FOREWORD

The International Trade in Services (ITS) statistics is produced by Uganda Bureau of Statistics (UBOS), by the Directorate of Economic Statistics.

ITS Statistics is compiled in compliance with the guidelines set out in the Balance of Payments and International Investment Position Manual (BPM6) and Manual on Statistics of International Trade in Services 2010 (MSITS 2010).

International Trade in Services statistics is important for economic analysis and policy making because it provides insight into the types of services traded by Uganda with the respective countries. The statistics are vital in the compilation of National Accounts and Balance of Payments.

The report gives an analysis of Uganda's International Trade in Services by Broad Economic Sectors, Service Categories and Trading Partners. Details on data sources, scope and coverage of the ITS survey and the conceptual framework and definitions used in the compilation are embedded in the technical notes. Statistical tables are attached in the Annexes to facilitate further analysis and research by various stakeholders and users.

The publication of this report has been made possible by the cooperation of business establishments engaged in Export and Import of Services. The Bureau takes this opportunity to appreciate all those that provided information during this important undertaking.

.....
Imelda Atai Musana (PhD)
Ag. Executive Director

EXECUTIVE SUMMARY

The Uganda Bureau of Statistics (UBOS) has been conducting the International Trade in Services Survey since 2010, collecting data on trade transactions in services between residents and non-resident institutional units or persons. The main objective of the survey was to generate quantitative information on the flow of import and export of services. The information collected will be used to improve the compilation of Gross Domestic Product (GDP) and Balance of Payments (BOP) statistics as well as to guide trade in services negotiations and policy at regional and international levels.

The survey targeted enterprises that export or import services in the country from five economic sectors of the economy. These included; Information and Communication, Construction, Financial & Insurance activities, Transport & Storage, and Professional, Scientific & Technical activities. A total of 587 enterprises were selected out of a frame of 5,865.

Statistics presented are grossed up for the five economic sectors mentioned above for the years 2017, 2018 and 2019. Revisions have been made on figures of 2018 due to submission of new data by major companies in the information and Communication Sector. In addition, there were improvements in the estimation methodology. Therefore, these led to the revised figures being different from those earlier disseminated in the International Trade in Services report of 2019.

From the five sectors, statistics were presented for the service categories as recommended by the Manual on Statistics of International Trade in Services (MSITS) and the Extended Balance of Payments Services (EBOPS) classification leaving out Government goods and services n.i.e.

Services Trade Flows

Uganda's total International trade in goods and services amounted to US\$13,561.6 million in 2019, compared to US\$12,313.5 million recorded in 2018. Trade in services accounted for 12.6 percent of the total trade in 2019. The survey findings show that on average trade in services declined by 15.3 percent annually from 2017 to 2019. Similarly, on average, imports and exports of services declined by 18.9 percent and 4.3 percent annually respectively.

In 2019, imports of services valued at US\$ 1,197.7 million accounted for the biggest share of 70.0 percent of total international services trade, while exports of services valued at US\$

514.3 million accounted for 30.0 percent. The most imported services were Telecommunications, Computer, & Information Services (37.8%), Financial Services (21.1%), Transport services (16.0%) and Other Business services (10.5%) whereas the main exports were Transport services (34.1%), Other Business services (30.3%), and Construction Services (15.3%).

The survey indicated that there was an annual decline in services exports of 7.1 percent to US\$ 514.3 million in 2019 from US\$ 553.4 million in 2018. This decline in exports of services was mainly due to the decline in Telecommunications, Computer, & Information Services (31.6%), Construction Services (25.3%) and Transport services (22.2%). On the other hand, Other Business Services recorded an annual growth of 70.9 percent in 2019.

Services imports too declined by 10.4 percent to US\$ 1,197.7 million in 2019 from US\$ 1,336.7 million in 2018. This decline was due to a decline in Other Business services (41.8%), Transport services (40.2%) and Insurance & Pension Services (6.7%). On the other hand Financial services, Construction services, Telecommunications, Computer, & Information services and other Services registered an annual growth of 18.8 percent, 22.5 percent, 4.1 percent and 41.4 percent respectively, in 2019.

Direction of Services Trade

Most of Uganda's services were sold to East African Community (30.4 %), 32.6 percent to Other African countries not in EAC, 21.8 percent to the European Union, 8.6 percent to the North America/Caribbean and 6.5 percent to unidentified regions. Uganda imported most services from East African Community (33.0%), the European Union (19.0%), and Other African countries not in EAC (17.0%) in 2019.

Services Trade Flows by Economic Sector

In 2019, the Transportation & Storage 31.4 percent was the major Sector involved in exportation of services. This was followed by Professional, Scientific & Technical activities with 30.3 percent of the total services exports. On the other hand, Financial and Insurance Activities (45.4%), Professional, Scientific & Technical Activities (18.8%), and Transport & Storage (12.9%) were the sectors that imported most services.

CHAPTER ONE

INTRODUCTION

1.0 Introduction

This chapter provides a brief background to the International Trade in Services survey, discusses the global and regional trade situation during 2019, as well as survey objectives and uses.

1.1 Background

Trade in services represents a major stake for almost every country in the world, whether the Least Developed Countries (LDCs), developing or developed countries. LDCs are a small player in world trade with a 0.91 percent share in 2019. International trade in services accounts for 10.8% of the world GDP in 2020.

In 2019, global services exports were valued at US\$ 6.1 trillion, representing one quarter of the value of total exports, including goods. Developing countries' exports summed up to almost US\$2 trillion in regard to services and services imports declined by 1.8 percent. In Africa, Services imports increased moderately, by 2.7 percent. (UNCTAD, 2020)

The availability of adequate statistical information would enable Uganda to make informed decisions at multilateral negotiations, attract investments, provide support to existing services sectors, and identify services where competitive and comparative advantage exists, and assist in evaluation of market accessibility. It would also inform investment decisions and national negotiating priorities, provide a statistical backing in settling disputes and facilitate the assessment of liberalisation achieved in the specific services and markets under COMESA and the East African Community (EAC) regional blocs.

Balance of Payment Statistics could be understated if information on trade in services is not well captured. This makes trade in services statistics an important input for the government in the management of the macroeconomic policy.

This information will be used for compilation of Gross Domestic Product (GDP) and the Balance of Payments (BOP) statistics as well as to guide trade in services negotiations at regional and international level.

Many trades in services are geographically domestic transactions made international solely by a difference in country of residence between the buyer and the seller of the service. Trade in services, therefore often does not involve crossing of an international boundary by the service, but only crossing of a border by the consumer/supplier of the service.

The International Trade in Services Survey collects data on trade transactions in services between residents and non-resident institutional units or persons. Services are the result of a production activity that changes the conditions of the consuming units or facilitates the exchange of products or financial assets (BPM6).

1.2 Objectives

The main objective of the International Trade in Services (ITS) Survey is to generate quantitative information on the flow of international trade in services.

The specific objectives are as follows;

- (1) Generate data for different types of services (imports/exports) by country of origin and destination.
- (2) Generate annual international trade in services estimates for compiling balance of payments and national accounts statistics.
- (3) Develop a robust statistical system to compile, analyse and disseminate International Trade in Services statistics to guide policy and decision making including bilateral and multilateral negotiations.
- (4) Develop methodologies to estimate trade in services statistics from survey, and administrative data sources in line with international best practices.

CHAPTER TWO

METHODOLOGY

2.0 Introduction

The chapter discusses data sources, sampling techniques used, data collection techniques and instruments and up-rating of survey results. The compilation of International Trade in Services (ITS) Statistics was in accordance with guidelines provided in the MSITS 2010 and the BPM6. The guidelines ensure production of comparable statistics on international trade in services across the globe.

Enterprises were classified by main economic activity according to the International Standard Industrial Classification of all Economic Activities, Revision 4 (ISIC, Rev.4).

2.1 Data sources

Annual enterprise surveys have been conducted since 2010 collecting information using a paper questionnaire that was administered by field interviewers. The design of the questionnaire was in accordance with the survey objectives and anticipated information to be generated.

The data collected covered receipts (exports) and expenses (imports) on different types of services, trading partners, employees by gender and by sector. The data was collected from selected enterprises that fall in the sample.

2.2 Scope and coverage

The survey covered various services from five economic sectors of the economy as classified in the ISIC Rev 4. The sectors included; Information and Communication, Construction, Financial & Insurance activities, Transport & Storage, and Professional, Scientific & Technical Activities. Although the guidelines in the Manual recommend that statistics be compiled for the 12 service categories as classified by the Extended Balance of Payments Classification (EBOPS) 2010, the survey covered 11 service categories excluding government goods and services, from the five economic sectors mentioned above.

The 12 main clusters of services outlined in EBOPS 2010 are as below;

1. Manufacturing services on physical inputs owned by others.
2. Maintenance and repair services n.i.e
3. Transport Services
4. Travel
5. Construction
6. Insurance and pension services

7. Financial services
8. Charges for the use of intellectual property n.i.e
9. Telecommunications, computer, and information services.
10. Other business services
11. Personal, cultural, and recreational services.
12. Government goods and services n.i.e

2.3 Survey frame

In constructing a sampling frame, the Value Added Tax (VAT) register from Uganda Revenue Authority (URA) was used and this was complemented by the Uganda Business Register (2009/2010). In addition, lists of institutions/associations from regulatory authorities like Uganda Insurance Commission, Association of Uganda Tour Operators, Transporters' Association, as well as Association of Engineers and Constructors were also used to update the sampling frame. In total, the sampling frame consisted of 5,865 eligible enterprises under the five monitored sectors according to ISIC, Rev4 categorization. From this frame, a sample of 587 enterprises was obtained for the respective sectors basing on the turnover with the understanding that it is the large enterprises that normally trade in international services. The survey targeted only enterprises with turnover of UGX 10million and above.

2.4 Sample design

Enterprises were stratified according to industry economic activity by ISIC, Rev4 classification. To determine the number of enterprises to be sampled in each stratum, different sampling methods were used. In strata with few enterprises, it was complete enumeration and therefore, all enterprises were sampled i.e. Commercial banks, Insurance companies and Telecommunication companies. For the rest of the strata, only large enterprises that contribute 75% of the total turnover of all the enterprises in each stratum were considered. Therefore from a frame of 5,865 enterprises, a sample of 587 enterprises was selected.

2.5 Survey Organization

Teams comprising of field supervisors and interviewers were constituted to implement survey field activities. The teams underwent training with the focus on generating the competencies in practical questionnaire administration. The UBOS Senior Staff coordinated and supervised survey field activities for quality control purposes and to ensure compliance with set field practices. Field staffs were also trained on how to interact and build rapport with respondents to gather relevant information.

2.6 Data Collection Methods

The information on transactions in exports and imports of services was collected using a paper questionnaire that was administered to the respondents by the trained field interviewers. The required data was collected on an annual basis. The questionnaire was designed in accordance to the survey objectives and anticipated data to be collected.

2.7 Estimation and up-rating Method

In order to get a national representation of International Trade in Services, sample figures were grossed up.

To gross up the samples results for exports and imports, each sector was considered separately and enterprises based on their turnover (as recommended by Uganda Investment Authority) were allocated to sub groups of big (>Ugx 360 million), medium (Ugx 100 million ≤ Ugx 360 million) and small (Ugx 10 million ≤ Ugx 100 million) enterprises. Sample mean for each sub group was calculated and multiplied by the respective total population in each sub group. The formula used is as below;

N_j = the total number of enterprises in the j^{th} stratum (Sector)

N_i = the number of enterprises in the i^{th} sub group (big, medium, small).

Then

$$N_j = \sum_{i=1}^3 N_i, i = 1, 2, 3$$

n_i is the number of sampled enterprises in the i^{th} sub group

\bar{X}_i is the average services value for the i^{th} sub group

T_g is the total sub group services

T_{SS} is the total services value for the j^{th} stratum.

Therefore, $\bar{X}_i = \frac{1}{n_i} \sum_{i=1}^n X_i$

Total sub group services, $T_g = \bar{X}_i * N_i$

Total sector (stratum) services, $T_{SS} = \sum_{i=1}^3 T_g$

Therefore, Total estimated Value of traded services (T_V) is given by:

$$T_V = \sum_{j=1}^4 T_{SS}$$

CHAPTER THREE

SURVEY FINDINGS

3.0 Overview

The International trade in services survey of 2020 collected information on trade transactions in services between residents and non-resident institutional units or persons for the years 2017 to 2019, with revisions on the figures of 2018. The statistics presented here are for five sectors of Information and Communication, Construction, Financial & Insurance activities, Transport & Storage, and Professional, Scientific & Technical Activities.

Statistics on both import and export of services are presented by service-category according to EBOPS 2010 classification, economic sector according to ISIC, Rev4 and by region.

3.1 Comparison of Uganda's International Merchandise Trade with International Trade in Services

As shown in Table 1 below, Uganda's total International trade in goods and services amounted to US\$13,561.6 million in 2019, of which trade in services accounted for 12.6 percent (US\$1,712.1million).

Table 1: Goods and Services Trade Flows, 2017 to 2019 (US\$ million)

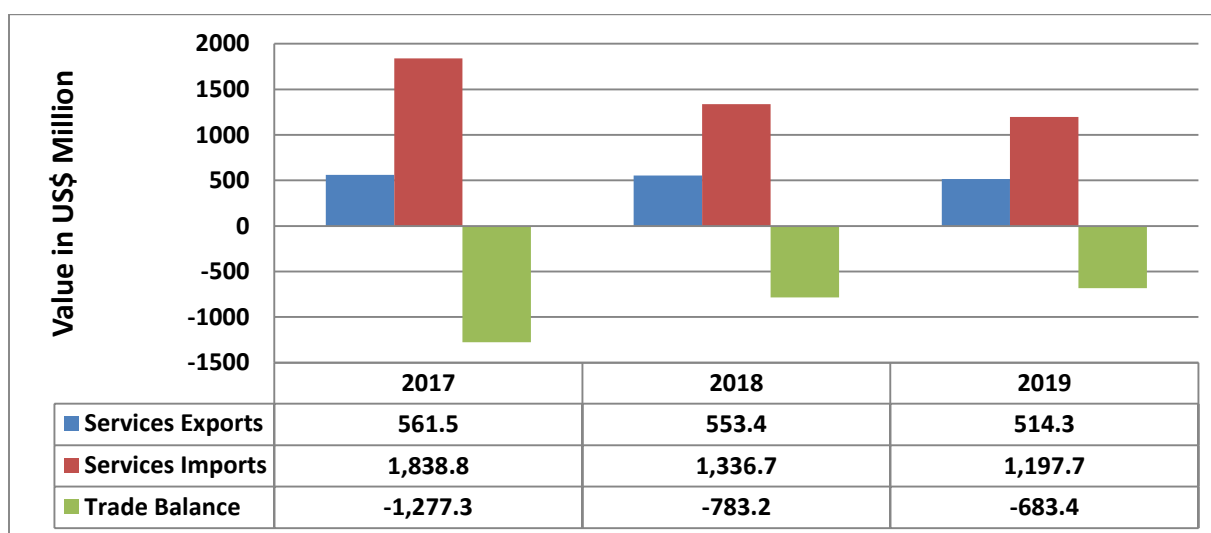

Trade Flow	2017	2018	2019
Exports	4,012.1	4,187.4	4,610.0
Goods	3,450.6	3,634.0	4,095.7
Services	561.5	553.4	514.3
Imports	7,515.4	8,126.1	8,951.5
Goods	5,676.6	6,789.4	7,753.8
Services	1,838.8	1,336.7	1,197.7
Total trade	11,527.5	12,313.5	13,561.6
Total goods	9,127.2	10,423.4	11,849.5
Total services	2,400.3	1,890.1	1,712.1
Goods % total trade	82.6	84.9	82.7
Services% total trade	20.8	15.3	12.6
Services exports% total exports	14.0	13.2	11.2
Services imports% total imports	24.5	16.4	13.4

2018 figures revised.

3.2 International Trade in services

The survey findings show that on average trade in services declined by 15.3 percent annually from 2017 to 2019. Imports of services declined by 18.9 percent while export of services declined by 4.3 percent annually. Uganda registered a trade deficit in services of USD\$ 683.4 million, a 12.7 percent decrease from 2018, See Figure 1 & Appendix1

Figure 1: Uganda International Services Trade flow and Balance in US\$ Million, 2017 to 2019

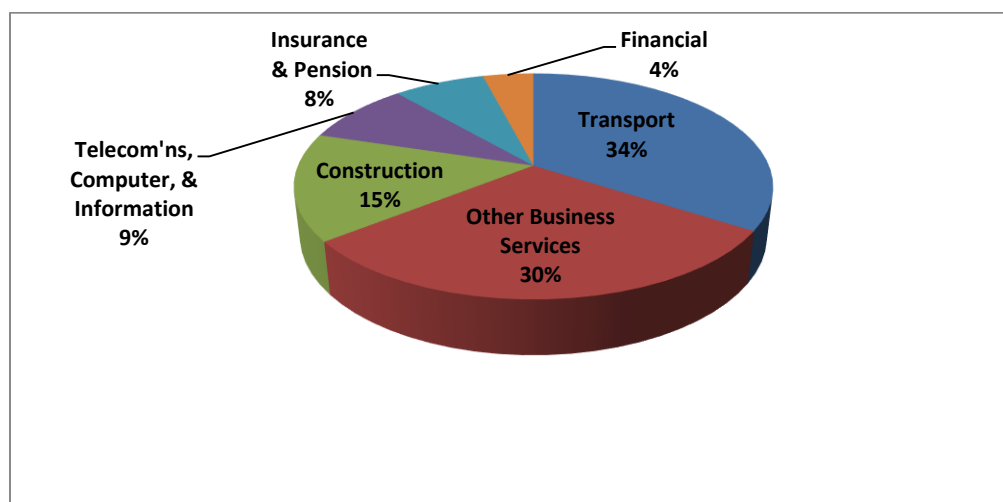

In 2019, imports of services accounted for the biggest percentage of total services trade of 70 percent while export of services accounted for 30.0 percent.

3.2.1 Export of Services

Uganda's services exports accounted for 11.2 percent of the total exports of goods and services in 2019. On average, exports of services recorded an annual decline of 4.3 percent from 2017 to 2019, see Table 1 and Appendix 1

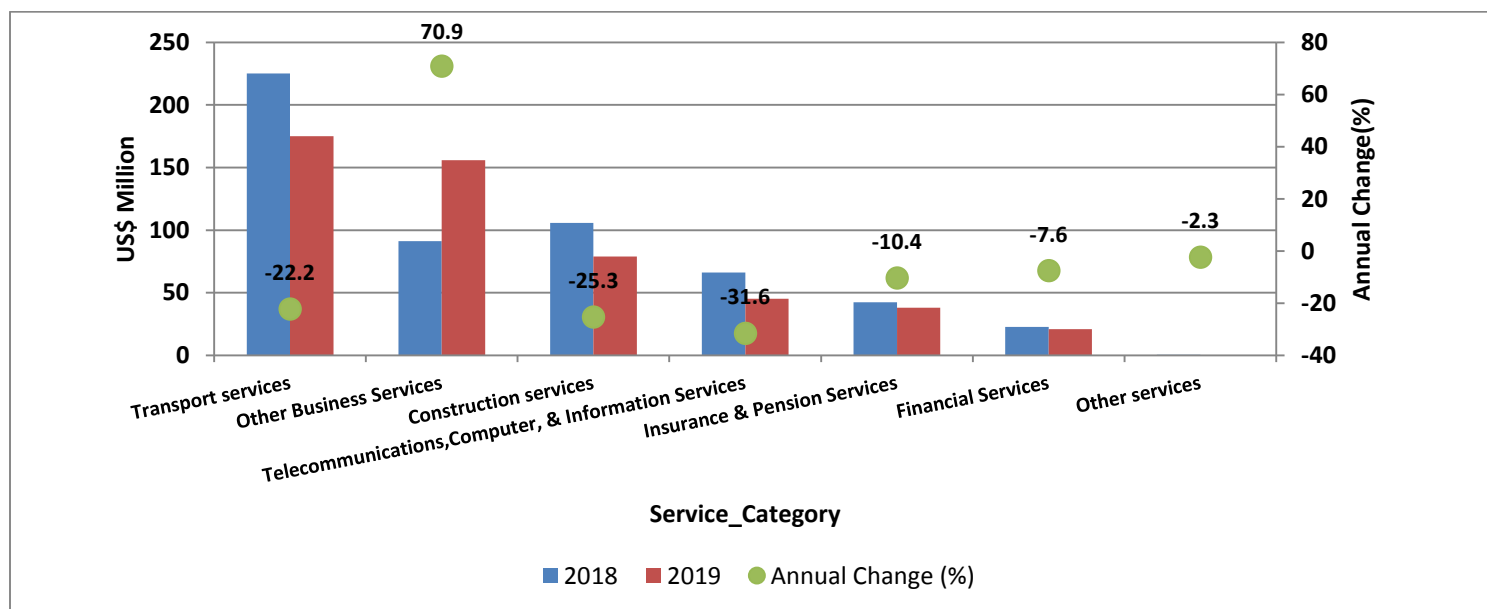

Exports of services represented 30.0 percent (US\$ 514.3 Million) of Uganda's total services trade in 2019 and the main services exports were Transport services (34.1%) , Other Business services (30.3%), and Construction Services (15.3%) as shown in Figure 2 and Appendix 2B.

Figure 2: Services Exports by Service-Category in 2019

There was an annual decline in services exports of 7.1 percent (US\$ 514.3 Million) from US\$ 553.4 Million in 2018, see Appendix 1. The main declines were registered in the Telecommunications, Computer, & Information Services (31.6%), Construction services (25.3%), Transport services (22.2%), Insurance & Pension Services (10.4 %) and Financial Services (7.6%). On the other hand, Other Business Services registered an annual growth of 70.9 percent in 2019 as shown in Figure 3 below.

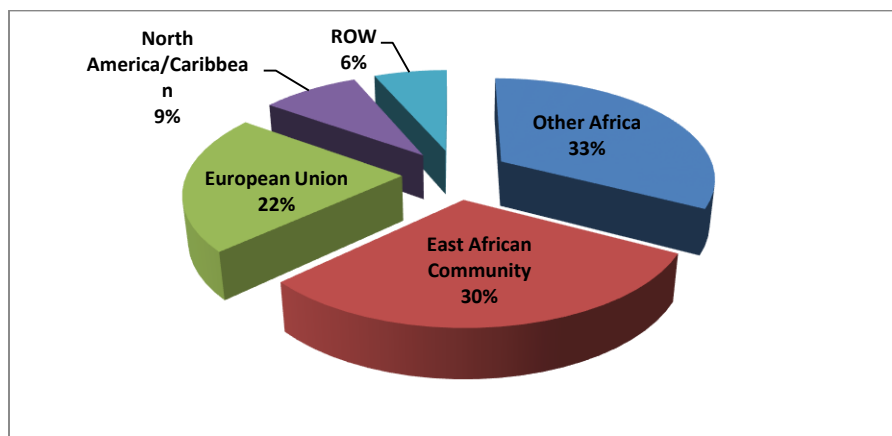

Figure 3: Trends in Services Exports by Service-Category, 2018 and 2019

Services Exports by Region in 2019

As shown below in figure 4 below, 30.4 percent of Uganda's services were exported to East African Community, 32.6 percent to Other African countries not in EAC, 21.8 percent to the European Union, 8.6 percent to the North America/Caribbean and 6.5 percent to unidentified regions, see Figure 4 and Appendix 4B.

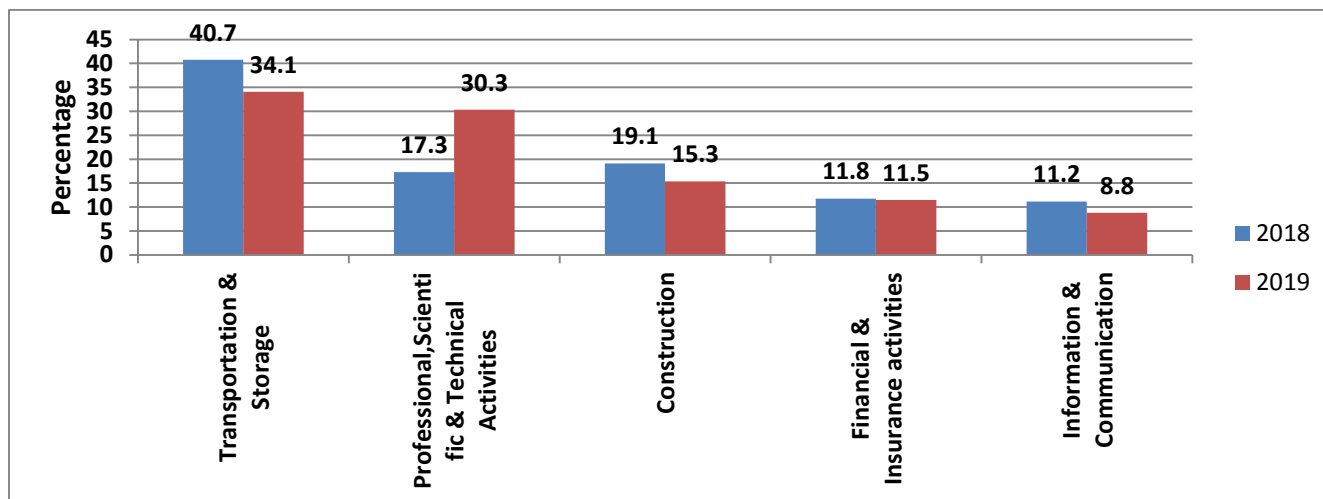

Figure 4: Services Exports by Region in 2019

Services Exports by Economic Sector

Figure 5 indicates that in 2019, Professional, Scientific & Technical activities contributing 30.3 percent and Transportation & Storage sector with 34.1 percent were the major sectors involved in exportation of services, see Figure 5 and Appendix 3B

Figure 5: Services Exports by Economic Sector in 2018 and 2019

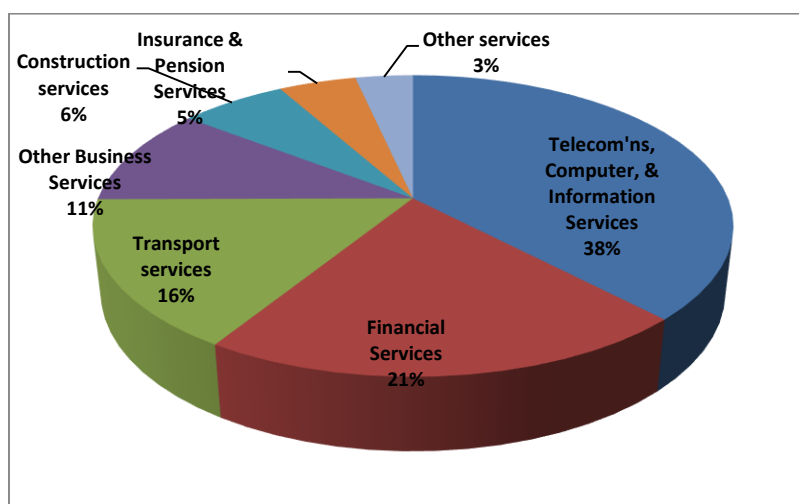

3.2.2 Import of Services

Uganda's services imports, accounted for 13.4 percent of total imports of goods and services in 2019. On average, imports of services recorded an annual decline of 18.9 percent from 2017 to 2019. see Table 1 and Appendix 1.

Services imports accounted for 70.0 percent (US\$ 1,197.7 million) of total services trade in 2019. The most imported services were Telecommunications, Computer, & Information Services (37.8%), Financial Services (21.1%), Transport services (16.0%) and Other Business services (10.5%) as indicated in Figure 6 and Appendix 2B.

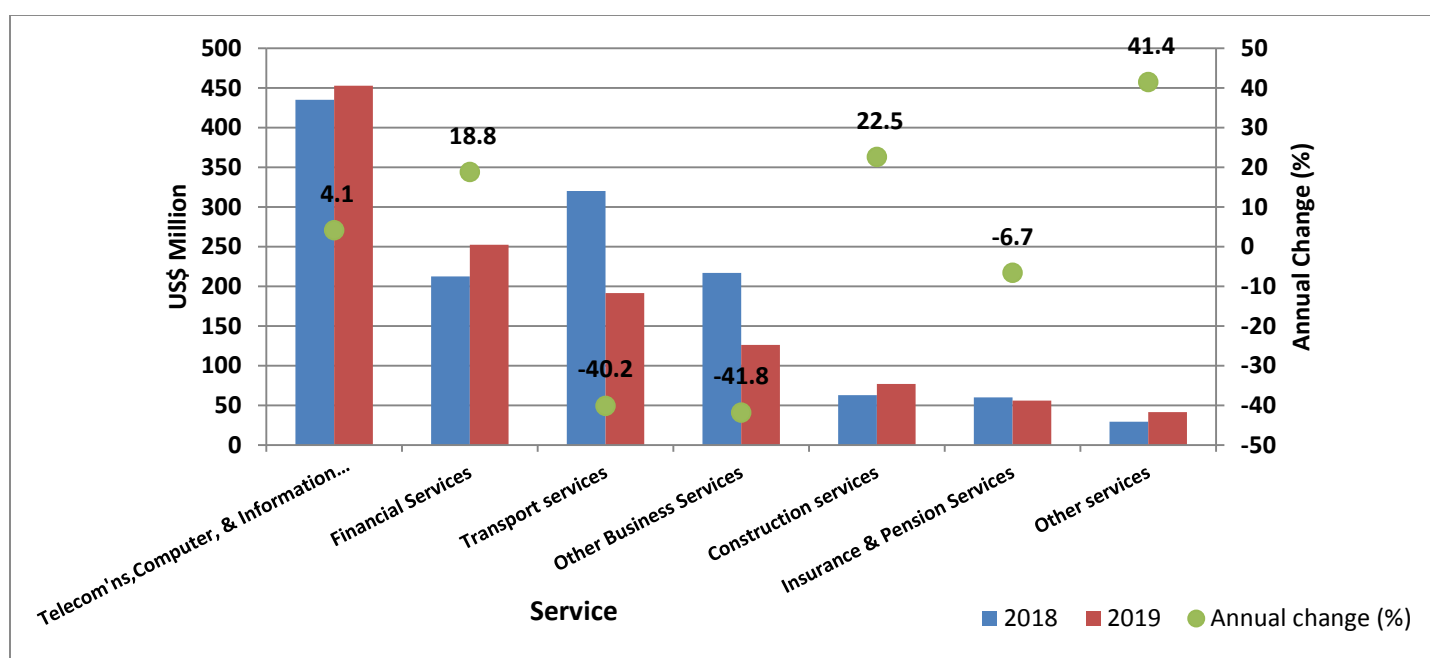

Figure 6: Services Imports by Service-Category in 2019

As shown in Appendix 1, services imports declined by 10.4 percent to US\$ 1,197.7 million in 2019 from US\$ 1,336.7 million in 2018.

This decline was due to a decline in Other Business Services (41.8%), Transport services (40.2%) and Insurance & Pension Services (6.7%). An annual growth was registered in the Financial services (18.8%), Construction services (22.5%), Telecommunications, Computer, & Information services (4.1%) and Other Services (41.4%) see Figure 7 below

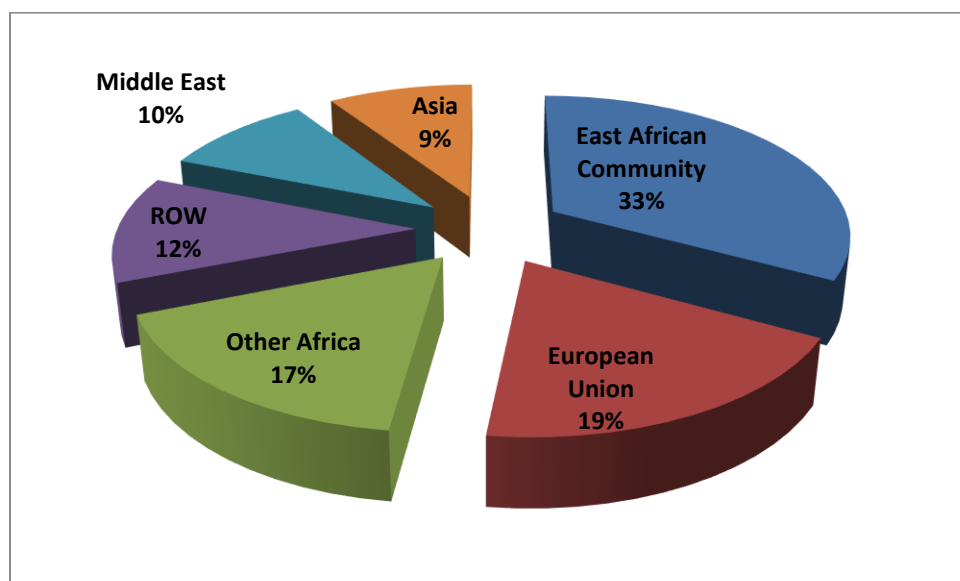

Figure 7: Trends in Services Imports by Service-Category, 2018 and 2019

Services Imports by Region

In 2019, most of Uganda's imports were from East African Community (33.0%), the European Union (19.0%), and Other African countries not in EAC (17.0%), see Figure 8 and Appendix 4B

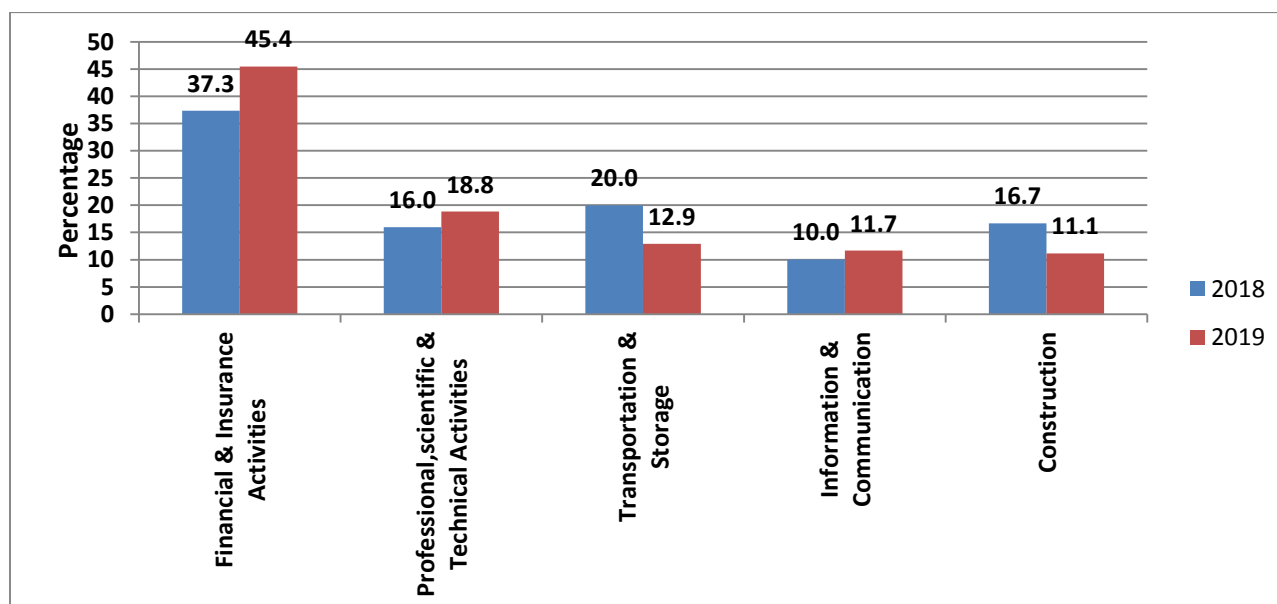

Figure 8: Services Imports by Region in 2019

Services Imports by Economic Sector

The survey indicated that in 2019, most services were imported by these sectors; Financial & Insurance Activities (45.4%), Professional, Scientific & Technical Activities (18.8%) and Transport & Storage (12.9%), see Figure 9 and Appendix 3B

Figure 9: Services Imports by Economic Sector in 2019

CHAPTER FOUR

CHALLENGES, POLICY RECOMMENDATIONS AND CONCLUSION

4.0 Introduction

This chapter presents the challenges faced during the survey, highlights recommendations and conclusion.

4.1 Challenges

Unlike trade in goods that is recorded by customs offices, services are not directly captured due to their immateriality, or intangibility, and this makes their measuring so challenging since these have to be tracked down through the various establishments/institutions that trade in services.

Inadequate and unreliable data has been the major challenge faced during the survey. This has been due to low response rates in most of the sectors caused by fear of some enterprises being taxed in the future.

A number of call backs were required for the data collectors to eventually access data from the establishments. This is not only time consuming but also affects the timeliness of the report.

Due to COVID-19 pandemic, A few enterprises maintained their operations and overall stability; many experienced a halt in operations, and some faced closure. In some, staff that used to respond to the survey were laid off, and some were working from their homes.

4.2 Recommendations

To begin with, the UBOS Act needs to be amended and given a stronger mandate in collecting data, so that legal action can be taken against persistent non-responders.

Secondly, there is need for more public sensitisation to emphasise the importance and objectives of ITS survey.

There is also need to increase funding for International Trade in Services to support the increase on the coverage for better estimates and to cater for endless call backs involved in data collection.

Finally, there is need for the Uganda government to increase resources in promoting the transport and communication sectors as well as innovation in ICT sector which have been observed to drive all other sectors of the economy around the world.

4.3 Conclusions

It's clear that services represent a significant importance in determining economic growth, development and job creation around the world.

Findings of Uganda's International Trade in Services survey (2020) from the five sectors i.e. Information & Communication, Financial and insurance activities, Transport & Storage, Construction and Professional, Scientific and Technical activities reveal that Transport Services, Other business Services and Construction Services were the most exported services whereas, Telecommunications, Computer, & Information Services, Financial Services and Transport services were the most imported services in 2019.

APPENDICES

Appendix 1: Services Trade Flows in US\$ Million, 2017 to 2019

Trade Flow	2017		2018		2019	
Services Exports		561.5		553.4		514.3
Services Imports		1,838.8		1,336.7		1,197.7

Appendix 7: Technical Notes

Concepts and definitions

Compilation of International Trade in Services statistics follows closely the principles and guidelines set out by the International Monetary Fund's Balance of Payments and International Investment Position Manual, Sixth Edition (BPM6). These guidelines include the definitions, valuation, classification and recording of trade in services between residents and non-residents.

The compilation of statistics on trade in services is hinged on two important concepts of transaction and residence as used in the balance of payments. A transaction is taken as the interaction between two institutional units by mutual agreement that reflects the creation, transformation, exchange, transfer or extinction of economic value, and involves changes in the volume, composition or value of an institutional unit's assets and liabilities. On the other hand, residence is used in the identification of transactions between residents and non-residents, the same way it is used in the 2008 SNA.

In compiling statistics on trade in services political boundaries may not always coincide with those appropriate for economic purposes, therefore, the economic territory is used as the relevant geographical area for characterizing residence. This helps to identify each institutional unit as a resident unit of only one economic territory, as determined by its centre of predominant economic interest.

1. Services.

The definition of services follows the IMF Balance of Payments and International Investment Position Manual, Sixth Edition (BPM6) classification. It reads as follows: "Services are the result of a production activity that changes the conditions of the consuming units or facilitates the exchange of products or financial assets."

Services are not generally separate items over which ownership rights can be established and cannot generally be separated from their production

2. Residency

According to the MSITS 2010, the residence of an institutional unit is the economic territory with which it has the strongest connection, constituting its center of predominant economic interest. An institutional unit is resident in an economic territory when there exists, within the economic territory, some location, dwelling, place of production, or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale. An institutional unit or person that have spent in a country for a period of one year and above is treated as a resident of that country.

3. Valuation

Services transactions internationally are valued at market prices i.e. the value of the transaction agreed upon between the supplier and the consumer at the time when the service is created, transformed, exchanged, transferred, or extinguished.

4. Classification

Uganda's international trade in services is classified broadly into the following 12 EBOPS 2010 categories, as recommended in the Manual on the Statistics of International Trade in services 2010.

1. Manufacturing services on physical inputs owned by others.
2. Maintenance and repair services n.i.e
3. Transport Services
4. Travel
5. Construction
6. Insurance and pension services
7. Financial services
8. Charges for the use of intellectual property n.i.e
9. Telecommunications, computer, and information services.
10. Other business services
11. Personal, cultural, and recreational services.
12. Government goods and services n.i.e

4.1 Manufacturing services on physical inputs owned by others.

Manufacturing services on physical inputs owned by others includes activities such as processing, assembly, labelling and packing that are undertaken by enterprises that do not own the goods but paid a fee by the owner.

4.2 Maintenance and repair services n.i.e

Maintenance and repair services n.i.e. includes maintenance and repair work by residents on goods that are owned by non-residents (and vice versa). Maintenance and repairs on ships, aircraft and other transport equipment, in particular, are included in this item.

4.3 Transport Services

Transport covers the process of carriage of people and objects from one location to another as well as related supporting and auxiliary services and rentals (charters) of carriers with crew. Also included are postal and courier services.

4.4 Travel

Travel is defined as covering goods and services for own use or to be given away, acquired from an economy, by non-residents during visits to that economy. It covers stays of any length, provided that there is no change in residence.

4.5 Construction

Construction covers the creation, management, renovation, repair or extension of fixed assets in the form of buildings, land improvements of an engineering nature and other constructions such as roads, bridges and dams.

4.6 Insurance and pension services

An insurance and pension service covers the provision to non-residents of various types of insurance by resident insurance enterprises, and vice versa.

4.7 Financial services

Financial services cover financial intermediation and auxiliary services, except those of insurance enterprises and pension schemes.

4.8 Charges for the use of intellectual property n.i.e

Charges for the use of proprietary rights, such as patents, trademarks, copyrights, industrial processes and designs, trade secrets, and franchises, where rights arise from research and development, as well as from marketing;

Charges for licences to reproduce and/or distribute intellectual property embodied in produced originals or prototypes, such as copyrights on books and manuscripts, computer software, cinematographic works and sound recordings, and related rights, such as for the recording of live performances and for television, cable or satellite broadcast.

4.9 Telecommunications, computer, and information services.

Telecommunications services covers the broadcast or transmission of sound, images, data, or other information by telephone, telex, telegram, radio and television cable transmission, radio and television satellite, electronic mail, facsimile, etc., and includes business network services, teleconferencing and support services.

Computer services consists of hardware- and software-related services and data processing services

Information services consist of News agency services and Other information services.

4.10 Other business services.

This involves three sub-components: Research and development services, Professional and management consulting services and Technical, trade-related and other business services.

4.11 Personal, cultural, and recreational services.

Personal, cultural, and recreational services comprises two sub-components, Audiovisual and related services and other personal, cultural, and recreational services.

Audio-visual and related services covers services associated with audio-visual activities (movies, music, radio and television) as well as services relating to the performing arts.

Other personal, cultural, and recreational services is divided into four components: Health services, Education services, Heritage and recreational services and Other personal services

4.12 Government goods and services n.i.e

Government goods and services n.i.e. covers:

- Goods and services supplied by and to enclaves, such as embassies and military bases;
- Goods and services acquired from the host economy by diplomats, consular staff and military personnel located abroad and their dependants;
- Services supplied by and to Governments and not included in other categories of services.

**Appendix 8:
Questionnaire**

UGANDA BUREAU OF STATISTICS

International Trade in Services Survey 2020

Purpose of the survey:

The purpose of this Survey is to collect information on trade transactions in services between residents and non-resident institutional units or persons. It particularly targets enterprises/persons that export or import services in the country. This information will be used for compilation of Gross Domestic Product (GDP) and the Balance of Payments (BOP) Statistics as well as guiding trade in services negotiations at regional and international level.

Authority

The Information is collected under the provisions of the **Uganda Bureau of Statistics Act, 1998**.

Confidentiality

The information provided in this form will remain strictly confidential as per the Uganda Bureau of Statistics Act.

Yours faithfully;

ALIZIKI. K. LUBEGA

For: EXECUTIVE DIRECTOR

To be filled by UBOS Staff:

Definitions

Export of services

Export of services comprises all services that are delivered by the company (based in Uganda) to companies, persons or other units that are not normally based in Uganda (even though they may reside in Uganda for short periods). Exports comprise all services to foreign buyers, even where the service may not be delivered from Uganda to abroad. Other units in the same group are also regarded as foreign buyers (parent company, subsidiaries, and branches).

The export of services via the Internet is also included where this takes place between Ugandan companies and companies, persons etc. that are not based in Uganda. Where a company or enterprise based in Uganda delivers services to another unit in the same group (parent company, subsidiaries, and branches) abroad, this is regarded as export and will be included.

Import of services

Import of services comprises all services that are delivered to the company by entities that are not based in Uganda (companies/entities and private individuals etc. registered abroad). Import comprises all purchases of services from foreign sellers, even where the service may not be delivered from abroad to Uganda. Other units in the same group are also regarded as foreign sellers (parent company, subsidiaries, and branches).

The import of services via the Internet is also included where this takes place between Ugandan companies and companies, persons etc. that are not based in Uganda. Where a company or enterprise based in Uganda receives services from another unit in the same group (parent company, subsidiaries, and branches) abroad, this is regarded as import and will be included.

Economic territory largely coincides with the country's customs territory, which is the territory in which the customs law of a country applies in full. The economic territory includes the land area, air space, territorial waters including areas over which jurisdiction is exercised over fishing rights and rights to fuels or minerals, in a marine territory- islands that belong to the territory, and territorial enclaves in the rest of the world (embassies, consulates, military bases, scientific stations information and immigration offices, aid agencies, central bank representative offices with diplomatic status).

Residence: The residence of each institutional unit is the economic territory with which it has the strongest connection, expressed as its center of predominant economic interest. Each institutional unit is a resident of one and only one economic territory determined by its center of predominant economic interest. An institutional unit is resident in an economic territory when there exists, within the economic territory, some location, dwelling, place of production, or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale. *For an institutional unit or person that have spent in a country for a period of one year and above is treated as a resident of that country.*

Foreign counterpart: All transactions with a foreign counterpart (e.g. foreign customer, supplier) should be included in this form. Foreign counterparts are defined as all legal persons and/or businesses registered outside the economic territory of Uganda, Uganda-owned subsidiaries and branches abroad, and persons living abroad regardless of citizenship.

1. Business Name and Address:

Name of Business	
Address	
Company telephone	
Fax	
Company email
