THE UGANDA NATIONAL PANEL SURVEY

Presented by Mr. James Muwonge

26th October 2010
OUTLINE

- Background of the study
- Preliminary findings
UBOS is currently implementing the Uganda National Panel Survey (UNPS) program.

The UNPS entails a multi-topic panel household survey that is carried out annually over a twelve-month period.

The UNPS aims at producing annual estimates of outcomes and outputs in the key policy areas as well as providing a platform for the experimentation and assessment of national policies and programs.
SURVEY OBJECTIVES

- To provide information required for monitoring the National Development Strategy of major programs
- To provide high quality nationally representative information on income dynamics at the household level
- To provide a framework for policy oriented analysis and capacity building
MODULES

- Socio-economic Module
- Woman Module
- Agricultural Module
- Community Module
- Price Module
SURVEY DESIGN

- The UNPS initial sample targeted 3,220 households, selected from the 7,426 households visited during the UNHS 2005/06.

- This sample will be visited for two consecutive years (2009/10 and 2010/11) after which parts of the sample will start to be replaced by new households extracted from the updated sample frames developed from the 2012 Census.

- The UNPS interviews each household twice each year, in visits six months apart.
COVERAGE

The survey covers all districts in the country.

The sample provides estimates at:

- National level
- Rural-Urban level
- Regional level
Preliminary Findings
Teacher Characteristics
