January 2008

PREFACE:

Tourism is a fast growing sector in the Ugandan economy. It is therefore important that reliable, accurate and timely statistics about the sector are made available for policy formulation, planning, regulation, marketing and monitoring and evaluation of the tourism sector. Of special interest is the volume of tourists, their characteristics and their expenditures in Uganda.

The Uganda Bureau of Statistics (UBOS) in fulfilling its mandate as the source of official information is glad to release this Migration and Tourism Report V. This is the fifth report in the series, previous ones having been published in 1995, 2001, 2003 and 2005. The current report presents the salient findings based on information collected from immigration cards and national parks for the years 2002 to 2006.

The Uganda Bureau of Statistics wishes to recognize and appreciate the support from sister government ministries and agencies. These include the Immigration Department in the Ministry of Internal Affairs, which is the source of the Immigration Cards, The Ministry of Tourism, Trade and Industry, and the Uganda Wildlife Authority.

John B. Male Mukasa

EXECUTIVE DIRECTOR

Glossary of Terms:

The following concepts and definitions have been adopted in this release, which are in conformity with the definitions adopted by the World Tourism Organization (WTO) and the Statistical Division of the United Nations.

Arrivals: refer to both Visitors and Residents entering Uganda through formal entry points.

Departures: refer to both Visitors and Residents leaving Uganda via formal exit points.

Tourism: comprises the activities of persons travelling to and staying in places outside their usual environment for not more than one consecutive year for leisure, business and other purposes not related to the exercise of an activity remunerated from within the place visited.

Visitor: refers to any person travelling to a place other than that of his/her usual environment for less than 12 consecutive months and whose main purpose of the trip is other than the exercise of an activity remunerated from within the place visited.

A Tourist: is a visitor who stays at least one night in collective or private accommodation in the place visited.

An **international visitor:** is an international visitor who stays at least one night in collective or private accommodation in the country visited.

A Traveller: is any person on a trip between two or more localities. An **international traveller** refers to any person on a trip between two or more localities in different countries.

Ugandan residents: are persons residing in Uganda (Uganda citizens and persons with permanent residence from other countries) who leave the country temporarily.

1. Background

1.2 Source of data:

Uganda is a land locked country and has common borders with Kenya in the East, Sudan in the North, Tanzania and Rwanda in the South and Democratic Republic of Congo to the West. There are several gazetted entry/exit points along the territorial boundaries. Legal movements across Ugandan borders as well as formal immigration into Uganda are controlled by Directorate of Passport and Citizenship, under the jurisdiction of the Ministry of Internal Affairs. Information on formal movements of a person is obtained from all points of entry/exit. Information on both arrival and departure cards (see Appendix 2) that are administered by the Immigration Department staff and later cards are delivered at UBOS for data capture.

Statistics collected from persons using those entry/exit points include among others classification by port of entry, Country of usual residence, purpose of entry, mode of travel, age and sex of persons arriving and departing.

Information about visitors to the National Parks is obtained from the Uganda Wildlife Authority (UWA).

Figure 1.1: Map of Uganda showing entry/exit points

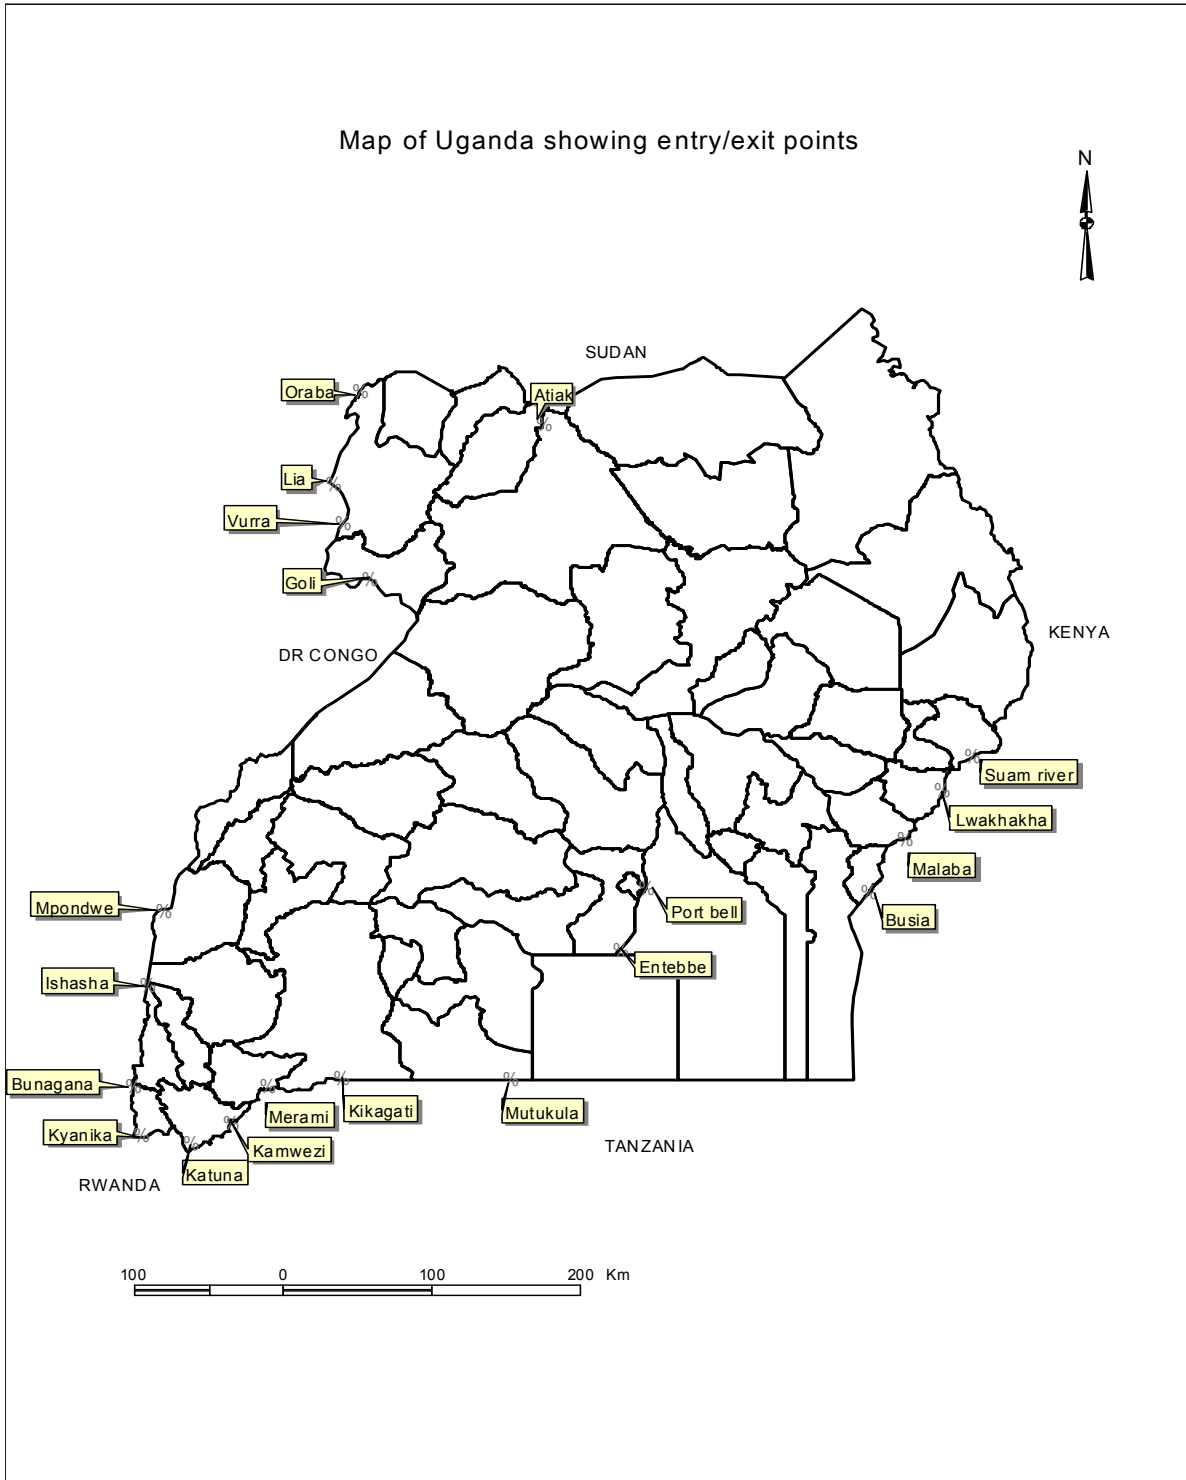

Figure 1.1 shows the official entry points, which include Entebbe International Airport.

1.3 Arrangement of this report

In addition of this chapter, chapters 2 and 3 look at the international arrivals and departures respectively. Chapter 5 isolates the tourists from all the arrivals.

For purposes of presentation of results by entry/exit points 4 major points have been identified namely Entebbe, Malaba, Busia and Katuna

2. International Arrivals

Arrivals refer to international travellers entering Uganda through formal entry points respective of their residence status.

International movements have been increasing for the past 2 decades as shown in appendix Table A1.

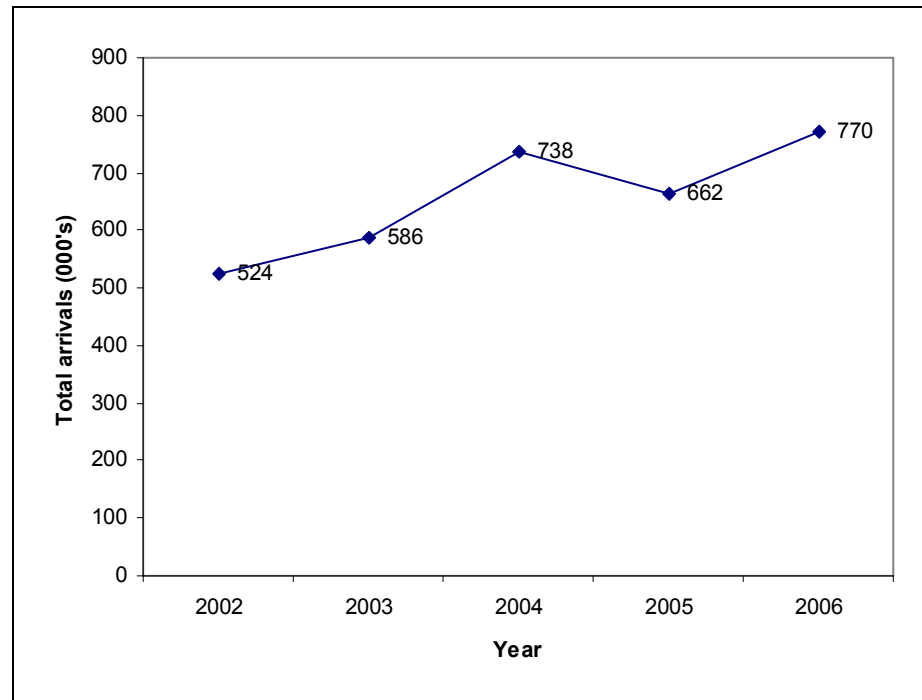

2.1 Total Arrivals

Total Arrivals increased by 16% between 2005 to 2006.

The total annual arrivals in the past five years (2002 – 2006) generally have been increasing as illustrated in Figure 2.1 below.

Total arrivals increased from 524,000 in 2002 to 770,000 in 2006 a 47 percent in five years. This gives an average increase of 49,200 persons per year. However the year 2005 experienced a decline in arrivals, this might be attributed to slow business in Kenya and some misunderstanding with Rwanda.

Figure 2.1: Total Arrivals ('000's) from 2002 - 2006

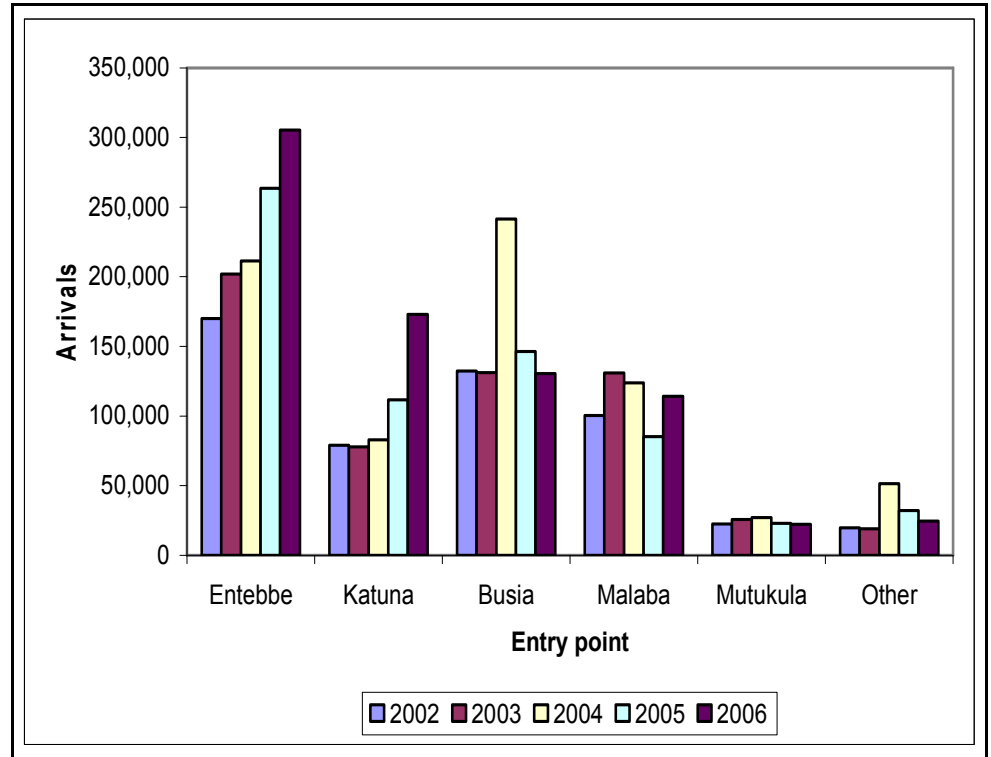

2.2 Arrivals by Entry point

Figure 2.2 shows that most of the travellers in into the country come in through Entebbe Airport and the level of traveller for the past five years has been increasing steadily from about 170,000 arrivals in 2002 to 305,000 arrivals in 2006.

The Figure 2.2 below reveals that Katuna border post has also an increase in the traffic flows while Busia and Malaba traffic flows has been up and down.

Figure 2.2: Total Arrivals by main entry points in 2006

Arrivals by Air dominated total arrivals in all year except 2004.

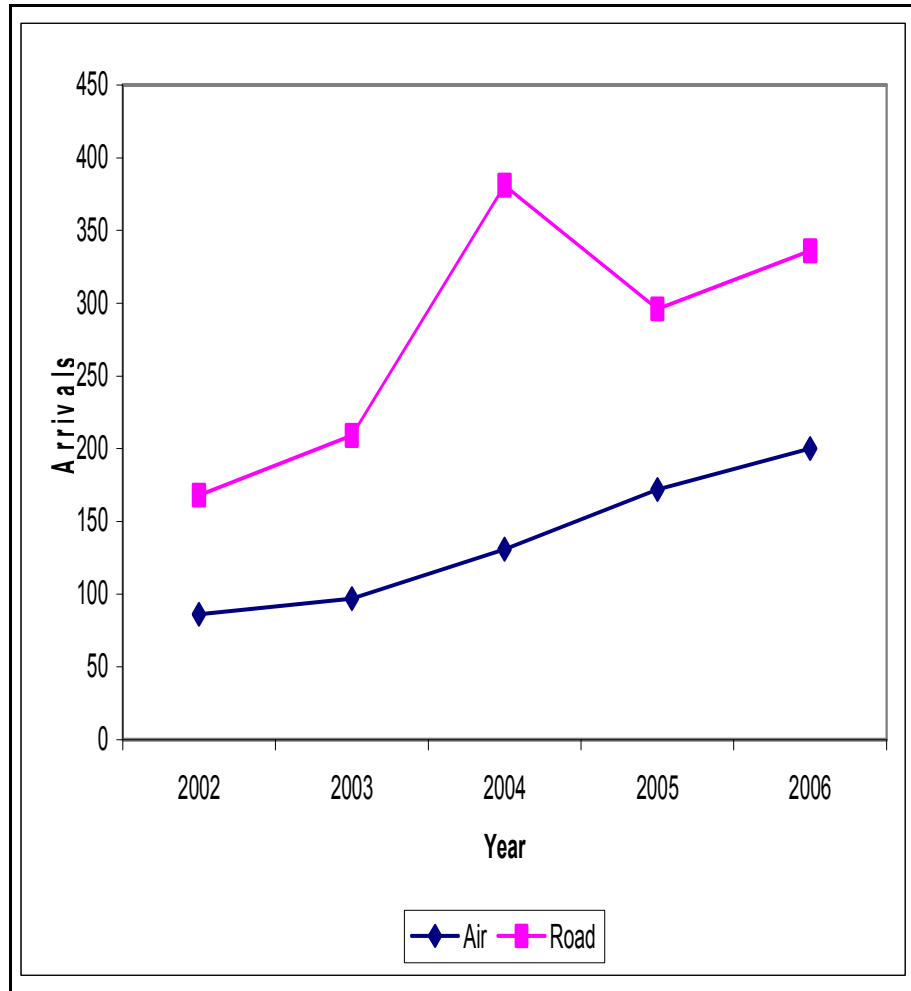

The share of Entebbe Airport in the total arrivals has also increased over time from 32 percent in 2002 to 39 percent in 2006.

2.3 Arrivals by mode of Transport

The 'mode of transport' used in a trip is defined as the conveyance used to cover the greatest distance. Two major types are identified in Uganda namely Air and Road transport. Very few travellers use Water transport at Port Bell.

Figure 2.3 below shows the number of arrivals by mode of transport, between 2002 and 2006. Road transport was the most commonly used mode of international arrivals in Uganda this is attributed to the country being land locked. Out of the 769,662 international arrivals in 2006, 60 percent used road transport and the remaining 40 percent used air. However, it has been noted that there was a steady increase in international arrivals using air transport. The share has increased from 32 percent in 2002 to 40 percent in 2006.

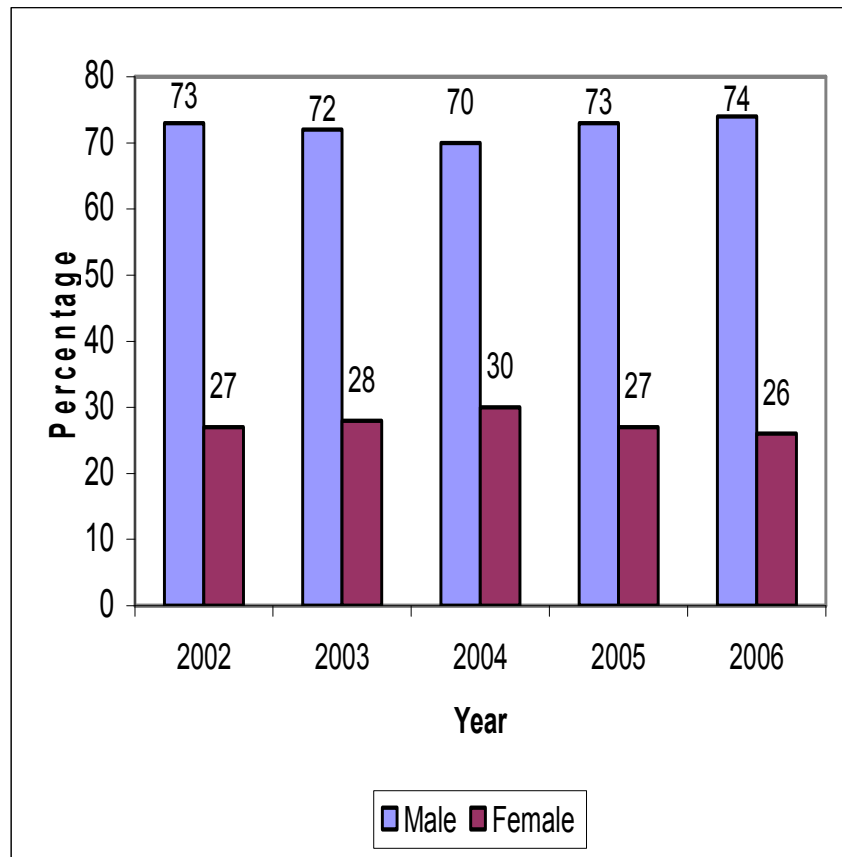

Figure 2.3: Arrivals by mode of transport; 2002 – 2006

2.4 Arrivals by Sex: 2002 – 2006

Sex differences are significant in many socio economic behaviours of persons. Nearly ¾ of the international arrivals in the country between 2002 and 2006 were males as seen from the Figure 2.4 below. The males mostly come in big number for business, conferences and other official work while the majority of females arrive in the country for holiday, leisure and visiting friends and relatives.

Figure 2.4: Percentage total arrivals by sex: 2002 – 2006

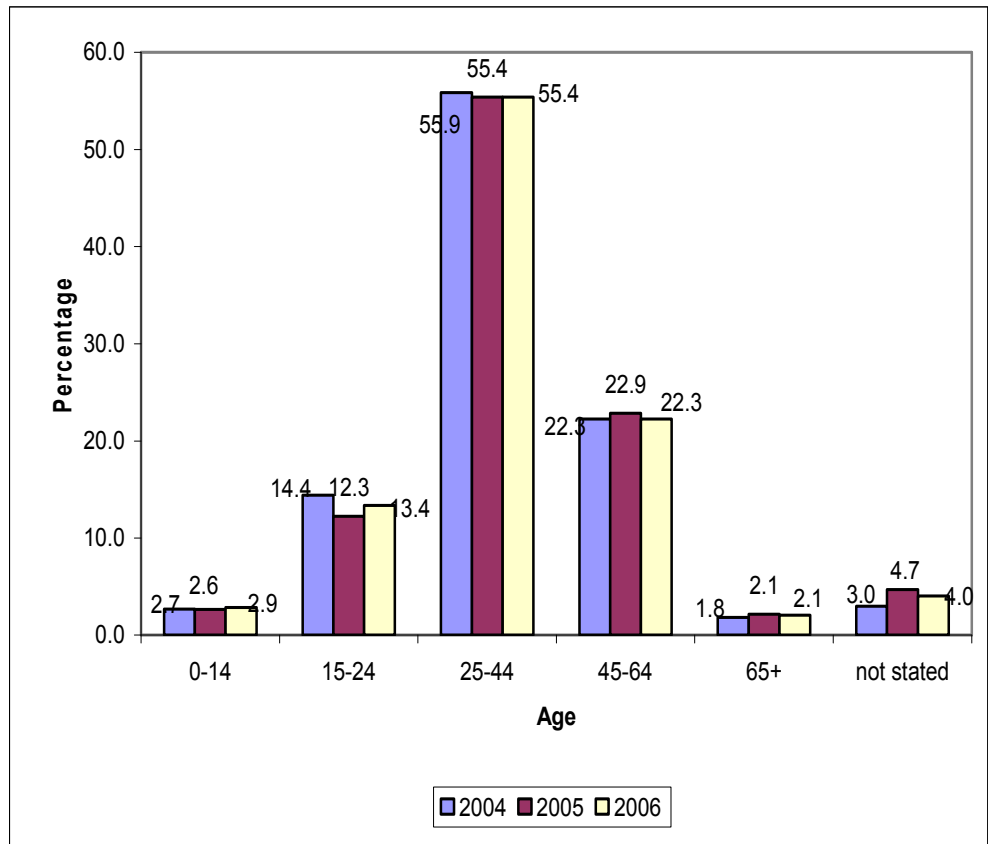

2.5 Arrivals by Age: 2002 – 2006

There are considerable differences in motives of travel between different age groups. The Figure 2.5 below reveals that the majority of international travelers are in the age group 25 – 44 years the group which is relatively young, economically active people and traveling mainly a family their percentage is above 50 percent for the years under consideration.

Travellers aged 45-64 years constitute over 20 percent of all travellers comprise of middle-aged, economically active people and traveling mainly without children.

The youngsters, constituting the important market of youth travel comes third in the row and those in 65+ take the fourth position and are mainly considered a retired.

Figure 2.5: Percentage arrivals by age group: 2002 - 2006

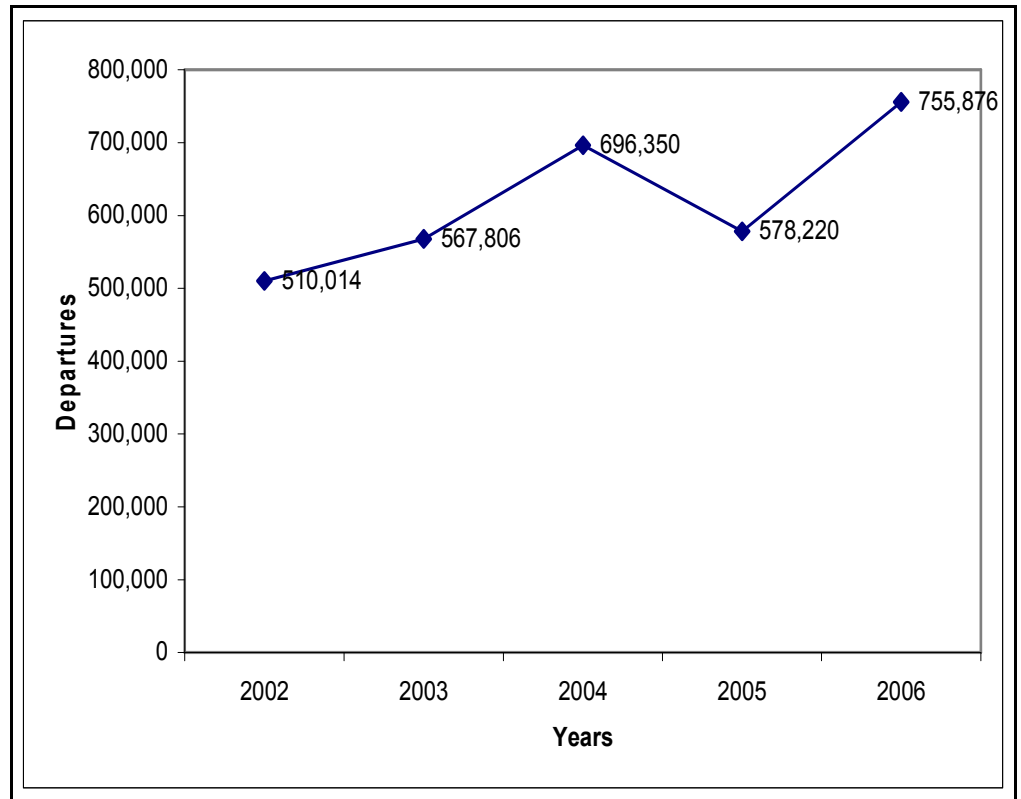

3. International Departures

Departures are persons moving out of the country through gazetted exit points. This is irrespective of the citizenship or residence status.

3.1 Total departures

There was a general increase in departures from 510,000 in 2002 to 756,000 in 2006. However, there was a decline in departure in the year 2005. The decline in the departures in 2005 was attributed to mainly to the slow business opportunities in Kenya, Tanzania and Rwanda as travelers to those countries there main purpose is business.

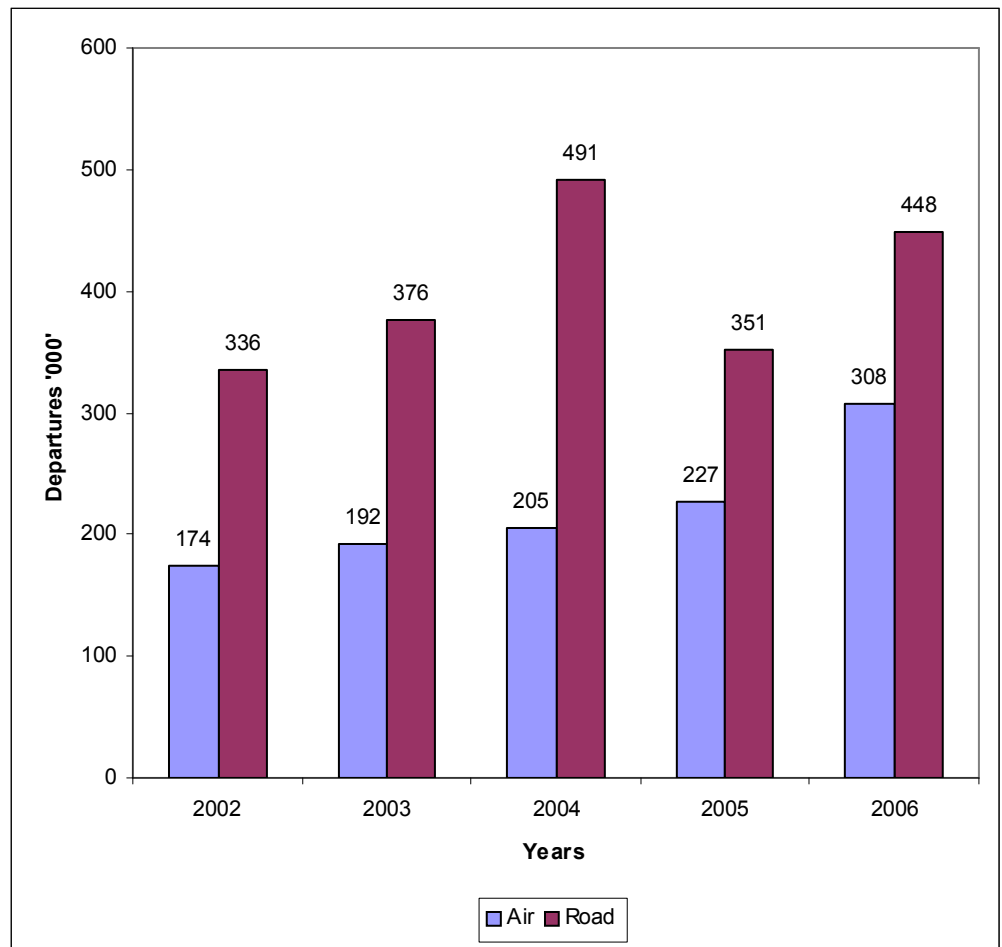

Figure 3.1: Total departures '000' from 2002 – 2006

3.2 Total departures by mode of transport

Figure 3.2 below shows that most departures from the country were by road and it increased between 2002 and 2006. The number of persons who left the country by air has also been growing at a slow rate as seen from the Figure 3.2 below.

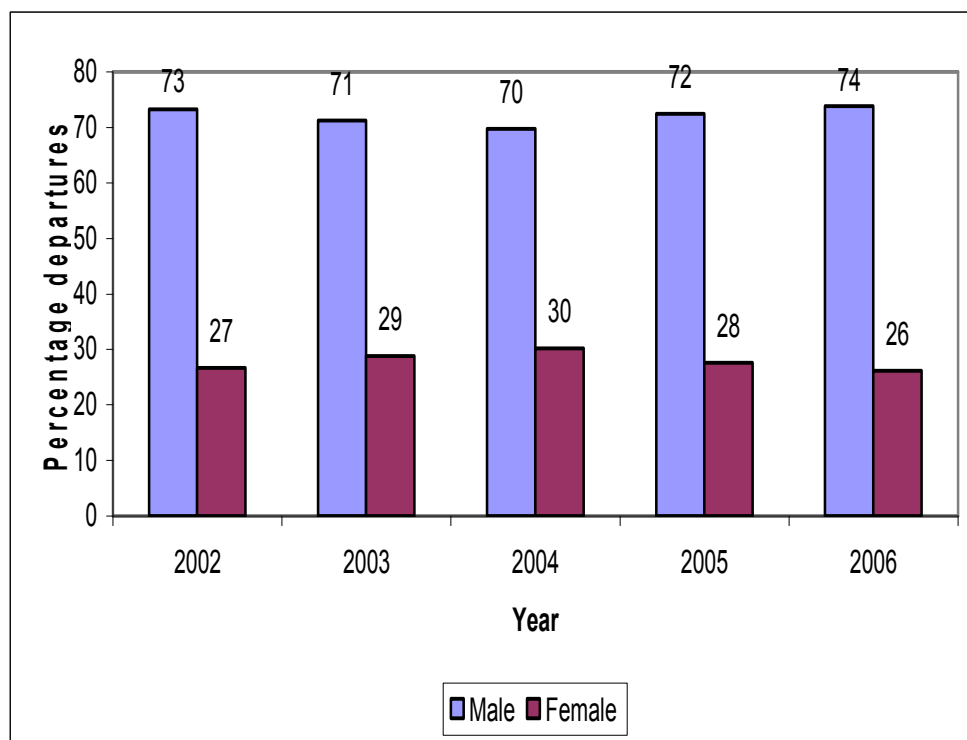

Figure 3.2: Departures '000' by mode of transport 2002–2006

3.3 Departures by sex

Figure 3.3 below reveals that there were more males leaving the country compared to the females in all years under consideration. Overall, the majority of the departures from the country to other countries were males constituting of over 70 percent in all years.

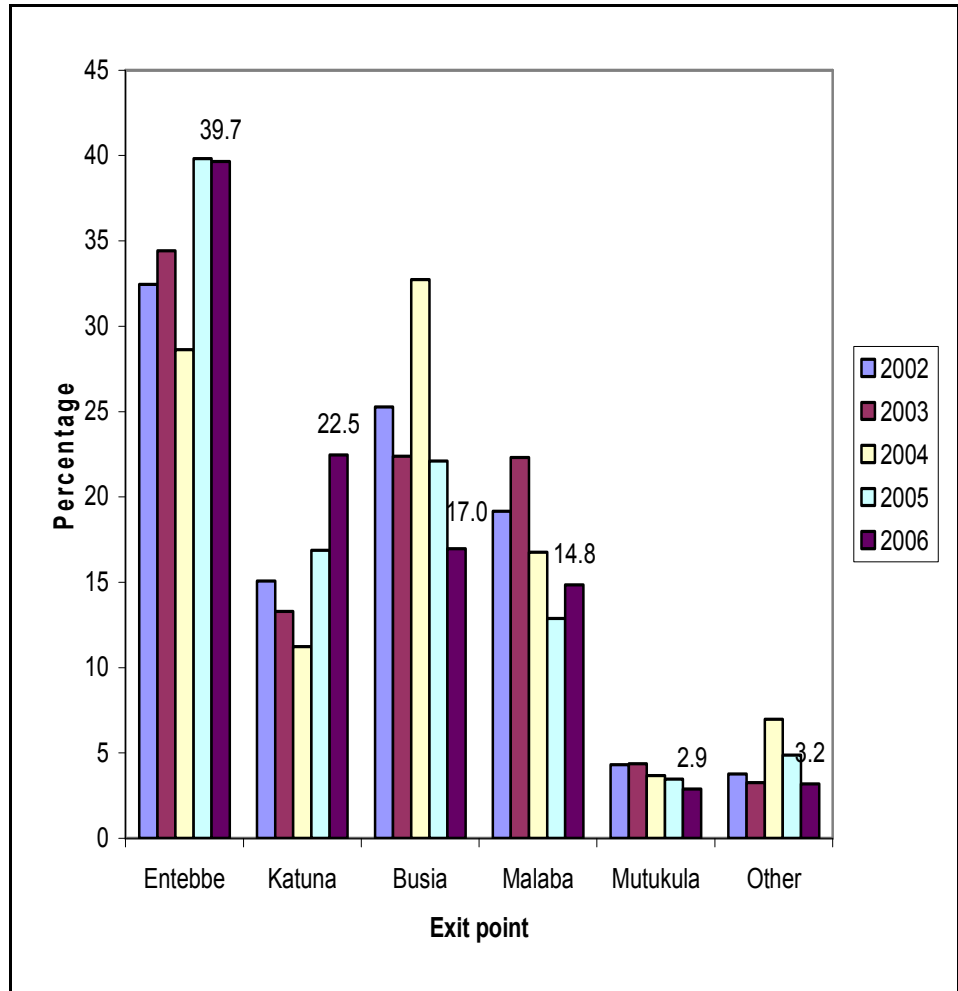

Figure 3.3: Percentage Departures by sex from 2002 – 2006

3.4 Total departures by exit point

Each port of exit from a country is specific to a given mode of transport, and therefore analysis of mode of transport can be undertaken from port of exit statistics. The greatest number of persons departing from Uganda to other countries through single exit point uses mostly air transport through Entebbe Airport which accounted for 40 percent in 2006, Busia and Katuna registered 37 percent each and other border posts contributed the least percent of 23 percent of the total departure in the same year.

Figure 3.4: Percentage departures by exit point from 2002 – 2006

4.0 Gross and Net Movements

This chapter looks at the gross and net movements over time.

4.1 Gross movements

Gross movements are the sum of all travels (arrivals and departures). This information is useful in managing the capacity of entry/exit points.

Table 4.1: Gross and net movements

Year	Arrivals	Departures	Net migration	Gross (arrivals plus departures)
2002	524,000	510,000	14,000	1,034,000
2003	586,000	568,000	18,000	1,154,000
2004	738,000	696,000	42,000	1,434,000
2005	662,000	578,000	84,000	1,240,000
2006	769,000	756,000	13,000	1,525,000

Overall the trend shows an increasing number of international travel from 1 million in 2002 to 1.5 in 2006, representing 48 percent increase in the 5 year period (7.7% per annum). If this rate is maintained the total flow is expected to increase to 2.3 million in 2011.

4.2 Net movements

Net movement is the difference between arrivals and departures. It reflects the net addition to the country's population because of international travel.

Table 4.1 above shows the net addition to the country's population is minimal e.g only 172,000 over 5-year period. This constitutes less than 1 percent of the total population of the country in 2006. Because of the small population of this population, no deeper analysis on the characteristics of the net movement is done.

5.0 Tourism

Visitor arrivals are persons travelling to a place other than that of their usual environment for less than 12 consecutive months and whose main purpose of the trip is other than the exercise of an activity remunerated from within the place visited.

One of the sources of tourism statistics is the immigration registration form (arrival and departure cards) completed by an international traveler at the point of arrival/departure, from the country. These cards provide a wide range of information of relevance for the planning, marketing and monitoring of tourism in the country. Table A10 shows that 70 percent of the total arrivals into Uganda came for tourism in 2006.

5.1 Visitor arrivals

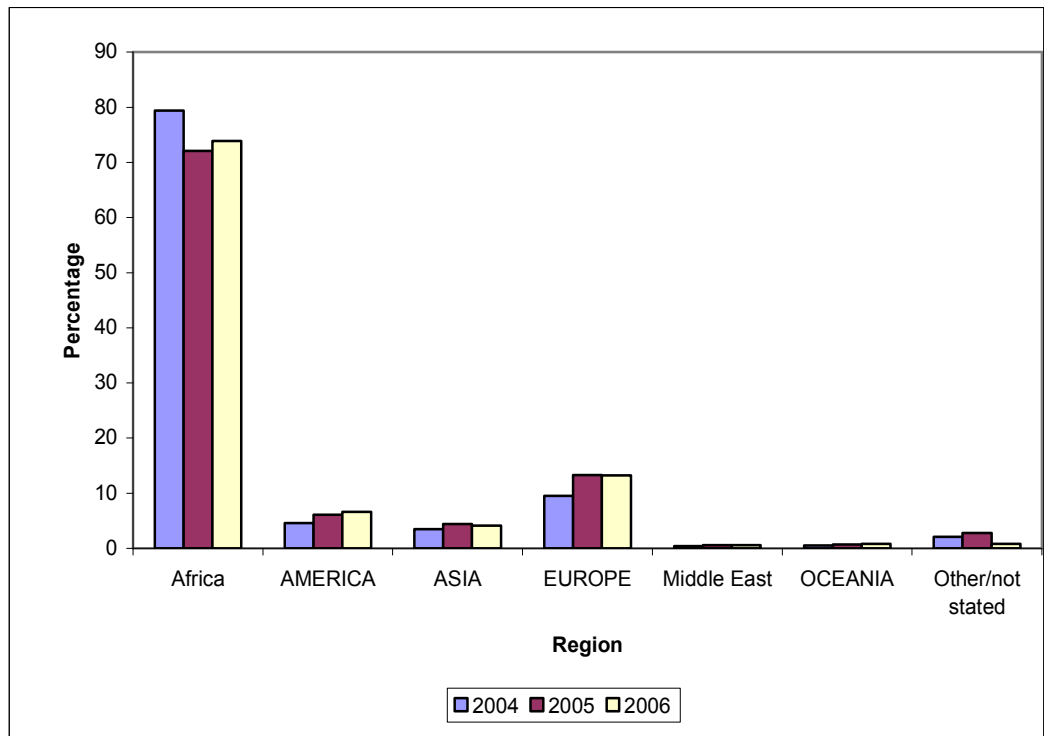

There were about 540,000 visitor arrivals out of 770,000 total arrivals in the country this was more than 2/3 of total arrivals. There was an increase in the number of visitor arrivals from about 470,000 in 2005 to 540,000 in 2006, representing a growth of 15 percent. It is believed that improved security in the northern Uganda and economy has contributed to the growth of the Tourism sector; where by a number of visitors come into Uganda for various reasons.

Figure 5.1: Visitor arrivals by year 2002- 2006

5.2 Visitor arrivals by place of origin 2004 – 2006

Figure 5.2 below shows that most visitors - arrivals in the country were from Africa, which accounted for over 70 percent of all arrivals, Europe contributes second largest number of visitors, while America comes third in ranking and mostly residents of the United States of America.

Figure 5.2: Percentage Visitor arrivals by region of origin 2004- 2006

5.3 Visitor arrivals by month 2002 – 2006

Table 5.1 below shows visitor - arrivals by month for the period 2002 – 2006. The monthly distributions for the years 2004 - 2006 showed that there is no clear pattern of in the visitor arrivals in the years under consideration. In the year 2006 the peak period was in the months of August and September, while in the year 2005 the peak was realized in the months of March and May.

Table 5.1: Visitor - arrivals by month 2002 - 2006

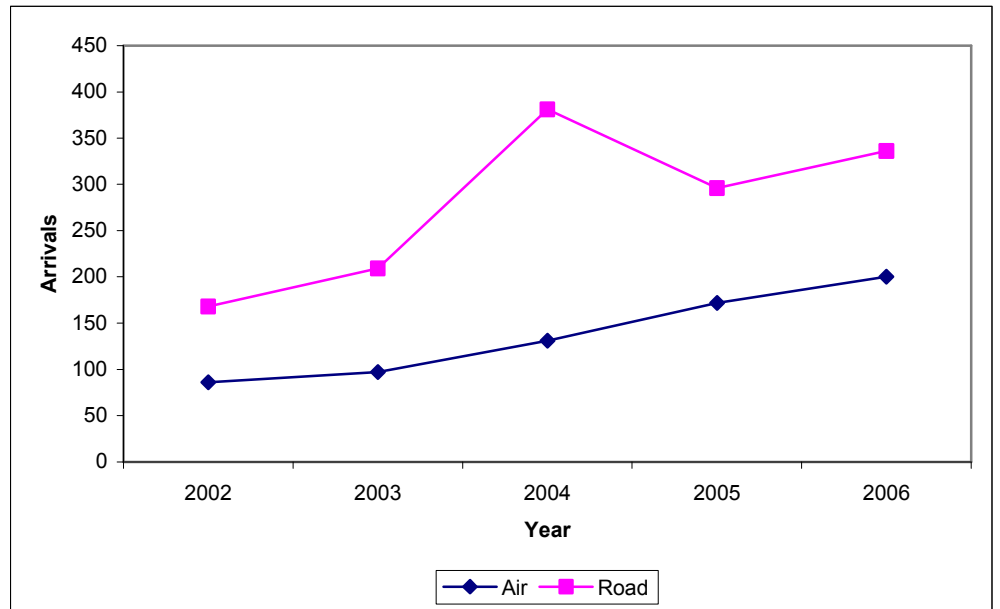

Month	2002	2003	2004	2005	2006
January	20,000	23,000	45,000	38,000	29,000
February	18,000	24,000	43,000	36,000	35,000
March	19,000	23,000	48,000	45,000	42,000
April	18,000	22,000	46,000	42,000	41,000
May	22,000	16,000	50,000	47,000	42,000
June	20,000	23,000	35,000	34,000	48,000
July	25,000	29,000	36,000	41,000	48,000
August	23,000	24,000	40,000	44,000	52,000
September	25,000	30,000	41,000	37,000	51,000
October	24,000	32,000	42,000	32,000	49,000
November	17,000	25,000	40,000	34,000	47,000
December	24,000	36,000	46,000	37,000	51,000
Total	254,000	306,000	512,000	468,000	539,000

5.4 Visitor arrivals by mode of transport

Figure 5.4 below shows road transport as the most commonly used mode of travel for visitor - arrivals. In the year 2006, Uganda received about 539,000 visitors, of whom 336,000 arrived in the country by road. This is due to the fact that most visitors into the country come from mainland Africa especially from our neighbour Kenya and Rwanda. Air transport through recorded about 200,000 arrivals in the same year and most of the visitors by air come from overseas mainly from Europe and America.

Generally visitor arrivals by air have steadily increasing and road transport from 2002 – 2004 increased and later in 2005 declined and then increased again in 2006.

Figure 5.4: Visitor arrivals by mode of transport, 2001 – 2004

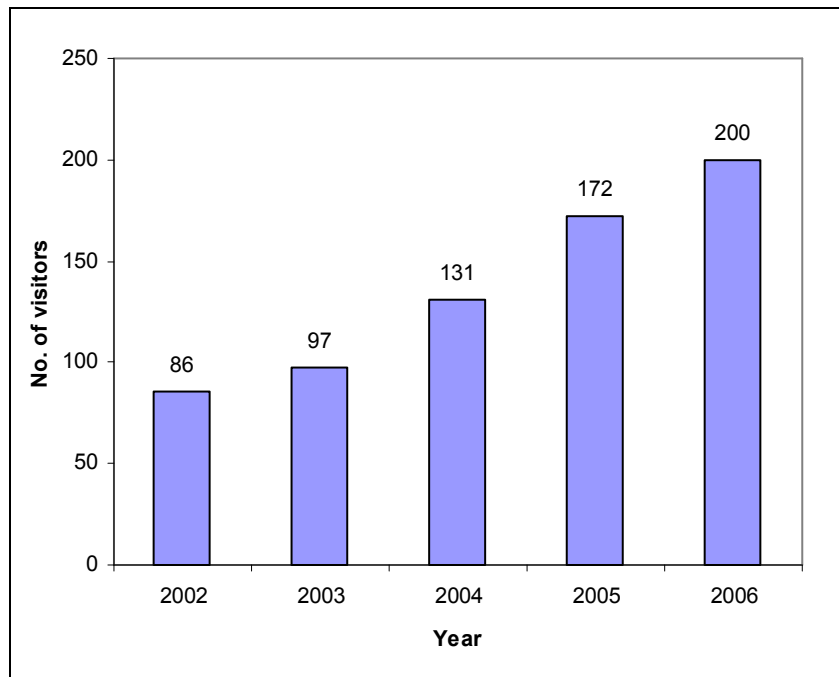

5.5 Arrivals through Entebbe Airport

The Figure 5.5 above reveals that there is a continuous increase in the number of visitor arrivals through Entebbe Airport since 2002. Most overseas visitors into Uganda pass through Entebbe Airport and on average the Airport handles 137,000 visitor arrivals per year (2002 – 2006).

A 16% increase in traffic flows of visitors through Entebbe International airport was recorded between 2005 and 2006.

Figure 5.5: Visitor arrivals through Entebbe Airport (000's)

Entebbe traffic inflow increased by 16%.

5.6 Visitor - arrivals by purpose of visit

Table 5.2 provides information on the percentage distribution of visitor arrivals by purpose of visit into the country. Of the total number of visitors 17 percent came to visit friends and relatives in 2006, then 13 percent traveled into the country for business and workshops and only 6 percent indicated that they came into the country for leisure, recreation and holidays in the same year 2006.

Those who came for other reasons and who didn't state the reason of entry, accounted for 64 percent of the total visitor arrivals. The higher percentage of other category is due to poor administration of the entry forms during filling by the travelers at the entry points.

Table 5.2: Percentage visitor arrivals by purpose of visit

Purpose of visit	2002	2003	2004	2005	2006
Leisure, recreation and holidays	27	25	17	2	6
Business and professional	23	22	16	7	13
Visiting friends and relatives	13	17	14	7	17
Other	37	36	53	84	64
Total	100	100	100	100	100

5.7 Visitor - arrivals by usual country of residence

Table 5.3 below shows percentage visitor arrivals by country of residence from 2002 - 2006. Of the total 540,000 visitor arrivals in Uganda in the year 2006, 30 percent came from Kenya, while Rwanda constituted 21 percent of the total visitors. Visitors from those countries mainly come here for business and visiting friends and relatives.

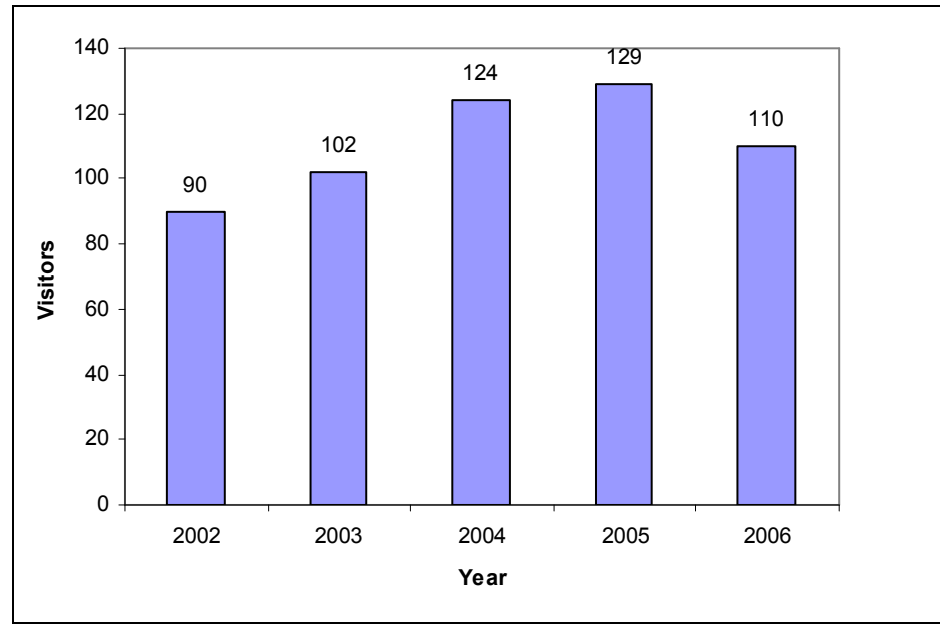

Visitors from Britain dominate the main market from overseas; which generated 5.8 percent, USA contributed 5.5 percent while Germany and Canada contributed 1.1 percent each of the total visitor arrivals in the year 2006.

Table 5.3: Percentage distribution of visitor arrivals by country of residence 2002 - 2006

5.8 Visitors to the National Parks

Figure 5.6: Visitors (Citizens and Foreigners) to National Parks (000's)

The total annual Visitors (citizens and foreigners) to the National parks of Uganda increased in the period of 2002 – 2005 and decreased in the year 2006 as portrayed by the Figure 4.6 above. The total annual visitors to the national parks in 2006 were recorded as about 110,000 persons compared to 129,000 in the year 2005, reflecting a decrease of about 15 percent.

Appendix Tables:
