## Introduction

This bulletin presents International Merchandise trade statistics (exports and imports flows) between Uganda and the rest of the world as compiled from customs, non-custom data sources and Informal Cross Border Trade (ICBT) Survey. International merchandise trade statistics records all goods which add to, or subtract from, the stock of material resources of a country by entering (as imports) or leaving (as exports) its economic territory. The data compiled from customs and commodities authorities is herein referred to as formal exports and imports while data from ICBT Survey is referred to as informal exports and imports.

The compilation of international merchandise trade Statistics is based on the General Trade System and coded according to Harmonized Commodity Description and Coding System 2022 (HS2022) and the Standard International Trade Classification (SITC Rev4) commodity nomenclatures as prescribed in the International Merchandise Trade Statistics manual 2010.

(IMTS 2010).
