FOREWORD

This publication provides the monthly Consumer Price Indices for Uganda (Composite) and for the ten centres of Kampala High Income, Kampala Middle Income, Kampala Low Income, Jinja, Mbale, Masaka, Mbarara, Fortportal, Gulu and Arua. All the baskets are for the urban households.

The current Consumer Price Index has been rebased from 2009/2010 to 2016/2017, using weights derived from the Uganda National Household Survey (UNHS VI) that was conducted from July 2016 to June 2017. The rebased CPI is classified using international standards, referred to as Classification of Individual Consumption According to Purpose (COICOP 2018). This is a shift from the COICOP 1999 that was used in the earlier series. COICOP 2018 is more detailed than the previous (1999) version, responding to the users' need for more detail, and addresses several other issues that required revision of the classification. The new COICOP of 2018 reflects the significant changes in goods and services in some areas, improved links of COICOP to other classifications, and addresses emerging statistical and policy needs of regional and international users.

At the elementary aggregate (EA) level, the indices are computed using the Jevons (Geometric Mean) method for all items within the elementary aggregates. The modified Laspeyres index formula is used to compute higher level indices. The National CPI is computed as a weighted average of the ten centres mentioned above and rebased indices are available from July 2017 to date at EA level.

ACRONYMS AND DEFINITIONS

COICOP: Classification of Individual Consumption According to Purpose, is a nomenclature developed by the United Nations Statistics Division to classify and analyse individual consumption expenditures incurred by households, non-profit institutions serving households and general government according to their purpose.

CPI: Consumer Price Index - a general indicator of price levels paid by households for consumer goods and services.

CPI basket: A commonly used term for the goods and services priced for the purpose of compiling the CPI.

Elementary aggregate (EA): The lowest level of commodity classification in the CPI, and the only level for which index numbers are constructed by direct reference to price data.

Inflation: A term commonly used to refer to changes in price levels. A rise in prices is called inflation, and a persistent fall is called deflation.

Jevons price index: An elementary price index defined as the un-weighted geometric average of the sample price relatives. It can also be defined as the un-weighted geometric average of the current to base period price relatives.

Laspeyres price index: The Laspeyres price index is an index formula used in price statistics for measuring the price development of the basket of goods and services consumed in the base period. The question it answers is how much a basket that consumers bought in the base period would cost in the current period.

Outlet: The interface between a supplier of products and the consumer. It may be a shop, a market stall, a catalogue, a website etc. Also referred to as a "retail outlet", although it can include wholesale outlets which also sell directly to the consumers

Outlier: A term used to describe any extreme value in a set of data, such as a price or price relative that requires further investigation or has been verified as incorrect

Price relative: A measure of price movements: the ratio of the price level in one period to the price level in another.

Reference base: The period in which the CPI is given a value of 100.0. The CPI is currently on a reference base of 2016/17.

Weight: The measure of the importance of an item in the index regimen relative to the other items. Weights can be expressed in either quantity or value terms. Value weights are used in the CPI.

1.0 HIGHLIGHTS OF UGANDA CPI FOR DECEMBER 2024

1.1 Annual Headline Inflation

The Annual Inflation as measured by the Consumer Price Index for Uganda for the 12 months to December 2024 is 3.3 percent compared to the 2.9 percent registered in the year ended November 2024.

This is largely attributed to Annual Core Inflation registered at 3.9 percent in the year ending December 2024 compared to 3.8 percent that was recorded in the year ended November 2024. The main driver of Annual Core Inflation is the Annual Services Inflation recorded at 6.1 percent in December 2024 compared to 5.9 percent registered in November 2024. This was mainly due to Passenger Transport by Road Inflation registered at 1.6 percent in the year ending December 2024 compared to 1.2 percent registered in the year ended November 2024. The other driver was Restaurants and Accommodation Services Inflation registered at 4.8 percent in the year ending December 2024 compared to 3.8 percent registered in the year ended November 2024. In addition, Annual Other Goods Inflation was recorded at 2.2 percent in the year ending December 2024, the same rate registered in the year ended November 2024. This was mainly due to Maize Flour prices that registered minus 13.4 percent in December 2024 compared to minus 18.2 percent registered in November 2024 and Rice prices that registered minus 5.7 percent in December 2024 compared to minus 9.1 percent registered in November 2024.

Annual Food Crops and Related Items Inflation recorded minus 0.7 percent in the year ending December 2024 compared to minus 4.0 percent registered in the year ended November 2024. This was mainly attributed to a drop in the prices of Fresh Leaf Vegetables - Nakati, Dodo, Bbugga by minus 11.6 percent compared to 0.6 percent in November 2024, Fresh Beans by minus 1.7 percent compared to 7.5 percent in November 2024, Egg Plants and Bitter Tomatoes by minus 12.2 percent compared to minus 1.9 percent in November 2024, Carrots prices by minus 18.5 percent compared to 11.2 percent in November 2024 and Irish potatoes prices increased by 11.7 percent compared to 17.3 percent in November 2024.

Annual Energy Fuel and Utilities (EFU) Inflation recorded 1.0 percent in the year ending December 2024 compared to 2.2 percent registered in the year ended November 2024. This was mainly due to Solid fuels inflation recorded at 10.9 percent in December 2024 compared to 14.5 percent registered in November 2024. Particularly, Charcoal prices increased by 4.9 percent in December 2024 compared to 13.9 percent recorded in November 2024. Liquid Energy Fuels Inflation recorded minus 8.5 percent in the year ending December 2024 compared to minus 7.8 percent registered in the year ended November 2024 driven mainly by Petrol prices that decreased by minus 10.6 percent in December 2024 compared to minus 9.4 percent in November 2024, Diesel prices by minus 7.8 percent compared to minus 8.3 percent in November 2024 and Liquefied gas prices by minus 4.5 percent compared to minus 4.2 percent in November 2024.
