INTRODUCTION

The principal function of government is to provide public services such as law and order, defense, education, health, and welfare to its citizens as well as redistribute income. To manage its operations and provide accountability to its citizens, government needs an accounting and reporting system. Two kinds of reporting systems are used; fiscal accounting and statistical reporting. A government fiscal accounting system is primarily designed to fulfill the requirements of fiscal accountability, which is a demonstration of compliance in the use of resources allocated by the budgetary process. **The Government Finance Statistics (GFS) reporting system is concerned with measuring the effectiveness of spending and the sustainability of fiscal policies. It deals with the stocks and flows in Revenue, Expense, Assets and Liabilities. Therefore Government Finance Statistics (GFS) measure the financial activities of the government in an economy.**

Purpose of GFS

- To provide input to the compilation of Government Consumption Estimates (GCE) for the General Government in the compilation of Gross Domestic Product (GDP).
- Used in the computation of the Supply and Use tables.
- Used in analysis of operations of specific levels of government and transactions between levels of government as well as the entire general government.
- To provide summary information on the overall performance and financial position of the general government.

Coverage

The bulletin covers Central Government which comprises Ministries, Departments, Agencies and Referral Hospitals. Currently, this includes 23 Ministries, 302, Agencies; 16 Referral hospitals; 38 Missions abroad and 10 Public universities.

GFS COMPILATION PRACTICES

The GFS compilation is in line with the current Government Finance Statistics Manual (GFSM 2014).

Data sources

The primary source of data is IFMS at the Ministry of Finance, Planning and Economic Development (MFPED), Department for Development Assistance and Regional Cooperation (DARC) at MoFPED and Uganda Revenue Authority.

Classification

The classification of transactions is consistent with internationally accepted standards, guidelines and best practices. Data is classified in accordance with the new chart of accounts issued in 2018, which is aligned to the classifications of GFSM 2001/14.

Basis of recording

The general government sector uses a modified cash basis of recording in their accounting and budgeting systems with all its transactions recorded on cash except for interest which is on accrual basis of accounting.

Valuation

All general government transactions are valued at market prices. In respect to the stock of assets, no valuation has been done. This has therefore not enabled compilation of the

Consumption of Fixed Capital (CFC) estimates.

Periodicity

The bulletin is produced quarterly with a time lag of one (1) quarter.
