## FOREWORD

This publication provides the monthly Consumer Price Indices for Uganda (Composite) and for the ten centres of Kampala High Income, Kampala Middle Income, Kampala Low Income, Jinja, Mbale, Masaka, Mbarara, Fortportal, Gulu and Arua. All the baskets are for the urban households.

The current Consumer Price Index has been rebased from 2009/2010 to 2016/2017, using weights derived from the Uganda National Household Survey (UNHS VI) that was conducted from July 2016 to June 2017. The rebased CPI is classified using international standards, referred to as Classification of Individual Consumption According to Purpose (COICOP 2018). This is a shift from the COICOP 1999 that was used in the earlier series. COICOP 2018 is more detailed than the previous (1999) version, responding to the users' need for more detail, and addresses several other issues that required revision of the classification. The new COICOP of 2018 reflects the significant changes in goods and services in some areas, improved links of COICOP to other classifications, and addresses emerging statistical and policy needs of regional and international users.

At the elementary aggregate (EA) level, the indices are computed using the Jevons (Geometric Mean) method for all items within the elementary aggregates. The modified Laspeyres index formula is used to compute higher level indices. The National CPI is computed as a weighted average of the ten centres mentioned above and rebased indices are available from July 2017 to date at EA level.

## ACRONYMS AND DEFINITIONS

**COICOP:** Classification of Individual Consumption According to Purpose, is a nomenclature developed by the United Nations Statistics Division to classify and analyse individual consumption expenditures incurred by households, non-profit institutions serving households and general government according to their purpose.

**CPI:** Consumer Price Index - a general indicator of price levels paid by households for consumer goods and services.

**CPI basket:** A commonly used term for the goods and services priced for the purpose of compiling the CPI.

**Elementary aggregate (EA):** The lowest level of commodity classification in the CPI, and the only level for which index numbers are constructed by direct reference to price data.

**Inflation:** A term commonly used to refer to changes in price levels. A rise in prices is called inflation, and a persistent fall is called deflation.

**Jevons price index:** An elementary price index defined as the un-weighted geometric average of the sample price relatives. It can also be defined as the un-weighted geometric average of the current to base period price relatives.

**Laspeyres price index:** The Laspeyres price index is an index formula used in price statistics for measuring the price development of the basket of goods and services consumed in the base period. The question it answers is how much a basket that consumers bought in the base period would cost in the current period.

**Outlet:** The interface between a supplier of products and the consumer. It may be a shop, a market stall, a catalogue, a website etc. Also referred to as a "retail outlet", although it can include wholesale outlets which also sell directly to the consumers

**Outlier:** A term used to describe any extreme value in a set of data, such as a price or price relative that requires further investigation or has been verified as incorrect

**Price relative:** A measure of price movements: the ratio of the price level in one period to the price level in another.

**Reference base:** The period in which the CPI is given a value of 100.0. The CPI is currently on a reference base of 2016/17.

**Weight:** The measure of the importance of an item in the index regimen relative to the other items. Weights can be expressed in either quantity or value terms. Value weights are used in the CPI.

## 1.0 HIGHLIGHTS OF UGANDA CPI FOR DECEMBER 2022

The Annual Inflation as measured by the Consumer Price Index for Uganda for the 12 months to December 2022 was registered at 10.2 percent, compared to 10.6 percent registered for the year ended November 2022. This was mainly driven by the increase in the price of commodities under core inflation that was registered at 8.4 percent in the year ending December 2022, compared to 8.8 percent registered in the year ended November 2022.

In particular, the increase in prices of commodities is attributed to other goods inflation registered at 12.4 percent in the year ending December 2022, compared to 12.8 percent recorded in the year ended November 2022. Maize flour inflation increased to 95.7 percent in December 2022 compared to 94.0 percent in November 2022 and rice inflation was registered at 42.6 percent in December 2022 compared to 46.7 percent in November 2022.

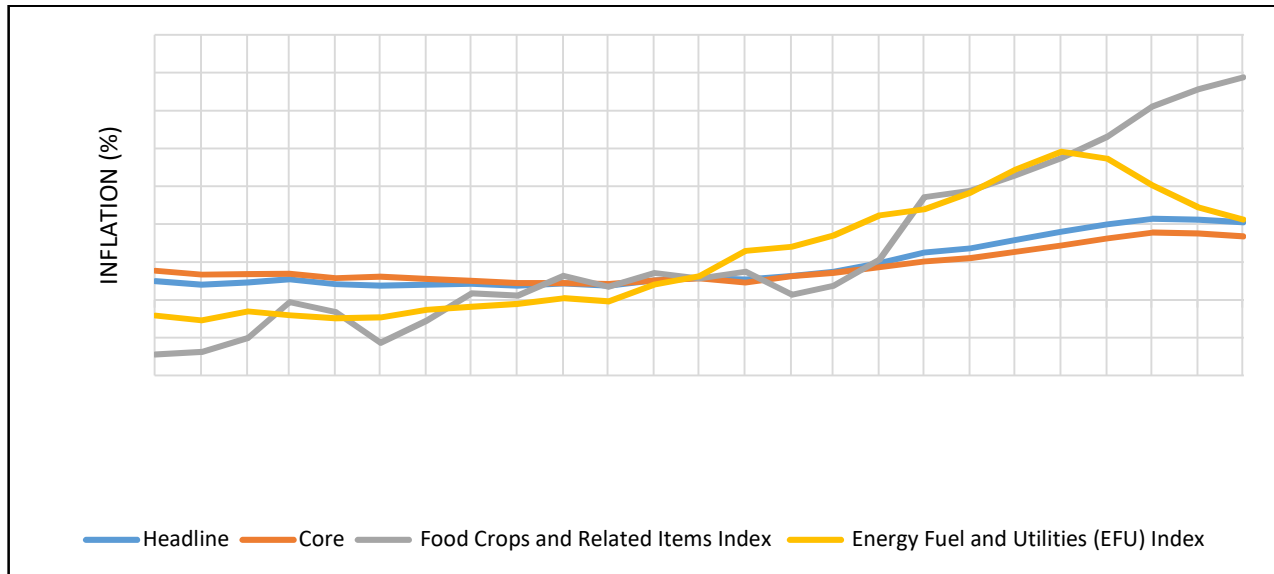

In addition, annual food crops and related items inflation increased to 29.4 percent in the year ending December 2022, compared to 27.8 percent registered in the year ended November 2022. This was mainly due to annual 'vegetables, tubers, plantains, cooking bananas and pulses' inflation that increased to 39.7 percent in December 2022, compared to 35.4 percent registered in November 2022. Specifically, matooke (bunch) and beans dry inflation was registered at 77.9 percent and 30.2 percent respectively in December 2022.

On the other hand, annual energy fuel and utilities (EFU) inflation was registered at 10.6 percent in the year ending December 2022, compared to 12.2 percent registered in the year ended November 2022. This was mainly due to annual liquid energy fuels inflation that was registered at 24.8 percent in the year ending December 2022 compared to 32.7 percent registered in the year ended November 2022. Specifically, annual petrol inflation was registered at 22.0 percent in December 2022, compared to 33.5 percent registered in November 2022 as shown in Table 1 and Figure 1.

### 1.7 Annual Headline Inflation by Income Groups and Geographical areas

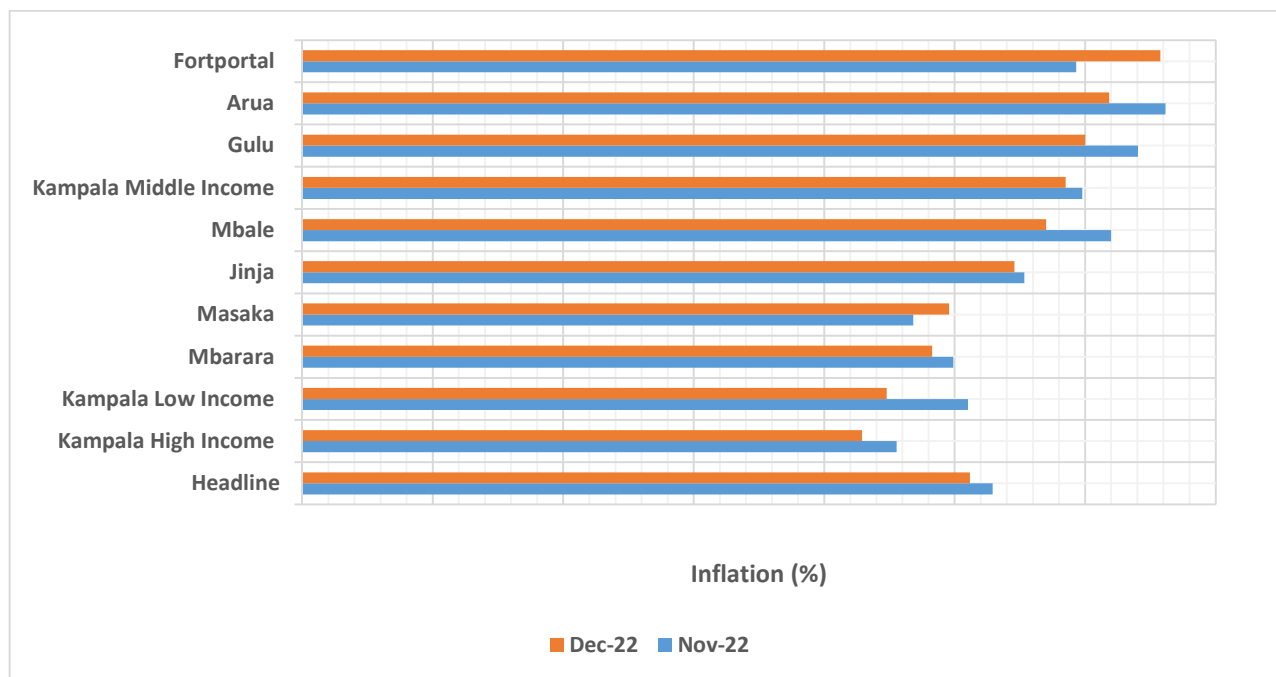

Analysis by geographical areas and income groups revealed that Fort portal registered the highest inflation of 13.2 percent for the 12 months to December 2022 compared to 11.9 percent recorded in November 2022. This was mainly driven by annual 'food and non-alcoholic beverages' inflation that increased to 25.5 percent in December 2022 compared to 23.8 percent registered in November 2022. Specifically, Cassava flour inflation was registered at 110.5 percent, Matoke (bunch) 99.5 percent, Maize flour 63.5 percent, Rice 50.0 percent, Sugar 43.5 percent and Beans dry 29.9 percent. In addition, annual restaurants and accommodation services inflation increased to 11.1 percent in December 2022 compared to 10.2 percent in November 2022.

The second highest inflation was registered in Arua at 12.4 percent for the 12 months to December 2022 compared to 13.2 percent recorded in November 2022. This was mainly driven by annual 'food and non-alcoholic beverages' inflation that registered 20.9 percent in December 2022 compared to 23.1 percent registered in November 2022. Specifically, Cassava flour Inflation was registered at 74.9 percent, Cassava dried 91.3 percent; Beans dry 81.8 percent, Cassava fresh 32.3 percent, Rice 41.4 percent, Maize flour 56.8 percent and Sugar 32.7 percent.

In addition, annual restaurants and accommodation services inflation increased to 14.3 percent in December 2022 compared to 12.6 percent in November 2022.

The least annual inflation was registered in Kampala High Income at 8.6 percent for the 12 months to December 2022 compared to 9.1 percent recorded in November 2022. This was mainly due to the annual transport inflation that registered 5.5 percent in December 2022 compared to 9.2 percent registered in November 2022. In addition, annual information and communication inflation was registered at 1.6 percent in December 2022, compared to 1.5 percent in November 2022.

**Figure 2: Annual Inflation by Income Groups and Geographical Areas for the 12 months to November 2022 and December 2022**

## ANNEX 1: ANNUAL INFLATION BY COICOP DIVISIONS

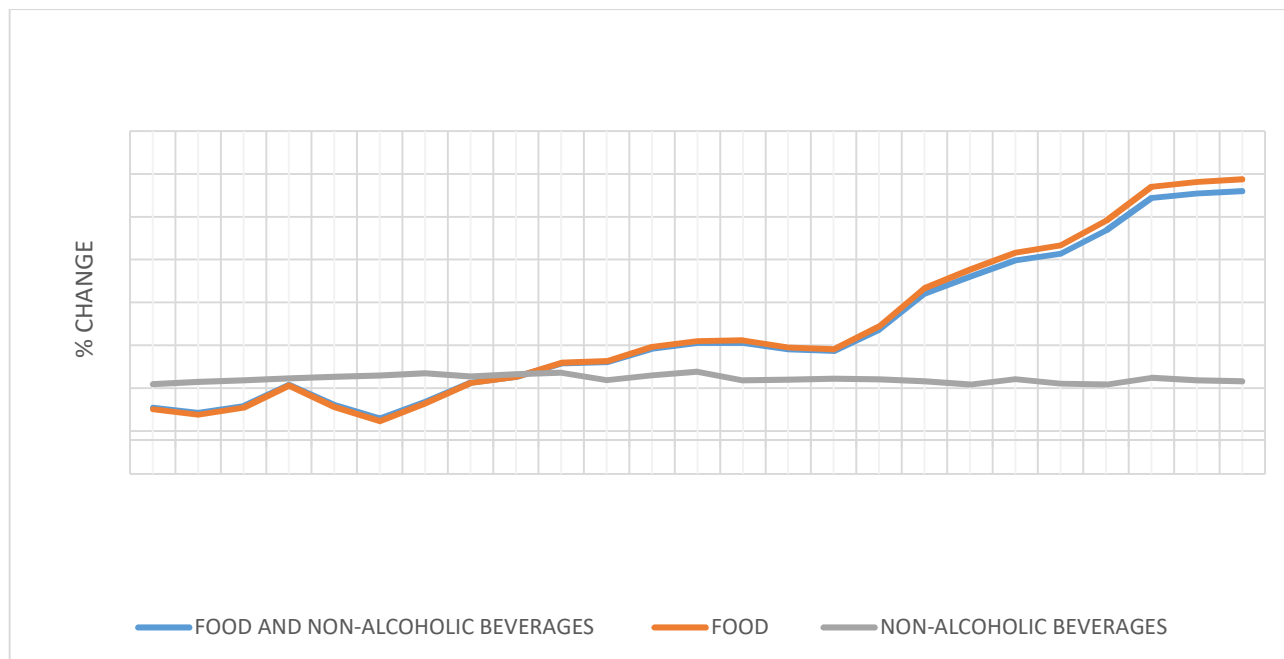

The evolution of Annual Inflation according to COICOP is described in the following paragraphs, reference is made to table 6.

### 01 Food and Non-Alcoholic Beverages

The Inflation for Food and Non-Alcoholic Beverages increased to 23.0 percent for the 12 months to December 2022 compared to 22.7 percent recorded in November 2022. The increase was mainly due to Annual Food Inflation that increased to 24.4 percent in December 2022 compared to 24.1 percent recorded in November 2022.

However, Non-Alcoholic Beverages Inflation decreased to 0.8 percent for the 12 months to December 2022 compared to 0.9 percent recorded in November 2022. *Figure 4 shows the trends of Food and Non Alcoholic Beverages Annual Inflation from October 2020 to December 2022.*

**Figure 4: Food and Non Alcoholic Beverages Annual Inflation Trends; December 2020 – December 2022.**

### 02 Alcoholic Beverages, Tobacco & Narcotics

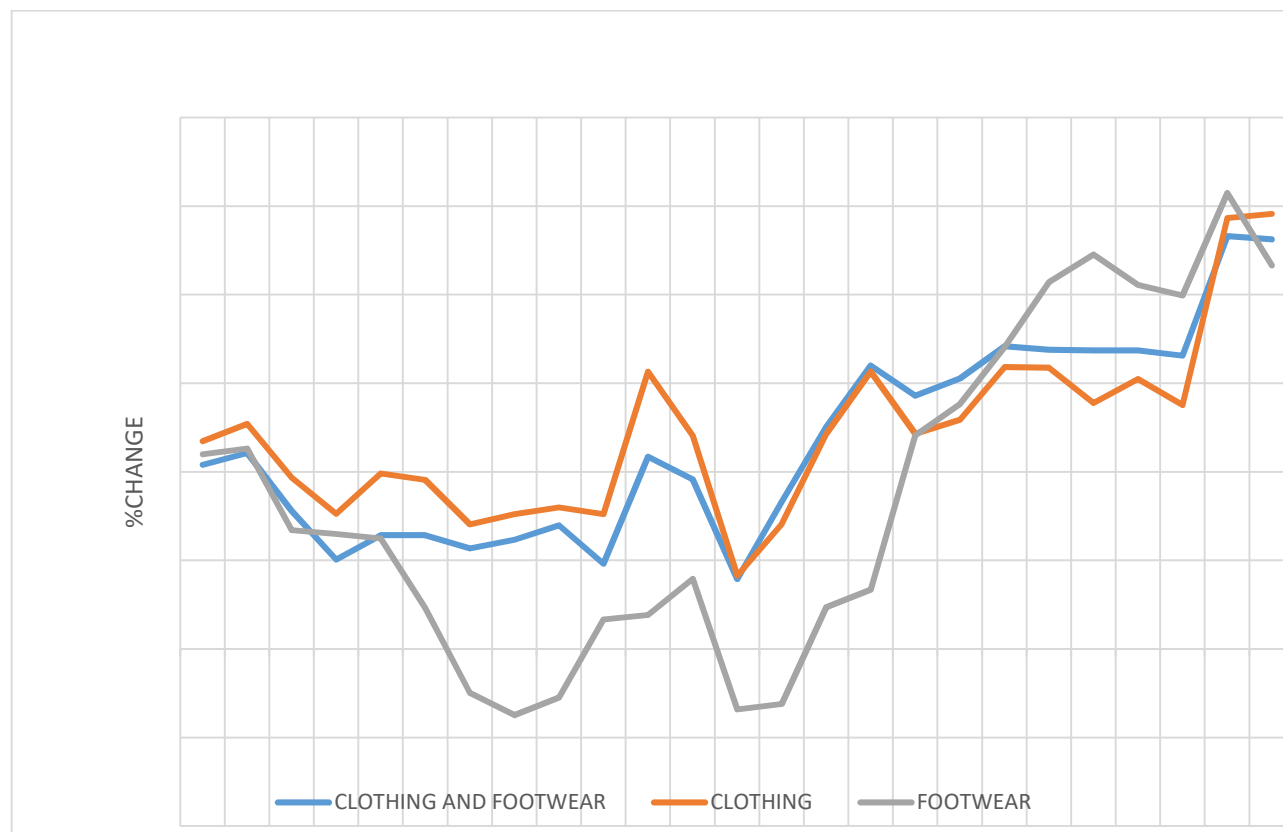

The Inflation for Alcoholic Beverages, Tobacco & Narcotics registered 8.0 percent for the 12 months to December 2022 compared to 8.7 percent recorded in November 2022. This was attributed to the Annual Alcoholic Beverages Inflation that registered 9.0 percent in December 2022 compared to 9.8 percent recorded in November 2022. In addition, Annual Tobacco Inflation registered minus 1.3 percent for the 12 months to December 2022 compared to minus 1.1 percent recorded in November 2022.

### 03 Clothing and Footwear
