FOREWORD

This publication provides the monthly Consumer Price Indices for Uganda (Composite) and for the ten centres of Kampala High Income, Kampala Middle Income, Kampala Low Income, Jinja, Mbale, Masaka, Mbarara, Fortportal, Gulu and Arua. All the baskets are for the urban households.

The current Consumer Price Index has been rebased from 2009/2010 to 2016/2017, using weights derived from the Uganda National Household Survey (UNHS VI) that was conducted from July 2016 to June 2017. The rebased CPI is classified using international standards, referred to as Classification of Individual Consumption According to Purpose (COICOP 2018). This is a shift from the COICOP 1999 that was used in the earlier series. COICOP 2018 is more detailed than the previous (1999) version, responding to the users' need for more detail, and addresses several other issues that required revision of the classification. The new COICOP of 2018 reflects the significant changes in goods and services in some areas, improved links of COICOP to other classifications, and addresses emerging statistical and policy needs of regional and international users.

At the elementary aggregate (EA) level, the indices are computed using the Jevons (Geometric Mean) method for all items within the elementary aggregates. The modified Laspeyres index formula is used to compute higher level indices. The National CPI is computed as a weighted average of the ten centres mentioned above and rebased indices are available from July 2017 to date at EA level.

ACRONYMS AND DEFINITIONS

COICOP: Classification of Individual Consumption According to Purpose, is a nomenclature developed by the United Nations Statistics Division to classify and analyse individual consumption expenditures incurred by households, non-profit institutions serving households and general government according to their purpose.

CPI: Consumer Price Index - a general indicator of price levels paid by households for consumer goods and services.

CPI basket: A commonly used term for the goods and services priced for the purpose of compiling the CPI.

Elementary aggregate (EA): The lowest level of commodity classification in the CPI, and the only level for which index numbers are constructed by direct reference to price data.

Inflation: A term commonly used to refer to changes in price levels. A rise in prices is called inflation, and a persistent fall is called deflation.

Jevons price index: An elementary price index defined as the un-weighted geometric average of the sample price relatives. It can also be defined as the un-weighted geometric average of the current to base period price relatives.

Laspeyres price index: The Laspeyres price index is an index formula used in price statistics for measuring the price development of the basket of goods and services consumed in the base period. The question it answers is how much a basket that consumers bought in the base period would cost in the current period.

Outlet: The interface between a supplier of products and the consumer. It may be a shop, a market stall, a catalogue, a website etc. Also referred to as a "retail outlet", although it can include wholesale outlets which also sell directly to the consumers

Outlier: A term used to describe any extreme value in a set of data, such as a price or price relative that requires further investigation or has been verified as incorrect

Price relative: A measure of price movements: the ratio of the price level in one period to the price level in another.

Reference base: The period in which the CPI is given a value of 100.0. The CPI is currently on a reference base of 2016/17.

Weight: The measure of the importance of an item in the index regimen relative to the other items. Weights can be expressed in either quantity or value terms. Value weights are used in the CPI.

1.0 HIGHLIGHTS OF UGANDA CPI FOR NOVEMBER 2023

1.1 Annual Headline Inflation

The Annual Inflation as measured by the Consumer Price Index for Uganda for the 12 months to November 2023 is registered at 2.6 percent compared to the 2.4 percent registered in the year ended October 2023.

This is largely attributed to the Annual Core inflation that registered 2.0 percent in the year ending November 2023 the same rate registered in the year ended October 2023. The main driver to Annual Core Inflation was the Annual Services inflation that increased to 2.8 percent in the year ending November 2023 compared to 2.2 percent registered in the year ended October 2023. This is attributed to Annual Child Deliveries Services inflation that increased to 19.7 percent in the year ending November 2023 compared to 3.9 percent registered in October 2023, Annual International Flights inflation registered negative 8.7 percent in the year ending November 2023 compared to negative 10.1 percent registered in the year ending October 2023 and Annual Passenger transport by taxi and hired car with driver Inflation that registered negative 4.6 percent in the year ending November 2023 compared to negative 10.9 percent registered in the year ending October 2023. However, Annual Other Goods Inflation slowed down to 1.4 percent in the year ending November 2023 compared to 1.8 percent in the year ended October 2023. The main drivers were Maize flour inflation that registered negative 27.0 percent in November 2023 compared to negative 23.0 percent registered in October 2023 and Rice inflation that registered negative 1.7 percent in November 2023 compared to 0.2 percent registered in October 2023.

The other driver to the increase in the Annual Inflation is the Annual Energy Fuel and Utilities (EFU) inflation that increased to 4.3 percent in the year ending November 2023 compared to 2.2 percent registered in the year ended October 2023. This was mainly due to Liquid Energy Fuels Inflation that registered negative 4.5 percent in November 2023 compared to negative 9.2 percent registered in October 2023. Specifically, Petrol inflation registered negative 3.9 percent in November 2023 compared to negative 11.1 percent in October 2023, Diesel inflation registered negative 9.3 percent in November 2023 compared to negative 11.2 percent registered in October 2023 and Kerosene inflation increased to 0.4 percent in November 2023 compared to negative 0.5 percent in October 2023. In addition, Charcoal inflation increased to 16.7 percent in November 2023 compared to 14.3 percent in October 2023.

However, Annual Food Crops and Related Items Inflation slowed down to 6.4 percent in the year ending November 2023 compared to 6.6 percent registered in the year ended October 2023. This is mainly attributed to Annual Vegetables, tubers, plantains, cooking bananas and pulses inflation that registered 7.2 percent in the year ending November 2023 compared to 7.5 percent registered in October 2023. Particularly, Round onions inflation that registered 91.5 percent in November 2023 compared to 115.4 percent registered in October 2023, Irish potatoes Inflation that registered negative 7.6 percent in November 2023 compared to negative 0.9 percent registered in October 2023. Fresh Cassava inflation that registered negative 11.7 percent in November 2023 compared to negative 6.6 percent in October 2023 as shown in the figure below.

1.5 Annual Headline Inflation by Income Groups and Geographical areas

Analysis by geographical areas and income groups revealed that Fort portal registered the highest inflation of 5.9 percent for the 12 months to November 2023 compared to 4.7 percent recorded in October 2023. This was mainly driven by Annual 'Food and non-alcoholic beverages' inflation that registered 11.2 percent in November 2023 compared to 8.3 percent registered in October 2023. In addition, Annual 'Transport' inflation registered 1.0 percent in November 2023 compared to minus 2.6 percent registered in October 2023.

The second highest inflation was registered in Jinja at 4.0 percent for the 12 months to November 2023 compared to 3.9 percent recorded in October 2023. This was mainly driven by annual 'Restaurants and Accommodation Services' inflation that registered 3.7 percent in November 2023 compared 1.7 percent registered in October 2023. In addition, Annual 'Transport' inflation registered 1.1 percent in November 2023 compared to minus 0.8 percent in October 2023.

The least annual inflation was registered in Kampala Middle at 1.3 percent for the 12 months to November 2023 compared to 1.7 percent recorded in October 2023. This was mainly due to the annual inflation for 'Food and Non-Alcoholic Beverages' that registered 0.5 percent in November 2023 compared to 1.2 percent registered in October 2023. In addition, annual 'Personal Care, Social Protection and Miscellaneous Goods' inflation registered 7.7 percent in November 2023 compared to 9.2 percent in October 2023.
