## FOREWORD

This publication provides the monthly Consumer Price Indices for Uganda (Composite) and for the ten centres of Kampala High Income, Kampala Middle Income, Kampala Low Income, Jinja, Mbale, Masaka, Mbarara, Fortportal, Gulu and Arua. All the baskets are for the urban households.

The current Consumer Price Index has been rebased from 2009/2010 to 2016/2017, using weights derived from the Uganda National Household Survey (UNHS VI) that was conducted from July 2016 to June 2017. The rebased CPI is classified using international standards, referred to as Classification of Individual Consumption According to Purpose (COICOP 2018). This is a shift from the COICOP 1999 that was used in the earlier series. COICOP 2018 is more detailed than the previous (1999) version, responding to the users' need for more detail, and addresses several other issues that required revision of the classification. The new COICOP of 2018 reflects the significant changes in goods and services in some areas, improved links of COICOP to other classifications, and addresses emerging statistical and policy needs of regional and international users.

At the elementary aggregate (EA) level, the indices are computed using the Jevons (Geometric Mean) method for all items within the elementary aggregates. The modified Laspeyres index formula is used to compute higher level indices. The National CPI is computed as a weighted average of the ten centres mentioned above and rebased indices are available from July 2017 to date at EA level.

## ACRONYMS AND DEFINITIONS

**COICOP:** Classification of Individual Consumption According to Purpose, is a nomenclature developed by the United Nations Statistics Division to classify and analyse individual consumption expenditures incurred by households, non-profit institutions serving households and general government according to their purpose.

**CPI:** Consumer Price Index - a general indicator of price levels paid by households for consumer goods and services.

**CPI basket:** A commonly used term for the goods and services priced for the purpose of compiling the CPI.

**Elementary aggregate (EA):** The lowest level of commodity classification in the CPI, and the only level for which index numbers are constructed by direct reference to price data.

**Inflation:** A term commonly used to refer to changes in price levels. A rise in prices is called inflation, and a persistent fall is called deflation.

**Jevons price index:** An elementary price index defined as the un-weighted geometric average of the sample price relatives. It can also be defined as the un-weighted geometric average of the current to base period price relatives.

**Laspeyres price index:** The Laspeyres price index is an index formula used in price statistics for measuring the price development of the basket of goods and services consumed in the base period. The question it answers is how much a basket that consumers bought in the base period would cost in the current period.

**Outlet:** The interface between a supplier of products and the consumer. It may be a shop, a market stall, a catalogue, a website etc. Also referred to as a "retail outlet", although it can include wholesale outlets which also sell directly to the consumers

**Outlier:** A term used to describe any extreme value in a set of data, such as a price or price relative that requires further investigation or has been verified as incorrect

**Price relative:** A measure of price movements: the ratio of the price level in one period to the price level in another.

**Reference base:** The period in which the CPI is given a value of 100.0. The CPI is currently on a reference base of 2016/17.

**Weight:** The measure of the importance of an item in the index regimen relative to the other items. Weights can be expressed in either quantity or value terms. Value weights are used in the CPI.

# 1.0 HIGHLIGHTS OF UGANDA CPI FOR FEBRUARY 2024

## 1.1 Annual Headline Inflation

The Annual Inflation as measured by the Consumer Price Index for Uganda for the 12 months to February 2024 increased to 3.4 percent compared to 2.8 percent registered in the year ended January 2024 as shown in Table 1 and figure 1 below.

This is largely attributed to the Annual Core inflation that registered 3.4 percent increase in the year ending February 2024 compared to 2.4 percent registered in the year ended January 2024. The main driver to Annual Core Inflation was the Annual Services inflation that increased to 5.4 percent in the year ending February 2024 compared to 3.9 percent registered in the year ended January 2024. The increase in the Annual Services Inflation was due to Annual Education Services inflation that increased to 14.5 percent in the year ending February 2024 compared to 6.1 percent registered in January 2024. Annual Restaurants and Accommodation Services Inflation increased to 6.0 percent in the year ending February 2024 compared to 4.9 percent registered in the year ended January 2024. Annual Transport Services Inflation increased to 1.8 percent in the year ending February 2024 compared to 2.5 percent registered in the year ended January 2024. In addition, Annual Other Goods Inflation increased to 1.8 percent in the year ending February 2024 compared to 1.3 percent recorded in the year ended January 2024. This was due to the increase in the prices of Beef by 9.1 percent in February 2024 compared to 3.0 percent in January 2024, and Maize flour prices by minus 19.2 percent in February 2024 compared to minus 31.1 percent recorded in January 2024.

Annual Energy Fuel and Utilities (EFU) inflation increased to 8.0 percent in the year ending February 2024 compared to 7.4 percent registered in the year ended January 2024. This was due to the increase in the Firewood prices by 15.1 percent in February 2024 compared to 9.4 percent in January 2024, Petrol prices increased by 5.7 percent in February 2024 compared to 4.4 percent in January 2024, and Liquefied gas prices registered minus 0.3 percent in February 2024 compared to minus 6.2 percent recorded in January 2024.

Annual Food Crops and Related Items Inflation increased at a slower rate of 0.5 percent in the year ending February 2024 compared to 2.6 percent registered in the year ended January 2024. This is mainly attributed to the increase in prices of Cooking bananas by 7.1 percent in the year ending February 2024 compared to 1.4 percent registered in January 2024. Bogoya prices increased by 3.2 percent in the year ending February 2024 compared to minus 12.5 percent registered in January 2024. Onions prices increased by 54.0 percent in the year ending February 2024 compared to 49.8 percent registered in January 2024.

### 1.3 Monthly Inflation.

The Monthly Headline Inflation for February 2024 increased by 0.5 percent from the 0.0 percent registered for the month of January 2024 as shown in Table 4 below.

The main driver was the monthly Core inflation that increased by 0.9 percent in February 2024 from the 0.0 percent registered in January 2024. The main driver for the rise in core inflation was monthly services inflation that recorded a rise of 1.8 percent in February 2024 from the 0.4 percent drop recorded in January 2024. Additionally, monthly other goods inflation registered an increase of 0.2 percent in February 2024 from the 0.3 percent rise recorded in January 2024.

Monthly Energy Fuel and Utilities (EFU) inflation recorded a drop of 0.4 percent in February 2024 from the 0.5 percent rise registered in January 2024. The drop in EFU inflation was mainly due to Charcoal prices that registered a decrease of 2.9 percent in February 2024 from the 1.3 percent rise recorded in January 2024. In addition, Liquid energy fuels inflation decreased by 1.1 percent in February 2024 from the 0.5 percent drop recorded in January 2024. Specifically, Petrol prices decreased by 1.6 percent in February 2024 from the 0.7 percent drop recorded in January 2024.

Monthly Food Crops and Related items inflation decreased by 2.4 percent in February 2024 from the 0.2 percent drop recorded in January 2024. This was mainly due to monthly Tubers, plantains and cooking bananas inflation that decreased by 9.0 percent in February 2024 from the 3.7 percent drop recorded in January 2024. Specifically, Cooking banana (Matooke) prices decreased by 13.3 percent in February 2024 from the 4.7 percent rise recorded in January 2024, Whole cassava prices decreased by 14.7 percent in February 2024 from the 6.8 percent rise recorded in January 2024 and Sweet potatoes prices decreased by 3.6 percent in February 2024 from the 6.3 percent rise recorded in January 2024. In addition, monthly Pulses inflation decreased by 2.2 percent in February 2024 from the 0.2 percent drop recorded in January 2024. Specifically, Peas prices decreased by 22.2 percent in February 2024 from the 10.5 percent drop recorded in January 2024, Beans prices decreased by 0.8 percent in February 2024 from the 0.6 percent rise recorded in January 2024.
