FOREWORD

This publication provides the monthly Consumer Price Indices for Uganda (Composite) and for the ten centres of Kampala High Income, Kampala Middle Income, Kampala Low Income, Jinja, Mbale, Masaka, Mbarara, Fortportal, Gulu and Arua. All the baskets are for the urban households.

The current Consumer Price Index has been rebased from 2009/2010 to 2016/2017, using weights derived from the Uganda National Household Survey (UNHS VI) that was conducted from July 2016 to June 2017. The rebased CPI is classified using international standards, referred to as Classification of Individual Consumption According to Purpose (COICOP 2018) This is a shift from the COICOP 1999 that was used in the earlier series. COICOP 2018 is more detailed than the previous (1999) version, responding to the users' need for more detail, and addresses several other issues that required revision of the classification. The new COICOP of 2018 reflects the significant changes in goods and services in some areas, improved links of COICOP to other classifications, and addresses emerging statistical and policy needs of regional and international users.

At the elementary aggregate (EA) level, the indices are computed using the Jevons (Geometric Mean) method for all items within the elementary aggregates. The modified Laspeyres index formula is used to compute higher level indices. The National CPI is computed as a weighted average of the ten centres mentioned above and rebased indices are available from July 2017 to date at EA level.

ACRONYMS AND DEFINITIONS

COICOP: Classification of Individual Consumption According to Purpose, is a nomenclature developed by the United Nations Statistics Division to classify and analyse individual consumption expenditures incurred by households, non-profit institutions serving households and general government according to their purpose.

CPI: Consumer Price Index - a general indicator of price levels paid by households for consumer goods and services.

CPI basket: A commonly used term for the goods and services priced for the purpose of compiling the CPI.

Elementary aggregate (EA): The lowest level of commodity classification in the CPI, and the only level for which index numbers are constructed by direct reference to price data.

Inflation: A term commonly used to refer to changes in price levels. A rise in prices is called inflation, and a persistent fall is called deflation.

Jevons price index: An elementary price index defined as the un-weighted geometric average of the sample price relatives. It can also be defined as the un-weighted geometric average of the current to base period price relatives.

Laspeyres price index: The Laspeyres price index is an index formula used in price statistics for measuring the price development of the basket of goods and services consumed in the base period. The question it answers is how much a basket that consumers bought in the base period would cost in the current period.

Outlet: The interface between a supplier of products and the consumer. It may be a shop, a market stall, a catalogue, a website etc. Also referred to as a "retail outlet", although it can include wholesale outlets which also sell directly to the consumers

Outlier: A term used to describe any extreme value in a set of data, such as a price or price relative that requires further investigation or has been verified as incorrect

Price relative: A measure of price movements: the ratio of the price level in one period to the price level in another.

Reference base: The period in which the CPI is given a value of 100.0. The CPI is currently on a reference base of 2016/17.

Weight: The measure of the importance of an item in the index regimen relative to the other items. Weights can be expressed in either quantity or value terms. Value weights are used in the CPI.

1.0 HIGHLIGHTS OF UGANDA CPI FOR JULY 2026.

1.1 Annual Headline Inflation

The Annual Inflation as measured by the Consumer Price Index for Uganda for the 12 months to July 2026 was 4.0 percent compared to 3.7 percent registered in the year ended June 2026. The main drivers of the 4.0 percent inflation were Annual Energy Fuels and Utilities Inflation and Annual Food Crops and Related Items Inflation, see Table 1 below.

Table 1: Annual Headline, Core, Food Crops and EFU Inflation for June 2026 and July 2026.

Description	Weights	June 2026	July 2026
Headline	**1000**	**3.7**	**4.0**
Core	**839.6200**	**3.4**	**3.4**
Other Goods	455.5070	2.2	2.3
Services	384.1130	4.9	4.8
Food Crops and Related Items	**95.1046**	**0.0**	**1.6**
Energy Fuel and Utilities (EFU	**65.2755**	**11.9**	**14.9**

In particular, the Annual Energy Fuels and Utilities inflation increased to 14.9 percent in the year ending July 2026 compared to 11.9 percent registered in the year ended June 2026. In particular, Annual Water charges increased by 17.8 percent in the year ending July 2026 compared to 0.7 percent recorded in the year ended June 2026. In addition, Electricity prices increased by 2.2 percent in the year ending July 2026 compared to 0.0 percent recorded in the year ended June 2026. Petrol prices increased by 29.0 percent in the year ending July 2026 compared to 26.3 percent recorded in the year ended June 2026 and the prices of Diesel increased by 39.0 percent in the year ending July 2026 compared to 37.3 percent recorded in the year ended June 2026.

The other driver of Annual Headline Inflation was Annual Food Crops and Related Items Inflation which increased to 1.6 percent in the year ending July 2026 compared to 0.0 percent recorded in the year ended June 2026. This was driven by prices of Fresh Leafy Vegetables (whose price change was 26.2 percent compared to 4.1 percent recorded in the year ended June 2026), Dry beans (whose rate of price change is minus 4.2 percent compared to minus 7.2 percent recorded in the year ended June 2026), Passion fruits (whose price change was 13.6 percent compared to 0.9 percent recorded in the year ended June 2026), Fresh cassava (whose price change was 25.9 percent compared to 21.6 percent recorded in the year ended June 2026) and Onions (whose price change was 0.1 percent compared to minus 4.7 percent recorded in the year ended June 2026).

Annual Core Inflation registered 3.4 percent in July 2026, same rate registered in June 2026. Annual Inflation for Other Goods increased to 2.3 percent in the year ending July 2026 compared to 2.2 percent recorded in the year ended June 2026. This was largely driven by beef and laundry soap prices. However, Annual Services Inflation registered 4.8 percent in July 2026 compared to 4.9 percent registered in June 2026. This is attributed to Annual Food and Beverage Serving Services Inflation, which recorded 3.0 percent in the year ending July 2026 compared to 3.2 percent recorded in the year ended June 2026, and Holiday packages Inflation that recorded 9.0 percent in the year ending July 2026 compared to 24.8 percent recorded in the year ended June 2026.
