## FOREWORD

This publication provides the monthly Consumer Price Indices for Uganda (Composite) and for the ten centres of Kampala High Income, Kampala Middle Income, Kampala Low Income, Jinja, Mbale, Masaka, Mbarara, Fortportal, Gulu and Arua. All the baskets are for the urban households.

The current Consumer Price Index has been rebased from 2009/2010 to 2016/2017, using weights derived from the Uganda National Household Survey (UNHS VI) that was conducted from July 2016 to June 2017. The rebased CPI is classified using international standards, referred to as Classification of Individual Consumption According to Purpose (COICOP 2018). This is a shift from the COICOP 1999 that was used in the earlier series. COICOP 2018 is more detailed than the previous (1999) version, responding to the users' need for more detail, and addresses several other issues that required revision of the classification. The new COICOP of 2018 reflects the significant changes in goods and services in some areas, improved links of COICOP to other classifications, and addresses emerging statistical and policy needs of regional and international users.

At the elementary aggregate (EA) level, the indices are computed using the Jevons (Geometric Mean) method for all items within the elementary aggregates. The modified Laspeyres index formula is used to compute higher level indices. The National CPI is computed as a weighted average of the ten centres mentioned above and rebased indices are available from July 2017 to date at EA level.

## ACRONYMS AND DEFINITIONS

**COICOP:** Classification of Individual Consumption According to Purpose, is a nomenclature developed by the United Nations Statistics Division to classify and analyse individual consumption expenditures incurred by households, non-profit institutions serving households and general government according to their purpose.

**CPI:** Consumer Price Index - a general indicator of price levels paid by households for consumer goods and services.

**CPI basket:** A commonly used term for the goods and services priced for the purpose of compiling the CPI.

**Elementary aggregate (EA):** The lowest level of commodity classification in the CPI, and the only level for which index numbers are constructed by direct reference to price data.

**Inflation:** A term commonly used to refer to changes in price levels. A rise in prices is called inflation, and a persistent fall is called deflation.

**Jevons price index:** An elementary price index defined as the un-weighted geometric average of the sample price relatives. It can also be defined as the un-weighted geometric average of the current to base period price relatives.

**Laspeyres price index:** The Laspeyres price index is an index formula used in price statistics for measuring the price development of the basket of goods and services consumed in the base period. The question it answers is how much a basket that consumers bought in the base period would cost in the current period.

**Outlet:** The interface between a supplier of products and the consumer. It may be a shop, a market stall, a catalogue, a website etc. Also referred to as a "retail outlet", although it can include wholesale outlets which also sell directly to the consumers

**Outlier:** A term used to describe any extreme value in a set of data, such as a price or price relative that requires further investigation or has been verified as incorrect

**Price relative:** A measure of price movements: the ratio of the price level in one period to the price level in another.

**Reference base:** The period in which the CPI is given a value of 100.0. The CPI is currently on a reference base of 2016/17.

**Weight:** The measure of the importance of an item in the index regimen relative to the other items. Weights can be expressed in either quantity or value terms. Value weights are used in the CPI.

# 1.0 HIGHLIGHTS OF UGANDA CPI FOR OCTOBER 2025

## 1.1 Annual Headline Inflation

The Annual Inflation as measured by the Consumer Price Index for Uganda for the 12 months to October 2025 is 3.4 percent compared to 4.0 percent registered in the year ended September 2025, see Table 1 and Figure 1 below.

Annual Core Inflation registered 3.4 percent in the year ending October 2025 compared to 4.0 percent recorded in the year ended September 2025. Annual Core Goods Inflation registered 2.6 percent in the year ending October 2025 compared to 3.0 percent recorded in the year ended September 2025. This is attributed to Sugar (whose rate of price change was 8.9 percent compared to 15.0 percent recorded in the year ended September 2025) and Meat-Beef (whose rate of price change was 11.6 percent compared to 13.3 percent recorded in the year ended September 2025). In addition, Annual Services Inflation recorded 4.5 percent in October 2025 compared to 5.1 percent registered in September 2025. This is mainly due to Annual Accommodation services Inflation (recorded at 3.2 percent in the year ending October 2025 compared to 4.2 percent recorded in the year ended September 2025), Labour for motor vehicle servicing (recorded 0.4 percent compared to 33.3 percent registered in the year ended September 2025), Education services (recorded 7.6 percent compared to 6.3 percent registered in the year ended September 2025) and Transport Inflation (recorded at 1.0 percent compared to 3.3 percent registered in the year ended September 2025).

Annual Food Crops and Related Items Inflation registered 6.1 percent in the year ending October 2025 compared to 7.4 percent registered in the year ended September 2025. This is attributed to Dry beans (whose rate of price change is 1.8 percent compared to 3.4 percent recorded in the year ended September 2025), Sweet Potatoes (whose rate of price change is 18.9 percent compared to 23.6 percent recorded in the year ended September 2025), Tomatoes (whose rate of price change is 18.8 percent compared to 30.4 percent recorded in the year ended September 2025), Onions (whose rate of price change is minus 4.5 percent compared to 1.8 percent recorded in the year ended September 2025), Pineapples (whose rate of price change is 23.2 percent compared to 44.6 percent recorded in the year ended September 2025) and Papaya (whose rate of price change is 7.2 percent compared to 18.5 percent recorded in the year ended September 2025).

Annual Energy Fuel and Utilities (EFU) Inflation was recorded at 0.1 percent in the year ending October 2025 compared to minus 0.1 percent registered in the year ended September 2025. This is mainly due to an increase in the rate of price change of Charcoal by 6.3 percent in October 2025 compared to 5.5 percent recorded in the year ended September 2025, Petrol by minus 2.0 percent in October 2025 compared to minus 3.6 percent recorded in the year ended September 2025 and Liquefied gas (propane) prices (whose rate of price change is minus 2.1 percent compared to minus 4.6 percent recorded in the year ended September 2025).
