problems related to crime faced by the communities.

Figure 6.13 shows the population's aged 18 and above assessment of their opinion on how effectively public security organizations dealt with crimes in Uganda. Seventy seven percent of Ugandans believed that public security forces addressed violence against women and violence against the elderly respectively.

**Figure 6.13. Perception of the population aged 18 and above on the effectiveness of Public Security organizations in addressing crimes**

## 6.7. Tension and Conflict

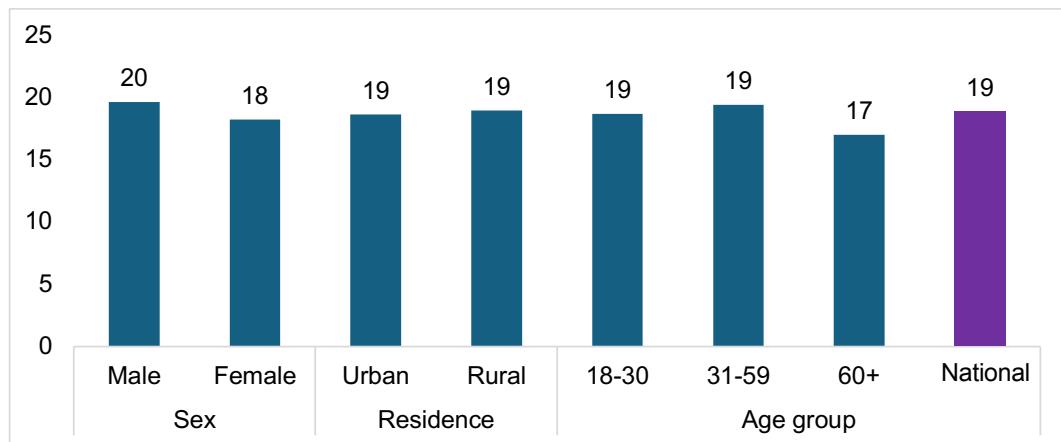

Tension is the state of emotional strain, apprehension or anticipation often involving hidden hostility while Conflict is the actual struggle or clash between opposing Forces whether internal or external or between incompatible goals. The World Bank argues that relative deprivation "breeds social tensions as the less well-off feel dispossessed when compared to wealthier individuals" and thus "the poor seek compensation and satisfaction by all means including committing crimes against both poor and rich"

### 6.7.1. Conflict or tension in communities

During the survey, the population aged 18 and above were asked whether there existed traces of any tension, conflict, or violence between groups in their communities 12 months prior to the survey. The results in Figure 6.14 shows that overall, 19 percent of the population

aged 18 and above indicated that there were cases of conflict or tensions among groups in their communities with minimal variations by residence, sex, and age.

**Figure 6.14. Proportion of the population who stated that there is existence of tension, conflict or violence between groups in their areas by sex, residence and age group**

### 6.7.2. Conflict resolution mechanism

The survey explored the population's aged 18 and above knowledge of the existence of conflict resolution mechanisms within their communities. Figure 6.15 shows that at national level, 90 percent of the population aged 18 and above were aware of the existence of conflict resolution mechanisms in their communities. This is an increase from 81 percent in 2017.

**Figure 6.15. Proportion of population aged 18 and above aware of the existence of the means, institutions to help resolve conflict (%)**

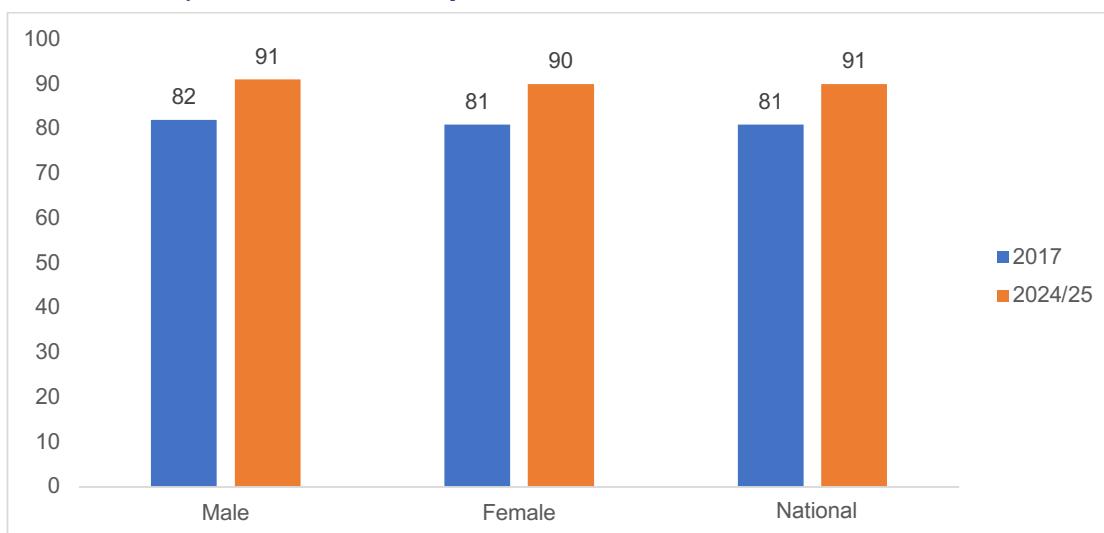

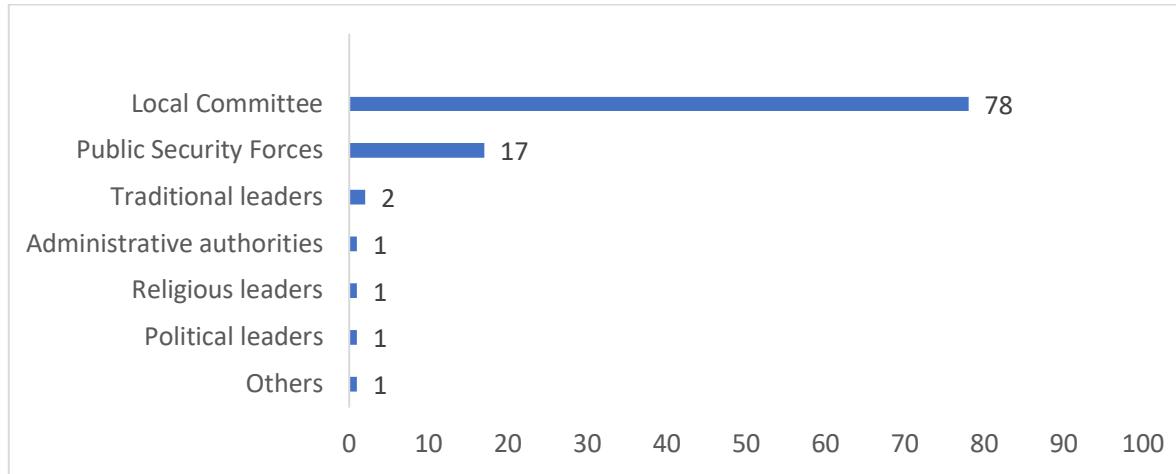

Figure 6.16 shows that the highest percentage of the population aged 18 and above reported that they go to their Local Committees (78%) for conflict resolution, followed by Public Security Forces (17%), while the least percentage go to administrative authorities, Political or Religious leaders (1% each).

Table 6.11 shows that Kigezi Sub region (97%) had the highest percentage of the population aged 18 and above aware of the existence of conflict resolution institutions in their area, while Busoga Sub region had the lowest proportion (73%).

**Figure 6.16. Proportion of population aged 18 and above by institutions they usually go to resolve conflicts, (%)**

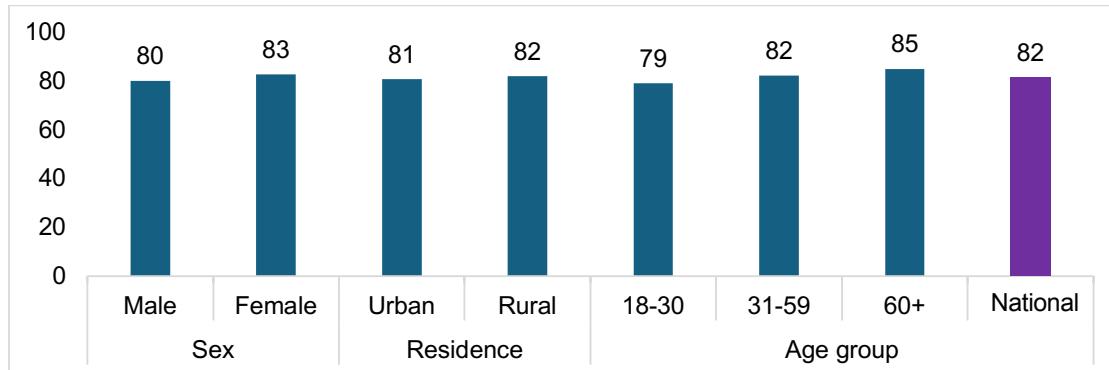

### 6.7.3. Public confidence in the state to provide security

The Government is mandated to protect and enhance the rights of its people. Public security is a key pillar that determines confidence that the citizens have in their leadership. It is therefore paramount that The State builds trust in its citizens.

Figure 6.17 reveals that (82%) of the population aged 18 and above had trust in the ability of the Government to protect them and their property. This is an increase from 72 percent in 2017.

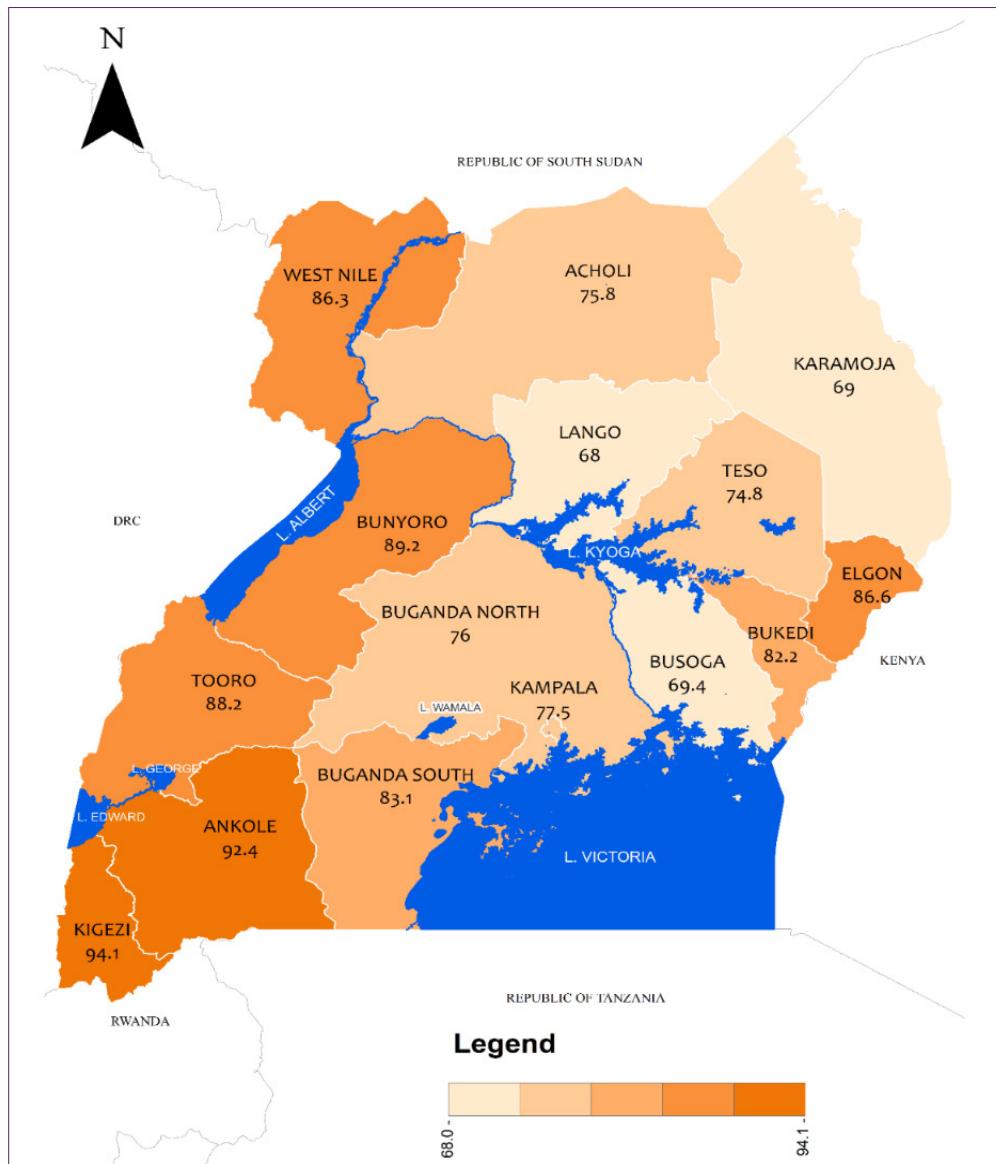

**Figure 6.17. Shows population aged 18 and above trust in the state to provide security for their property from crime and violence.**

\*Trust combines fairly and completely

By Sub region, the proportion of population aged 18 and above that trusted the Government to provide security for their property from crime and violence was lowest Lango Sub region (68%) while the highest was Kigezi Sub region (94%) as shown in Figure 6.18.

**Figure 6.18. Shows population aged 18 and above trust in the state to provide security for their property from crime and violence**

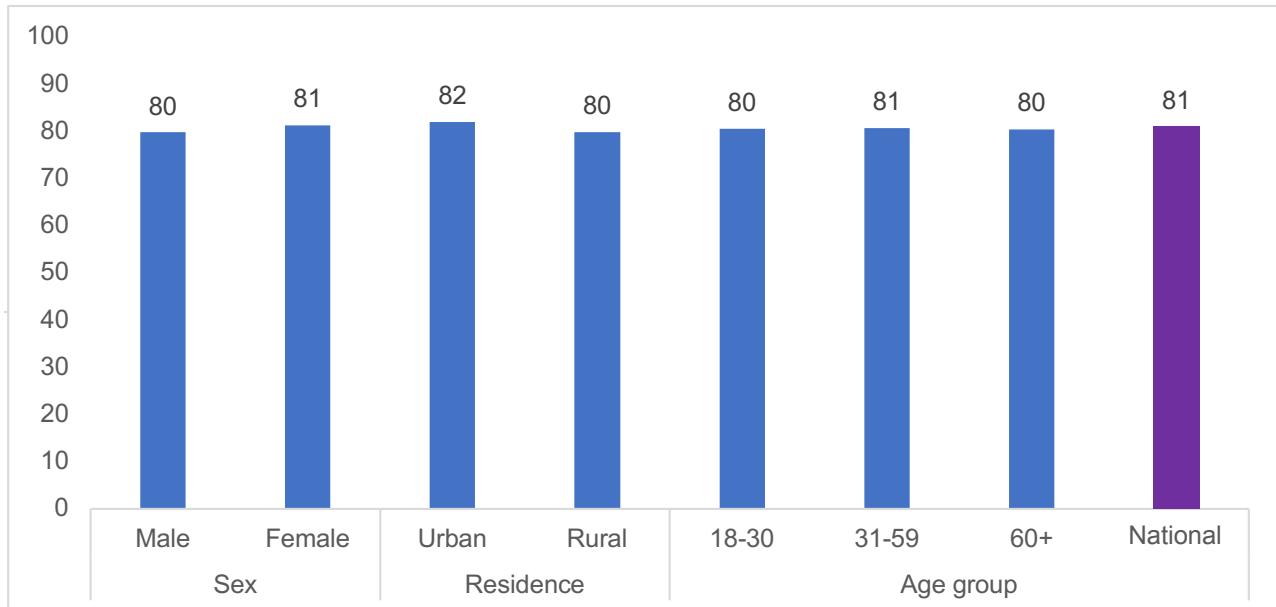

## 6.8. Subjective well-being/happiness

Happiness is known to be subjective, explaining one's feelings/moods. Subjective well-being is measured by simply asking people to report on how satisfied they feel with their own lives and how much positive and negative emotion they are experiencing. Individuals who indicated experiencing this feeling fairly or completely were classified as happy. It describes a range of positive emotions, including joy, pride, contentment, and gratitude.

During the survey, the population aged 18 and above were asked "Taking all things together would you say that you are happy?". Overall, 81 percent of population aged 18 and above reported that they were generally happy with their lives with residents in Urban areas reporting to be happier than residents in Rural areas.

**Figure 6.19. Proportion of population aged 18 and above with their level of happiness with life (%)**

*\*Happy combines fairly and completely*

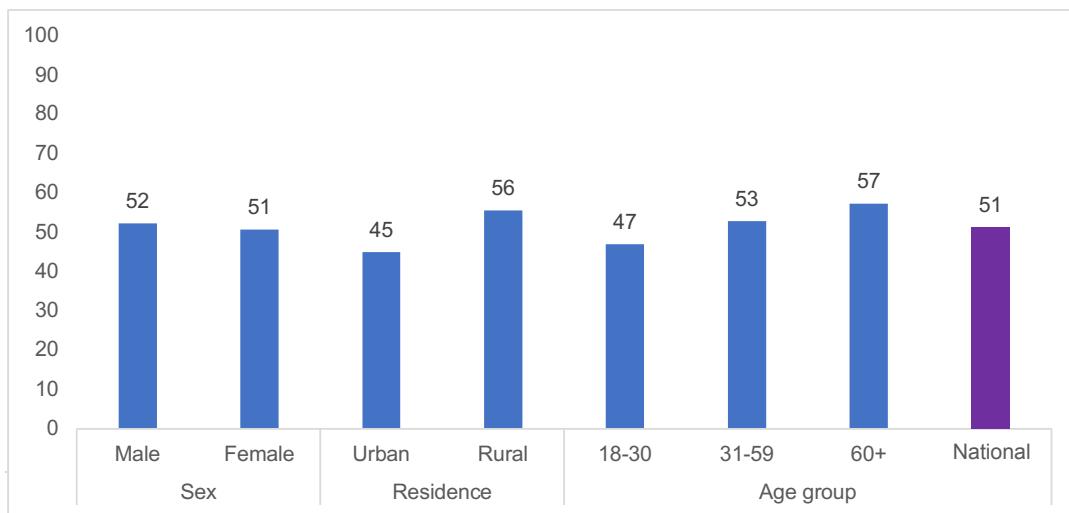

Table 6.11 further shows that there were no variations in the proportion of population aged 18 and above that indicated they were happy by sex (81% females and 80% males), and residence (81% each). By region, Buganda South Sub region and Bukedi Sub regions had the highest proportion of the population aged 18 and above that indicated they were happy (87% each) while Busoga Sub region had the least (61%).

## 6.9. Interpersonal trust

Interpersonal trust- building is constructed as an interactive process in which both individuals learn about each other's trustworthiness in different situations. High levels of trust can enhance feelings of security while lack of it can lead to conflict and anxiety.

Persons aged 18 and above were asked what extent can most people be trusted. Figure 6.19 indicate that overall, the level of trust in Uganda was at 51 percent of persons aged 18 and above. Proportion of the population aged 18-30 (47%) had the least levels of interpersonal trust compared to that of population aged 60+ (57%)

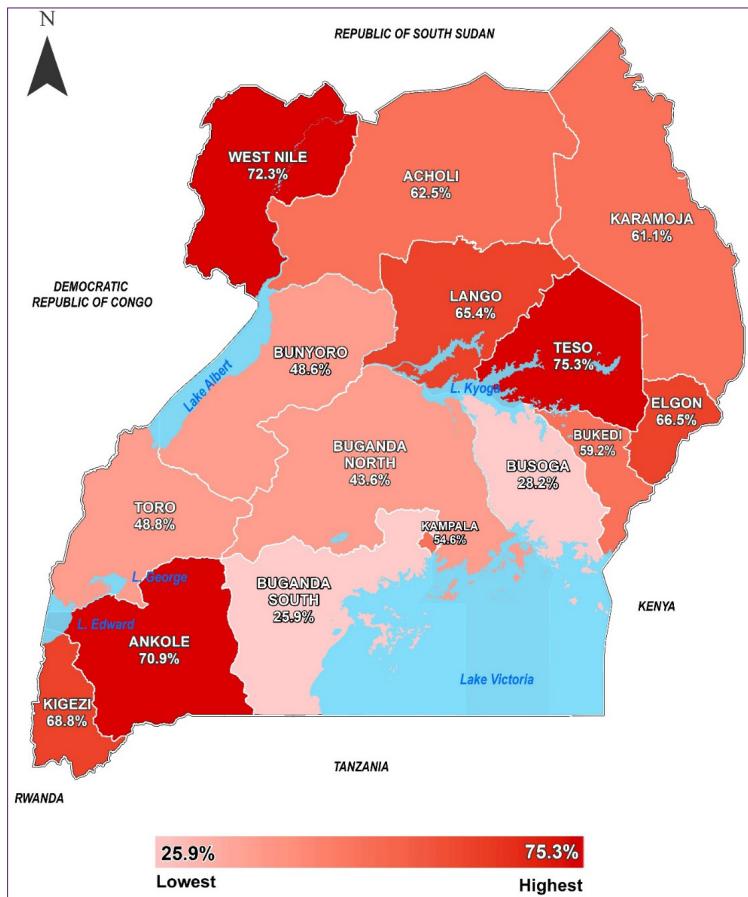

**Figure 6.20. Proportion of population aged 18 and above indicating the extent to which people trust others (%)**

\*Interpersonal trust combines fairly and completely

Figure 6.21 shows that Teso Sub region had the highest proportion of the population aged 18 and above with interpersonal trust (75%), while Buganda South Sub region had the lowest (26%).

**Figure 6.21. Proportion of population aged 18 and above indicating the extent to which people trust others.**

## Chapter 7

# PERCEPTIONS ON WOMEN'S RIGHTS

## Key Findings

- ⦿ **Women's participation in politics:** A slightly higher proportion of women (80%) than men (78%) agreed that the major reason why there are not many women in top political offices is that women are held to a lower standard than men.
- ⦿ **Participation in Electoral processes:** Ninety-nine and 98 percent of the male and female aged 18 and above agreed that women should participate as voters; 98 percent of both sexes agreed women should participate as candidates.
- ⦿ **Preference between men and female candidates in elections:** Eighty-six percent of men aged 18 and above would vote for a male candidate, while 49% who would vote for a female candidate. Among women, 74% would vote for a female candidate, while 60% would vote for a male candidate.
- ⦿ **Violence against women and girls is a violation of human rights:** Ninety seven percent of women and 96 percent of men aged 18 and above agreed that violence against women and girls is a violation of human rights.
- ⦿ **Gender equity and equality:** Overall, 91 percent of the population aged 18 and above agreed that both men and women should be involved in raising children and doing housework.

### 7.1. Introduction

Gender equality and inclusion are foundational to the effective realization of national governance, peace, and security. Recognizing that sustainable peace and democratic governance cannot be achieved without the full participation and protection of all citizens, Uganda has increasingly prioritized gender-responsive approaches within its national frameworks. In the context of governance, this means ensuring equitable representation and decision-making power for women and men at all levels of political and administrative leadership. This aligns with the Constitution of Uganda, the Fourth National Development Plan (NDP IV) and the Gender and Equity Compliance requirements

In the spheres of peace and security, gender inclusion addresses the unique needs, roles, and contributions of both women and men in conflict prevention, resolution, and post-conflict recovery. National policies and strategies have been aligned with international commitments such as the Convention on the Elimination of All Forms of Discrimination Against Women (CEDAW) and the UN Security Council Resolution 1325 on Women, Peace, and Security, reaffirming Uganda's commitment to inclusive and gender-sensitive governance. This work also advances SDG 5 on gender equality and SDG 16 on inclusive institutions and is consistent with Agenda 2063.

This approach not only promotes justice and human rights but also strengthens the resilience and legitimacy of institutions. As such, integrating gender equality and inclusion is not only a social imperative but also a strategic necessity for building a stable, peaceful, and inclusive society.

This chapter presents findings on public perceptions of women's rights, participation in politics, willingness to vote for female candidates, and views on violence against women and girls, disaggregated by sex, education, residence, age and Sub region.

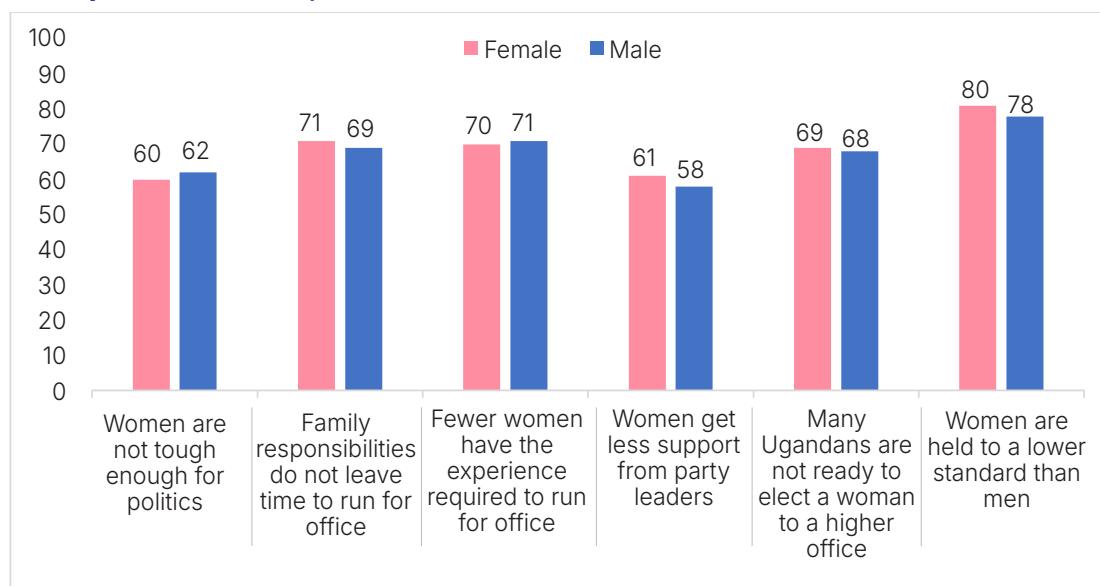

## 7.2. Perceptions towards women participation in politics

Information on reasons why fewer women than men stand for election, and why there are not many women in top political offices was collected.

Table 7.1 shows that the primary reason fewer women than men stand for election is that women are expected to seek permission from their partners to participate in politics, as reported by 88 percent of men and 89 percent of women aged 18 and above.

Among the population aged 18 and above, a slightly higher proportion of women (80%) than men (78%) agreed that the major reason why there are not many women in top political offices is that women are held to a lower standard than men (Figure 7.1).

**Figure 7.1. Perceptions of men and women on why there are not many women in top political offices, (%)**

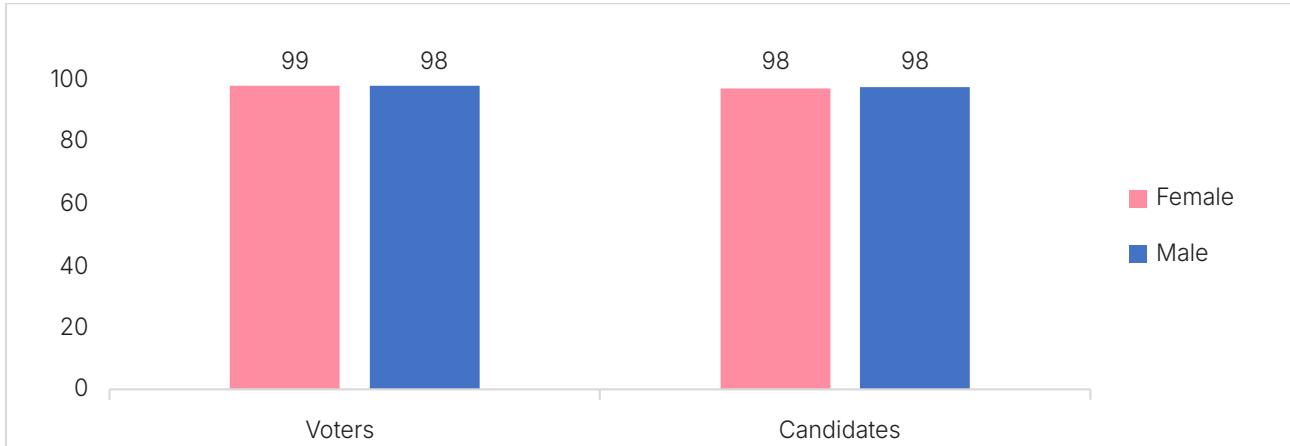

## 7.3. Perception on what women should participate as in Electoral Processes

The survey collected information on whether women should participate in elections as voters or candidates.

The results in Figure 7.2 revealed that the perception of women and men aged 18 years and above as to whether women should participate in politics was almost universal. Similar findings are observed for the perceptions on women participating in elections as candidates.

All women in Teso Sub region, all men in Busoga and Ankole Sub regions agreed that women should participate as voters and candidates (100% each) in elections. (Table 7.3)

**Figure 7.2. Participation in electoral processes by category (%)**

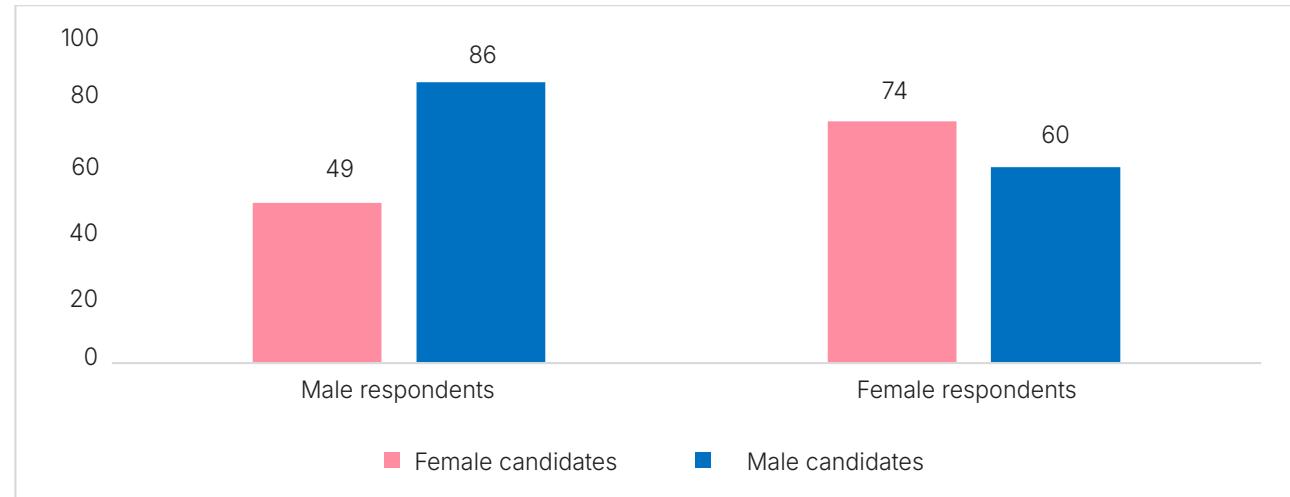

## 7.4. Preference between male and female candidates in elections

The survey collected information on who the population aged 18 and above would vote for if two equally qualified candidates, one man and one woman, are running for parliamentary elections.

Figure 7.3 shows that 8 of every 10 men (86%) aged 18 and above would vote for the male candidate, while 5 of every 10 men (49%) aged 18 and above would vote for a female candidate. Furthermore 7 in every 10 women (74%) aged 18 and above would vote for a female candidate, while 6 in every 10 women (60%) aged 18 and above would vote for a male candidate. (Table 7.4)

**Figure 7.3. Proportion of population aged 18 and above who would vote for female and, or male candidates during an election (%)**

## **7.5. Perceptions of the population on violence against women and girls is a violation of human rights**

The survey collected information on perceptions on whether violence against women and girls is a violation of human rights, with 97 percent of women and 96 percent of men aged 18 and above reporting that it is. Elgon sub-region had the least proportion of men and women aged 18 and above who agreed that violence against women and girls is a violation of human rights, 86 and 88 respectively.

Kigezi Sub region had the overall highest proportion of males (99.5%) aged 18 and above who agreed that violence against women and girls is a violation of human rights. (Table 7.5)

## **7.6. Attitudes about different aspects of gender equity and equality**

Information was collected on attitudes about different aspects of gender equity and equality, with ninety-one percent of both women and men aged 18 and above reporting that both women and men should share responsibility in raising children and doing housework. A higher proportion of women (93%) reported that women have a right to have equal share of family's wealth compared to men (87%).

Ninety seven percent of women and 96 percent of men aged 18 and above responded that women have a right to contribute views in all matters that affect them. (Table 7.6)

They are both resting on a white document with some faint text and diagrams. The lighting is soft, creating a professional and focused atmosphere.

## Chapter 8

# CONCLUSION AND RECOMMENDATIONS

## 8.1. Introduction

The NGPSS 2024/25 was the third in a series of GPS surveys, following the NGPSS 2017, and UNGBS 2013. The NGPSS was premised on the following domains for which the subsequent summaries are drawn; Human Rights and Justice, Democracy and Electoral Systems, Transparency and Accountability, Peace and Security, and Perception on women's rights. The survey targeted males and females aged 18 years and above. Sixty percent of the population aged 18 and above was residing in the rural areas; 35 percent were aged 18-30; More than twice as many females (17%) as males (7%) had never attended school; 32% of persons aged 18 and above reported having a disability, with a higher proportion of females (35%) than males (29%).

This chapter presents the conclusions and recommendations drawn from the different domains of the survey.

## 8.2. Human Rights and Justice

Awareness of human rights, the right to seek justice, and institutions providing legal services was reported at 89% among the population aged 18 years and above, indicating a generally high level of legal awareness among adults. More persons aged 18 and above who fell sick consulted a private clinic (41%) compared to a Government health unit/hospital (38%). Seventy-three percent of the working population reported working in harmful environments. Three in every ten (28%) persons aged 18 and above had experienced some form of discrimination, primarily based on poverty or wealth (9%) and language (9%). Public trust in justice institutions was generally strong, at 93%. The most trusted institutions were the Local Councils (91%), followed by the Courts of Law and the Uganda Human Rights Commission (82% each).

### Recommendations

1. Strengthen civic education programs, improve access to information on justice-related particularly targeting females, rural residents, and older populations (aged 60+), to bridge gaps in human rights awareness.
2. Develop targeted campaigns to encourage individuals to actively claim their human rights by addressing barriers such as fear of stigma or lack of knowledge about legal recourse.
3. Institutions that offer free legal aid should increase awareness particularly in rural areas to address gaps in access to free legal services.
4. Enhance monitoring mechanisms at health facilities to eliminate unofficial fees at health facilities, which increased to 9% in 2024/25 from 4% in 2017. This will reduce financial barriers, especially for the poor and rural residents.
5. Scale up patriotism programs, especially in rural areas and among older populations to enhance civic engagement and reduce corruption. In addition, engage youth in patriotism initiatives to leverage their higher awareness and foster long-term commitment to national development.
6. Strengthen community-based and formal justice structures to play a critical role in promoting access to justice and upholding public confidence in the rule of law.

### 8.3. Democracy and Electoral Systems

Citizen awareness of the right to vote was nearly universal at 94 percent nationally, with no notable gender differences. However, the proportion of the population able to verify their details on the voters' register declined to 75 percent in the 2021 general elections, down from 81 percent in 2016. Twenty-four percent of the population aged 18 and above were members of the Political parties. The youth comprised 18% of members in political parties.

#### Recommendations

1. Create more awareness of the civic rights and obligation of citizens by institutionalizing civic education programs.
2. Enact stringent laws on election malpractices such as bribery and commercialization of politics.
3. Political parties should intensify the registration and participation of their members, especially the youth.

### 8.4. Transparency and Accountability

Overall trust in public institutions remained high at 93 percent, with notable improvement in trust in the Uganda Police Force, rising from 46 percent in 2017 to 60 percent. Perception of local service delivery also improved to 69 percent, up from 66 percent in 2017. Three in ten persons aged 18 and above felt empowered to demand accountability from local leaders, while 16 percent were informed about the use of public funds. Concern about corruption declined to 82 percent from 88 percent in 2017, and the prevalence of bribery reduced to 14 percent from 17 percent. Awareness of Government efforts to combat corruption increased slightly to 57 percent, up from 54 percent in 2017.

#### Recommendations

1. Fast-track enforcement of service charters with clear turnaround times for key transactions (ID issuance, licensing, recruitment, pensions). Additionally, prioritize consumer responsiveness.
2. Enhance collaboration between anti-corruption agencies to avoid scattered efforts.
3. Empowering the population to demand for accountability of public funds at all levels.
4. MoJCA should complete the Regulatory Impact Assessment (RIA) for the Witness Protection Law and progress to the recommended action.
5. DEI should continue leading efforts to develop Rules for asset recovery, particularly in terms of valuation of benefits and forfeiture.
6. Advocacy for a Civil Asset Recovery Law must remain ongoing.
7. Clearly designate national champions to take responsibility for implementation of Asset recovery and whistleblower protection laws.
8. Enhance funding for anti-corruption and accountability agencies.

9. The Joint Anti-Corruption Action Plan, developed by a specialized inter-ministerial technical task force, should be considered and approved by Cabinet.
10. The 7th National Anti-Corruption Strategy should be developed and implemented in alignment with NDP IV.
11. Re-strategize with a primary focus on mobilizing all state actors and the public to combat corruption and deepen a culture of accountability.
12. Enhance national ethical values, patriotism, and a sense of national pride among the citizenry.
13. The IG's TAAC Strategy should be implemented by leveraging existing Government mechanisms and partnering with non-State actors, including the use of Integrity Promotion Committees and District Integrity Promotion Fora (DIPFs).
14. All MDAs should give greater attention to accountability and anti-corruption as cross-cutting issues in the implementation of their mandates
15. Enforce sanctions and penalties

## 8.5. Peace and Security

Overall, the findings show notable improvements in public safety, trust, and well-being. Seventeen percent of the population aged 18 and above reported that their property had been taken without consent in the past 12 months, a decline from 28 percent in 2017. Among those affected, 69 percent reported the theft to the police, and satisfaction with the outcome of the most recent complaint increased to 39 percent from 30 percent in 2017. Perceived effectiveness of the Public Security Forces remained high, with 77 percent of population aged 18 and above considering them effective in managing violence against women and 79 percent in managing violence against children. Sixty percent of population aged 18 and above felt safe walking alone at night in their area. Awareness of mechanisms and institutions for conflict resolution stood at 90 percent, and 78 percent of population aged 18 and above reported seeking assistance from their Local Committees when resolving conflicts. Trust in the Government's ability to provide security improved to 82 percent, up from 72 percent in 2017. Lastly, overall life satisfaction increased, with 81 percent of the population aged 18 and above reporting that they were happy with their lives, compared to 77 percent in 2017.

### Recommendations

1. Expand community policing programs that involve local residents in neighborhood watch initiatives, conflict resolution, awareness campaigns.
2. Fast track the roll out of Sub County Policing Model to enhance trust and real-time response to local issues.
3. Increase citizens' comfort in public spaces by improving street lighting, pedestrian paths, and CCTV coverage in both urban and sub-urban areas to deter crime.

## 8.6. Perception on Women's Rights

Women's underrepresentation in top political offices is largely attributed to being held to a lower standard, as reported by 80% of women and 78% of men. Support for women's participation in elections is very high, with nearly all persons aged 18 and above agreeing women should vote and stand as candidates. Men predominantly preferred male candidates (86% vs. 49%), while women favored female candidates (74% vs. 60%). Awareness of gender-based human rights violations is strong, with over 96% recognizing violence against women and girls as a violation. Additionally, 91% of population aged 18 and above support shared responsibilities between men and women in childcare and housework.

### Recommendations

1. Strict enforcement of laws to reduce the prevalence of violence against women.
2. Ensure disability-inclusive voter education and party processes
3. Deploy mobile legal-aid desks and fast-track procedures for election-related GBV, harassment and defamation cases during campaign windows
4. Reduce entry-cost barriers by waiving or lowering nomination and party-primary fees for first-time women aspirants and publishing gender-disaggregated primary results.
5. Scale local-language civic education on women's political rights and complaint pathways through radio, faith-based platforms and community forums.

# ANNEX

## Annex I: Survey Errors

Estimates generated from a household survey are subject to two types of errors: sampling and non-sampling errors. Non-sampling errors arise from factors such as misinterpretation of questions, data recording mistakes, and challenges encountered during data collection and processing. While every effort was made during the implementation of the NGPSS 2024/25 to minimize these errors through rigorous training, supervision, and data quality checks, such errors are difficult to eliminate or quantify statistically.

Sampling errors, on the other hand, occur because the survey results are based on information obtained from a sample rather than a complete enumeration of the population. Since the NGPSS 2024/25 utilized a three-stage cluster sampling design, the estimates may vary from those that would have been obtained using a different sample of the same design and size. These differences are measurable statistically and reflect the variability across all possible samples.

Sampling error is commonly expressed as the Standard Error (SE) of a given statistic (mean, percentage, etc.), which is the square root of its variance. The SE can be used to construct confidence intervals, indicating the range within which the true population value is expected to lie. In addition, the Coefficient of Variation (CV), which represents the ratio of the standard error to the estimate, was computed to assess the reliability and precision of the selected indicators.

The SEs and CVs were computed using Stata software, accounting for the survey's three-stage cluster design. The results are presented at the national, rural–urban, and sub-regional levels (where applicable).

## CHAPTER SEVEN: PERCEPTION ON WOMENS RIGHTS

### Proportion perception towards women's participation in Politics, (%)

Women are not tough enough for politics

Male	0.6212	0.0081	1.3	0.6052	0.6369	10356
Female	0.5984	0.0073	1.2	0.584	0.6126	10356

### Family responsibilities do not leave time to run for office

Male	0.6907	0.0084	1.2	0.674	0.7069	10356
Female	0.7133	0.0075	1.1	0.6984	0.7278	10356

### Fewer women have the experience required to run for office

Male	0.7086	0.008	1.1	0.6927	0.7241	10356
Female	0.7003	0.0078	1.1	0.6847	0.7154	10356

### Women get less support from party leaders

Male	0.5794	0.0091	1.6	0.5614	0.5971	10356
Female	0.6055	0.0086	1.4	0.5886	0.6222	10356

### Many Ugandans are not ready to elect a woman to a higher office

Male	0.6789	0.0076	1.1	0.6637	0.6937	10356
Female	0.6877	0.0076	1.1	0.6725	0.7025	10356

### Women are held to a lower standard than men

Male	0.7783	0.0082	1.1	0.7618	0.794	10356
Female	0.8047	0.0071	0.9	0.7905	0.8182	10356

### Many Women Are Not Educated Enough To Stand For Political Office

Male	0.5549	0.0096	1.7	0.536	0.5737	10356
Female	0.5738	0.0084	1.5	0.5572	0.5902	10356

## ANNEX II: Questionnaire

# UGANDA BUREAU OF STATISTICS

*We Are Evidence Based*

Statistics House, Plot 9, Colville Street, P.O. Box 7186, Kampala - Uganda

## THE NATIONAL GOVERNANCE, PEACE AND SECURITY SURVEY 2024/2025

SECTION A: IDENTIFICATION PARTICULARS					
1. STRATUM:					
2. DISTRICT/CITY:					
3. SUB-STRATUM: (Urban = 1, Rural = 2)					
4. COUNTY/MUNICIPALITY/CITY-DIVISION					
5. SUB-COUNTY/ TOWN COUNCIL/DIVISION:					
6. PARISH/WARD:					
15. VILLAGE/CELL:					
7. EA:					
8. HOUSEHOLD SERIAL NO.:					
9: SAMPLE NO.:					
16. IS HOUSEHOLD A REFUGEE HOUSEHOLD? (Yes = 1, No = 2)					
10. NAME OF HOUSEHOLD HEAD:					
12. HOUSEHOLD CODE					
13. TELEPHONE CONTACT:					
14. LOCATION ADDRESS OF HOUSEHOLD:					
15. CAPI GPS COORDINATES					

THIS SURVEY IS BEING CONDUCTED BY THE UGANDA BUREAU OF STATISTICS UNDER THE AUTHORITY OF THE UGANDA BUREAU OF STATISTICS ACT, 1998.

THE UGANDA BUREAU OF STATISTICS

	l) Other, specify	l	l	l) Other, specify	l	l

G709: Give your opinions on the following practices. Using the following codes, write the code that corresponds to the rating in the table below

1. Strongly agree    2. Agree    3. Not sure    4. Disagree    5. Strongly disagree

Statement	Code	
a) It is more important that a boy gets higher education than it is for a girl.	a	a
b) Households should spend the same amount of resources on girls and boys regarding education	b	b
c) Households should spend the same amount of resources on girls and boys regarding health	c	c
d) Girls and boys should spend the same amount of time on domestic work	d	d
e) Men and women must share equally household tasks and child caring if both are working.	e	e

## **SECTION H: ACCESS TO JUSTICE FOR PERSONS 18 YEARS AND ABOVE**

*Now I am going to ask you questions about access to justice.*

H8	Which are these organizations/Institutions?  A = Uganda Association of women lawyers: FIDA B = LDC Legal Aid Clinic C = Legal Action for Persons with Disabilities D = Centre for Health Human Rights and Development E = Platform for Labor Action F = Foundation for Human Rights Initiative G = Human Rights Network-Uganda H = Legal Aid Project/Service Providers I = Public Defenders' Association of Uganda J = Forgotten/Don't remember Z = Other, specify	A B C D E F G H I J Z	A B C D E F G H I J Z	
H9	During the last 12 months, have you been coerced from seeking Justice by any of the following?  READ OUT 1 = Yes                    2 = No A=Employer B=Uganda Police Force C=Army D=Uganda Prisons Services E=Family Member F=Traditional Leader G=Non-Government organization F= Community leader Z=Other Specify	A B C D E F G H I F Z	A B C D E F G H I F Z	
H10	In the last 12 months, did anyone take your property against your will?  1 = Yes                    2 = No	1 2	1 2	If 2>>H17
H11	In the last 12 months, what were the MOST recent property (ies) taken away from you against your will?  A=Phone B=Bag C=Television/radio D=House E=Money F=Vehicle G=Land Grabbing H=Motorcycle/Bicycle I= Computer/Monitor/CPU or any other device J= Livestock/Animal K= Agricultural produce L=Furniture Z= Other Specify	A B C D E F G H I J K Z	A B C D E F G H I J K Z	

H12	Who took that property? A = Family member B = Community member C = Government institution D = Government agent E = Security agent F = I don't know G= Landlord Z = Others Specify	A B C D E F G Z	A B C D E F G Z	
H13	Did you or any member of the household report the complaint to the relevant authorities? 1 = Yes      2 = No	1 2	1 2	IF 2>>H17
H14	Where was the case reported? A=Police B=Uganda Human Rights Commission C= Equal opportunities Authorities D=Local councils E= Courts of law Z=Others Specify	A B C D E Z	A B C D E Z	
H15	Were you satisfied with the outcome from your most recent complaint to the authorities? 1 = Very satisfied      2 = Satisfied      3 = Very dissatisfied      4 = Dissatisfied	1 2 3 4	1 2 3 4	
H16	Overall, How much money did you spend in the process of seeking for justice in this case? (Record in UG Shillings)			
H17	An informal justice system is an endeavor to resolve disputes through informal means such as; elders, cultural or religious leaders to resolve the dispute. In the last 12 months, have you used the informal justice system to resolve a dispute? 1 = Yes      2 = No	1 2	1 2	If 1 >>H19
H18	Why haven't you used the informal system of justice resolution? A=Had no case B=They are biased C=They are costly/Expensive D=They are incompetent E= The case takes a lot of time Z= Others Specify	A B C D E Z	A B C D E Z	>>Section I
H19	Which of the following have you used in the last 12 months? READ OUT 1 = Yes      2 = No A=Clan leader B=Cultural/ Traditional leader C=Religious leader D=Elders Z=Others Specify	A B C D Z	A B C D Z	
H20	Based on your previous experience of the most recent complaint or based on your ongoing complaint, rate your level of satisfaction with..... (READ OUT) 1 = Very satisfied      2 = Satisfied      3 = Very dissatisfied      4 = Dissatisfied A. Time it took to Close the case B. The Court Process C. The Final Judgment D. Fairness to both men and women E. Fairness to both rich and poor	A B C D E	A B C D E	

## SECTION I: TRANSPARENCY AND ACCOUNTABILITY FOR PERSONS AGED 18 YEARS AND ABOVE

Now I am going to ask you questions about transparency and accountability.

				Skip Pattern
	Personal Id in HH Roster			
	Name of household member			
	Age of household member			
	Serial number of person providing information			
I1	Are you aware that you have the right to demand for information on how public funds are used? 1 = Yes      2 = No	1 2	1 2	
I2	Are you aware that you have a right to raise a complaint over anyone misusing public resources/funds? 1 = Yes      2 = No	1 2	1 2	
I3	During the Higher Local Government Planning Process, Local leaders are expected to share information about the Indicative Planning Figures (IPF) for the previous year and how that money was utilized? During the last Financial Year; Did your local council leaders inform you of how the received funds were utilized? 1 = Yes 2 = No 3 = Don't Know	1 2 3	1 2 3	
I4	In the last 12 months, have you raised any complaint to the Local Government leaders over poor service delivery in your community? (for example, roads, schools and health etc.) 1 = Yes      2 = No	1 2	1 2	
I5	Are you empowered to demand for accountability regarding service delivery from your local council leaders? 1 = Yes      2 = No	1 2	1 2	
I6	Are you aware of the existence of any committee set up to monitor the delivery of services in your community? 1 = Yes      2 = No	1 2	1 2	
I7	In the last 12 months, have you attended any meetings on service delivery in your community? 1 = Yes      2 = No	1 2	1 2	
I8	Are you aware of new Government policies, programs or projects introduced in your community in the last 12 months? 1 = Yes      2 = No	1 2	1 2	If code 2 >> I12
I9	What are the new Government policies, programs or projects introduced in your community in the last 12 months?			
I10	How did you first learn about these Government policies, programs or projects introduced in your community? 1= Radio 2=Television 3= social media 4=Newspaper 5= Local meetings 6= Word of mouth 7=Phone calls 8=Community Announcer 9=Internet search 10=Baraza 11=others	1 2 3 4 5 6 7 8 9 10 11	1 2 3 4 5 6 7 8 9 10 11	

I11	Have you participated in any community meetings or discussion or projects introduced in your community in the last 12 months?  1 = Yes      2 = No	1 2	1 2	If code 2>>I14
I12	How often do you attend such community meetings or discussions on projects or programs introduced?  1= Not at all 2= Rarely 3= Often 4=Always	1 2 3 4	1 2 3 4	
I13	Have you been a beneficiary of the following Programs  1 = Yes      2 = No  A=PDM B=Operation Wealth Creation (OWC) C=Youth Livelihood Programme (YLP) D=Uganda Women's Entrepreneurs Programme (UWEP) E=NUSA F=NAADS G=Emyooga H= Older Persons Grant (SEGOP)	A B C D E F G H	A B C D E F G H	
I14	How effective were the following programs in meeting your expectations?  1 = Not at all   2 = Not very effective   3 = Fairly   4 = very effective  A=PDM B=Operation Wealth Creation (OWC) C=Youth Livelihood Programme (YLP) D=Uganda Women's Entrepreneurs Programme (UWEP) E=NUSA F=NAADS G=Emyooga H= Older Persons Grant (SEGOP)	A B C D E F G H	A B C D E F G H	Rate only those with Yes in I13.

## SECTION J: NATIONAL REGISTRATION AND ELECTORAL SYSTEMS FOR PERSONS AGED 18 YEARS AND ABOVE

Now I am going to ask you questions about the national registration and electoral systems.

	Personal Id in HH Roster			Skip Pattern
	Name of household member			
	Age of respondent			
	Serial number of person providing information			
J1	Do you have a valid National Identification card? 1 = Yes 2 = No, registered but not picked 3 = No, got lost 4 = No, expired 5 = No, never registered	1 2 3 4 5	1 2 3 4 5	IF 1 or 2 >>J3
J2	Why have you not registered or renewed the National Identification Card?
