# UCA 2008/09 AT A GLANCE

## 1.1 Background

- 1.1.1** In Uganda, agriculture is the most important sector of the economy. According to the 2002 Uganda Population and Housing Census (PHC, 2002), the agricultural sector accounted for 73 percent of the total employment for persons aged 10 years and above. In addition, 74 percent of the households had an agricultural holding as determined from the Agricultural Module which was included in the PHC, 2002. In order to eradicate poverty from the majority of the population in rural areas, the government established and has been implementing the Plan for Modernisation of Agriculture (PMA) in line with the Poverty Eradication Action Plan (PEAP). In the last eight years the policy environment for the agriculture sector in Uganda has been shaped by PMA which is a multi-sectoral policy framework for agriculture and rural development. The multi-sectoral nature of PMA gave it the breadth that agriculture needs to move forward. Its scope covered seven pillars: research and technology development; National Agricultural Advisory Services (NAADS); rural finance; agro-processing and marketing; agricultural education; physical infrastructure as well as sustainable natural resource utilisation and management. The PMA implementation mandate spread across 13 ministries and agencies, which among other factors, affected implementation.
- 1.1.2** In 2005 the Rural Development Strategy (RDS) was formulated with the overall objective of raising household incomes with a focus on the sub-county as a basic unit for planning. In 2006 a much broader vision of Prosperity for All (PFA) was formulated and of recent Government has formulated the National Development Plan (NDP), 2010/11 - 2014/15. The NDP embodies investment priorities which include: physical infrastructure development mainly in energy, railways, waterways and air transport. Others are human resources development in areas of education, skills development, health, water and sanitation. Also included are, facilitating availability and access to critical production inputs especially in agriculture and industry as well as the promotion of science, technology and innovation. The development approach of the NDP intertwines economic growth and poverty eradication.
- 1.1.3** Information on the agricultural sector is therefore crucial for monitoring the RDS, the PFA programme and the NDP. Furthermore, information is required to monitor some of the Millennium Development Goals (MDGs).
- The mandate of the Food and Agriculture Organisation (FAO) of the United Nations is to: collect, analyse, interpret and disseminate information relating to nutrition, food and agriculture. Since its establishment, FAO has cooperated with member countries to improve the coverage, consistency and quality of food and agricultural statistics, through the Programme for the World Census of Agriculture (WCA).

- The current 2010 WCA is the 9th round in Censuses of Agriculture (CA) since 1930. FAO has been responsible for preparing guidelines on concepts, definitions, classifications, methodology, and tabulation plan to help countries plan and carry out their CA.
- Uganda has so far conducted three Censuses of Agriculture, the third one being the Uganda Census of Agriculture (UCA), 2008/09. The first CA was conducted during 1963/65. The Government of Uganda was assisted by FAO and the then Department for Technical Cooperation of the United Kingdom both of which provided international consultants and census equipment to a varying degree. Uganda continued to use the 1963 census data and it became clear with time that the data was getting out of date. As a result, the Ministry responsible for agriculture depended on two sources of data. sample surveys conducted during 1967 to 1975 and the Agricultural Reporting Service (ARS). The ARS entailed undertaking small-scale surveys to determine mean plot sizes for different crops as well as estimates of the number of crop plots planted for each crop as reported by chiefs. It was noted that the estimates obtained were subject to wide margins of errors and resulted in inconsistent time series of crop area and production.

**1.1.4** The second CA called the National Census of Agriculture and Livestock (NCAL) was conducted during 1990/91. It was funded by United Nations Development Programme (UNDP) and executed by FAO. Due to being contentious, the NCAL results had limited circulation. But almost two decades after the contentious NCAL, the need for a CA to provide agricultural benchmark data for monitoring Government development programmes such as the Poverty Eradication Action Plan (PEAP) and the Plan for Modernisation of Agriculture (PMA) was obvious, thus the UCA 2008/09.

**1.1.5** The Uganda Bureau of Statistics (UBOS), in close collaboration with the Ministry of Agriculture, Animal Industry and Fisheries (MAAIF) in 2002 initiated preparatory activities to conduct a UCA. The Royal Norwegian Government funded a three-year project titled 'Support to Strengthen Agricultural Statistics Project' (SSASP), whose main objectives were to develop an Agricultural Reporting Service (ARS), a Village Registration System (VRS), a System of Annual Surveys and to initiate preparations for a UCA that was slated for 2004/05. The UCA 2004/05 was to be preceded with a Pilot Census of Agriculture (PCA) in 2003.

**1.1.6** Due to lack of funding, however, it was not possible to conduct the long awaited UCA 2004/05. But during the Financial Year (FY) 2007/08 the Government of Uganda approved the funds for the UCA. The FY 2007/08 was regarded as a preparatory year during which census materials/items such as computers, UCA instruments and transport equipment were procured.

## 1.2 Objectives

### 1.2.1 The long-term objective

To have a system of Food and Agriculture Statistics (FAS) in place.

### 1.2.2 Specific Objectives

- i) Provision of data on the social and economic factors of Uganda's agricultural structure by inter-relating various characteristics of holdings e.g. size of a holding and by type of holding and factors such as fragmentation, land tenure, land utilisation, crop patterns, use of fertilisers and agro-chemicals, use of farm implements and machinery, farm population and labour force
- ii) Provision of detailed agricultural data such as number of holdings, total area of holdings, basic patterns of land utilisation, area under crops and extent of irrigation;
- iii) Provision of a benchmark for improving the reliability of current agricultural statistics from annual surveys and administrative sources and for assessing future agricultural development; and,
- iv) Creation and strengthening of the national capacity in agricultural censuses and surveys undertaking.

## 1.3 Scope and Coverage

The UCA 2008/09 covered all the 80 districts in the country as of July 2007 and a district was the domain of study i.e. census data was disaggregated to district level. Data was collected on:

### 1.3.1 Structural and Organisational aspects of the agricultural households (Ag HHs) and included among others;

- Number and size of holdings;
- Land access/Ownership/Tenure and Use;
- Demographic characteristics of the holder and his/her household;
- Use of agricultural labour;
- Access and use of implements, farm machinery etc.;
- Irrigation;
- Agricultural Credit/Loans;
- Agricultural Buildings/Storage facilities;
- Mode of transportation
- Sources of Agricultural information and,
- Access to facilities e.g. electricity, roads, markets, inputs etc

### 1.3.2 Data was also collected on current statistics including but not limited to;

- Crop area and crop production;
- Crop prices, quantity sold, etc
- Agro-forestry

## 1.4 Demographic and Socio-economic Characteristics

### 1.4.1 Agricultural Households

- The estimated number of Agricultural Households (Ag HHs) was 3.95 million, with the Western Region having the highest percentage (28.5%) while the Central Region had the least (20.5%).
- Out of the 3.6 million Ag HHs that responded, 78.9 percent were Male headed while 21.1 percent were Female headed.

### 1.4.2 Ag HH Population Composition

- The estimated number of Ag HH population was 19.3 million persons. Out of this, 50.5 percent were Males and 49.5 percent were Females.

### 1.4.3 Marital status of Ag HH heads

- Out of 3.6 million Ag HH heads that revealed their marital status,
  - 74.2 percent were *Married*,
  - 14.3 percent were *Widowed and not Remarried*
  - 4.2 percent were *Married but Separated*
  - 3.8 percent had *Never Married*.
  - 3.5 percent were *Divorced and not remarried*

### 1.4.4 Education

- Out of 16.9 million Ag HH members with information on educational status, 16.9 percent had *Never been to school*, 61.3 percent had *Primary level Education*, 15.6 percent had *Secondary Education* while 2.9 percent had *Post secondary Education*.

### 1.4.5 Literacy Status of Ag HH members

- Out of the 13.5 million Ag HH members with information on literacy, 9.3 million (69.1%) *Could Read and Write* while 4.2 million (30.9%) *Could not Read and Write*.
- Out of the 9.3 million who *Could Read and Write*, 5.1 million (55.1%) and 4.2 million (44.9%) were male and female members respectively.

### 1.4.6 Economic Activity

- *Crop Production* was reported by 45.9 percent of the Ag HH members as the Main Activity.
- 45.5 percent reported *Non-paid Family Worker* as the most common Type of Main Activity.

### 1.4.7 Management of crop plots

- Out of 5.7 million Ag HHs members who were reported to be managing at least a plot, 3.2 million (56.8%) were Males while 2.5 million (43.2%) were Females.

### 1.4.8 Membership to Farmers' groups

- An estimated 906,000 Ag HH members were *members of Farmers' Groups*. Out of this, 462,000 (51.0%) were males and 444,000 (49.0%) were females.

## 1.5 Agricultural Services

### 1.5.1 Agricultural Technology and Extension Services

- Out of 3.6 million Ag HHs that responded, 680,000 (19%) reported having been visited by an Extension Worker during the reference period;
- On average, Ag HHs reported having been visited by an Extension Worker 4 times in the reference period for all regions except the Eastern Region which recorded an average of 3 times

### 1.5.2 Sources of Agricultural Information

- *Radio* and *Farmer to Farmer* were the most important sources through which most Ag HHs received information on agriculture. The highest percentage of Ag HHs that got information on Weather (85.0%), Farm Machinery (43.8%) and Credit Facilities (50.2%) received it over the *Radio* while the highest percentage of Ag HHs that got information on Crop Varieties (43%), New Agricultural Practices (39.5%), Plant Diseases and Pests (45.4%) and Marketing (50.7%) received it through *Farmer to Farmer*.

### 1.5.3 Access to Credit

- Out of the 3.6 million Ag HHs that responded, 10 percent had accessed credit in the five years prior to enumeration.
- Out of the 357,000 Ag HHs that reported having accessed credit in the five years preceding the reference period, 272,000 (76.0%) were required to provide *Collateral/Security*.
- Out of the 272,000 Ag HHs that were required to provide collateral, the highest percentage (29.1%) used their *Land Titles* followed by *Character* with 23.1 percent while the least commonly used type of Collateral/Security was Salary with 9.8%.
- Out of 3.2 million Ag HHs that did not access credit in the 5 years preceding the reference period, 27.1 percent cited high Interest Rates as the main reason as to why they did not receive loans or credit. Lack of Collateral/Security (20.9%), No need for credit (16.4%) and *Ignorance of the existence of facilities* (15.1%) were cited as the other major reasons for not having received credit.

## 1.6 Access to Facilities

### 1.6.1 Ag HHs that reported being at a distance of 5 Km and above from nearest facilities

- *Local Produce Market* - 38.3 percent
- *Local Input/Dealer/Farm* - 50.9 percent
- *Extension Services* - 63.3 percent
- *All year round gravel road* - 26.6 percent
- *Tarmac Road* - 76.3 percent
- *District Produce Market* - 86.9 percent
- *Nursery* - 64.9 percent
- *Agricultural Research Centre* - 93.0 percent

- *Public Transport* - 33.8 percent
- *Feeder Road* - 14.4 percent

### 1.6.2 Means of Transportation

- Out of 3.0 million Ag HHs that responded, 2.0 million (63.6%) reported owning a bicycle and this was established to be the most commonly used Means of Transportation.

### 1.6.3 Storage Facilities

- Out of 3.6 million Ag HHs that responded, 2.0 million (55.3%) had storage facilities.
- *In the House* storage facility was the most widely used and reported by 56.7 percent of the Ag HHs that had storage facilities. This was followed by *Specific house/room* with 18.5 percent.

## 1.7 Irrigation and Water Management

### 1.7.1 Irrigation

- Irrigation was practiced by less than one percent (0.9%) of the 3.6 million Ag HHs that responded. This implies that agriculture is mainly rain-fed.
- The Total area under irrigation was nearly 7,000 Ha.

### 1.7.2 Flooding

- Seven (7) percent of Ag HHs reported that they were prone to flooding.
- The Eastern Region was the most affected by this phenomenon.

### 1.7.3 Drainage on Ag HHs

- Three (3) percent of Ag HHs reported carrying out drainage.
- Most of the drainage was reported by the Eastern Region.
- Thirty-six thousand (36,000) Ha of land were drained across the country.
- Eastern Region had 51.8 percent of the drained area.

## 1.8 Agricultural Inputs

### 1.8.1 Labour Inputs

- The number of Ag HH members who worked *Permanently* on the holding during the reference period was 8.1 million out of 19.3 million Ag HH members representing 42.3 percent.
- The number of Ag HH members who worked *Temporarily* on the holding during the reference period was 3.5 million out of 19.3 million Ag HH members representing 18.2 percent.

### 1.8.2 Non-Labour Inputs

- The total number of Ag HHs that reported having used Hoes was estimated to be 3.4 million. This was about 95.8 percent of all the 3.6 million Ag HHs that responded.
- Out of the estimated 3.6 million Ag HHs that responded,

- 2.5 million (71.0%) reported having used Axes. Overall, over 67 percent of the Ag HHs in each of the regions reported having used Axes.
  - 1.3 million (36.5%) reported having used Slashers.
  - 3.1 million (85.5%) reported having used Pangas
  - 28,000 Ag HHs (0.8%) reported having Tractors.
- Local Seeds were the most widely used inputs in the country. Out of the 3.6 million Ag HHs that responded, 3.3 million (91.7%) reported having used them during the reference period. This was followed by Improved/Hybrid Seeds with 1.1 million Ag HHs (31.1%), Veterinary Drugs with 1.0 million Ag HHs (29.2%) and then Organic Fertilisers with 873,000 Ag HHs (24.4%).

## 1.9 Household Food Security

### 1.9.1 Food shortage

- Out of the estimated 3.6 million Ag HHs that responded, 2.0 million Ag HHs (56.7%) reported that their members were not able to afford eating what they would normally eat during the reference period.

### 1.9.2 Reasons for food shortage

- *Loss of Crops/Insufficient Production* was advanced by 71.4 percent as the major reason for Food Shortage followed by *Lack of Adequate capital* (19.3%) and *Lack of Adequate Land* (10.0%).

### 1.9.3 Response to food shortage

- *Adult Female* members of the Ag HH bore the brunt of Food Shortage in the majority of Ag HHs compared to other members.
  - 53.1 percent of Ag HHs reported their Adult Female members Skipping meals
  - 61.1 percent of Ag HHs reported their Adult Female members Eating less preferred food
  - 68.3 percent of Ag HHs reported their Adult Female members Reduced size of meals
- *Use of Savings to Buy Food and getting Assistance from relatives* were the major coping strategies adopted by a majority of Ag HHs for all categories of Ag HH members whereas no Ag HH had child members who Took Out a Loan or Sold Land to Buy Food .

### 1.9.4 Loss of agricultural output due to natural disaster

- Out of the 2.0 million Ag HHs that experienced Food Shortage, 1.8 million (91.5%) experienced *Drought*.
- Out of the 2.0 million Ag HHs that experienced Food Shortage, 1.3 million (66.0%) experienced *Pests/diseases*.
- 71 percent of the Ag HHs that experienced Food Shortage expressed *Fear for Food Shortage* during the 12 months after enumeration.

## 1.10 Economic Activities and Sources of Income

### 1.10.1 Other Economic Production Activities

- Out of the 3.6 million Ag HHs that responded, 1.1 million (29.8%) reported undertaking *other economic production activities other than agricultural production*.

#### Number and percentage of Ag HHs whose members undertook other economic activities

Other economic production activities	Ag HHs that reported their;					
	Male members		Female members		Child members	
1. Wholesale and Retail Trade	251,000	(23.6%)	139,000	(13.1%)	15,000	(1.5%)
2. Other Agricultural Production	288,000	(27.0%)	210,000	(19.7%)	9,000	(4.6%)
3. Agricultural Services	83,000	(7.8%)	68,000	(6.4%)	18,000	(1.7%)
4. Hunting, Trapping etc	80,000	(7.5%)	7,500	(0.7%)	27,000	(2.6%)
5. Fishing, Aquaculture and related activities	56,687	(5.3%)	20,079	(1.9%)	13,135	(1.2%)
6. Manufacturing activities	55,000	(5.2%)	30,000	(2.8%)	6,400	(0.6%)
7. Forestry, logging and related activities	40,000	(3.8%)	14,000	(1.3%)	3,800	(0.4%)
8. Operation of Hotels and Restaurants.	21,000	(2.0%)	52,000	(5.7%)	6,000	(0.6%)

### 1.10.2 Other Sources of Ag HH Income

Other Sources of Income	Ag HHs ranking main source of income from other economic activities for their;					
	Male members		Female members		Child members	
1. Economic Production Activities Other Than Agricultural Production	330,454	(9.2%)	765,859	(21.4%)	1,474,341	(41.2%)
2. Paid Employment	120,408	(3.4%)	370,011	(10.3%)	551,255	(15.4%)
3. Pensions and Investment	54,539	(1.5%)	135,043	(3.8%)	227,371	(6.4%)
4. Remittances (inside Uganda)	198,604	(5.6%)	205,681	(5.8%)	375,268	(10.5%)
5. External remittances	32,252	(0.9%)	48,642	(1.4%)	61,064	(1.7%)

## 1.11 Area and Production of Major Crops

**Table 1: Total Area, Production, Yield and Mean Plot Sizes for Major Food Crops**

Crop	Area (Ha)	Production in metric tons (MT)	Yield (MT/Ha)	Total number of plots	Mean Plot size (Ha)
Banana (Food),	806,627	4,017,986	5.0	2,889,700	0.3
Cassava	871,389	2,894,311	3.3	3,147,389	0.3
Maize	1,014,260	2,361,956	2.3	2,873,654	0.4
Sweet Potatoes	440,256	1,818,769	4.1	2,717,138	0.2
Beans	617,521	929,277	1.5	2,277,083	0.3
Sorghum	399,252	375,795	0.9	1,212,563	0.3
Finger Millet	249,987	276,928	1.1	935,884	0.3
Groundnuts	345,232	244,684	0.7	1,410,622	0.2
Banana (Beer)	86,127	242,845	2.8	208,185	0.4
Rice	75,085	190,735	2.5	186,946	0.4
Irish Potatoes	32,758	154,436	4.7	269,633	0.1
Simsim	175,596	101,028	0.6	467,499	0.4
Banana (Sweet)	23,124	36,514	1.6	75,582	0.3
Soya Beans	36,444	23,623	0.6	105,846	0.3
Field Peas	43,837	16,452	0.4	131,926	0.3
Pigeon Peas	29,801	11,330	0.4	58,783	0.5
Cowpeas	23,818	11,058	0.5	76,962	0.3

**Table 2: Area and Production by Season of Major Food crops**

Crop	Second season 2008		First season 2009		Total	
	Area (Ha)	Production (MT)	Area (Ha)	Production (MT)	Area (Ha)	Production (MT)
Banana (Food),	416,719	2,132,393	389,908	1,885,593	806,627	4,017,986
Cassava	459,072	1,668,388	412,317	1,225,923	871,389	2,894,311
Maize	465,347	1,164,324	548,913	1,197,632	1,014,260	2,361,956
Sweet Potatoes	235,424	1,134,072	204,832	684,697	440,256	1,818,769
Beans	315,431	545,787	302,090	383,490	617,521	929,277
Sorghum	200,338	217,465	198,914	158,330	399,252	375,795
Finger Millet	115,876	163,058	134,111	113,870	249,987	276,928
Groundnuts	152,002	154,652	193,230	90,032	345,232	244,684
Banana (Beer)	46,914	125,364	39,213	117,481	86,127	242,845
Rice	38,803	135,985	36,282	54,750	75,085	190,735
Irish Potatoes	17,374	86,844	15,384	67,592	32,758	154,436
Simsim	132,785	84,547	42,811	16,481	175,596	101,028
Banana (Sweet)	12,538	20,180	10,586	16,334	23,124	36,514
